Notes to Financial Statements

December 31, 2019 and 2018

1. Description of the Plans

General

The following description of the Verizon Management Pension Plan (the “VMPP”) and the Verizon Pension Plan for Associates (the “VPPA”) (collectively, the “Plans”) provides only general information on the Plans’ provisions. Participants should refer to their respective Summary Plan Description and Plan Document for a complete description of the Plans’ provisions.

The Plans are sponsored by Verizon Communications Inc. (“Verizon”) or one of its subsidiary companies (the “Companies” or “Plan Sponsors”) and provide pension benefits as set forth in the respective Plan Documents. The Verizon Employee Benefits Committee (“VEBC”) is the Administrator of the Plans.

The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”).

Pension Benefits

The Plans are trustee, noncontributory, defined benefit plans, which cover many of the employees and former employees of the sponsoring Companies. Pension benefits are based on compensation and service or on service only, as defined by the applicable Plan Document.

Generally, the Plans provide vesting for participants with five years of eligible vesting service or upon attainment of normal retirement age. Service with a prior Company or one of its affiliates, as defined by the Plans, is counted for vesting purposes. Prior benefits under merged Plans may have vested under a different schedule. Eligible employees, as defined in the respective Plan Document, typically have the opportunity to elect a lump sum, a life annuity, a joint and survivor annuity, or a certain and life annuity option as a form of retirement benefit payment, subject to the terms of each such plan.

The former Verizon Wireless Retirement Plan (the “Wireless Plan”), was merged into the VMPP, effective December 31, 2017. The merger preserved the separate benefit provisions of each plan and did not result in any benefit provisions of the Wireless Plan to become applicable to participants in the VMPP, and vice versa.

The Plans are now closed such that new employees hired on or after the applicable close date are not eligible to participate and earn pension benefits under the Plans. A number of plans or component plans are fully frozen with no pay or service accruals (VMPP (except for certain West Associates) and Enterprises Management in VPPA).

Additionally, the majority of the West Associates had their average annual compensation frozen according to the dates specified in the applicable Plan Documents.

2019 Plan Amendments

Effective August 1, 2019, the MCI component of the VMPP was amended to provide lump sum distributions options to certain eligible participants and beneficiaries not otherwise eligible to receive a lump sum.

2018 Plan Amendments

Effective December 31, 2018, the Verizon Pension Plan for Mid-Atlantic and South Associates (the "Mid-Atlantic Plan") and the GTE Florida Incorporated Plan for Hourly-Paid Employees' Pensions (the "Florida Plan") were merged into the VPPA. The merger preserved the separate benefit provisions of each plan and did not result in any benefit provisions of the Mid-Atlantic Plan and the Florida Plan to become applicable to participants in the VPPA, and vice versa.

The Wireless Plan (a component of the VMPP) was amended to provide lump sum distribution options to certain eligible participants and beneficiaries not otherwise eligible to receive a lump sum, and with benefit commencement dates on or after September 1, 2018.

The VMPP was amended to provide for a limited interest rate protection during a limited period of time for calculating lump sum pensions for certain eligible participants under the 2018 Voluntary Separation Program.

Components of the VPPA and Mid-Atlantic Plan were amended to reflect the collective bargaining agreements reached in 2018.

Funding Policy

The Plans' funding policy is for the Companies to contribute an amount which will meet the minimum funding requirement. The Plans have met the ERISA minimum funding requirements for the years ended December 31, 2019 and 2018. In accordance with the Pension Protection Act of 2006, all plans are required to use the Unit Credit Cost Method to determine the minimum contributions to the ongoing plan. Additionally, the Company can make an annual contribution to the medical-benefit component (the "401(h) accounts") of the VMPP and VPPA based upon the maximum deductibility under Section 401(h) of the Internal Revenue Code ("IRC") (see Note 11).

Information Certified by the Trustee

The assets of the Plans are included in the Bell Atlantic Master Trust (the "Master Trust") maintained by the Bank of New York Mellon ("BNY Mellon" or the "Trustee"). With the exception of the fair value hierarchy table in Note 5, all investment information disclosed in the financial statements and footnotes, including investments held as of December 31, 2019 and 2018 and the Plans' allocated share of the Master Trust investment activities for the years ended December 31, 2019 and 2018, was obtained or derived from information supplied to the Plans' Administrator and certified as complete and accurate by BNY Mellon.

2. Summary of Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting and in conformity with generally accepted accounting principles in the United States ("U.S. GAAP"). Certain prior year amounts have been disclosed to conform to the current year's presentation.

Use of Estimates

U.S. GAAP requires the Plans' Administrator to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Administrative Expenses

Certain administrative fees are charged directly to the Plans as incurred or allocated to the Plans based on their pro rata share of Master Trust assets. Certain administrative expenses related to the Master Trust are allocated to the Plans and reflected in the Master Trust investment activities.

Benefit Payments

Benefit payments to participants are recorded upon distribution.

Plan Transfers

The Plan Sponsors are permitted to transfer benefit obligations, subject to the provisions of ERISA, for certain participants who transfer employment between certain Companies that sponsor different pension plans. The Statements of Net Assets Available for Benefits of the Plans as of December 31, 2019 and 2018 include net assets that were transferred in and out of the plans due to participant transfers during previous plan years. The impact of participant transfers during previous plan years are included in the Statements of Changes in Net Assets Available for Benefits, as applicable, for the years ended December 31, 2019 and 2018. The actual amount transferred is adjusted with trust earnings to the date of transfer.

Recently Adopted Accounting Standard

In February 2017, the Financial Accounting Standards Board issued the Accounting Standards Update ("ASU") No. 2017-06, "Employee Benefit Plan Master Trust Reporting." This ASU requires an employee benefit plan to disclose the plan's percentage interest in a master trust and a list of the investments held by the master trust, presented by general type, within the plan's financial statements. This ASU also removes the requirement to disclose the plan's overall percentage interest in a master trust for plans with divided interests and requires that all plans disclose the dollar amount of their interest in each general type of investment. The ASU requires the disclosure of the master trust's other asset and liability balances and the dollar amount of the plan's interest in each of those balances. The amendments in this ASU are effective for fiscal years beginning after December 15, 2018. The Plan Sponsors adopted this accounting standard update in 2019 on a retrospective basis to conform to the presentation and disclosure requirements.

Recently Issued Accounting Standard

In August 2018, the Financial Accounting Standards Board issued the ASU No. 2018-13, "Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement". This ASU removes the requirements to disclose the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy, the policy for timing of level transfers, and the valuation processes for Level 3 fair value measurements. This ASU requires entities that calculate net asset value ("NAV") to disclose the timing of liquidation of an investee's assets and the date when redemption restrictions might lapse, only if the timing was communicated to the entity or publicly announced, and disclose information on measurement uncertainty as of the reporting date. In addition, this ASU will require entities to present the changes in unrealized gains and losses for recurring Level 3 fair value measurements, as well as the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, based on materiality. The amendments in this ASU are effective for fiscal years beginning after December 15, 2019. All amendments, with the exception of the disclosures on changes in unrealized gains and losses, Level 3 unobservable inputs and measurement uncertainty information, will be applied retrospectively. Early adoption is permitted. The Plan Sponsors are currently evaluating the impact that this ASU will have on the presentation of the Plans' fair value measurement disclosures.

Investment Valuation and Income Recognition

Investments in the Master Trust are reported at fair value (see Note 5). The Statement of Changes in Net Assets Available for Benefits reflects the net investment gain from the Plans' allocated share of Master Trust investment activities which consists of the realized gains or losses and the unrealized appreciation/(depreciation) in fair value, as well as interest and dividends earned. Purchases and sales of investments are reflected as of the trade date. Realized gains and losses on sales of investments are determined on the basis of average cost. Dividend income is recorded on the ex-dividend date. Interest earned on investments is recorded on the accrual basis. Net appreciation/(depreciation) includes gains and losses on investments bought and sold, as well as held during the year.

Fair Value Measurements

Fair value of financial and non-financial assets and liabilities is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and liabilities, is as follows:

Level 1 - Quoted prices in active markets for identical assets or liabilities

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 - Unobservable pricing inputs in the market for assets and liabilities

Financial assets and financial liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. The Plan Sponsors' assessment of the significance of a particular input to the fair value measurements requires judgment, and may affect the valuation of the assets and liabilities being measured and their categorization within the fair value hierarchy. Valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs.

Subsequent Events

Management has evaluated subsequent events through October 13, 2020, the date the financial statements were available to be issued.

In January 2020, the World Health Organization ("WHO") announced a global health emergency due to a new strain of coronavirus ("COVID-19") originating in Wuhan, China and the risk to the international community as the virus spread beyond its point of origin. In March 2020, the WHO classified COVID-19 as a pandemic, due to its rapid spread and severity.

The full impact of COVID-19 continues to evolve as of the date of this report. The pandemic has adversely affected economic activity and greatly contributed to significant deterioration and instability in the financial markets. As a result, the Plans' investment portfolios have experienced significant fluctuations in fair value since December 31, 2019. Because the values of the Plans' individual investments have and will fluctuate in response to changing market conditions, the amount of losses that may be recognized, if any, in a subsequent period is not determinable at this time.

3. Plan Termination

Except as limited by plan terms, the Plans may be terminated at any time by action of the Board of Directors of the sponsoring Companies. All hourly and union plans are subject to collective bargaining obligations. The Company has no plans to terminate any of the Plans. In the event the Plans terminate, the net assets of the Plans will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (A) Payment of benefits which were being paid to retired employees or beneficiaries on the date three years prior to the date of termination, and for employees or beneficiaries who would have been receiving benefits three years prior to the date of termination if the employee had retired prior to such earlier date and if the employee's pension had commenced as of the beginning of such three-year period;
- (B) Vested portion of the benefits, which is guaranteed by the Pension Benefit Guaranty Corporation ("PBGC");
- (C) Benefits to the extent that they are non-forfeitable; and
- (D) Benefits accrued as of the date of termination.

To the extent that net assets available for benefits exceed the amounts described above, such excess will be allocated as set forth in the applicable Plan Document.

Certain benefits under the Plans are insured by the PBGC if the Plans terminate. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pension; however, the PBGC does not guarantee all types of benefits under the Plans, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plans are guaranteed at the level in effect on the date of the Plans' termination, subject to statutory limitations.

4. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic and lump sum payments that are attributable under the Plans' provisions to the service employees have rendered to date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated vested employees, (b) beneficiaries of employees who have died, and (c) present employees. The Plans' actuary determines the actuarial present value of accumulated plan benefits by applying actuarial assumptions to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuations as of January 1, 2019 and 2018, for the actuarial present value of accumulated plan benefits are as follows:

- (A) The 2019 present value was determined using the December 31, 2018 Aon AA Above Median yield curve and the expected payouts for each plan. The level equivalent yield varied by plan with the range between 4.20% and 4.43%. The expected return on assets is 6.75%.
- (B) The 2018 present value was determined using the December 31, 2017 Aon AA Above Median yield curve and the expected payouts for each plan. The level equivalent yield varied by plan with the range between 3.50% and 3.79%. The expected return on assets is 7.00%.
- (C) The assumed retirement age is based on normal rates of retirement, which are based on past experience and expectations of future retirements.
- (D) The mortality tables used for the January 1, 2019 present values are as follows:
 - Healthy lives - The RP-2006 Fully Generational Mortality Table projected using MP-2019 improvement scale. Associates use the blue collar version of the RP-2006 table and managers use the aggregate base table.
 - Disabled lives - The RP-2006 Disabled Retiree Mortality Table projected using MP-2019 improvement scale except for the Wireless Plan that uses the same table as for healthy lives.
- (E) The mortality tables used for the January 1, 2018 present values are as follows:
 - Healthy lives - The RP-2006 Fully Generational Mortality Table projected using MP-2018 improvement scale. Associates use the blue collar version of the RP-2006 table and managers use the aggregate base table.
 - Disabled lives - The RP-2006 Disabled Retiree Mortality Table projected using MP-2018 improvement scale except for the Wireless Plan that uses the same table as for healthy lives.

The actuarial present value of accumulated plan benefit information as of January 1, 2019 and 2018 are presented in the following tables (in thousands):

**Actuarial Present Value of Accumulated Plan Benefits

(2) The VMPP amounts in the table above reflects the merger with the Wireless Plan as of December 31, 2017.

Changes in the actuarial present value of accumulated plan benefits are as follows for the year ended January 1, 2019 (in thousands):

**Changes in Actuarial Present Value of Accumulated Plan Benefits
For the year ended January 1, 2019**

Plan	Balance January 1, 2018	Interest Accumulation	Benefit Payments	Plan Amendments	Actuarial Assumptions	Other Changes	Balance January 1, 2019

(3) The VPPA amounts in the table above reflect the merger of the Mid-Atlantic and Florida Plan into VPPA as of December 31, 2018.

These actuarial assumptions are based on the presumption that the Plans will continue. Were the Plans to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. Investments in Master Trust

Master Trust

The Master Trust holds both defined benefit and defined contribution assets. Assets in the Master Trust are either pooled between defined benefit plans and defined contribution plans, or specific to defined benefit plans, or specific to the defined contribution plans.

As of December 31, 2019 and 2018, the total fair value of the Master Trust investments was approximately \$19.7 billion and \$18.0 billion, respectively, including approximately \$145.4 million and \$153.9 million, respectively, of investments specific to the defined contribution plans, for which separate financial statements are prepared.

On a monthly basis, investments, investment income and expenses are allocated to the Plans in accordance with their proportionate interest in the defined benefit portion of the Master Trust.

The Plans' interests in the investments held in the Master Trust are reported in "Plan interest in Bell Atlantic Master Trust" in the Statements of Net Assets Available for Benefits. The related investment gains are reported in "Allocated share of Master Trust investment activities" in the Statement of Changes in Net Assets Available for Benefits.

The accounting records of the Master Trusts are maintained in U.S. dollars. Foreign currency denominated assets and liabilities are translated into U.S. dollars at the prevailing rates of exchange at the end of each accounting period, with the impact of fluctuations in foreign exchange rates reflected as an unrealized gain or loss in the fair value of the investments.

Cash receipts and payments derived from investment trades involving foreign currency denominated investments are translated into U.S. dollars at the prevailing exchange rate on the respective transaction date. Net realized gains and losses on foreign currency transactions result from the disposition of foreign currency denominated investments as a result of fluctuations in foreign exchange rates between the trade and settlement dates and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received.

The foreign exchange effect on foreign currency denominated investments is not segregated from the impact of changes in market prices in the Statement of Changes in Net Assets Available for Benefits.

The overall investment strategy is to achieve a mix of assets that allows us to meet projected benefit payments while taking into consideration risk and return. While target allocation percentages will vary over time, the current target allocation for plan assets is designed so that 48.0% - 68.0% of the assets have the objective of achieving a return in excess of the growth in liabilities (comprised of public equities, private equities, real estate, hedge funds, and emerging debt) and 35.0% - 55.0% of the assets are invested as liability hedging assets (where cash flows from investments better match projected benefit payments, typically longer duration fixed income) and 15.0% maximum is in cash. This allocation will shift as funded status improves to a higher allocation of liability hedging assets. Target policies will be revisited periodically to ensure they are in line with fund objectives.

Valuation of Investments

Cash and cash equivalents include short-term investment funds (less than 90 days to maturity), primarily in diversified portfolios of investment grade money market instruments and are valued using quoted market prices or other valuation methods. The carrying value of cash equivalents approximates fair value due to the short-term nature of these investments.

Investments in securities traded on national and foreign securities exchanges are valued by the custodian at the last reported sale prices on the last business day of the year or, if no sales were reported on that date, at the last reported bid prices. Government obligations, corporate bonds, international bonds and asset-backed securities are valued using matrix prices with input from independent third-party valuation sources. Over-the-counter securities are valued at the bid and ask prices or the average of the bid and ask prices on the last business day of the year from published sources or, if not available, from other sources considered reliable such as multiple broker quotes.

Commingled funds not traded on national exchanges are valued by the custodian or fund administrator at their NAV. Commingled funds held by third-party custodians appointed by the fund managers provide the fund managers with a NAV. The fund managers have the responsibility for providing this information to the custodian of the respective plan. Hedge fund investments include those investments seeking to maximize absolute returns using a broad range of strategies to enhance returns and provide additional diversification. Hedge funds are valued by the custodian at NAV based on statements received from the investment manager. These funds are valued in accordance with the terms of their corresponding offering or private placement memoranda.

Commingled funds, hedge funds, venture capital, corporate finance, natural resource and real estate limited partnership investments for which fair value is measured using the NAV per share as a practical expedient are not leveled within the fair value hierarchy and are included as a component of the total investments in the Master Trust.

The investment manager of the entity values venture capital, corporate finance, and natural resource limited partnership investments. Real estate investments are valued at amounts based upon appraisal reports prepared by either independent real estate appraisers or the investment manager using discounted cash flows or market comparable data. Loans secured by mortgages are carried at the lesser of the unpaid balance or appraised value of the underlying properties. The values assigned to these investments are based upon available and current market information and do not necessarily represent amounts which might ultimately be realized. Because of the inherent uncertainty of valuation, estimated fair values might differ significantly from the values that would have been used had a ready market for the securities existed. These differences could be material.

Forward currency contracts, futures, and options are valued by the custodian at the exchange rates and market prices prevailing on the last business day of the year. Both exchange rates and market prices are readily available from published sources. These securities are classified by the asset class of the underlying holdings.

Assets are monitored to assess the appropriate levels assigned within the fair value hierarchy. Changes in economic conditions, such as bankruptcy, default or delisting, may require the transfer of an asset from one fair value level to another. When such transfer occurs, it is recognized as of the end of the reporting period. Transfers for fixed income securities, real estate, private equity investments and hedge funds, which are included in the above table for year 2019, were the result of identifying observable prices for the underlying holdings. Transfers into Level 3 primarily reflect the absence of observable prices for hedge funds.

The defined benefit portion of the Master Trust's interest and dividend income for the year ended December 31, 2019 was approximately \$313.4 million and \$76.1 million, respectively. The net appreciation of the Master Trust investments was \$2.9 billion for the year ended December 31, 2019.

6. Derivatives

In the normal course of operations, the Master Trust's assets may include derivative financial instruments. Derivatives are synthetic instruments used to get various market exposures with limited margin requirements and therefore with leverage risk involved. The intent is to use derivative financial instruments to gain market exposure or as economic hedges to manage various risks such as market volatility risk, foreign currency exchange rate risk, interest rate risk or credit risk associated with the Master Trust's investment assets or to express investment managers' views of future market movements efficiently.

As of December 31, 2019 and 2018, the Master Trust utilized futures, options, foreign currency forwards, interest rate and credit derivatives to manage risks such as price risk, foreign currency exchange rate risk, interest rate sensitivity and credit risk. As of December 31, 2019 and 2018, the fair value of the derivative instruments, and the related gains/losses, were not significant.

7. Securities Lending

The Master Trust maintained a Securities Lending Agreement (the "Agreement") with the Trustee. The Agreement, updated as of November 19, 2018, includes domestic and international securities. The securities on loan may be sold at the manager's discretion, in which case the Trustee will reallocate or recall positions in order to satisfy sale delivery. Securities on loan may not be re-pledged by the Master Trust.

Securities on loan were approximately \$1.1 billion as of December 31, 2019 and 2018. The collateral held by the Trustee represents approximately 102.4% and 102.3% of the market value of securities on loans as of December 31, 2019 and 2018, respectively.

The Master Trust's exposure to credit loss related to the borrowing counterparty is reduced by the collateral securing the transaction and the Agreement which provides full indemnity against broker default by the Trustee. In addition, the Agreement requires collateral from the borrowing brokers of an amount equal to 102% and 105% of the fair value of the securities loaned for loans of U.S. securities and non-U.S. securities, respectively. The collateral primarily consists of cash, which was reinvested in a separately managed cash collateral account.

The Master Trust's net earnings derived from the Agreement were approximately \$3.8 million and \$4.3 million for the years ended December 31, 2019 and 2018, respectively.

8. Income Tax Status

The Plans have received determination letters from the Internal Revenue Service ("IRS") stating that the form or terms of the Plans are qualified under Section 401(a) of the IRC and therefore the related trust is exempt from taxation. The VPPA and the VMPP received favorable determination letters on February 29, 2016 and December 15, 2015, respectively. Once qualified, the Plans are required to operate in conformity with the IRC to maintain their qualification. The Plans' administrator believes the Plans are being operated in compliance with the applicable requirements of the IRC, and therefore, believes the Plans are qualified and the related trust is tax-exempt.

U.S. GAAP require plan management to evaluate uncertain tax positions taken by the Plans. The financial statement effects of a position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plans' administrator has analyzed tax positions taken

by the Plans, and has concluded that as of December 31, 2019, there are no uncertain positions taken or expected to be taken. The Plans have recognized no interest or penalties related to uncertain tax positions. The Plans are subject to routine audits by taxing jurisdictions; however, there are no audits for any tax periods in progress. The Plans' administrator believes the Plans are no longer subject to income tax examinations for years prior to 2016.

9. Related-Party Transactions

Verizon Investment Management Corp. ("VIMCO"), an indirect, wholly-owned subsidiary of Verizon qualifies as a related party. VIMCO is the investment advisor for certain investment funds and received no compensation from the Plans other than reimbursement of certain expenses directly attributable to its investment advisory and investment management services rendered to the Plans.

The Companies are the sponsor of the Master Trust and the Plans whose assets are held in the Master Trust. The Companies employ the Administrator of the various Plans and members of the Administrator's staff. The Companies received no compensation from the Plans other than reimbursement of certain expenses directly attributable to administrative services rendered to the Plans.

BNY Mellon, as Trustee of the Master Trust, rendered various trustee services to the Master Trust for which it was compensated in accordance with its agreements with the Companies and VIMCO.

VIMCO, the Companies and BNY Mellon are all parties-in-interest (as defined by ERISA) to the Master Trust and the Plans whose assets are held in the Master Trust. All of the related-party transactions described in this section are exempt from the prohibited transaction rules pursuant to statutory or administrative exemptions.

10. Commitments and Contingencies

The Master Trust has outstanding investment commitments to a number of private equity and private real estate investment vehicles. In total, the Master Trust has pledged private equity capital commitments of \$682.3 million and real asset commitments of \$538.2 million as of December 31, 2019. Historically, pledged commitments are drawn down over the term of the investment (generally 10 years), although they may be called more quickly at the investment manager's discretion and in accordance with the terms of the governing documents. Other investments held by the Master Trust are generally liquidated to meet these capital commitments.

In the ordinary course of business the Plans may be involved in various legal proceedings. Where it is determined, in consultation with counsel based on litigation and settlement risks, that a loss is probable and estimable in a given matter, the Companies establish an accrual. In none of the currently pending matters is the amount of accrual material. An estimate of the reasonably possible loss or range of loss in excess of the amounts already accrued cannot be made at this time due to various factors typical in contested proceedings, including (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the generally unpredictable nature of the litigation. The Plans' Administrator does not expect that the ultimate resolution of any pending legal matter in future periods will have a material effect on the Plans' financial condition, but it could have a material effect on its results of operations for a given reporting period.

11. 401(h) Accounts

The Plans include medical-benefit components in addition to normal retirement benefits to fund a portion of the postretirement obligations for retirees and their beneficiaries in accordance with Section 401(h) of the IRC.

On May 21, 2018, the Company funded the 401(h) accounts established under the VMPP and VPPA with \$81.7 million and \$597.3 million, respectively. Employer contributions to the 401(h) accounts are determined annually and are at the discretion of the Plan Sponsors. Plan participants do not contribute to the 401(h) accounts. The 401(h) accounts are held in the Master Trust, which includes certain restricted assets that fund a portion of postretirement health benefits for retirees and their beneficiaries. In accordance with Section 401(h) of the IRC, the investments in the 401(h) accounts may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries.

The related obligations for health benefits are not included in the Plans' obligations in the statement of accumulated plan benefits but are reflected as obligations in the financial statements of the health and welfare benefit plans.

Refer to Note 2 for description of the valuation methodologies used.

13. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that those changes could materially affect the amounts disclosed in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Schedule SB, line 7—Explanation of Discrepancy in Prior Year Funding Standard
Carryover Balance or Prefunding Balance

The Prefunding Balance in line 7(b) does not match line 13(b) from the prior year, because line 7(b) includes the \$1,315,288,551 Prefunding Balance of the former Verizon Pension Plan for Mid-Atlantic and South Associates (EIN: 23-2259884, PN: 018) and \$23,433,186 Prefunding Balance of the former GTE Florida Incorporated Plan for Hourly-Paid Employees' Pensions (EIN: 23-2259884, PN: 017), which merged into this plan on December 31, 2018.

The electronically filed Schedule SB includes line 7(b) and line 10(b) entries that have been adjusted to arrive at the correct line 13(b) entry. This was done because the filing software does not allow an override to the line 10 calculation. Due to the plan merger, there are three different interest rates to roll forward the Carryover Balance and the Prefunding Balance. The signed Schedule SB and the exhibit in the attachments have the correct numbers.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at mid-year, except for the 100% retirement age. The retirement ages are weighted in proportion to active participant counts to determine the final weighted average retirement age of 58.

Schedule SB, line 23—Information on Use of Substitute Mortality Tables

The funding target and funding target normal cost are based on substitute mortality tables.

The substitute tables are used for all plan populations, and reflect combined experience for non-annuitants and annuitants.

The tables were constructed based on full credibility and were developed using a 1.069711 mortality ratio for males, and a 1.109814 mortality ratio for females.

IRS approval of the substitute mortality table applies for 10 plan years, starting with the 2019 plan year and ending with the 2028 plan year.

Schedule SB, line 24—Change in Actuarial Assumptions

The January 1, 2019 funding valuation reflects the following assumption changes:

- The mortality rates for purposes other than determining lump sum values have been updated to use substitute tables based on Verizon's own experience, as approved by the IRS.
- The 10-year Treasury lump sum interest rate for West Associates lump sums has been updated to be 25 basis points below the 30-year Treasury rate assumption.
- The cash balance assumed interest crediting rate has been increased from 3.00% to 3.75%.
- The expected return on assets has been changed from 7.00% to 6.75%.

These changes were made to better reflect anticipated plan experience. The assumption changes did not reduce the funding shortfall; as such, approval of the Commissioner is not required.

Schedule SB, line 7—Explanation of Discrepancy in Prior Year Funding Standard
Carryover Balance or Prefunding Balance

The Prefunding Balance in line 7(b) does not match line 13(b) from the prior year, because line 7(b) includes the \$1,315,288,551 Prefunding Balance of the former Verizon Pension Plan for Mid-Atlantic and South Associates (EIN: 23-2259884, PN: 018) and \$23,433,186 Prefunding Balance of the former GTE Florida Incorporated Plan for Hourly-Paid Employees' Pensions (EIN: 23-2259884, PN: 017), which merged into this plan on December 31, 2018.

The table below shows the key details of the funding balance calculations as of January 1, 2019:

The electronically filed Schedule SB includes line 7(b) and line 10(b) entries that have been adjusted to arrive at the correct line 13(b) entry. This was done because the filing software does not allow an override to the line 10 calculation. Due to the plan merger, there are three different interest rates to roll forward the Carryover Balance and the Prefunding Balance. The signed Schedule SB and the exhibit in the attachments have the correct numbers.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at mid-year, except for the 100% retirement age. The retirement ages are weighted in proportion to active participant counts to determine the final weighted average retirement age of 58.

Schedule SB, line 23—Information on Use of Substitute Mortality Tables

The funding target and funding target normal cost are based on substitute mortality tables.

The substitute tables are used for all plan populations, and reflect combined experience for non-annuitants and annuitants.

The tables were constructed based on full credibility and were developed using a 1.069711 mortality ratio for males, and a 1.109814 mortality ratio for females.

IRS approval of the substitute mortality table applies for 10 plan years, starting with the 2019 plan year and ending with the 2028 plan year.

Schedule SB, line 24—Change in Actuarial Assumptions

The January 1, 2019 funding valuation reflects the following assumption changes:

- The mortality rates for purposes other than determining lump sum values have been updated to use substitute tables based on Verizon's own experience, as approved by the IRS.
- The 10-year Treasury lump sum interest rate for West Associates lump sums has been updated to be 25 basis points below the 30-year Treasury rate assumption.
- The cash balance assumed interest crediting rate has been increased from 3.00% to 3.75%.
- The expected return on assets has been changed from 7.00% to 6.75%.

These changes were made to better reflect anticipated plan experience. The assumption changes did not reduce the funding shortfall; as such, approval of the Commissioner is not required.

Cash Balance Interest Crediting Rate	3.75%
Cash Balance Annuity Conversion Rate	Same as funding rates
Benefit and Compensation Limits	Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$225,000 and the section 401(a)(17) compensation limit of \$280,000
Trust Expenses Included in Target Normal Cost	\$35,620,000. The average of the three prior years' actual trust expenses reduced by investment related expenses and the prior year's PBGC premium. This average is then increased by the current year's expected PBGC premium and rounded to the nearest ten thousand.

Female beneficiaries are assumed to be three years younger than the participant and male beneficiaries are assumed to be three years older than the participant.

Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, expected earnings, and asset transfers. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
