Schedule SB, line 22 – Description of Weighted Average Retirement Age

All participants are assumed to retire upon attainment of age 65, the plan's normal retirement age.
The weighted average retirement age is 65.

Schedule SB, Part V – Statement of Actuarial Methods and Assumptions

Interest

For Minimum Required Contribution and AFTAP (Rates with Stabilization):

September 2018 adjusted 24-month average segment rates as specified by IRS Notice 2018-73 (3.74%, 5.35%, 6.11%). The effective interest rate for 2019 is 5.59%. For the 2018 valuation, September 2017 adjusted 24-month average segment rates as specified by IRS Notice 2017-50 (3.92%, 5.52%, 6.29%). The effective interest rate for 2018 was 5.78%.

For PBGC Variable-Rate Premium:

Standard Method

Segment rates published by the PBGC for the premium payment year beginning January 1, 2019 (3.38%, 4.32%, 4.69%).

Alternative Method

2019 valuation interest segment rates without Stabilization (2.28%, 3.81%, 4.46%).

For all other Valuation Calculations (Rates without Stabilization):

September 2018 three-segment rates specified by IRS Notice 2018-73 (2.28%, 3.81%, 4.46%). The effective interest rate for 2019 is 4.07%. For the 2018 valuation, September 2017 three-segment rates specified by IRS Notice 2017-50 (1.75%, 3.76%, 4.66%). The effective interest rate for 2018 was 4.14%.

The interest assumption is prescribed by the Pension Protection Act of 2006 based on elections made by the plan sponsor.

Future Increases in Maximum Benefits and Plan Compensation Limitations

It is assumed that maximum benefit and plan compensation limitations under the Internal Revenue Code will not increase in the future.

Assumed Cost-of-Living Adjustments

None.

Retirement

It is assumed that participants will retire upon becoming eligible for normal retirement. The retirement age assumption is based on plan experience and professional judgment reflecting future experience expectations.

Schedule SB, Part V – Statement of Actuarial Methods and Assumptions

Mortality

IRS 2019 Combined Static Mortality Table. For 2018 valuation, the IRS 2018 Combined Static Mortality Table.

The mortality assumption is prescribed by the Pension Protection Act of 2006. No mortality improvement is assumed beyond any improvements already included in the underlying assumption.

Disability Rates

Attained Age	Male	Female
20	0.03	0.04
40	0.08	0.13
50	0.33	0.40
55	0.69	0.64
60	1.15	0.90
65	1.64	1.09

Given the low assumed disability rates, the declining number of actives and the small percentage of total liability associated with active participants, this assumption continues to decline in significance. We continue to use the same disability assumption from previous valuations as recent experience is not credible to justify a change.

Representative Termination Rates (per 100 employees) not due to disability, retirement or mortality

Attained Age	Male	Female
20	14.7	21.6
25	7.4	11.6
30	4.3	6.7
35	3.1	5.1
40	2.0	3.9
45	1.3	2.8
50	0.7	1.4

Given the declining number of actives, the aging active population coupled with low assumed termination rates at later ages, and the small percentage of total liability associated with active participants, this assumption continues to decline in significance. We continue to use the same assumption from previous valuations as recent experience is not credible to justify a change.

Schedule SB, Part V – Statement of Actuarial Methods and Assumptions

Cost Method

Traditional Unit Credit Cost Method. The actuarial cost method is required by the Pension Protection Act of 2006.

Plan-Related Expenses

Plan-related expenses, including PBGC premium, actuarial fees, and asset-related fees and charges, expected to be paid from plan assets in 2019 (\$55,000) were added to the normal cost. For 2018, the plan-related expense assumption was \$51,000.

Asset Method

The two-year smoothing method described in Internal Revenue Code section 430(g)(3)(B), using annual determination dates ending on the valuation date, with an assumed investment return of 7.5% (not to exceed the third segment rate under Code section 430 (h)(2)(c)(iii) as specified by IRS Notice 2009-22).

The actuarial value of assets must be within a 10% corridor of the market value of assets including discounted receivables.

The asset valuation method is prescribed by the Pension Protection Act of 2006 based on elections made by the plan sponsor.

Form of Payment

Participants are assumed to elect a single life annuity. The single life annuity form of payment is available to all plan participants and will not produce significantly different benefit obligations or projected cash flows compared to reflecting a percentage of the population electing an optional annuity payment form that provides for survivor benefits. The form of payment assumption is based on professional judgement reflecting future experience expectations.

Marriage

80% of all employees are assumed to be married, with males 3 years older than their spouses. Both the marriage and spousal age difference assumptions are based on professional judgement given general retirement population demographics and do not have a significant impact on the valuation.

Schedule SB, Part V – Statement of Actuarial Methods and Assumptions

Amortization Schedule

The funding shortfall is generally amortized over a period of 7 years, with a new base established annually equal to the funding shortfall offset by the present value of annual amortization installments for the prior six years. The plan sponsor has elected the fifteen-year alternative amortization schedule allowed under the Pension Relief Act of 2010 and described in IRS Notice 2011-3, for the 2011 plan year. An alternative amortization schedule has not been elected for any prior plan year.
