Independent Auditor's Report

To the Benefits Committee
Aleris Cash Balance Plan
Beachwood, Ohio

We have audited the accompanying financial statements of the Aleris Cash Balance Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2019 and changes therein for the year then ended, and its financial status as of December 31, 2018 and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental Schedule of Assets (Held at End of Year) as of December 31, 2019 and the supplemental Schedule of Reportable Transactions for the Year Ended December 31, 2019 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

Aleris Cash Balance Plan

Notes to Financial Statements

1. Description of the Plan

The following description of the Aleris Cash Balance Plan (the “Plan”) is provided for general information only. Complete information regarding the Plan’s provisions may be found in the Plan document, which is available to all participants upon request.

General

The Plan is a noncontributory cash balance defined benefit plan covering all eligible employees of Aleris Rolled Products, Inc. (the “Plan Sponsor”) and other subsidiaries of Aleris International, Inc. (the “Company”), and provides for retirement income, disability, and preretirement death benefits. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

On April 14, 2020, Aleris Corporation, the Company’s parent, finalized an agreement for Aleris Corporation to be acquired by Novelis Inc., a subsidiary of Hindalco Industries Limited (the “Transaction”). A condition of the approval of the Transaction by the United States Department of Justice is that Novelis divest the legacy Aleris North America automotive assets, including the Lewisport, Kentucky plant and the Madison Heights (Detroit) innovation center (the “Divestiture”). A buyer for this divested business has not been identified. Plan management is currently evaluating the impact the Transaction and related Divestiture will have on the Plan.

The Plan is a cash balance account plan whereby a participant’s accrued benefit is maintained in a notional cash balance account. A participant’s notional cash balance account consists of the sum of the benefit credits and the interest credits entitled under the Plan. Effective January 1, 2007, the Plan was amended such that participants no longer earn additional benefit credits, any increase in their accrued benefits (excluding interest credits), or additional credited service, as defined in the Plan.

The Plan was also amended so that the interest crediting rate is the lesser of (a) the average of the auction yields on a three-year treasury rate or (b) the annual rate of interest on a 30-year treasury security. The interest crediting rate cannot be less than the interest rate determined by compounding the annual interest crediting rates provided under the Plan for the six-year period beginning five years before the current Plan year, and the minimum interest crediting rate for such six-year compounding period shall be 22.45%.

Information about the Plan, the vesting and benefit provisions and the Pension Benefit Guaranty Corporation’s (“PBGC”) benefit guarantee is contained in the Plan’s *Summary Plan Description*. Copies of the *Summary Plan Description* are available from the Company’s employee benefits department.

Plan Administration

Overall responsibility for administering the Plan rests with the Company’s Benefits Committee, which is appointed by the Board of Directors of the Company. The Company’s Benefits Committee has appointed Wells Fargo Bank, N.A. as the trustee of the Plan (the “Trustee”). The Trustee is responsible for management and control of the Plan’s assets.

Eligibility

The Plan provides benefits to eligible employees of the Company. Employees that are covered under a collective bargaining agreement are not eligible. Effective December 9, 2004, the Plan was amended to preclude any employee hired by the Company on or after that date from participating in the Plan.

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

Funding Policy

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to Plan participants. The Company's intention is to make contributions in amounts sufficient to fund the Plan's normal costs on a current basis and any increases in the past service liability due to subsequent amendments to the Plan. The Plan has met the minimum funding requirements of ERISA for 2019 and 2018.

Benefit and Vesting Provisions

The Plan generally provides for normal retirement at age 65. The Plan provides for payments of retirement, disability and death benefits to participants or their beneficiaries under various payment options, including a monthly retirement benefit, straight-life annuity and single-sum payment. Participants are 100% vested after three years of service.

Plan Termination

The Company reserves the right under the Plan document to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Upon termination, the net assets of the Plan will be allocated for payment to the participants in an order of priority as prescribed by ERISA and its related regulations and the Plan document.

Whether all participants receive their benefits should the Plan terminate at some future time will be dependent on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefits and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC as well as the priority of those benefits. Some benefits may be fully or partially provided for by the then-existing net assets of the Plan and the PBGC guarantee, while other benefits may not be provided for at all.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market volatility and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near-term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

Investment Valuation and Income (Loss) Recognition

The Plan's investments are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for further discussion and disclosures related to fair value measurements.

In conformity with Accounting Standards Codification ("ASC") 820, *Fair Value Measurement*, assets and liabilities measured at fair value are categorized into the following fair value hierarchy:

Level 1 – Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market that the Plan has the ability to access at the measurement date.

Level 2 – Fair value is based on quoted prices in markets that are not active, quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Fair value is based on prices or valuation techniques that require inputs that are both significant to the fair value measurements and unobservable. These inputs reflect management's judgment about the assumptions that a market participant would use in pricing the investment and are based on the best available information, some of which may be internally developed.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Benefit Payments

Benefits are recorded when paid.

Administrative Expenses

Administrative expenses are paid by the Plan.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 3) represent the actuarial present value of estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by employees through the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries (b) beneficiaries of deceased employees and (c) present employees or their beneficiaries. Normal retirement benefits for participants who retire or otherwise terminate employment in Plan years commencing after January 1, 1998, are based on the participants' notional account balances on the normal retirement date converted to a benefit using the RP-2014 Mortality Table and an applicable interest rate. The Plan also includes provisions for the payment of later retirement benefits, early retirement benefits, disability benefits, and deferred vested benefits to participants. The accumulated plan benefits for active employees are based on their compensation for services rendered and interest credits accumulated prior to the valuation date. Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included only to the extent they are deemed attributable to employee services rendered through the valuation date.

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

Evaluation of Subsequent Events

Plan management has evaluated subsequent events through October 13, 2020, which is the date the financial statements were available to be issued, and has determined that there were no subsequent events that have occurred through that date that have not already been reflected in the financial statements and / or disclosed in the notes, other than disclosed below.

On January 30, 2020, the World Health Organization ("WHO") announced a global health emergency because of a new strain of coronavirus originating in Wuhan, China and the risks to the international community as the virus spread globally beyond its point of origin. In March 2020, the WHO classified the COVID-19 outbreak as a pandemic, based on the rapid increase in exposure globally.

The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. This pandemic has adversely affected global economic activity and greatly contributed to volatility in financial markets. However, because the values of the Plan's investments have and will fluctuate in response to changing market conditions, the amount of losses that will be recognized in subsequent periods, if any, cannot be determined. The value of the Plan's investments has a direct impact on its funded status. As a result of possible changes to the actuarial assumptions used in determining the present value of accumulated plan benefits, the Plan Sponsor may need to make greater cash contributions to fund the Plan. Based on the Plan's funded percentage, there may be certain benefit limitations imposed. However, the actual impact, if any, on future required contributions, Plan liquidity, and benefit limitations cannot be determined at this time.

On March 27, 2020, President Trump signed into law the "Coronavirus Aid, Relief, and Economic Security (CARES) Act." The CARES Act, among other things, includes several relief provisions available to tax qualified retirement plans and their participants. Plan management has evaluated the relief provisions available to Plan participants under the CARES Act and has implemented the following provisions:

- Special coronavirus distributions up to \$100,000;
- Increased the available loan amount as described in Note 1 to the lesser of \$100,000 or 100% of the participant's vested account balance;
- Extended the period for loan repayments, if applicable, up to one year.

Although Plan management cannot estimate the length or gravity of the impact of the COVID-19 Outbreak at this time, if the pandemic continues, it may have an adverse effect on the Plan.

3. Actuarial Present Value of Accumulated Plan Benefits

Mercer (U.S.) Inc., the Plan's actuary, estimated the actuarial present value of accumulated plan benefits, which is the amount that resulted from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

The actuarial present value of accumulated plan benefits is as follows:

	January 1,	
	2019	2018
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefits	\$ 20,018,678	\$ 20,221,833
Other participants	7,760,872	8,095,380
Total vested benefits	<u>27,779,550</u>	<u>28,317,213</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 27,779,550</u></u>	<u><u>\$ 28,317,213</u></u>

The changes in accumulated plan benefits as of January 1, 2019, are as follows:

Actuarial present value of accumulated plan benefits at beginning of year	\$ 28,317,213
Increase (decrease) during the year attributed to:	
Benefits accumulated and (gains)/losses	65,147
Increase for interest due to the decrease in the discount period	1,940,171
Benefits paid	(2,874,352)
Change in actuarial assumptions	<u>331,371</u>
Net decrease	<u>(537,663)</u>
Actuarial present value of accumulated plan benefits at end of year	<u><u>\$ 27,779,550</u></u>

Significant assumptions underlying the actuarial valuation include:

Interest crediting rate	3.50%
Assumed rate of return on investments	6.70% (6.80% for the year beginning January 1, 2018)
Mortality basis	Adjusted RP-2014, which backs out the post-2006 mortality improvements, white collar, separate annuitant and non-annuitant, sex distinct base tables. Post-2006 mortality improvements are projected generationally using the MP-2018 projection scale (The RP-2014 tables using MP-2017 projection scale for the year beginning January 1, 2018)
Normal retirement	Age 65

The actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The actuary estimated the accumulated plan benefits as of January 1, 2019.

4. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy in ASC 820 are described in Note 2.

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety. Following is a description of the valuation techniques and inputs used for each major class of assets measured at fair value.

Interest-bearing cash: Valued at carrying value (which approximates fair value due to the short-term nature of the asset).

Registered investment companies (Mutual funds): Valued at quoted prices from an active market which represents the net asset value (“NAV”) of shares held by the Plan at year-end.

Commingled funds: Include pooled separate accounts, common and collective funds. Commingled private funds include multiple kinds of assets from several accounts combined to mitigate risk through investment diversification. Pooled separate accounts are valued at the NAV of units held by the Plan, which is determined by dividing the fair value of the fund’s net assets by its units outstanding at the valuation date. Common collective funds are valued based on net asset value per share.

Limited partnership interests: Valued at estimated NAV at the valuation date.

While the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Plan’s assets carried at fair value as of December 31, 2019 and 2018:

Assets at Fair Value as of December 31, 2019				
	Total	Level 1	Level 2	Level 3
Interest-bearing cash	\$ 374,841	\$ 374,841	\$ -	\$ -

Aleris Cash Balance Plan
Notes to Financial Statements (continued)

- (a) In accordance with ASC 820-10, certain investments that were measured at NAV (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in the tables are intended to permit reconciliation of the fair value hierarchy to the line items presented in the Statements of Net Assets Available for Benefits.

The following table summarizes investments measured at fair value based on NAV per share as of December 31, 2019 and 2018:

	As of December 31,	
	2019	2018
Commingled funds:		
Core real estate (a)	\$ 2,523,448	\$ 3,335,544
International large cap equity (b)	2,409,592	2,141,594
Limited partnership interests:		
Core fixed income (c)	11,659,860	9,038,906
Hedged equity (d)	3,043,124	3,368,332
Small cap value equity (e)	595,319	1,874,636
Total assets measured at fair value based on NAV	<u>\$ 20,231,343</u>	<u>\$ 19,759,012</u>

The Plan used the practical expedient to measure the fair value of the commingled funds and limited partnership interests at December 31, 2019 and 2018 within the scope of Accounting Standards Update 2009-12, *Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)* based on the investment's NAV.

A description of each of the significant investment strategies is as follows:

- a) **Core real estate:** Core real estate fund is composed primarily of real estate investments owned through a commingled pension trust fund. The investment objective of the fund is to provide a high, stable income stream with the potential for moderate capital appreciation over the long term. The core real estate fund invests in high-quality stabilized office, retail, residential and industrial assets in primary markets throughout the United States. Management of the core real estate fund has the ability to rebalance and refine the composition of the overall portfolio and remove assets of lesser quality and/or growth prospects, and where appropriate, trade up for asset quality and geographic location. As a result of how the fund is managed and priced, an extended notice period of six months is required for redemption requests. The Plan has the ability to redeem the investment at the NAV (or its equivalent) in the near term.
- b) **International large cap equity:** International large cap equity fund invests in equity securities. The investment objective of the fund is to achieve long-term growth principally by investing in a diversified portfolio of equity securities of companies ordinarily located in any country other than the United States and Canada. Redemption requests must be made at least six business days before the end of the month. The Plan has the ability to redeem the investment at the NAV (or its equivalent) on the measurement date.
- c) **Core fixed income:** Core fixed income fund invests primarily in fixed income securities. The investment objective is to seek total return consistent with the preservation of capital by investing in U.S. dollar-denominated fixed income securities, particularly U.S. government, agency, corporate and mortgage-backed issues. Investments may also include highly liquid AAA-rated mortgage paper, investment grade corporate and Yankee securities. Core fixed income is valued based on the Plan's ownership interest in the net asset value of the investment, which is used as a practical expedient to fair value per the underlying investment funds, which are based upon the Plan's own assumptions about the assumptions a market participant would use in pricing the assets and liabilities of the fund. The Plan has the ability to redeem the investment at the NAV (or its equivalent) on the measurement date.

- d) **Hedged equity:** Hedged equity fund is comprised primarily of shares or units in other investment companies or trusts. The fund invests the assets of its portfolios in other private investment funds. The investment objective of the fund is to generate absolute returns while maintaining a moderate level of risk. Its portfolio assets are allocated to the other private investment funds targeting absolute returns throughout the global financial markets with an emphasis on developed markets. In addition to its investments in other private investment funds, the fund may also make short-term investments for liquidity or defensive purposes, including but not limited to, interest-earning money market accounts, government obligations, commercial paper and short-term certificates of deposit. The fund may also maintain positions in a variety of derivative and non-derivative financial instruments in order to manage the various types of risks that are associated with the financial instruments and markets in which it invests. Hedged equity fund is valued based on the Plan's ownership interest in the net asset value of the investment funds, which are based upon the Plan's own assumptions about the assumptions a market participant would use in pricing the assets and liabilities of the fund. The fund's investments can only be redeemed on the first business day of each calendar quarter or each calendar month, but only after such redemption request has been made at least 45 days prior to the last business day of each quarter. The Plan has the ability to redeem the investment at the NAV (or its equivalent) in the near term.
- e) **Small cap value equity:** Limited partnership interests invested primarily in equity securities of domestic and international small capitalization companies. Small cap value equity is valued based on the Plan's ownership interest in the net asset value of the investment, which is used as a practical expedient to fair value per the underlying investment funds, which are based upon the Plan's own assumptions about the assumptions a market participant would use in pricing the assets and liabilities of the fund. Redemptions may be made on the last day of any month, subject to approval and certain other limitations. The Plan has the ability to redeem the investment at the NAV (or its equivalent) at the reporting date.

There were no unfunded commitments at December 31, 2019 and 2018 for any of the commingled funds or limited partnership interests.

The Company's Benefits Committee is responsible for determining the Plan's valuation policies and analyzing information provided by the investment Trustee and funds' general managers or partners that is used to determine the fair value of the Plan's investments. The Company's Benefits Committee is comprised of various members of the Company's management (including the Company's Chief Financial Officer, General Counsel and Executive Vice President, and Chief Human Resources Officer) and reports to the Company's Board of Directors. The Company also has established policies and procedures that relate to the approval of any new Level 3 assets in which the Plan is permitted to invest.

5. Investments

Other than the fair values of the commingled funds and limited partnership interests and the related interest and net appreciation (depreciation), all investment information for the Plan disclosed in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2019 and 2018, and net appreciation (depreciation) in fair value of investments and interest and dividends for the years ended December 31, 2019 and 2018, was obtained or derived from information provided to the plan administrator and certified as complete and accurate by the Trustee.

6. Transactions with Parties-in-Interest

Fees paid during the year for services rendered by parties-in-interest were based on customary and reasonable rates for such services. Certain of the Plan's investments are managed by the Trustee. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

7. Tax Status

The Plan received a determination letter from the Internal Revenue Service (the "IRS") dated December 28, 2012, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the "Code") and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator and the Plan's tax counsel believe the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believe that the Plan, as amended, is qualified and the related trust is tax-exempt.

U.S. GAAP requires Plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2019 and 2018, there are no uncertain tax positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

- Healthy participants
Section 430(h)(3) prescribed PPA 2019 separate static annuitant and non-annuitant mortality tables. These tables are developed by the IRS, based on the RP-2014 mortality tables backed off to 2006 with mortality improvement based on projections scale MP-2017

Cash balance plans

- Interest accumulation rate
3.50%
- Lump Sums
The plan provides the greater of the current cash balance account and the minimum lump sum equivalent of the accrued benefit under 417(e) assumptions. For participants commencing under age 61, the cash balance account is expected to be larger and for participants commencing on or after age 61, the minimum 417(e) lump sum is expected to be larger. For participants commencing on or after age 61, the cash balance account is loaded with a factor to estimate the minimum 417(e) lump sum. This factor is not interest-sensitive as the plan-defined cash balance conversion to an annuity also uses 417(e) interest rates. The factor only reflects the difference between the plan-defined cash balance conversion mortality table (unisex 1983 GAM table) and the prescribed 417(e) mortality table. These factors are updated annually to reflect the 417(e) mortality table in effect during the valuation year.

RATIONALE FOR ECONOMIC ASSUMPTIONS

- **Discount Rate** – Interest rates prescribed by IRS.
- **Cash balance interest accumulation rate** – The cash balance plan interest crediting rate assumption is based on the historical spread between high quality corporate bonds and the plan defined interest crediting rate. The interest crediting rate assumption is determined by applying the historical spread to the discount rate used for disclosure as this rate is based on high quality corporate bond yields. The resulting Aleris Cash Balance Plan assumed interest crediting rate will not be lower than 3.50%, the approximate minimum interest crediting rate defined in the plan.
- **Expected investment return** – The expected rate of return on plan assets is based on a blend of the hypothetical past performance of the plan's target asset mix, adjusted for current market conditions, and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook for the plan's target asset mix. The expected return on assets assumption is net of an adjustment for investment expenses assumed to be paid from plan assets.
- **Expenses** – Expenses are based on year-by-year experience for actual administrative expenses paid from plan assets and adjusted for the difference in expected PBGC premium.

RATIONALE FOR DEMOGRAPHIC ASSUMPTIONS

- **Mortality** – Mortality table prescribed by the IRS.
- **Withdrawal** – The termination table is based on the Society of Actuaries 2003 ultimate turnover table with adjustments. Annual review of the experience has shown that this table produced a reasonable approximation of the rates of termination experienced by the plan.
- **Retirement age** – Retirement rates have been developed based on the actuary's experience with similar plans and the age social insurance programs are first available. Annual review of the plan experience has shown that these rates provide similar results to the actual rates of retirement experienced under the plan.
- **Form of payment** – 100% of participants are assumed to elect a lump sum of their cash balance account, based on experience that shows relatively fewer participants elect the actuarially equivalent annuity options.

*Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***ACTUARIAL METHODS****Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

sum of the component funding targets and target normal costs associated with the various anticipated separation dates.

- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Mortality sponsor elections

- Healthy participants
Section 430(h)(3) prescribed PPA 2019 separate static annuitant and non-annuitant mortality tables. These tables are developed by the IRS, based on the RP-2014 mortality tables backed off to 2006 with mortality improvement based on projections scale MP-2017

Cash balance plans

- Interest accumulation rate
3.50%
- Lump Sums
The plan provides the greater of the current cash balance account and the minimum lump sum equivalent of the accrued benefit under 417(e) assumptions. For participants commencing under age 61, the cash balance account is expected to be larger and for participants commencing on or after age 61, the minimum 417(e) lump sum is expected to be larger. For participants commencing on or after age 61, the cash balance account is loaded with a factor to estimate the minimum 417(e) lump sum. This factor is not interest-sensitive as the plan-defined cash balance conversion to an annuity also uses 417(e) interest rates. The factor only reflects the difference between the plan-defined cash balance conversion mortality table (unisex 1983 GAM table) and the prescribed 417(e) mortality table. These factors are updated annually to reflect the 417(e) mortality table in effect during the valuation year.

RATIONALE FOR ECONOMIC ASSUMPTIONS

- **Discount Rate** – Interest rates prescribed by IRS.
- **Cash balance interest accumulation rate** – The cash balance plan interest crediting rate assumption is based on the historical spread between high quality corporate bonds and the plan defined interest crediting rate. The interest crediting rate assumption is determined by applying the historical spread to the discount rate used for disclosure as this rate is based on high quality corporate bond yields. The resulting Aleris Cash Balance Plan assumed interest crediting rate will not be lower than 3.50%, the approximate minimum interest crediting rate defined in the plan.
- **Expected investment return** – The expected rate of return on plan assets is based on a blend of the hypothetical past performance of the plan's target asset mix, adjusted for current market conditions, and the median simulated investment return using capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook for the plan's target asset mix. The expected return on assets assumption is net of an adjustment for investment expenses assumed to be paid from plan assets.
- **Expenses** – Expenses are based on year-by-year experience for actual administrative expenses paid from plan assets and adjusted for the difference in expected PBGC premium.

RATIONALE FOR DEMOGRAPHIC ASSUMPTIONS

- **Mortality** – Mortality table prescribed by the IRS.
- **Withdrawal** – The termination table is based on the Society of Actuaries 2003 ultimate turnover table with adjustments. Annual review of the experience has shown that this table produced a reasonable approximation of the rates of termination experienced by the plan.
- **Retirement age** – Retirement rates have been developed based on the actuary's experience with similar plans and the age social insurance programs are first available. Annual review of the plan experience has shown that these rates provide similar results to the actual rates of retirement experienced under the plan.
- **Form of payment** – 100% of participants are assumed to elect a lump sum of their cash balance account, based on experience that shows relatively fewer participants elect the actuarially equivalent annuity options.

*Schedule SB, Part V — Statement of Actuarial Assumptions/Methods***ACTUARIAL METHODS****Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

sum of the component funding targets and target normal costs associated with the various anticipated separation dates.

- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Summary of Plan Provisions

- Accrued benefit

For periods prior to January 1, 1998 and after December 31, 1992:

1.15% of a participant's Final Average Pensionable Earnings multiplied by Credited Service.

Plus 0.45% of his Final Average Pensionable Earnings in excess of his Covered Compensation, multiplied by Credited Service not exceeding 35 years.

For periods after December 31, 1997:

The accrued benefit as of January 1, 1998 converted to a cash account balance using an interest rate of 5.81%. Future interest that is accrued uses a guaranteed rate of return which is the lesser of: (a) 3-Year Treasury rate of prior November; (b) 30-Year Treasury rate of prior November. This rate applies for the following calendar year.

Benefit credits accrued are based on age:

<u>Age</u>	<u>Percent of salary</u>
0 – 39	3.50%
40 – 46	4.50%
47 – 49	4.90%
50 – 54	6.00%
55+	8.00%

Benefit Credits are frozen as of January 1, 2007.

Interest is earned on the balance at the beginning of the year. No interest is earned on the benefit credit of the current year.

The Normal Retirement Benefit is the cash account balance converted to life annuity using the blended (50% Male / 50% Female) 1983 GAM table and the lesser of 6% and the applicable interest rate.

Schedule SB, Part V — Summary of Plan Provisions

	<p><u>Grandfathered Participants:</u></p> <p>Participants who have attained age 55 and have 15 years of Vesting Service as of December 31, 1997 will receive the better of the old plan with continued service credits and the cash balance plan. In no event will the benefit be less than the accrued benefit as of December 31, 1993 as calculated under the plan formula and salary limits in effect on that date.</p> <p>The plan provides the greater of the current cash balance account and the minimum lump sum equivalent of the accrued benefit under 417(e) assumptions. For participants commencing under age 61, the cash balance account is expected to be larger and for participants commencing after on or after age 61, the minimum 417(e) lump sum is expected to be larger. All lump sums are determined as equal to the cash balance account. For participants commencing on or after age 61, the cash balance account is loaded with a factor to estimate the minimum 417(e) lump sum. This factor is not interest-sensitive as the plan-defined cash balance conversion to an annuity also uses 417(e) interest rates. The factor only reflects the difference between the plan-defined cash balance conversion mortality table (unisex 1983 GAM table) and the prescribed 417(e) mortality table. These factors are updated annually to reflect the 417(e) mortality table in effect during the valuation year.</p>

Unless noted below, all benefits provided by the plan, as restated, are included in this valuation.

Plan amendments excluded: Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.

- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are not valued including the late retirement actuarial increase because it is deemed immaterial.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This plan does not have any unpredictable contingent event benefits.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.

PLAN PROVISION CHANGES SINCE PRIOR VALUATION

Maximum benefit amounts under IRS rules were updated from 220,000 in 2018 to 225,000 in 2019.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The expense component of normal cost increased from \$380,042 to \$510,000 to reflect our expectations for the current plan year.
- The expected return on asset assumption decreased from 6.80% to 6.70% to reflect the plan's updated target asset allocation.
