Note 1 - Plan Description

The following description of The Cleveland Museum of Art Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering all employees of The Cleveland Museum of Art (the "Museum") who have completed 1,000 hours of service and are age 21 or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

Participants shall accrue yearly benefit payments in an amount equal to 1 percent of the career average compensation multiplied by the number of years of service credited. As of December 31, 2010, employees who had not attained age 45 with at least five years of service under the Plan and whose age plus years of service under the Plan did not total at least 60 ceased to accrue additional benefits. Those employees who had attained the above qualifications were able to make a one-time irrevocable election to continue to accrue additional benefits under the Plan. The Plan permits early retirement at age 55 with at least 10 years of service. If employees terminate before rendering five years of service, they forfeit the right to receive a benefit. Employees may elect to receive the value of their accumulated plan benefits as a life annuity payable monthly from retirement. Employees may also elect to receive their pension benefits in the form of a joint and survivor annuity. Employees whose accrued benefits are \$5,000 or less upon termination or retirement will receive the value of their accumulated plan benefits as a lump-sum distribution.

Death Benefits

If an active or terminated married employee who has a vested interest in the Plan dies prior to his or her benefit commencement, a death benefit equal to the benefit the employee would have received under the qualified joint and survivor annuity form, had he or she retired on the day immediately preceding the date of his or her death, will be paid to the surviving spouse. A beneficiary of employees (either married for at least one year or single) will at least receive a cash payment equal to the employee's contribution accumulation.

Funding

Contributions are made by the Museum in actuarially determined amounts. The Museum's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Funding Policy

The Plan no longer allows participant contributions.

Accumulated employee contributions of nonretired participants are approximately \$3,051,000 and \$3,081,000 as of December 31, 2019 and 2018, respectively, including related investment income. Interest on amounts contributed to the Plan subsequent to January 1, 1988 is determined based on 120 percent of the federal midterm rate in effect as of the first month of the plan year (3.47 and 2.62 percent as of January 1, 2019 and 2018, respectively).

Vesting

A participant is fully vested in his or her employer pension benefit after five years of credited service. Participants are immediately vested in their employee contributions and any income thereon.

December 31, 2019 and 2018

Note 1 - Plan Description (Continued)

Administration

The Museum is the sponsor of the Plan. The pension committee, as provided in the plan agreement, is the plan administrator and has responsibility for the administration of the Plan. John Hancock Life Insurance Company (U.S.A.) functions as trustee and investment manager. Investment management fees and trustee fees are paid by the Plan in accordance with the plan agreement.

Party-in-interest Transactions

The Plan invests in a group annuity contract managed by John Hancock Life Insurance Company (U.S.A.) or its affiliates. John Hancock Life Insurance Company (U.S.A.) is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation

The Plan's investments are stated at fair value. The estimated fair value of the group annuity contract is based on contract value, adjusted for certain contractual provisions. Contract value represents investments at cost plus accrued interest income less amounts withdrawn to pay benefits. See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Benefit Payments

Benefits are recorded when paid.

Administrative Expenses

Various administrative costs are paid by the Museum. These transactions qualify as party-in-interest transactions.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments that are attributable, under the Plan's provisions, to the services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to the following:

- (a) Retired or terminated employees or their beneficiaries
- (b) Present employees or their beneficiaries
- (c) Beneficiaries of employees who have died

Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee services rendered to the valuation date.

December 31, 2019 and 2018

Note 2 - Summary of Significant Accounting Policies (Continued)

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by an actuary from Findley as of the beginning of each plan year and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at January 1, 2019 are summarized as follows:

Actuarial cost method	Entry age normal actuarial cost method
Assumed rate of return	5 percent per annum
Mortality basis	RP-2014 Mortality Total Dataset Tables regressed to 2007 using the MP-2014 scale and then projected forward generationally using a modification of the MP-2018 scale. The ultimate long-term improvement scale percentages are 0.80 percent for all ages through 85, then grade linearly to 0.00 percent at age 105. The select period (prior to application of the ultimate long-term improvement scale) uses the MP-2018 scale for 2019-2028 and converges linearly to the ultimate long-term improvement scale over 10 years, reaching that scale in 2028.
Retirement	Age 60 through 80

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and that, due to the uncertainties inherent in setting assumptions, the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 8, 2020, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Investment Information

John Hancock Life Insurance Company (U.S.A.) (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment results included in the accompanying financial statements and supplemental schedule of assets held at end of year are based solely on information certified by the Trustee.

December 31, 2019 and 2018

Note 4 - Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Findley as of the beginning of each plan year. The calculation of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which was made as of January 1, 2019, the most recent actuarial valuation, is as follows:

Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants currently receiving benefit payments	\$ 16,493,624
Other vested participants	18,538,886
	<hr/>
Total vested benefits	35,032,510
Nonvested benefits	337,272
	<hr/>
Total actuarial present value of accumulated plan benefits	\$ 35,369,782
	<hr/>

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended January 1, 2019 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	\$ 34,179,356
Increase (decrease) during the year attributable to:	
Changes in actuarial assumptions	593,527
Benefits accumulated	586,959
Interest due to the decrease in the discount period	1,749,341
Benefits paid	(1,739,401)
	<hr/>
Net increase	1,190,426
	<hr/>
Actuarial present value of accumulated plan benefits - End of year	\$ 35,369,782
	<hr/>

The change in actuarial assumptions for the year ended December 31, 2019 is due primarily to changes in the mortality table used.

Note 5 - Group Annuity Contract

The Plan invests in an unallocated immediate participation guarantee group annuity contract with John Hancock Life Insurance Company (U.S.A.). The insurer credits the Plan's deposits that are intended to provide future benefits to present employees in an account that is invested with other assets of the insurer. The account is credited with its share of actual income over the fixed-rate income and mortality experience. When a participant retires, benefit payments are made directly from the account. The balance of the account must be maintained at the amount required, according to a premium schedule in the contract, to provide for the remaining pension benefits for all current retirees. This portion of the account is referred to as the retired life fund.

In addition to the group annuity contract recorded in the accompanying statement of net assets available for benefits, there is a contingency account with a fair value of approximately \$676,000 and \$647,000 at December 31, 2019 and 2018, respectively, that is not an asset of the Plan and, therefore, is not included in the financial statements. This contingency account, however, is a contractual asset of the insurer and is considered an asset for actuarial reporting purposes. The income earned on the account may only be used to reduce future employer contributions. The group annuity contract recognized income of approximately \$27,000 for both 2019 and 2018 (included in interest income) from the contingency account. The group annuity contract provides for periodic dividends at John Hancock Life Insurance Company (U.S.A.)'s discretion on the basis of its experience under the contract. No dividends were received in 2019 or 2018.

December 31, 2019 and 2018

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances where inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2019 and 2018:

		Assets Measured at Fair Value on a Recurring Basis at December 31, 2019	
		Investments (at Fair Value)	Level 2
Group annuity contract	\$	30,221,434	\$ 30,221,434
		Assets Measured at Fair Value on a Recurring Basis at December 31, 2018	
		Investments (at Fair Value)	Level 2
Group annuity contract	\$	27,438,321	\$ 27,438,321

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no transfers between levels of the fair value hierarchy during December 31, 2019 and 2018.

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

December 31, 2019 and 2018

Note 8 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Accordingly, no provision for income taxes has been made in the accompanying financial statements.

Note 9 - Subsequent Events

Subsequent to year end, the Plan's investment portfolio has incurred a significant decline in fair value, consistent with the general decline in financial markets. As of September 30, 2020, the investment values have recovered from the initial decline. However, because the values of individual investments fluctuate with market conditions and due to market volatility, the amount of losses that will be recognized in subsequent periods, if any, cannot be determined.

Appendix B (Continued)

Rates of Turnover (Continued)	Rationale: Based on an experience study completed in 2018 covering the period from January 1, 2012 to December 31, 2016. Due to the small number of active participants, the experience analysis was fitted to a standard Society of Actuaries table.
Assumptions Made In Valuing Spouse's Benefit	Ninety percent of the male and seventy-five percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be four years younger than the husband.
Optional Form Election	All participants are assumed to elect a life annuity, which is actuarially equivalent to all other payment forms.
Annual Increases to Maximum Benefits and Plan Compensation Limits	Funding: 0.00%
Annual Increase to Social Security	None assumed.
Provision for Expenses	<p>The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.</p> <p>Rationale: Based on prior year's actual administrative expenses.</p>
Standing Elections	The sponsor has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.
Asset Method	<p>Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions).</p>
Employees Valued	Only participants as of the valuation date were valued.

Appendix B (Continued)

Selection of Assumptions

The segment rates and mortality table used to determine minimum funding and funded ratios were based on methodology mandated by Internal Revenue Code and rates published by the Internal Revenue Service to affect it.

A complete review of non-economic assumptions, to satisfy ASOP 35 was completed in 2018.

Changes in Assumptions and Methods since the Last Actuarial Valuation

The segmented interest rates used for determining the funding target were 3.92%, 5.52% and 6.29%. These rates were updated to the rates required for the current plan year and also reflect BBA.

The mortality was RP-2000 mortality as described in Regulation 1.430(h)(3), projected by Scale AA.

The interest rate for developing the Actuarial Value of Assets was 5.25%.

Schedule SB, Line 24 – Change in Actuarial Assumptions

The Cleveland Museum of Art Pension Plan

January 1, 2019 Valuation

EIN/PN: 34-0714336 / 001

Changes in
Assumptions and
Methods since the
Last Actuarial
Valuation

The interest rate for developing the Actuarial Value of Assets was 5.25%.

Justification for
Changes in Actuarial
Assumptions

The plan did not need IRS approval to change assumptions because the unfunded vested benefits do not exceed \$50,000,000 and the decrease was less than 5% of the Funding Target before the change.
