Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

REPORT OF INDEPENDENT AUDITORS

To the Board of Trustees
Wood County Hospital Retirement Plan
Bowling Green, Ohio

Report on Financial Statements

We have audited the accompanying financial statements of Wood County Hospital Retirement Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, the related statement of changes in net assets available for benefits for the year ended December 31, 2019, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Board of Trustees
Wood County Hospital Retirement Plan
Bowling Green, Ohio

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial status of the Plan as of December 31, 2019 and 2018, and the changes in its financial status for the year ended December 31, 2019, in accordance with accounting principles generally accepted in the United States of America.

Report on Supplemental Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules as listed in the table of contents referred to as "supplemental schedules," are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplemental information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

1. DESCRIPTION OF THE PLAN

The Wood County Hospital Retirement Plan (the Plan) was adopted by the Board of Trustees of The Wood County Hospital Association (the Plan Sponsor) and is a noncontributory defined benefit plan, cash balance plan. The Plan provides for retirement, disability retirement and death benefits and covers all eligible employees of the Plan Sponsor.

Pension Benefits

Employees with three or more years of service are entitled to annual pension benefits beginning at normal retirement age (65). The Plan permits early retirement at ages 55-64. Employees may elect to receive their pension benefits in the following forms, 120 monthly payments, joint annuity, life annuity, or lump sum. If employees terminate before rendering three years of service, they forfeit the right to receive the portion of their accumulated plan benefits attributable to the Plan Sponsor's contributions.

On January 1, 2008, the Defined Benefit Retirement Plan for the Plan Sponsor was converted to a cash balance plan. The Board of Trustees resolved to freeze the accrued benefit option of the Plan effective December 31, 2007. The accrued benefit under the prior plan formula was converted into an initial cash account balance as of January 1, 2008. All new participants are eligible for a cash balance benefit.

Death and Disability Benefits

If a vested member of the plan dies before benefit payments begin, a pre-retirement death benefit is paid to the employee's surviving spouse or beneficiary. The pre-retirement death benefit paid to the surviving spouse will be equal to the value of the employee's cash balance benefit and 50% of the frozen benefit, if the employee has been married at least one year prior to death. If a non-spouse is the designated beneficiary, the pre-retirement death benefit will be equal to the employee's cash balance benefit only. If a vested member of the plan dies after retirement benefit payments begin, a death benefit will be payable to a beneficiary upon death only if the payment option elected by the employee provides for such payment. If a non-vested member of the plan dies, no death benefits will be paid by the plan.

Members who become totally disabled receive annual disability benefits that are equal to the normal retirement benefits they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age at which time disabled participants begin receiving normal retirement benefits computed as though they had been employed to normal retirement age.

Vesting

Benefits become vested upon completion of three years of service and are payable beginning at normal retirement age or upon early or late retirement.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

Contributions

The Plan Sponsor has agreed to voluntarily contribute such amounts as are necessary on an actuarial basis to provide assets sufficient to meet the benefits to be paid to Plan members. The Plan has met the Employee Retirement Income Security Act of 1974 minimum funding requirements.

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by the Employee Retirement Income Security Act of 1974 (ERISA) and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2019, that ceiling was \$5,608 per month for a 65-year-old annuitant. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Valuation of Investments

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sale of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Most significantly, estimates are used in determining the actuarial present value of accumulated plan benefits and valuation of investments. Actual results could differ from those estimates.

Benefit Payments

Retirement benefits are recorded when paid.

Administrative Expenses

All costs incurred with regard to the operation of the Plan are paid by the Plan.

Subsequent Events

The Plan has evaluated subsequent events through October 13, 2020, the date the financial statements were available to be issued.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

3. FAIR VALUE OF FINANCIAL INSTRUMENTS

Effective January 1, 2019, the Plan early adopted the Financial Accounting Standards Board's Accounting Standards Update (ASU) 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. The amendments in this ASU removed and modified certain disclosure requirements in Topic 820. As such, the fair value measurement disclosures for 2018 have been restated for these changes.

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

- *Level 1:* Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- *Level 2:* Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
- *Level 3:* Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2019 and 2018:

Mutual funds: Valued at the daily closing prices as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2019 and 2018. Classification within the fair value hierarchy table is based on the lowest level of any input that is significant to the fair value measurement.

Fair Value of Assets at December 31, 2019			
	Level 1	Level 2	Level 3
Mutual funds	\$ 65,812,803	\$ -	\$ -
Cash			468,925
Total investments at fair value			\$ 66,281,728

Fair Value of Assets at December 31, 2018			
	Level 1	Level 2	Level 3
Mutual funds	\$ 58,623,916	\$ -	\$ -
Total investments at fair value	\$ 58,623,916	\$ -	\$ -

4. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) present employees or their beneficiaries.

Prior to the freezing of the monthly pension benefit option of the Plan, benefits for retired or terminated employees or their beneficiaries are based on the employee's credited service and the average of monthly earnings for the five highest consecutive plan years during which the participant is a member of the Plan. The accumulated plan benefits for active employees are based on their credited service and fiscal monthly earnings during the five years preceding the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

After freezing of the monthly benefit option of the Plan, benefits for retired or terminated employees or their beneficiaries are determined by the sum of the employee's cash balance benefit and the employee's benefit prior to the freezing of the monthly benefit option. The cash balance benefit is determined by converting the cash balance account into a monthly single life annuity benefit. The cash balance account is based on the employee's credited service which includes pay credits, interest credits and transition credits. Pay credits are a percentage of compensation which is determined by a participants' age plus credited service. The annual pay credits benefit accrual for eligible participants range from 3% to 8% of annual wages. Interest credits are based on the cash balance account at the beginning of the Plan year and the average yield on thirty-year Treasury constant maturities. In no event will the interest credit in any Plan year be less than 4%. As the average Treasury yield was less than the minimum of 4%, a 4% interest credit was allocated in 2019. Transition credits are a percentage of compensation with is determined by a participants' age plus credited service for those participants with greater than ten years of credited service and 1,000 hours of service as of January 1, 2008. The annual transition credits benefit accrual for eligible participants range from 3% - 8% of annual wages. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The Plan's actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Accumulated plan benefit information is as follows:

	2019	2018
Actuarial present value of accumulated Plan benefits:		
Vested benefits:		
Participants currently receiving payments	\$ 11,140,104	\$ 10,339,784
Other participants	33,502,138	33,185,502
Total vested benefits	44,642,242	43,525,286
Nonvested benefits	2,327,795	2,523,624
Actuarial present value of accumulated Plan benefits	<u>\$ 46,970,037</u>	<u>\$ 46,048,910</u>

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

Changes in the present value of accumulated plan benefits are as follows:

	2019	2018
Accumulated plan benefits - beginning of year	\$ 46,048,910	\$ 45,786,130
Increase attributable to:		
Benefits paid	(5,485,276)	(5,110,877)
Benefits accumulated	1,468,071	1,341,721
Assumption changes	3,354,133	(106,010)
Actuarial (gains)/losses	(1,550,005)	1,017,877
Decrease in the discount period	3,134,204	3,120,069
Net Increase	921,127	262,780
Accumulated plan benefits - end of year	<u>\$ 46,970,037</u>	<u>\$ 46,048,910</u>

Significant assumptions underlying the actuarial computations are as follows:

	2019	2018
Discount rate	6.00%	7.00%
Life Expectancy	Pri-2012 and RP-2014 Mortality Tables for employees and using annuitants with no collar adjustment, projected generationally using a modified version of Scale MP- 2019 and Scale MP- 2018 in 2019 and 2018, respectively.	
Retirement	Normal retirement age 65 Early retirement age 55 and 5 years of eligibility service	

These actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

5. TRANSACTIONS WITH PARTIES-IN-INTEREST

Certain Plan investments are managed by Key Bank and Charles Schwab. Key Bank is the trustee and Charles Schwab is the custodian, as defined by the Plan, and, therefore, these transactions qualify as party-in-interest transactions. Fees incurred are paid directly by the Plan for the investment management services.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

Parties-in-interest are defined under Department of Labor regulations as any fiduciary of the Plan, any party rendering service to the Plan, the Hospital and certain others. Willis Towers Watson is the Plan's actuary. Blue & Co., LLC is the independent auditor for the Plan. The aforementioned parties generally receive payment from the Plan Sponsor.

6. INCOME TAX STATUS

The Plan obtained its latest determination letter on September 3, 2015, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has not been amended since receiving the determination letter.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by various federal and state taxing authorities. Management has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2019 and 2018, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the accompanying financial statements. The Plan is subject to routine audits by taxing Jurisdictions. However, as of the date the financial statements were available to be issued, there were no audits for any tax period in progress. Management believes it is no longer subject to income tax examinations for years prior to 2016.

7. RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

WOOD COUNTY HOSPITAL RETIREMENT PLAN

NOTES TO FINANCIAL STATEMENTS DECEMBER 31, 2019 AND 2018

8. SUBSEQUENT EVENT

On March 11, 2020, the World Health Organization declared Coronavirus (COVID-19) a pandemic. The continued spread of COVID-19, or any similar outbreaks in the future, may adversely impact the local, regional, national and global economies. The extent to which COVID-19 impacts the Plan's operating results is dependent on the breadth and duration of the pandemic and could be affected by other factors management is not currently able to predict. Potential impacts include, but are not limited to, decreased demand for services by employers that contribute to the Plan and investment portfolio declines. Management believes the Plan is taking appropriate actions to respond to the pandemic; however, the full impact is unknown and cannot be reasonably estimated at the date the financial statements were available to be issued.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age and gender are shown below.

Age	Percentage retiring during the year	
	Males	Females
55-59	5.0%	5.0%
60-61	10.0%	10.0%
62	25.0%	25.0%
63-64	10.0%	10.0%
65	50.0%	50.0%
66-69	25.0%	25.0%
70	100.0%	100.0%

The weighted average retirement age is 64 determined by weighting each potential retirement age by the number of current active employees expected to retire at such age, as determined by the above retirement rates.

Form of payment

90% of new terminated vested participants are assumed to elect to receive an immediate lump sum, and 10% are assumed to elect a deferred annuity at age 65.

70% of new retired participants are assumed to elect to receive an immediate lump sum, and 30% are assumed to elect to receive an immediate annuity.

70% of current deferred participants are assumed to elect to receive a lump sum at age 55 or at current age if older than 55.

Lump sums were valued using the substitution of annuity form under IRS Regulation §1.430(d)-1(f)(4) using the mortality prescribed under IRC §417(e)(3) for 2019.

Percent married

100% of participants are assumed to be married.

Spouse age

Male participants are assumed to be three years older than their spouses and female participants are assumed to be three years younger than their spouses.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date

First day of plan year

Funding target

Present value of accrued benefits

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Actuarial value of assets for determining minimum required contributions

Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.00% for 2018 and 7.25% for 2017 (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2018 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Sources of Data and Other Information

Wood County Hospital through its administrative system, eepoint, furnished participant data as of January 1, 2019. Information on assets, contributions and plan provisions was supplied by Wood County Hospital. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations. No data adjustments were made, and we are unaware of any data adjustment made by the data provider.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate, but with a minimum interest credit rate of 4.00%. Our long term estimate of the 30-year Treasury rate is 2.80%, based on a combination of current conditions, past history, and future economic expectations.
Lump sum conversion rate	As required by IRC §430, lump sum benefits are valued using "annuity substitution," so that the interest rates assumed are effectively the same as described above for the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC §430, annuity benefits are valued by converting accounts to annuities using the current IRC §430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).
Compensation increase	The resulting salary increase assumption is based on plan sponsor expectations and is a composite rate that reflects both current conditions and future expectations.

Assumed return for asset smoothing

The assumed return of 7.00% for 2018 and 7.25% for 2017 used for asset smoothing is the expected gross return on assets assumption chosen by the client with the help of their investment advisers for the 2018 plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law," as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date, as required by IRC §430.

The mortality projection scale used to calculate the funding target and target normal cost was updated from Scale MP-2016 to Scale MP-2017, as required by IRC §430.

The decrement timing used in the valuation was changed from beginning of year to rounded middle of year. Under rounded middle of year decrement timing, all decrements are assumed to occur at the middle of the year and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. This change in funding method was made in accordance with a class ruling issued to Willis Towers Watson on March 18, 2019, and the effects of the change fall within the parameters of the class ruling.

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age and gender are shown below.

Age	Percentage retiring during the year	
	Males	Females
55-59	5.0%	5.0%
60-61	10.0%	10.0%
62	25.0%	25.0%

65	50.0%	50.0%
66-69	25.0%	25.0%
70	100.0%	100.0%

The weighted average retirement age is 64 determined by weighting each potential retirement age by the number of current active employees expected to retire at such age, as determined by the above retirement rates.

Form of payment

90% of new terminated vested participants are assumed to elect to receive an immediate lump sum, and 10% are assumed to elect a deferred annuity at age 65.

70% of new retired participants are assumed to elect to receive an immediate lump sum, and 30% are assumed to elect to receive an immediate annuity.

70% of current deferred participants are assumed to elect to receive a lump sum at age 55 or at current age if older than 55.

Lump sums were valued using the substitution of annuity form under IRS Regulation §1.430(d)-1(f)(4) using the mortality prescribed under IRC §417(e)(3) for 2019.

Schedule SB, Line 25 Change in Method

The decrement timing used in the valuation was changed from beginning of year to rounded middle of year. Under rounded middle of year decrement timing, all decrements are assumed to occur at the middle of the year and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. This change in funding method was made in accordance with a class ruling issued to Willis Towers Watson on March 18, 2019, and the effects of the change fall within the parameters of the class ruling.
