Note 1: Description of the Plan

The following description of the Duke Energy legacy Pension Plan (the Plan), is provided for general information purposes only. Participants should refer to the Summary Plan Description and Plan document for more complete information.

General

The Plan is a noncontributory defined benefit pension plan covering certain former employees of Duke Energy Corporation (Duke Energy) and participating affiliates (collectively referred to as the Employing Company). The plan is frozen to future benefit accruals and closed to new entrants. The investment of the assets held in the Duke Energy Corporation Master Retirement Trust (Master Trust) is administered by the Duke Energy Investment Committee and each of the component plans under the Plan is administered by the Duke Energy Benefits Committee. The Board of Directors of the Company, or its delegate, appoints the Chair of the Duke Energy Investment Committee, who, then in turn, appoints the other members of the Investment Committee. The Board of Directors of the Company, or its delegate, appoints the Chair of the Duke Energy Benefits Committee, who, then in turn, appoints the other members of the Benefits Committee. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Plan Transfer

Effective as of January 1, 2018, Duke Energy reorganized its pension liabilities through the following plan spin-off and merger transactions that occurred in the order listed: (i) certain inactive participants were spun-off from the Duke Energy Retirement cash Balance Plan ("RCBP") to create the Plan; (ii) certain inactive participants were transferred from the Cinergy Corp. Union Employees' Retirement Income Plan ("RIP") to the Plan; (iii) the RIP was merged into the RCBP; and (iv) the Retirement Plan of Piedmont Natural Gas Company, Inc. (the "Piedmont Plan") was merged into the RCBP.

Pension Benefits

The plan is frozen to future benefit accruals and closed to new entrants. Participants have previously earned a benefit under a cash balance benefit accrual formula or a traditional formula benefit. Under the Plan's cash balance benefit accrual formula, records are maintained on a notional account basis. The participant's account receives monthly interest credits, generally based upon a monthly rate of 0.327% on the account balance.

401 (h) Account

The Plan permits, under Section 401(h) of the Internal Revenue Code (IRC) the funding of postretirement medical benefits in a separate trust account. No contributions were made by the Employing Company to the Plan 401(h) account in 2019. Participants do not contribute to the 401(h) account. Effective as of January 1, 2018, payment of benefits from the 401(h) account is limited to medical expenses reimbursable to eligible retirees and their covered dependents under retiree coverage provided by the Duke Energy Retiree Medical Plan, The Connector Program, the Duke Energy Corporation Nuclear Health Reimbursement Account Opportunity Plan, and/or the Duke Energy Corporation Post-Retirement Health Reimbursement Account Program (the "Medical Plan"). Other Plan assets may not be used to fund postretirement medical benefits and the 401(h) account may not be used to fund Plan retirement benefits. The obligations of the Medical Plan are not obligations of the Plan. The Medical Plan obligations are reflected in the financial statements of that plan.

Note 2: Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America (US GAAP).

Certain reclassifications have been made to the 2018 amounts to conform to the 2019 presentation. These reclassifications had no effect on changes in net assets available for benefits.

Use of Estimates

The preparation of the financial statements in conformity with US GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various investment securities that are exposed to various risks, such as interest rates, credit, and overall market volatility. Market values of investments may decline for a number of reasons, including changes in prevailing market and interest rates, increases in defaults and credit rating downgrades. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that some changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates in the near term would be material to the financial statements.

Investment Valuation and Income Recognition

Investments of the Plan are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of the Plan's interest in the Duke Energy Corporation Master Retirement Trust (Master Trust) (see Note 3) is based on the Plan's interest in the underlying assets in the Master Trust. See Note 4 for discussion of fair value measurements.

Realized and unrealized gains and losses are based on the value of these investments as of the later of the beginning of the plan year or at the time of purchase, if purchased during the year, and are reflected currently in the accompanying Statements of Changes in Net Assets Available for Benefits. Purchases and sales of securities are recorded on a settlement-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Investment income from the Master Trust, which includes interest, dividends and realized and unrealized gains and losses, net of administrative expenses, is allocated to each Plan by the trustee on

a pro rata basis. Brokerage fees are added to the acquisition cost of assets purchased and subtracted from the proceeds of the assets sold.

Derivative Financial Instruments

The Master Trust holds various instruments that meet the definition of a derivative under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 815, *Derivatives and Hedging*, (FASB ASC 815), including foreign currency contracts and interest rate swaps. The Plan's primary objective in holding these derivatives is investment appreciation and, accordingly, does not designate such derivatives as hedges of risks. Foreign currency exchange rate movements create a degree of risk by affecting the US dollar value of instruments denominated in foreign currencies. Such derivatives are recorded in the accompanying Statements of Net Assets Available for Benefits at their fair value, and changes in fair value are recorded in the Plan interest in Master Trust net income in the accompanying Statement of Changes in Net Assets Available for Benefits.

Contributions

Contributions to the Plan are recorded in the period that the Plan's actuary determines they relate to except that a contribution receivable is recorded to the extent that amounts due are pursuant to formal commitments as well as legal or contractual requirements in existence at the end of the Plan year.

Benefit Payments

Benefit payments to participants or their beneficiaries are recorded when paid.

Administrative Expenses

The Plan pays all investment fees related to the Plan and most other administrative costs, as provided in the Plan document.

Plan Management's Review of Subsequent Events

In preparing the accompanying financial statements, Plan management has reviewed all known events that have occurred after December 31, 2019, and through October 12, 2020, the date the financial statements were available to be issued, for inclusion in the financial statements and footnotes.

On March 11, 2020, the World Health Organization (WHO) classified the global coronavirus outbreak (COVID-19) as a pandemic, triggering volatility in financial markets and significant economic uncertainties. This could have a significant impact on the amounts reported in the statements of net assets available for benefits, changes in net assets available for benefits and the accumulated plan benefits. The duration of these uncertainties and the ultimate financial effects cannot be reasonably estimated at this time. Plan management does not believe there is substantial doubt about the Plan's ability to continue as a going concern.

New Accounting Pronouncement

In February 2017, the FASB issued ASU 2017-06, "Employee Benefit Plan Master Trust Reporting" (ASU 2017-06). The new guidance requires disclosure of the dollar amount of the plan's interest in each type of investment held by a master trust, as well as the master trust's other assets and liabilities on a gross basis and the dollar amount of the plan's interest in each balance. This update is effective for

fiscal years beginning after December 15, 2018, with retrospective application to all periods presented, with early application of the guidance permitted. The adoption of this ASU had no material impact on the Plan's net assets available for benefits.

In July 2018, the FASB issued Accounting Standards Update No. 2018-09 "Codification Improvements" (ASU-2018-09). ASU 2018-09 requires a plan to evaluate its investments to determine whether a readily determinable fair value exists or if investments qualify for the net asset value per share practical expedient and can be excluded from the fair value hierarchy disclosure. The new standard is effective for fiscal years beginning after December 15, 2018. The adoption of this ASU had no material impact to the Plan's net assets available for benefits.

In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirement for Fair Value Measurement. ASU 2018-13 eliminates, amends and adds disclosure requirements and is applicable to all entities that are required under accounting principles generally accepted in the United States of America to disclose recurring and nonrecurring fair value measurements. ASU 2018-13 is effective for all reporting periods beginning after December 15, 2019, though early adoption is permitted for any eliminated or modified disclosure requirements. Management is currently evaluating this ASU to determine its impact to the Plan's financial statements, and it is not expected to have a material impact to the Plan's net assets available for benefits.

In August 2018, FASB issued ASU No. 2018-14 to add, remove and clarify disclosure requirements related to defined benefit pension and other post retirement plans. The changes in this ASU are mostly related to the disclosure requirements of the defined benefit pension plans except for the removal of disclosures related to the effects of a one-percent-point change in the assumed healthcare costs and the effect of this change in rates on service cost, interest cost, and the benefit obligation for postretirement health care benefits. This ASU is effective for fiscal years ending after December 15, 2020 with early adoption permitted. Management is currently evaluating this ASU to determine its impact to the Plan's financial statements, and it is not expected to have a material impact to the Plan's net assets available for benefits.

Note 3: Investments (Certified by Trustee)

Information related to the Plan's investments and investment income as of December 31, 2019 and 2018 and for the year ended December 31, 2019, has been certified by the Trustee as permitted by 29 CFR 2500.103-8 of the Department of Labor rules under ERISA.

Duke Energy also sponsors the RCBP, which covers certain legacy Duke Energy, Cinergy and Piedmont employees, as well as legacy Progress non-union employees. Investments of the RCBP are also held in the Master Trust.

Effective as of January 1, 2018, Duke Energy established the Plan, which covers certain inactive participants spun-off/transferred from the RCBP and RIP. Investments of the Plan are also held in the Master Trust.

Florida Progress Corporation sponsors the Retirement Plan for Bargaining Unit Employees of Florida Progress Corporation (the "Florida Plan"), which covers bargaining unit employees of the Employing Company. Investments related to the Florida Plan are also held in the Master Trust.

The Master Trust has the following Plans and accounts with their respective percentages as of December 31, 2019 and 2018:

	2019	2018
Duke Energy Retirement Cash Balance Plan	42.31	43.18
Duke Energy Retirement Cash Balance Plan 401(h) account	0.10	0.09

Duke Energy Legacy Pension Plan 401(h) account	1.77	1.65
Retirement Plan for Bargaining Unit Employees of Florida Progress Corporation	8.08	7.28
	100.00	100.00

Investment income and administrative expenses relating to the Master Trust are allocated based on average monthly balances invested by each plan, other than items specific to one or the other.

Note 4: Fair Value Measurements

FASB ASC Topic 820, *Fair Value Measurement,* (FASB ASC 820) defines fair value, establishes a framework for measuring fair value in US GAAP and expands disclosure requirements about fair value measurements. Under FASB ASC 820, fair value is considered to be the exchange price in an orderly transaction between market participants to sell an asset or transfer a liability at the measurement date. The fair value definition under FASB ASC 820 focuses on an exit price, which is the price that would be received by the Plan to sell an asset or paid to transfer a liability versus an entry price, which would be the price paid to acquire an asset or received to assume a liability. Although FASB ASC 820 does not require additional fair value measurements, it applies to other accounting pronouncements that require or permit fair value measurements.

The amended guidance of FASB Accounting Standards Update (ASU) 2015-07, *Fair Value Measurement (Topic 820): Disclosure for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* has been early-adopted by management. See Note 2 for information on recent accounting pronouncements.

The Plan determines fair value of financial assets and liabilities based on the following fair value hierarchy, as prescribed by FASB ASC 820, which prioritizes the inputs to valuation techniques used to measure fair value into three levels:

Level 1
Unadjusted quoted prices in active markets for identical assets or liabilities that the Plan has the ability to access. An active market for the asset or liability is one in which transactions for the asset or liability occurs with sufficient frequency and volume to provide ongoing pricing information.

Level 2
Inputs other than quoted market prices included in Level 1 that are observable, either directly or indirectly, for the asset or liability. Level 2 inputs include, but are not limited to, quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active and inputs other than quoted market prices that are observable for the

asset or liability, such as interest rate curves and yield curves observable at commonly quoted intervals, volatilities, credit risk and default rates.

Level 3
Unobservable inputs for the asset or liability. Unobservable inputs reflect the Plan's own assumptions about the factors that other market participants would use in pricing an investment that would be based on the best information available in the circumstances.

The following is a description of the valuation methodologies used for investments measured at fair value for the Master Trust. There have been no changes in the methodologies used at December 31, 2019 and 2018.

Equity securities, corporate debt securities and US government securities: Valued at the closing price in the principal active market in which the individual securities are traded. Principal active markets include published exchanges such as NASDAQ, NYSE, NYMEX and Chicago Board of Trade, as well as pink sheets, which is an electronic quotation system that displays quotes for broker-dealers for many over-the-counter securities.

Government and commercial mortgage backed securities: Valued based on external price data obtained from third party vendors. When position specific external price data are not observable, the valuation is based on comparable securities. When external pricing data is observable, the securities are categorized in Level 2. When the external pricing data is unobservable, the securities are categorized as Level 3.

Short-term investment funds: Valued based on quoted market prices of the securities in the funds.

Partnerships: Valued using the net asset value of the Plan's ownership interest in the Partnerships. Partnerships represent private equity capital that is not quoted on a public exchange. Private equity consists of investors and funds that make investments directly into private companies or conduct buyouts of public companies that result in a delisting of public equity. Capital for private equity is raised from retail and institutional investors, and can be used to fund new technologies, expand working capital within an owned company, make acquisitions, or to strengthen a balance sheet. The majority of private equity consists of institutional investors and accredited investors who can commit large sums of money for long periods of time.

Real estate limited partnerships: Valued based upon property appraisal reports prepared by independent real estate appraisers. The Chief Real Estate Appraiser of the asset manager is responsible for assuring that the valuation process provides independent and reasonable property market value estimates. An external appraisal management firm not affiliated with the asset manager has been appointed to assist the Chief Real Estate Appraiser in maintaining and monitoring the independence and the accuracy of the appraisal process.

Hedge fund: Valued based on the value provided to the asset manager by the underlying fund. Values of liquid funds are based on observable inputs such as quoted market prices. Values of illiquid funds are based on observable or unobservable inputs to determine the value that might reasonably expect to be received in the normal course of business. If due diligence performed by the asset manager

determines the value provided the underlying fund does not represent fair value, the asset manager may consult with its valuation committee in determining fair value.

The following tables provide by level, within the fair value hierarchy, the Master Trust investments, at fair value as of December 31, 2019 and 2018 (in millions):

The following table provides a reconciliation of beginning and ending balances of investments measured at fair value on a recurring basis where the determination of fair value includes significant unobservable inputs (Level 3) for the year ended December 31, 2019 (in millions):

	2019
Balance as of December 31, 2018	$ 27.4
Total gains/(losses), (realized and unrealized), and other	1.4
Purchases	0.2
Sales	(18.4)
Balance as of December 31, 2019	$ 10.6

The Plan's share in gains and losses (realized and unrealized) included in changes in net assets for the period above are reported in net appreciation in fair value of investments in the Master Trust's Statement of Changes in Net Assets Available for Benefits.

Note 5: Net Asset Value (NAV) Per Share

Under the amended guidance of FASB Accounting Standards Update (ASU) No. 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* (ASU 2009-12), entities are permitted, as a practical expedient, to estimate the fair value of investments within its scope using the NAV per share of the investment as of the reporting entity's measurement dates. The amended guidance also requires additional disclosures to better enable users of the financial statements to understand the nature and risks of the reporting entity's investments that fall under these rules. In accordance with ASU 2009-12, the Plan expanded its disclosure to include the category, fair value, redemption frequency, and redemption notice period for those assets whose fair value is estimated using the NAV per share or its equivalent for which the fair value is not readily determinable.

The following table sets forth a summary of Master Trust investments with a reported estimated fair value using the NAV per share as of December 31, 2019 and 2018 (in millions):

	2019	2018	Unfunded Commitment	Redemption Frequency	Redemption Notice Period
Equity securities - Common stock funds (a)	$ –	$ 621.9	$ –	Immediate to Annual	60-120 days
Equity securities - Partnerships (b)	103.5	119.7	30.1	Non-redeemable	N/A
Equity securities – Stock rights (c)	0.6	–	–	Upon achievement of certain corporate objectives	N/A
Hedge funds (d)	224.2	226.4	–	Weekly to Quarterly	Weekly to Quarterly
Real estate limited partnerships (e)	–	144.2	–	Quarterly	N/A

(a) This category consists of institutional funds. Investments of approximately 82% of the total fair value at December 31, 2018 are redeemable either immediately or monthly. Investments of approximately 18% of this category contain liquidity restrictions and require redemption notices ranging from 60-120 days at December 31, 2018.

(b) This category consists of private equity partnership funds that invest in private equity limited partnerships. The investments in this category are non-redeemable.

(c) This category consists of a contingent value right. It will be exchanged upon first commercial shipment of concentrate following restart of operations at the Escobal mine in Guatemala.

(d) This category consists primarily of investments in privately offered hedge funds managed by unaffiliated investment managers managed by Russell Investments. For approximately 2% of this category, quarterly redemptions in excess of 20-50% of the final NAV may be partially funded, based on the hedge fund's board of director's decision, on a pro rata basis in proportion to all other hedge fund investees. 100% of investments of the total fair value are semi-redeemable within 92 days written notice.

(e) This category consists of real estate investment funds that invest in portfolios of commercial and residential real estate assets. Fund participants may withdraw from the fund once per quarter subject to available cash, as determined by the Trustee. A written withdrawal request is required 45 days prior to quarter end. To the extent that withdrawal requests exceed available cash, distributions are made on a pro rata basis.

Note 6: Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The Plan is frozen to future benefit accruals. Traditional benefits under the Plan are based on the participant's years of participation and generally the final three-year average annual pension-eligible earnings. Cash balance benefits are based upon the participant's notional account balance as of the valuation date. Benefits payable under all circumstances (i.e., retirement, death, disability, and termination of employment) are included, to the extent they are deemed attributable to employee service rendered through the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment and type (by means of commencement age and optional form elected) between the valuation dates and the expected date of payment. The effect of Plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective.

The significant actuarial assumptions used in the valuations as of January 1, 2020 were:

Discount Rate:	6.85%
Mortality:	Pri-2012 rates with no collar mortality tables and Pri-2012 no collar contingent survivor rates projected generationally with Scale MP-2019
Interest Crediting:	4.0% per annum

The significant actuarial assumptions used in the valuations as of January 1, 2019 were:

Discount Rate:	6.85%
Mortality:	RP-2014 healthy no collar table for Annuitants and Non-Annuitants projected generationally with scale MP2017, with rates increased by 13% (legacy Duke Energy) and RP-2014 healthy no collar table for Annuitants and Non-Annuitants projected generationally with scale MP2017, with rates increased by 9% (legacy Progress Energy)
Interest Crediting:	4.25% per annum

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The most recent actuarial valuation was prepared as of January 1, 2020 and 2019. Had the valuations been performed as of December 31, 2019 and 2018, there would be no material differences. The actuarial present value of accumulated plan benefit information as of January 1, 2020 and 2019 is as follows (in millions):

	1/1/2020	1/1/2019
Vested benefits:		
Participants and/or beneficiaries currently receiving benefits	$ 2,283.7	$ 2,365.1
Other participants	571.8	651.6
Total vested benefits	2,855.5	3,016.7
Nonvested benefits	0.1	0.2
Total Actuarial Present Value of Accumulated Plan Benefits	$ 2,855.6	$ 3,016.9

The changes in the actuarial present value of the Plan's accumulated plan benefits are as follows (in millions):

Actuarial present value of accumulated plan benefits as of January 1, 2019	$ 3,016.9
Increase (decrease) during the year attributable to:	
Change in actuarial assumptions	(29.7)
Decrease in the discount period	195.7
Benefits accumulated and actuarial experience	(6.2)
Benefits paid	(321.1)
Net decrease	(161.3)
Actuarial Present Value of Accumulated Plan Benefits as of January 1, 2020	$ 2,855.6

Note 7: Funding Policy

The Employing Company's policy is to fund amounts on an actuarial basis to provide assets sufficient to meet benefits to be paid to plan participants. Contributions to provide benefits under the Plan are made solely by the Employing Company. No contributions by the Employing Company were necessary in 2019 to meet the minimum funding requirements of ERISA. The Employing Company made no voluntary contributions related to plan year 2019.

Note 8: Plan Termination

Although it has not expressed any intention to do so, Duke Energy has the right under the Plan, to discontinue contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of any termination of the Plan or upon complete or partial discontinuance of contributions, each participant shall become fully vested, and the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations there under and the Plan document, generally to provide the following benefits in the order indicate:

a. Benefits attributable to employee contributions, taking into account those paid out before termination.
b. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
c. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a US government agency) up to the applicable limitations (discussed subsequently).

d. All other vested benefits (that is, vested benefits not insured by the PBGC).
e. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide these benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided by the then existing assets and the PBGC guaranty while other benefits may not be provided at all.

Note 9: Federal Income Tax Status

The Plan is intended to qualify under section 401(a) of the IRC and the Master Trust is intended to be exempt from tax under section 501(a) of the IRC. The IRS has determined and informed the Employing Company by a letter dated December 2019, that the Plan and related trust are designed in accordance with applicable sections of the IRC. The Plan has been amended since receiving the determination letter. The Plan filed for a determination letter and is currently waiting for a response from the IRS. The request was dated August 31, 2020. The Employing Company and the Plan administrator believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC and the Plan and Master Trust continue to be tax exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

US GAAP requires Plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. Plan management has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2019, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. Plan management believes it is no longer subject to income tax examinations for years prior to 2014.

Note 10: Exempt Party-in-Interest Transactions

Northern Trust manages the Master Trust. Northern Trust is also trustee of the Plan. Therefore, these transactions qualify as party-in-interest transactions; however, they are exempt from prohibited transaction rules under ERISA. Administrative expenses paid by the Plan were approximately $5.5 million for the year ended December 31, 2019.

Note 11: Plan **Changes**

A restatement of the Plan made effective as of January 1, 2020 and adopted on August 19, 2020, modifies the minimum required distribution provisions in light of the SECURE Act, adds COVID-19 pandemic claims procedure filing deadline relief, clarifies the suspension of benefits provisions, clarifies the beneficiary designation provisions, and makes miscellaneous clarifications.

An amendment dated December 12, 2019, modifies the suspension of benefits provisions.

An amendment dated December 17, 2018 made a technical clarification to the annuity starting date provision. A January 1, 2018 restatement of the Plan, adopted December 15, 2017, reflects the provisions of the Plan, including provisions applicable to the prior RCBP and RIP plan benefits.

Note 12: Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits per the Form 5500 to the financial statements as of December 31, 2019 and 2018 (in millions):

Less: Net assets held in 401(h) account included as assets in Form 5500	161.1	137.8
Net Assets Available for Benefits per the Financial Statements	$ 4,434.8	$ 4,005.2

The following is a reconciliation of the changes in net assets per the Form 5500 to the financial statements for the year ended December 31, 2019 (in millions):

Net income before transfers per Form 5500	$ 352.9
Less: Net decrease in 401(h) net assets	23.3
Net increase per the Financial Statements	$ 329.6

Methods

Valuation date	January 1, 2019.
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.
Trust expenses included in target normal cost	Provided by Duke Energy Corporation. $4,386,024 for 2019.
Actuarial value of assets	Smoothed fair market value of assets over the current and prior three months, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.
Actuarial method	Standard Unit Credit Cost Method
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued except prior plan benefits and grandfathered benefits for active employees. Based on discussions with Duke Energy Corporation, such benefits are considered to have a de minimis likelihood of being paid and thus are not required to be valued, and will not be valued. Willis Towers Watson has reviewed the plan provisions with Duke Energy Corporation and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor through its third party administrator, furnished participant data as of 1/1/2019. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data

Plan Name:	Duke Energy Legacy Pension Plan
EIN / PN:	20-2777218 / 012
Plan Sponsor:	Duke Energy Corporation
Valuation Date	January 1, 2019

and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available. In consultation with Duke Energy, the following assumptions were made for missing or apparently inconsistent data elements:

- Retirees who are receiving a joint and survivor annuity benefit that have missing beneficiary information, the valuation age difference assumption and opposite gender is used.
- Frozen accrued benefits are estimates to the extent they have not yet been certified by the employer. We do not believe these estimates have significantly affected the results of the valuation.
- In cases where an accrued benefit was not provided for a terminated vested participant we have used the prior year benefits, if available, or used an assumption of $1,000 per month for annuity participants and $100,000 cash balance account for cash balance participants.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

A separate memo delivered with this report will serve as documentation of the rationale for these valuation assumptions in accordance with our understanding of Actuarial Standards of Practice Nos. 4, 6, 27 and 35. All assumptions were selected based on information known at the valuation date and on the premises that the plan will continue and that no events will occur in 2019 that would cause Duke Energy to select different assumptions.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation	The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2017 to September 2018. Rates have been adjusted to reflect HATFA corridors. The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The assumed plan-related expenses added to the target normal cost were changed from $4,391,490 for 2018 to $4,386,024 for 2019. The assumed cash balance crediting rate for account balances subject to the 30-year Treasury rate was increased from 4.00% to 4.25%. The interest rate used to convert lump sum annuities (based on the 30-year Treasury rate) was updated from 3.75% to

SCHEDULE SB ATTACHMENTS

4.00% to better reflect long-term expectations of future market conditions

The expected retirement rates and form of payment assumptions were updated based on an experience study conducted in 2018.

Benefits Paid Upon the Following Events

Normal Retirement

The retirement benefit is based on the opening account balance calculated for Duke as of January 1, 1997 and for PanEnergy/Nantahala, as of January 1, 1999. Thereafter, the account is increased monthly through the addition of contribution credits and an interest adjustment.

The contribution credit percentage is determined by points credited to the participant monthly, as follows:

Contribution Credit Percentage by Points at Beginning of Year

Points	Contribution Credit Percentage
<35	4%, plus 4% of pay over Social Security Wage Base
35-49	5%, plus 4% of pay over Social Security Wage Base
50-64	6%, plus 4% of pay over Social Security Wage Base
>64	7%, plus 4% of pay over Social Security Wage Base

A participant's points as of any January 1 (or date of participation) equal the sum of the attained age and creditable service on such date, with the sum truncated to drop less than full points.

The monthly interest adjustment is a percentage increase in the account balance. For balances accrued through December 31, 2012 for non-union employees, through December 31, 2013 for USW Local 7202 (Nantahala) employees, and through March 31, 2015 for IBEW Local 962 and IBEW Local 962-T employees, the rate of monthly increase is the average yield on 30-year Treasury bonds for the end of the third full business week of the month prior to the beginning of the calendar quarter in which the particular month occurs, subject to a minimum of 4% and a maximum of 9%. For non-union pay credits accrued on or after January 1, 2013, USW Local 7202 (Nantahala) pay credits accrued on or after January 1, 2014, and IBEW Local 962 and IBEW Local 962-T pay credits accrued on or after April 1, 2015, the rate of monthly interest credit is fixed based on an annual percentage rate of 4%.
