To the Participants and the AkzoNobel Retirement Plan Committee of
AkzoNobel Retirement Plan

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of AkzoNobel Retirement Plan (the Plan), which comprise the statements of net assets available for benefits as of December 30, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years ended December 30, 2019 and 2018, and the statement of accumulated plan benefits as of December 30, 2019 and the statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by the Northern Trust Company, the trustee of the Plan (Trustee) except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the Trustee as of December 30, 2019 and 2018, and for the years ended December 30, 2019 and 2018, that the information provided to the plan administrator by the Trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matter

The supplemental schedules of Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year) and Schedule H, Line 4(j) - Schedule of Reportable Transactions as of and for the year ended December 30, 2019 are required by the DOL's Rules and Regulations for Reporting and Disclosure under the ERISA and are presented for the purpose of additional analysis and are not a required part of the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on these supplemental schedules.

Report on Form and Content in Compliance with DOL's Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under the ERISA.

Akzonobel Retirement Plan

Notes to Financial Statements
December 30, 2019 and 2018

1. Description of the Plan

The following description of the AkzoNobel Retirement Plan (the Plan) provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan is a non-contributory, defined benefit pension plan covering eligible employees of AkzoNobel, Inc. (the Company). The Plan is subject to the provisions of the Employee Retirement Income Securities Act of 1974 (ERISA).

The Plan is administered by the AkzoNobel Retirement Plans Committee (Committee). The Committee has overall responsibility for the operation and administration of the Plan. The Committee determines the appropriateness of the Plan's investment offerings, monitors investment performance and reports to the Investment Committee of the Company.

As a result of the Company's decision to separate their specialty chemical's division into a standalone business, effective December 31, 2017, the Committee resolved to separate the assets and liabilities of the AkzoNobel Retirement Plan attributable to (1) employees of the Akzo Nobel Chemicals and its related entities and (2) former employees for whom liabilities are assigned to Akzo Nobel Chemicals and its related entities, as determined by the Akzo Nobel Savings Plan Committee in its sole and absolute discretion, to form the AkzoNobel Chemicals Retirement Plan (the Chemicals Plan).

The Plan's net assets totaling approximately \$126,000,000 as of December 31, 2017 and approximately \$150,000,000 of accumulated plan benefits as of December 31, 2017 were transferred from the Plan to the AkzoNobel Chemicals Retirement Plan in connection with the transaction. All liabilities of the plan related to the employees involved in the separation were assumed by the Chemicals Plan and all benefits formally payable under the Plan will be paid under the Chemicals Plan. Additionally, contributions of \$1,596,000 which were accounted for in contributions receivable at December 30, 2017, prior to the separation of the Chemicals Plan, was contributed into the Chemicals Plan and accounted for as part of the transfer out of the Plan into the Chemicals Plan during 2018.

Plan Freeze

The Plan was closed to all new entrants as of November 30, 2013. Benefit accruals within the Plan freeze in accordance with the applicable supplement and formula. Cash balance participants that have interest credits will continue to increase participant account balances.

Funding Policy

A vested participant who retires at the normal retirement date (the first day of the month following his or her 65th birthday) and has completed five years of service is entitled to normal retirement benefits in the form of a joint and survivor annuity or, if the participant waives the joint and survivor annuity option, a single life annuity, or equal installments over the assumed life expectancy of the participant, or over the assumed joint life expectancy of the participant and his or her beneficiary with a 10-year certain option. The monthly amount of the annuity is either determined by a formula times years of credited service, as defined by the Plan, to a maximum of 40 years, or a cash balance credit. A lump-sum distribution is available for participants whose present value of benefits is \$5,000 or less.

A participant who has attained the age of 55 and has completed at least 10 years of eligible service may elect early retirement. The annual amount of early retirement benefits is determined as described above for normal benefits, but is reduced by 0.5 percent for each month by which the date the retirement income commences preceding age 62.

Akzonobel Retirement Plan

Notes to Financial Statements
December 30, 2019 and 2018

The spouse of a vested participant, upon the death of the vested participant, is entitled to 50 percent of the benefits that would have been payable to the vested participant. For a participant who is not married, upon the death of the vested participant, a retirement benefit may be paid to the beneficiary in the form of monthly installments.

Effective January 1, 1998, the Plan was converted to a cash balance plan, as defined in the Plan document. Employees participating in the cash balance formula may elect commencement of benefits at any age following termination of employment and the completion of three years of service. The cash balance feature offers the option of an annuity or lump sum upon retirement. Pay credits for the cash balance feature will not be credited after December 31, 2006; however, cash balance interest credits will continue to accrue.

The spouse or other beneficiary of a vested participant who has a cash balance account will be paid 100 percent of the value of that account in the form of a lump sum. A spouse may instead elect the value in the form of an annuity.

Active employees who become totally disabled and qualify for Social Security Disability and the AkzoNobel Long-Term Disability Plan continue to accrue benefits under some formulas as if their service and annual compensation remained the same as at the time they become disabled until they reach normal retirement age, the formula freeze date, die or recover, whichever occurs earlier.

Vesting

Participants of the Plan vest in the benefits of the Plan according to the specific vesting schedules by plant location, as noted in the plan document.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires plan management to make estimates and assumptions that affect the reported amounts of net assets available for benefits, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Investment Committee determines the Plan's valuation policies utilizing information provided by the Northern Trust Company (Trustee). See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/ depreciation includes the gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Akzonobel Retirement Plan

Notes to Financial Statements
December 30, 2019 and 2018

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation of fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the services employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries, (2) beneficiaries of the employees who have died, and (3) present employees or their beneficiaries. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances such as retirement, death, disability, and termination of employment are included, to the extent they are attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The computation of the actuarial present value of accumulated plan benefits was made as of December 31, 2018. Had the valuation been performed as of December 30, 2018 there would be no material differences.

Akzonobel Retirement Plan

Notes to Financial Statements
December 30, 2019 and 2018

The significant actuarial assumptions used in the valuation at December 30, 2018 and December 30, 2017, were as follows:

Mortality Rate	December 30, 2018 - The Pri-2012 mortality table with white collar adjustment for male and female employees and annuitants (including separate survivor rates for contingent annuitants), projected generationally from 2012 using Scale MP-2019.													
	December 30, 2017 - RP2014 Mortality Tables with generational mortality improvement projection scale MP-2018, with white collar adjustments and no collar adjustments.													
Assumed retirement age	Actives													
	<table><tr><th>Age</th><th>Retirement Rate</th></tr><tr><td>55-57</td><td>0.07</td></tr><tr><td>58-61</td><td>0.10</td></tr><tr><td>62-64</td><td>0.20</td></tr><tr><td>65-69</td><td>0.35</td></tr><tr><td>70</td><td>1.00</td></tr></table>	Age	Retirement Rate	55-57	0.07	58-61	0.10	62-64	0.20	65-69	0.35	70	1.00	
Age	Retirement Rate													
55-57	0.07													
58-61	0.10													
62-64	0.20													
65-69	0.35													
70	1.00													
	Inactives: Retirement age is assumed to be age 65 or earliest unreduced age for all deferred vested inactives.													
Discount rate	4.2% at December 30, 2018, changed from 3.5% at December 30, 2017													
Cash balance Interest crediting rate	Select and multiple table of rates beginning at 4.150% and grading linearly to 6.50% at December 30, 2018 and select and multiple table of rates beginning at 4.075% and grading linearly to 6.50% at December 30, 2017													

The change in actuarial assumptions consisted of the update in the discount rate, the update to the mortality projection scale and the change in the interest crediting rate.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

3. Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. No participant contributions are permitted. The minimum funding requirements of ERISA were met for 2019 and 2018.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Akzonobel Retirement Plan

Notes to Financial Statements
December 30, 2019 and 2018

4. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.
- (b) Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.
- (c) All other vested benefits (that is, vested benefits not insured by PBGC).
- (d) All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

5. Information Certified by Trustee (Unaudited)

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee has certified that the following information included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments, at fair value, accrued income, due from broker and due to broker and other payables, as shown in the statements of net assets available for benefits as of December 30, 2019 and December 30, 2018.
- Net appreciation, interest and dividends as shown in the statements of changes in net assets available for benefits for the years ended December 30, 2019 and December 30, 2018.
- Schedule H, Line 4(i) - Schedule of Assets (Held at End of Year) as of December 30, 2019.
- Schedule H, Line 4(j) - Schedule of Reportable Transactions for the year ended December 30, 2019.

The Plan's independent accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplementary schedules.

6. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 30, 2019 and December 30, 2018.

Government securities are valued using pricing models maximizing the use of observable inputs for similar securities.

Cash and cash equivalents are valued at the account balance.

Common stock is valued at the closing price reported on the active markets on which the individual securities are traded.

Collective trusts are collective trust funds are valued at the NAV of units of a bank collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the collective trusts, the investment adviser reserved the right to temporarily delay the withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

Qualified investor funds include the Towers Watson Alternative Credit Fund (ACF Fund) and the Towers Watson Diversifying Strategies Fund (DSF Fund), which are sub-funds of the Towers Watson Investment Management Master Trust Ireland (Trust). The Trust has been authorized as a Qualifying Investor Alternative Investment Fund (QIAIF) regulated by the Central Bank of Ireland. The Trust uses a Master Feeder structure with underlying sub-funds. The assets of each sub-fund belong exclusively to such sub-fund. These funds have an alternative investment strategy to seek an attractive risk-adjusted total return on a medium and long term basis through primarily investing in a portfolio of alternative investment funds and or managed accounts. Each sub-funds' net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable shares with the total number of redeemable shares for each respective class. No investor shall be permitted to redeem their share of the funds for a period of one year following the date on which those shares were subscribed.

Limited partnerships are valued at estimated fair value as determined by the general partner based on the NAV of investment units held by the Plan at year end, which is subject to judgment.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the assets and liabilities measured at fair value as of December 30, 2019 and December 30, 2018:

Assets at Fair Value as of December 30, 2019

7. Derivative Instruments

The Plan has limited involvement with derivative financial instruments and does not use them for trading or speculative purposes. As part of an overall portfolio strategy, the Trustee for the Plan uses cash, including cash equivalents and futures contracts to manage exposure to U.S. Treasury securities. Cash equivalents are defined as highly liquid debt instruments maturing within ninety days at the time of purchase. Daily margin settlement for future contract results in maintaining a zero market value for these contracts. Gains and losses attributable to changes in market value are reflected in unrealized and realized gains and losses in the accompanying financial statements. Total net realized and unrealized (losses) attributable to U.S. treasury securities short-term future contracts were \$(195,268) and \$(309,533) for the years ended December 30, 2019 and December 30, 2018, respectively.

As of December 30, 2019 and December 30, 2018, the Plan held derivative securities as follows:

	Fair Value 2019	Fair Value 2018	Notional Value 2019	Notional Value 2018
Derivative Assets	\$ 9,688,357	\$ 10,579,162	\$ 9,688,357	\$ 10,625,084
Derivative Liabilities	(9,688,357)	(10,579,162)	(9,688,357)	(10,625,084)

8. Related-Party and Party In Interest Transactions

The Plan's investments are administered under a contract with Trustee. Contributions are held and managed by Trustee, who invests cash received, interest, and dividend income and makes distributions to participants. These transactions qualify as party in interest transactions which are exempt from the prohibited transactions rules of ERISA.

As described in Note 1, the Plan paid certain expenses related to plan operations and investment activity to various service providers. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

9. Concentrations

The Plan holds certain investments that represent 10 percent or more of the Plan's net assets available for benefits. As of December 30, 2019 and December 30, 2018, the Plan had investments totaling \$138,862,066 and \$144,177,014 that were concentrated in five funds.

10. Income Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated December 5, 2017, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

US GAAP requires management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Notes to Financial Statements
December 30, 2019 and 2018

11. Risk and Uncertainties

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

In addition, the Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

12. Subsequent Events

The Plan has evaluated subsequent events for recognition or disclosure through October 12, 2020, the date the financial statements were available to be issued. There were no subsequent events requiring disclosure.

In March 2020, the World Health Organization declared the outbreak of novel coronavirus disease (COVID-19) as a global pandemic, triggering volatility in financial markets and a significant negative impact on the global economy. As a result of COVID-19, the current fair value of the Plan's investments may be materially different from the amounts presented on the statement of net assets available for benefits as of November 30, 2019. Furthermore, the actuarial present value of accumulated Plan benefits may be materially different from the amounts presented within these notes to the financial statements.

The COVID-19 outbreak continues to spread as of the date of this report. There are many uncertainties related to the COVID-19 global pandemic that could negatively affect the Plan's statements of net assets available for benefits, statements of changes in net assets available for benefits, and the actuarial present value of accumulated Plan benefits. The Plan's individual investments and the discount rate used to determine the actuarial present value of accumulated Plan benefits fluctuate in response to changing market conditions. Therefore, the effect of the COVID-19 pandemic on the Plan's investment values and the actuarial present value of accumulated Plan benefits in subsequent periods, if any, cannot be determined.

Actuarial value of assets

“Smoothing” – Average of market values (adjusted for contributions, benefit/expense payments, and expected investment returns) as of the valuation date and prior two valuation dates. Asset values can be no less than 90% of fair market value and no more than 110% of fair market value, including discounted contributions receivable for the prior plan year (discounted using the effective interest rate for the 2013 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets

Assumptions Rationale – Significant Economic Assumptions

Discount Rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest Crediting rate	The cash balance interest crediting rate (ICR) is based on the 10-year Treasury rate, subject to a minimum (floor) of 4.00% for the AkzoNobel Retirement Plan (RAP Salaried Plan). The long-term assumption for 10-year Treasury rates is 4.75% and has been set by the Company based on a projection of future market rates. The resulting assumption is a select and ultimate table of rates which reflects both current conditions and expected future conditions. We believe that the selected assumption does not significantly conflict with other economic assumptions used.
Lump sum conversion rate	The lump sum interest rates are set equal to the segment rates as required by IRC §430.

Assumptions Rationale – Significant Demographic Assumptions

Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Employee Turnover Termination	Termination rates were updated based on the results of an experience study conducted in 2015, with annual consideration of whether any conditions have changed that would be expected to produce different experience in the future.
Retirement	Retirement rates were updated based on the results of an experience study conducted in 2015, with annual consideration of whether any conditions have changed that would be expected to produce different experience in the future.
Benefit commencement date for deferred benefits:	
■ Preretirement death benefit	For preretirement pension death benefits, surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer.

SCHEDULE SB ATTACHMENTS

- **Deferred vested benefit** Deferred vested pension participants are assumed to begin benefits at the earliest unreduced age because it is expected that many participants will retire and begin benefits when unreduced benefits are first available.

Form of Payment The assumed form of payment elections for active and terminated vested participants were updated based on the results of an experience study conducted in 2015, with annual consideration of whether any conditions have changed that would be expected to produce different experience in the future.

Source of Prescribed Methods

Funding methods The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods Since Last Year

The funding interest rate basis was updated to the 24-month average segment rates for August 2018 based on yields through July 2018.

The lump sum conversion mortality table was updated to the 417(e) Applicable Mortality Table for 2018.

The segment rates used to determine minimum funding requirements and benefit restrictions were updated as required, including application of the HATFA corridors in effect for 2017 plan year valuations. Additionally, the segment rates used to convert benefits into lump sum payments were updated to be consistent with the segment rates used to determine minimum funding requirements.

The required mortality table used to calculate the funding target and target normal cost was updated to including one additional year of projected mortality improvements, pursuant to the requirements of the Pension Protection Act of 2006. AkzoNobel elected to defer application of the new IRS mortality tables until 2019.

The mortality tables used for annuity and lump sum conversion was updated to include one additional year of improvements and align with recent statutory table changes.

The assumed plan-related expenses added to the target normal cost were changed from \$2,900,000 for the 2017 plan year to \$2,600,000 for the 2018 plan year to better reflect anticipated experience.

Sources of Valuation Data

The primary source of participant data for the current valuation is a census of all participants supplied by Akzo Nobel Inc. through Willis Towers Watson eepoint. The data was provided as of December 31, 2018.

Missing or Incomplete Data

We made the following assumptions for missing or incomplete data. For missing dates (hire, birth, retirement), we used the average data for all similar participants in that plan. For missing benefits for deferred inactives or participants currently receiving benefits, we used the benefit from the prior year's data if available; otherwise, we estimated the benefit according to the plan provisions. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assets

The asset data supplied by the Trustee was used by Willis Towers Watson without further audit. Akzo Nobel Inc. provided the dates and amounts of the prior plan year contributions that were paid in 2019. All of this information has been relied upon by Willis Towers Watson. We are not aware of any errors or omissions in the asset data that would have a significant effect on the results of our calculations.

Schedule SB, Line 22 Description of Weighted Average Retirement Age as of December 31, 2018

For each active participant, an expected retirement age was calculated weighted in proportion to the probability (as shown in the retirement rates tables in the attachments to Schedule SB, Part V – Statement of Actuarial Assumptions/Methods) that the individual would remain an active participant to each age and then retire at that age. The plan's weighted average retirement age of 62 is the arithmetic average of the expected retirement ages of all participants on December 31, 2018.

Schedule SB, Part V Summary of Plan Provisions

Summary of principal plan provisions

Plan Provisions – AkzoNobel Retirement Plan

The AkzoNobel Retirement Plan is a merger of previously separate plans. Effective December 31, 2010, assets and liabilities for participants of the AkzoNobel Master Hourly Retirement Plan and the AkzoNobel Consolidated Pension Plan for Employees of ICI were merged into the AkzoNobel Retirement Account Plan. The plan was renamed the AkzoNobel Retirement Plan effective December 31, 2010. The following summarizes the plan provisions applicable to the primary groups that participate in the plan.

Plan Provisions – AkzoNobel Retirement Account Plan

Plan name	Salaried Plan — Retirement Account Plan (RAP)	Effective date	12/31/1975
Plan number	001	Restated effective date	12/31/1997
Type of plan	Final Average Pay (former ANRP formula) Cash Balance		
Plan configuration	Merger of many previously separate plans. Some common provisions, with individual company variations for service dates, benefit formulas, minimums and offsets. Closed/Sold and HRAP were merged in effective December 30, 2008.		
Eligibility to participate	Salaried and certain hourly employees on later of date of hire or age 21. Effective January 1, 1998, participants between the ages of 40 and 55 had the option to remain under the ANRP formula or to choose the cash balance. Participants beyond age 55 or who had 30 years of service remained under the ANRP formula and participants under age 40 fall under the cash balance provisions. All new participants after January 1, 1998 will be under the cash balance provisions. Employees hired on or after October 1, 2006 are not eligible.		
Benefit service	Former ANRP: All continuous service (see comments)

Plan Provisions – AkzoNobel Consolidated Pension Plan for Employees of ICI

The AkzoNobel Consolidated Pension Plan for Employees of ICI is a merger of previously separate plans. Effective April 1, 2008, assets and liabilities for certain participants of the National Starch and Chemical Company Consolidated Pension Plan were merged into the ICI Paints Salaried Pension Plan. The plan was renamed the AkzoNobel Consolidated Pension Plan for Employees of ICI effective December 31, 2009. Below is a summary of the plan provisions applicable to the main groups that participate in the plan. The plan provisions are summarized as follows:

Paints Salaried

Paints Hourly – Reading Painters

National Starch & Chemicals Salaried

National Starch & Chemicals Nonunion

In addition, Legacy Groups of inactive participants and beneficiaries with annuity benefits participate in the Plan. These legacy groups no longer accrue benefits under the Plan; therefore only eligibility and retirement reduction plan provisions for these groups have been summarized. Legacy Groups consist of participants from the following prior plans:
