ACCOUNTANTS AND CONSULTANTS

To the Trustees
Caputo's New Farm Produce, Inc. 401 (k) Plan
Carol Stream, Illinois

Our audit was performed in accordance with auditing standards generally accepted in the United States of America, except that we did not perform any of the normal auditing procedures on asset information certified or provided by the custodians under section 2520.103-8 of the United States Department of Labor's Rules and Regulations. In planning and performing our audit of the financial statements of the Caputo's New Farm Produce, Inc. 401(k) Plan (the Plan) as of and for the year ended December 31, 2019, we considered the Plan's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we do not express an opinion on the effectiveness of the Plan's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and, therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A deficiency in design exists when (a) a control necessary to meet the control objective is missing, or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met. A deficiency in operation exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the financial statements will not be prevented, or detected and corrected on a timely basis.

A significant deficiency is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Following are descriptions of other identified control deficiencies that we determined did not constitute significant deficiencies or material weaknesses:

Benefit Waiver Forms

We noted that benefit waiver forms were not obtained from employees who elected to not participate in the Plan. We recommend that eligible employees who elect not to participate in the Plan be required to complete a Company enrollment form and choose a deferral program of zero. A copy of this form should be placed in the respective employee's personnel file. Additionally, employee personnel files for all current employees should be reviewed to ensure proper documentation is in place. This will help provide written documentation that supports the fact that all eligible participants were given the opportunity to participate in the Plan.

Trustee Meetings

The Plan Sponsor has no formal documentation, such as minutes of meetings, maintained for actions taken by Plan Sponsor personnel who are currently fulfilling the role of Trustees. Although there were no discretionary profit contributions for the year ended December 31, 2019, that decision is not formally documented. Further, formal documentation of the discretionary employer match should be maintained in writing. Written documentation should be retained by the Trustees of the decision which should be performed through the Trustee minutes of meetings.

With the complexity of investment alternatives, and the complexity of the tax laws covering the qualifications of the Plan and fiduciary responsibilities of the Plan Sponsor, it is important that the Plan Sponsor adequately document the due diligence its personnel exercise over the operations of the Plan, including documentation of the considerations made when determining an investment policy and selecting investment alternatives, as well as documentation of the continued monitoring of investment performance against the Plan's objectives.

Observations and Recommendations

This letter also includes comments and suggestions with respect to matters that came to our attention in connection with our audit of the financial statements. These items are offered as constructive suggestions to be considered as part of the ongoing process of modifying and improving the Plan's practices and procedures.

Coronavirus Aid, Relief, and Economic Security and Bipartisan Budget Acts

During our review of subsequent events, we noted that certain provisions enacted under the Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") and the Bipartisan Budget Act ("BB Act") are being administered by the Plan to certain participants who have been deemed eligible under the CARES and BB Act requirements. Although formal amendments cannot be currently executed as final guidance and language is being finalized by regulatory bodies, we recommend that Plan Management execute retroactive amendments as soon as the guidance for the CARES and BB Act provisions have been finalized. Additionally, we recommend the amendment provisions be formally documented through the Board of Trustees minutes of meetings.

Observations and Recommendations (Continued)

Technology and Data Security Risk Assessment and Management

Technology continues to transform business. However, technology is not only changing business, it is changing who and what has access, custody and control over information. As technology advances, it becomes increasingly import to take ownership and maintain accountability over securing sensitive data and information. Therefore, employee benefit plans need to evolve in the ways that they manage technology and data security. While there is no way to prevent all data breaches, phishing scams or other risks, Plan management can mitigate the Plan's risks with a thorough understanding of cyber-security, data security, privacy, and protection of its information technology. We recommend Plan management consider developing or enhancing its data security risk management plan.

In developing or enhancing the plan, Plan management may want to consider the following (which is not an exhaustive list):

- Risk assessment
- A written policy
- Effective screenings of employees, vendors, third party administrators, and business partners
- Management access to systems
- Effective authentication
- Insurance and cyber-insurance
- Red flags
- Training of employees
- Plan for responding to a breach notification
- Properly backing up data
- Encryption of private information
- Separation of work and person cyber activities
- Carefully integrating new technologies
- Continued IT system updates and upgrades
- New legislation and regulation which may impact the Plan or the Plan Sponsor
