ESSENTRA HOLDINGS CORP
PENSION PLAN FOR HOURLY EMPLOYEES

Notes to Financial Statements

1. Description of Plan:

During 2017, the plan name was changed from Essentra Porous Technologies Corp Pension Plan for Hourly Employees to Essentra Holdings Corp Pension Plan for Hourly Employees (the "Plan"). The following description of the Plan provides only general information. Participants should refer to the Plan agreement or summary plan description for a more complete description of the Plan's provisions.

General: The Plan is a defined benefit pension plan covering those employees of Essentra Holdings Corporation (the "Company") who meet the eligibility requirements as stated in the Plan. Effective June 1, 2007 the Plan was closed to new entrants. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Pension Benefits: Hourly employees working under a union contract, with five or more years of service as defined by the Plan, are entitled to annual pension benefits beginning at normal retirement age (65), equal to the monthly benefit multiplier multiplied by the years of credited service. Credited service is the uninterrupted service from the most recent hire date to the day the employee leaves the employer. The Plan permits early retirement from ages 55 to 64 for employees who have completed ten years of service. Participants can elect to receive their benefits in one of four options: a single, lump-sum distribution if the participant's accrued pension benefit is $5,000 or less; annuity payments over the lifetime of the participant; annuity payments over the lifetime of the participant and one or more designated beneficiaries; annuity payments over a certain period not extending beyond the joint life and last survivor expectancy of the participant and one or more designated beneficiaries.

Death Benefits: If a participant dies prior to termination of employment but after completing five years of vesting service, the surviving spouse of the deceased participant shall be entitled to a death benefit in the form of survivor's pension benefit. If the participant dies prior to becoming eligible for an early retirement pension benefit, the amount of the survivor's pension benefit shall be equal to fifty percent of the participant's deferred vested retirement pension benefit as of the date of death, reduced for early retirement to the earliest retirement age and reduced for election of a joint and fifty percent of the contingent survivor option in favor of the spouse at the earliest retirement age.

Disability Benefits: If a participant becomes disabled prior to the normal retirement date but after completing five years of vesting service, the participant shall be entitled to a retirement pension benefit equal to seven-eighths of a normal retirement benefit based on credited years of service following the expiration of six months after disability arises. Disability benefits continue until the participant reaches age 65, at which point the participant would receive their normal retirement benefit.

2. Summary of Significant Accounting Policies:

The following are the significant accounting policies followed by the Plan:

Basis of Accounting: The financial statements of the Plan are prepared under the accrual basis of accounting.

Investment Valuation and Income Recognition: As further discussed in Note 6, the Plan records investments at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net realized and unrealized appreciation (depreciation) is recorded in the accompanying statements of changes in net assets available for benefits as net appreciation (depreciation) in fair value of investments.

Payment of Benefits: Benefits are recorded when paid.

Prepaid Distributions: Prepaid distributions represent disbursements from the Plan related to the subsequent year.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of Plan assets available for benefits and changes therein and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. Changes in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

Method of Funding: For 2019 and 2018, the actuarial cost method used in the valuation by the Plan's actuary is the standard unit credit method of funding.

2. Summary of Significant Accounting Policies, Continued:

Subsequent Events: Management has evaluated subsequent events through October 12, 2020, the date the financial statements were available to be issued, and has determined that except as disclosed below, there are no subsequent events to be reported in the accompanying financial statements.

In March of 2020, COVID-19 was declared a world-wide health pandemic and has had a significant impact on the national and global economy. The full impact of the COVID-19 outbreak continues to evolve as of the date the financial statements were available to be issued. This pandemic has adversely affected global economic activity and greatly contributed to deterioration and instability in financial markets. As a result, the Plan's investment portfolio has incurred a decline in fair value since December 31, 2019. Because the values of the Plan's individual investments have and will fluctuate in response to changing market conditions, the amount of losses that will be recognized in subsequent periods, if any, and related impact on the Plan's liquidity cannot be determined at this time.

3. Contributions:

The Company's funding policy is designed to fund the Plan's normal costs on a current basis and to fund, over a period not in excess of 30 years, the unfunded past service liability, such that all participants' benefits will be fully provided for by the time they retire. The Company's contributions of $1,787,137 for 2019 and $1,002,812 for 2018, meet the minimum funding requirements of ERISA.

4. Plan Termination:

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Annuity benefits for former participants or their beneficiaries who have been receiving for at least three years, or those participants eligible to retire for that three-year period who would have been receiving benefits if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is further limited to the lowest benefit that would be payable under the provisions in effect at any time during the five years preceding Plan termination.

b. Other vested benefits insured by the PBGC, a U.S. governmental agency, up to the applicable limitations (discussed below).

c. All other vested benefits (that is, vested benefits not insured by the PBGC).

d. All nonvested benefits.

4. Plan Termination, Continued:

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan would be guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2019 and 2018, that ceiling, which is adjusted periodically, was $5,608 and $5,420 per month, respectively. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and level of benefits guaranteed by the PBGC.

5. Actuarial Present Value of Accumulated Plan Benefits:

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. The accumulated plan benefits for participants are based on demographic assumptions and an assumed interest rate. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from Aon Hewitt and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts of interest) and the probability of payment (by means of decrements such as for death, disability, termination, or retirement) between the valuation date and the expected date of payment. Projected years of service are used only to determine eligibility for a benefit in the future. Valuation results are based on the ultimate monthly benefit multiplier of $49 per year of service.

5. Actuarial Present Value of Accumulated Plan Benefits, Continued:

In accordance with ASC 960, the Company has chosen to present the actuarial present value of accumulated plan benefits and assumptions as of the beginning of the plan years, January 1.

Significant actuarial assumptions used in the valuations as of January 1, 2019 and 2018 were:

Assumed rate of return on investments: 6.20% compounded annually and limited to 6.11% for 2019 and 6.20% compounded annually for 2018.

Discount rate: 6.20% for the present value of accumulated benefits in 2019 and 2018.

Mortality: For 2019 and 2018, the 2006 base rates from the RP-2014 mortality study.

Disabled mortality: For 2019 and 2018, the 2006 base rates from the RP-2014 mortality study.

Surviving spouse benefit: It is assumed that 80% of males and 50% of females for 2019 and 2018 have an eligible spouse, and that males are three years older than their spouses.

Retirement: Annual retirement rates are according to the following table:

Age	Annual Retirement Rate
55-57	2%
58	3%
59	4%
60-61	9%
62	25%
63-64	12%
65+	100%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The funding valuation reflects a change in the interest rate assumption and a change in the mortality assumption.

5. Actuarial Present Value of Accumulated Plan Benefits, Continued:

The accumulated plan benefits information as of January 1, 2019 and 2018 are as follows:

	2019	2018
Actuarial present value of accumulated plan benefits:		
Vested benefits:

Nonvested benefits	34,041	30,321

The change in the actuarial present value of accumulated plan benefits for the years ended January 1, 2019 and 2018 consists of the following:

	2019	2018
Actuarial present value of accumulated plan benefits, January 1, 2018 and 2017	$ 27,540,546	$ 27,945,594

Plan amendments	-	55,120

Other	(170,354)	295,265
Net change	(882,716)	(405,048)
Actuarial present value of accumulated plan benefits, January 1, 2019 and 2018	$ 26,657,830	$ 27,540,546

6. Fair Value Measurements:

The Financial Accounting Standards Board ("FASB") has issued guidance for measurement and disclosure of fair value and establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 — Inputs to the valuation methodology are quoted prices for similar instruments in active and inactive markets; and model driven valuations with significant inputs and drivers derived from observable active markets.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Valuation techniques used should maximize the use of observable inputs and minimize the use of unobservable inputs. The following is a description of the valuation methodologies used for investments carried or disclosed at fair value:

Money market funds: Valued at cost, which approximates fair value.

Exchange-traded funds: Exchange-traded funds traded on a national securities exchange are stated at the last reported sales price on the day of valuation.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

6. Fair Value Measurements, Continued:

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2019:

	Investments at Fair Value		
	Level 1	Level 2	Total
Money market funds	$ -	$ 547,119	$ 547,119
Exchange-traded funds	23,634,793	-	23,634,793
Total investments at fair value	$ 23,634,793	$ 547,119	$ 24,181,912

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2018:

	Investments at Fair Value		
	Level 1	Level 2	Total
Money market funds	$ -	$ 530,270	$ 530,270
Exchange-traded funds	21,293,724	-	21,293,724
Total investments at fair value	$ 21,293,724	$ 530,270	$ 21,823,994

7. Related Party Transactions:

The Plan paid fees to the trustee, First State Trust Company, and therefore are considered to be party-in-interest transactions for which statutory exemption exists under the Department of Labor Regulations. Fees paid by the Plan to the trustee amounted to $15,468 for 2019 and $9,809 for 2018.

8. Income Tax Status:

The Internal Revenue Service has determined and informed the Company by a letter dated November 13, 2017, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code. The Plan has been amended since receiving the determination letter; however, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Internal Revenue Code.

Management has evaluated the effects of accounting guidance related to uncertain income tax positions and has concluded that the Plan had no significant financial statement exposure to uncertain income tax positions at December 31, 2019 and 2018. The Plan is not currently under audit by any tax authority.

9. Risks and Uncertainties:

The Plan provides for investment in various investment securities. Investments are exposed to various risks such as interest rates, market and credit. Due to the level of risk associated with certain investment securities, and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and participant demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

10. Financial Information Certified by the Trustee:

Information regarding the following, as of and for the years ended December 31, 2019 and 2018, included in the Plan's financial statements and supplemental schedules, was prepared by First State Trust Company, the trustee of the Plan, which has certified that it is complete and accurate:

- Investments, at fair value
- Investment income (loss)
- Schedule of assets (held at end of year)
- Schedule of reportable transactions

For ERISA Requirements

Valuation of Plan Assets	Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
Expected Return on Assets	
2016 Plan Year	6.20%.
2017 Plan Year	6.20%.
2018 Plan Year	6.20%, limited to 6.11%.
Trust Expenses Included in Target Normal Cost	Prior year administrative expenses rounded to the nearest $1,000.
Actuarial Method	Standard unit credit cost method.
