Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Invensys Pension Plan, which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified investment information described in Note 3, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the entities that certified the investment information meet the requirements of 29 CFR 2520.103-8. The plan administrator has obtained certifications as of December 31, 2019 and 2018, and for the years then ended, stating that the investment information provided to the plan administrator is complete and accurate.

Disclaimer of Opinion on Financial Statements

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Disclaimer of Opinion on Supplemental Schedule

The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2019, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on the supplemental schedule referred to above.

Report on Compliance of Form and Content With Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedule, other than that derived from the certified investment information, have been audited by us in accordance with auditing standards generally accepted in the United States. The information presented in the accompanying supplemental schedule of assets (held at end of year) as of December 31, 2019, does not disclose the historical cost of investments. Disclosure of this information is required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. In our opinion, except for the omitted information described above, the supplemental schedule is presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Invensys Pension Plan

Notes to Financial Statements

December 31, 2019

1. Plan Description

The following description of the Invensys Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan document for more complete information.

General

The Plan is a noncontributory defined benefit pension plan. Employees with five years of vesting service, as defined by the Plan, are entitled to pension benefits upon retirement. The Plan provides for normal retirement benefits upon reaching 65, and has provisions for death, early retirement, and disability benefits. Pension benefits are provided to participants and depending on the provisions of legacy plan provisions, are based on age, years of service, benefit rate in effect at time of retirement or compensation, as defined. Information concerning the plan agreement is available from the Human Resources Department.

The Schneider Electric Benefits Committee of Schneider Electric Holdings, Inc. (the Company and Plan Sponsor) controls and manages the operation and administration of the Plan. State Street Bank and Trust Company served as trustee of the Plan until July 1, 2018, and Bank of New York/Mellon serves as the trustee beginning on July 1, 2018 (collectively referred to as the Trustees). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

As of July 1, 2018, the Plan's investment assets are held in the Schneider Electric Holdings, Inc. DB Master Trust (the Schneider Electric Master Trust), a master trust established by the Company and administered by the Trustees, and prior to July 1, 2018, the Plan's investment assets were held in the Invensys Inc. Master Retirement Trust (the Invensys Master Trust), collectively referred to as the Master Trusts.

On September 12, 2018, the Plan entered into a binding agreement to purchase a group annuity contract from Massachusetts Mutual Life Insurance Company (Mass Mutual), irrevocably transferring the future benefit obligation and annuity administration for approximately 4,122 retirees from the Plan to Mass Mutual. The purchase of the group annuity contract that was funded directly by Plan assets of \$324,210,802 was completed on September 18, 2018.

Plan Freeze

The Plan does not allow new participants and no future benefit accruals for employees.

Invensys Pension Plan

Notes to Financial Statements (continued)

1. Plan Description (continued)

Funding Policy

The Plan is funded annually by the Company in an amount based on actuarial determinations. The contributions are at least equal to the minimum funding standards required by the ERISA. The Plan has met the ERISA minimum funding requirements for the years ended December 31, 2019 and 2018.

Plan Termination

Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Although it has not expressed any intentions to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

2. Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Valuation of Investments and Income Recognition

The Plan's investments are held in the Master Trusts and are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). See Note 4 for further discussion of fair value measurements.

Invensys Pension Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

Prior to July 1, 2018, the Invensys Master Trust invested in futures contracts. A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange. The Master Trust could have used futures contracts to manage exposure to certain markets. Buying futures increased the Masters Trust's exposure to the underlying instrument and selling futures decreased the Master Trust's exposure to the underlying instrument held or hedge the fair value of other investments held. Future contracts were valued at the last settlement price at the end of each day on the exchange upon which they were traded.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 5) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the freeze date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on various formula depending on employees location group as described in the plan document. The accumulated plan benefits for active employees are based on years of service and the annual earnings factor as described in the plan document. Benefits payable under all circumstances — retirement, death, disability, and termination of employment — are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

Administrative Expenses

The Plan pays most of its administration expenses. All other administrative expenses of the Plan are paid by the Company. The Plan Sponsor provides accounting and other administrative services to the Plan at no charge.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Invensys Pension Plan

Notes to Financial Statements (continued)

2. Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes and supplemental schedule. Actual results could differ from those estimates.

New Accounting Pronouncements

In July 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-09, *Codification Improvements*, which, among other things, amends an illustrative example of a fair value hierarchy disclosure to indicate that a certain type of investment should not always be considered to be eligible to use the net asset value per share practical expedient. Also, it further clarifies that an entity should evaluate whether a readily determinable fair value exists or whether its investments qualify for the net asset value per share practical expedient in accordance with Accounting Standards Codification 820, *Fair Value Measurement*. Adoption of the amended guidance, which is to be applied prospectively, affects the fair value disclosures, but does not change the fair value measurement of the investments. ASU 2018-09 is effective for entities for fiscal years beginning after December 15, 2019. Early application is permitted. Management has elected not to early adopt ASU 2018-09.

3. Master Trust

Substantially all of the Plan's investments are in the Master Trusts, which invests in a variety of investments and were established for the investment of the assets of the Plan and other Company-sponsored pension plans. The Schneider Electric Master Trust includes several Master Trust Investment Accounts (MTIAs). Each participating retirement plan has a divided interest in the MTIAs selected by the respective plan. Investment income (loss) and expenses are allocated to the Plan based upon each plan's share of elected investments and the income (loss) earned/charged and expenses charged on those investments.

Prior to July 1, 2018, the investment in the Invensys Master Trust represents the Plan's undivided ownership of the net assets of the Invensys Master Trust, which have been accumulated through the Company's contributions and investment activity of the Invensys Master Trust, less benefit payments. Although assets of all plans were commingled in the Invensys Master Trust, the trustee maintained supporting records for the purpose of allocating the net gain or loss of the investment

account to the participating plans. The net investment income of the investment assets was allocated by the trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans.

Certain investment information disclosed in the accompanying financial statements and supplemental schedule, including investments held at December 31, 2019 and 2018, and net appreciation (depreciation) in fair value of investments, interest, dividends, and investment expenses for the years then ended, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by the Trustees.

4. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below.

Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets and liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in markets that are not active
- Observable inputs other than quoted prices that are used in the valuation of the asset or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals)
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

Invensys Pension Plan

Notes to Financial Statements (continued)

4. Fair Value Measurements (continued)

Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety.

The following is a description of the valuation techniques and inputs used for each general type of investment measured at fair value:

Cash: Valued at original cost plus accrued interest.

Mutual funds: Valued at the closing price reported on the active market where the individual fund is traded.

U.S. Government agency, state, and local government bonds: U.S. Government agency obligations and state and municipal debt securities are valued using third-party pricing services.

Corporate debt instruments: Corporate debt instruments are valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available for comparable securities of issuers with similar credit ratings.

Common/collective trust funds: Valued at the net asset value (NAV) provided by the administrators of the funds.

Private equity investment funds: Valued at the NAV provided by the investment fund managers. The NAV is calculated using valuation models developed by the investment fund managers and independent third-party appraisals.

Short-term investment fund: Valued at cost, which represents fair value.

4. Fair Value Measurements (continued)

- (a) This category includes common/collective trust funds that are designed to provide total return through investments in a diversified portfolio of investment-grade, fixed-income securities. This category also includes common/collective trust funds that are designed to provide total return through investments in a diversified portfolio of debt securities that are rated below investment grade or unrated. The redemption notice period is 15 business days (or such shorter period agreed to by the issuer) for these funds. In normal functioning capital markets, generally there are no redemption restrictions to liquidate these funds.
- (b) This category includes common/collective trust funds that are designed to provide a diversified profile of equity securities and emphasis on capital appreciation over an extended period of time. The redemption notice period is 15 business days (or such shorter period agreed to by the issuers) for these funds. In normal functioning capital markets, generally there are no redemption restrictions to liquidate these funds.
- (c) This category includes limited partnership investments, which offer portfolio diversification along with higher expected long-term market returns. These investments are 11 – 17 years old. The private equity investments generally cannot be liquidated until the funds are fully terminated and distributed.

5. Accumulated Plan Benefits

An independent actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The changes in accumulated plan benefits are as follows:

Accumulated plan benefits at January 1, 2018	\$ 908,132,881
Changes during the year attributable to:	
Assumption changes	4,834,323
Benefits accumulated and actuarial gains	(10,961,968)

Invensys Pension Plan

Notes to Financial Statements (continued)

5. Accumulated Plan Benefits (continued)

Significant assumptions underlying the actuarial computations are as follows:

Assumed rate of return	6.0%
Retirement	2019 – Various rates ranging from 2% at age 55 to 100% at age 70 with terminated vested participants assumed to retire at age 62. 2018 – Age-related retirement rates from age 55 to age 65, with terminated vested participants assumed to retire at age 62
Mortality	PRI-2012 sex-distinct white collar table projected generationally with MP-2019 projection scale

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

6. Risks and Uncertainties

The Schneider Electric Master Trust invest in various investment securities. Investment securities are exposed to various risks, such as interest rate, market volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term, and that such changes could materially affect the amounts reported on the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Invensys Pension Plan

Notes to Financial Statements (continued)

7. Parties-in-Interest Transactions

The Schneider Electric Master Trust holds units of common/collective trust funds in which Bank of New York/Mellon, the trustee, is a subadvisor or manager of these funds. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

8. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS), dated September 13, 2017, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination letter by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes that the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. Plan management has analyzed the tax positions taken by the Plan and has concluded there are no uncertain positions taken or expected to be taken. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

9. Subsequent Events

The Company has evaluated all subsequent events through October 13, 2020, the date the accompanying financial statements were available to be issued.

In March 2020, the COVID-19 pandemic has resulted in significant volatility in the global financial markets. The impact of the COVID-19 pandemic on companies continues to evolve rapidly and its future effects on the Plan's net assets available for benefits and changes in net assets available for benefits are uncertain.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**RATIONALE FOR ECONOMIC ASSUMPTIONS**

- The expense assumption is based on prior year actual expenses, adjusted for expected changes in the coming year.

RATIONALE FOR DEMOGRAPHIC ASSUMPTIONS

- Withdrawal rates, retirement rates, benefit commencement age for terminated vested participants, and the form of payment assumptions were developed based on an experience study undertaken in 2011 covering the four-year period ending December 31, 2009. The plan sponsor believes these assumptions continue to be representative of anticipated future experience. The assumptions are reviewed annually for reasonability.
- Because the employer does not have enough credible experience to analyze disability incidence, the assumption used is based on industry standards that reflect the nature of the plan's population.
- Because the employer does not have enough credible experience to analyze spousal demographics, the assumptions regarding percent married/spouse age difference at benefit commencement age are based on the actuary's experience with many plans and discussions with employer representatives.

ACTUARIAL METHODS FOR FUNDING**Asset methods**

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts under which benefits are paid to plan participants.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.
- **Disabled participants:** Disabled participants are included in the active employee count since they continue to earn vesting service for early retirement eligibility.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

The following estimates were incorporated into the valuation. The estimates were not expected to have a material impact on the valuation results.

Attained age	Missing Item	Number	Estimation Methodology
APVS/Controls/Foxboro	Retired or deferred vested benefit	263	Based on last year's data
APVH/APVS/BTR/Foxboro/Safetran	Missing beneficiary gender	129	Assumed the opposite gender of the related participant
APVH/APVS/BTR/Foxboro/Safetran	Missing beneficiary date of birth	129	Based on spouse assumption
Controls/Foxboro	Vesting Service	26	Assumed last year service plus one

Minimum funding methods

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides certain death benefits that are not based a participant's years of service. These benefits are allocated to funding target by multiplying the benefit by the ratio of service on the valuation date to service at each decrement age. These benefits are allocated to target normal cost based on the proportionate benefits attributable to the increase in the participant's service during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**RATIONALE FOR ECONOMIC ASSUMPTIONS**

- The expense assumption is based on prior year actual expenses, adjusted for expected changes in the coming year.

RATIONALE FOR DEMOGRAPHIC ASSUMPTIONS

- Withdrawal rates, retirement rates, benefit commencement age for terminated vested participants, and the form of payment assumptions were developed based on an experience study undertaken in 2011 covering the four-year period ending December 31, 2009. The plan sponsor believes these assumptions continue to be representative of anticipated future experience. The assumptions are reviewed annually for reasonability.
- Because the employer does not have enough credible experience to analyze disability incidence, the assumption used is based on industry standards that reflect the nature of the plan's population.
- Because the employer does not have enough credible experience to analyze spousal demographics, the assumptions regarding percent married/spouse age difference at benefit commencement age are based on the actuary's experience with many plans and discussions with employer representatives.

ACTUARIAL METHODS FOR FUNDING**Asset methods**

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts under which benefits are paid to plan participants.
- **Transferred participants:** The liabilities for employees who have transferred into another plan of the plan sponsor have been included with the liabilities for terminated vested participants.
- **Disabled participants:** Disabled participants are included in the active employee count since they continue to earn vesting service for early retirement eligibility.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

The following estimates were incorporated into the valuation. The estimates were not expected to have a material impact on the valuation results.

Attained age	Missing Item	Number	Estimation Methodology
APVS/Controls/Foxboro	Retired or deferred vested benefit	263	Based on last year's data
APVH/APVS/BTR/Foxboro/Safetran	Missing beneficiary gender	129	Assumed the opposite gender of the related participant
APVH/APVS/BTR/Foxboro/Safetran	Missing beneficiary date of birth	129	Based on spouse assumption
Controls/Foxboro	Vesting Service	26	Assumed last year service plus one

Minimum funding methods

Target liability for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides certain death benefits that are not based a participant's years of service. These benefits are allocated to funding target by multiplying the benefit by the ratio of service on the valuation date to service at each decrement age. These benefits are allocated to target normal cost based on the proportionate benefits attributable to the increase in the participant's service during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

The pre-retirement surviving spouse annuity provides a reduced benefit equal to the benefit the spouse would have received had the participant retired on the day preceding his or her date of death (or had survived until his or her earliest retirement date, if death occurs prior to such date, and retired on such date) and elected to receive benefits in the 50% Joint and Survivor Annuity form.
<i>After Retirement</i>	Death benefits payable after retirement, if any, are payable in accordance with whichever option the retiree elected.
Optional Forms of Payment	The forms of benefit payment available to each participant shall be the Actuarial Equivalent of his/her normal retirement benefit on a single life annuity basis. The forms of benefit are as follows: — 5-year and 10-year certain and life — 50%, 75% and 100% Joint and Survivor annuity — Social Security adjustment
Actuarial Equivalent Except as noted below	For determination dates occurring on or after July 1, 1996, means an amount having equal value when computed on the basis of 7.00% interest rate compounded annually and a blend of 50% of the male mortality rates and 50% of the female mortality rates from the 1983 Group Annuity Mortality Table.
Actuarial Equivalent for Lump Sums (small cashouts and Social Security Adjustment)	For payments occurring on or after January 1, 2008, an interest rate equal to the annual rate structure based on the Pension Protection Act of 2006 (PPA) rates for the month of October immediately preceding the plan year

Schedule SB, Part V — Summary of Plan Provisions

during which the payment occurs and mortality rates based on PPA rates for the applicable year.

Benefits included or excluded

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments excluded:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase up to age 85.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan provisions specific to funding**Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
- **Unpredictable contingent event benefits:** This valuation does not value the plan's unpredictable contingent event benefits for New Stanton employees, which are summarized in the plan provisions above, because there are no longer any active participants. The plan does not have any other unpredictable contingent event benefits.

Plan provision changes since prior valuation

Schedule SB, Part V — Summary of Plan Provisions

Commencement	Payments commence on the later of the first day of the month following an employee's retirement or the date the participant applies for the benefit.																
Form of Payment	Benefits are normally payable in an unreduced amount as a life annuity for unmarried participants and in a reduced amount on a 50% Joint and Survivor basis for married participants.																
Late Retirement	Each employee who continues to be an employee after attaining his/her Normal Retirement Age shall be entitled upon actual retirement to receive a monthly benefit determined in the same manner as for Normal Retirement as of his/her Late Retirement Date.																
Early Retirement																	
Eligibility	Age 55 provided that the sum of attained age and completed years of Vesting Service is greater than or equal to 64 (with minimum of at least 4 years of Vesting Service).																
Benefit	The amount of benefit is computed as for Normal Retirement. The benefit is payable in full at age 62, or multiplied by the appropriate early retirement factor as follows																
	<table> <tr> <th><u>Age</u></th><th><u>Early Retirement Factor</u></th></tr> <tr> <td>55</td><td>57.90%</td></tr> <tr> <td>56</td><td>63.50%</td></tr> <tr> <td>57</td><td>69.40%</td></tr> <tr> <td>58</td><td>75.20%</td></tr> <tr> <td>59</td><td>80.80%</td></tr> <tr> <td>60</td><td>86.70%</td></tr> <tr> <td>61</td><td>93.30%</td></tr> </table>	<u>Age</u>	<u>Early Retirement Factor</u>	55	57.90%	56	63.50%	57	69.40%	58	75.20%	59	80.80%	60	86.70%	61	93.30%

56	63.50%																
57	69.40%																
58	75.20%																
59	80.80%																
60	86.70%																
61	93.30%																
Commencement	Anytime between early retirement date and normal retirement date, at the employee's election.																
Form of Payment	Same as Normal Retirement																
Deferred Vested Benefit																	
Eligibility	Termination of employment prior to normal retirement with at least 5 years of Vesting Service																
Benefit	The amount of benefit should be calculated as for Normal Retirement.																
Commencement	Unreduced at Normal Retirement Date, or in a reduced amount prior to Normal Retirement any time after attaining age 55, provided the employee has four or more years of Vesting Service and provided that the sum of attained age and completed years of Vesting Service is greater than or equal to 64. Reduction factors are the same as for Early Retirement.																

Schedule SB, Part V — Summary of Plan Provisions

Form of Payment	Same as for normal retirement.
Disability Benefit	
Eligibility	If a participant incurs a total and permanent disability, attained age 50 and completed 8 years of participation, he or she shall be entitled to receive a disability benefit.
Benefit	Monthly annuity is the greater of (a) or (b) as follows: (a) \$70 (b) \$5 times years of continuous service ending on date of disability.
Commencement	The first day of the month coincident with or next following six months after disability provided the participant has applied for a disability benefit. Payments will be payable until the earlier of the following: (a) the participant's early retirement date, (b) the date of his/her death, or (c) the date as of which it was determined that the participant is no longer disabled.
Form of Payment	Temporary single life annuity
Death Benefit	
<i>Before Retirement</i>	Upon the death of a vested participant who has been married for at least one year, his or her surviving spouse shall be eligible to receive a pre-retirement surviving spouse annuity. The pre-retirement surviving spouse annuity provides a reduced benefit equal to the benefit the spouse would have received had the participant retired on the day preceding his or her date of death (or had survived until his or her earliest retirement date, if death occurs prior to such date, and retired on such date) and elected to receive benefits in the 50% Joint and Survivor Annuity form.
<i>After Retirement</i>	Death benefits payable after retirement, if any, are payable in accordance with whichever option the retiree elected.
Optional Forms of Payment	The forms of benefit payment available to each participant shall be the Actuarial Equivalent of his/her normal retirement benefit on a single life annuity basis. The forms of benefit are as follows: — 5-year and 10-year certain and life — 50%, 75% and 100% Joint and Survivor annuity — Social Security adjustment
Actuarial Equivalent Except as noted below	For determination dates occurring on or after July 1, 1996, means an amount having equal value when computed on the basis of 7.00% interest rate compounded annually and a blend of 50% of the male mortality rates and 50% of the female mortality rates from the 1983 Group Annuity Mortality Table.
Actuarial Equivalent for Lump Sums (small cashouts and Social Security Adjustment)	For payments occurring on or after January 1, 2008, an interest rate equal to the annual rate structure based on the Pension Protection Act of 2006 (PPA) rates for the month of October immediately preceding the plan year

Schedule SB, Part V — Summary of Plan Provisions

during which the payment occurs and mortality rates based on PPA rates for the applicable year.

Benefits included or excluded

Unless noted below, all benefits provided by the plan are included in this valuation.

- **Plan amendments excluded:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase up to age 85.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan provisions specific to funding**Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
- **Unpredictable contingent event benefits:** This valuation does not value the plan's unpredictable contingent event benefits for New Stanton employees, which are summarized in the plan provisions above, because there are no longer any active participants. The plan does not have any other unpredictable contingent event benefits.
