Note 1 - Plan Description

The following description of ThyssenKrupp Industrial Solutions (USA), Inc. Retirement Plan (the "TKIS Plan"); ThyssenKrupp Materials NA, Inc. Pension Plan (the "Materials Plan"); ThyssenKrupp Crankshaft Company Retirement Income Plan for Employees Covered by the Bargaining Agreement with the International Union, United Automobile, Aerospace, and Agricultural Implement Workers of America, U.A.W. Local 2128 (the "Crankshaft Plan"); Rotek Salaried and Florence Hourly Pension Plan (the "Rotek Salary and Florence Hourly Plan"); Rotek Incorporated Pension Plan for Aurora-Ravenna Hourly Employees (the "Rotek Aurora Hourly Plan"); and The Budd Company Pension Plan for Executive and Administrative Employees (the "E&A Plan") (collectively, the "Plans") provides only general information. Participants should refer to each respective plan's legal documents for a more complete description of each plan's provisions.

General

The Plans were adopted to provide a means by which eligible employees of certain divisions within thyssenkrupp North America, LLC (the "Company") are provided retirement benefits. Certain subsidiaries within the Company act as the sponsor of each individual plan. The Plans are noncontributory defined benefit plans that are subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

All of the Plans are frozen to new participants. Additionally, further accrual of benefits was frozen under the Plans effective as of the dates listed below:

Plan	Benefit Accrual Freeze Date
Crankshaft Plan	September 30, 2010
E&A Plan	May 31, 2012
TKIS Plan	December 31, 2017
Materials Plan	December 31, 2018
Rotek Salary and Florence Hourly Plan (salaried employees only)	December 31, 2018
Rotek Aurora Hourly Plan	January 1, 2019

Hourly employees participating in the Rotek Salary and Florence Hourly Plan are still eligible to accrue benefits under the plan.

Eligibility and Vesting

Employees become fully vested in company-funded accrued benefits upon completion of five years of service. Employees who terminate service before becoming fully vested forfeit all benefits under the Plans. Employees in each of the Plans became fully vested in their accrued benefits as of the date in which benefits were frozen.

Pension Benefits

Normal retirement is permitted at the age of 65. The Plans also permit early retirement based on certain age and credited service requirements. Calculation of benefits is based on a blend of credited service, compensation, and a monthly pension benefit in effect when the years of credited service were earned, as described in the plan documents. The Plans also contain provisions for certain disability, deferred vesting, and surviving spouse benefits.

Death Benefits

In certain circumstances, if an active or terminated employee who has a vested interest in the Plans dies prior to his or her normal retirement age, the surviving spouse or designated beneficiary shall receive a survivor benefit, as defined in the plan documents.

Note 1 - Plan Description (Continued)

Funding Policy

Contributions are made by the plan sponsors in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. The plan sponsors will also make additional contributions from time to time, with the total not to exceed the maximum contribution deductible under the Internal Revenue Code. Annual contributions meet the minimum funding requirements of ERISA.

The TKIS Plan is further supported by employee contributions. Neither the plan sponsor's contributions nor the plan's assets are allocated for the accounts of individuals; however, records of individual employee contributions are maintained. Prior to January 1, 2006, participants were required to contribute 2.25 percent of their monthly compensation. Participants are fully and immediately vested in these contributions. Present employees' accumulated contributions at December 31, 2019 and 2018 were \$764,080 and \$804,833, respectively, including interest credited at rates of 2.03 percent and 3.47 percent in 2019 and 2018, respectively, compounded annually. Beginning on January 1, 2006, employee contributions are no longer allowed.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying statements have been prepared on the modified cash basis of accounting. Under the modified cash basis of accounting, contributions and investment income (loss) are recognized when cash is received, benefit payments and expenses are recognized when paid, and investments are recognized at fair value.

Investment Valuation

The fair value of each individual plan's interest in the thyssenkrupp North America, Inc. Master Trust (the "Master Trust") is based on the beginning of the year value of each individual plan's interest in the investment units held by the Master Trust plus actual contributions and allocated investment income (loss), less actual distributions and allocated administrative expenses.

The common collective trust funds are valued at net asset value per share (NAV) or its equivalent of the funds, which is based on the fair value of the funds' underlying assets.

The government securities and corporate debt securities are valued using quoted market prices or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve, as well as other relevant economic measures.

Investments in partnerships are valued at NAV or its equivalent of the funds based on audited financial statements of the funds, where available, with adjustments to account for partnership activity and other applicable valuation adjustments.

The money market funds and interest-bearing cash are valued at fair value based on their outstanding balances.

All other investments are valued based on quoted market prices reported in active markets. See Note 7 for additional information.

Notes to Modified Cash Basis Financial Statements

December 31, 2019 and 2018

Note 2 - Summary of Significant Accounting Policies (Continued)

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under each individual plan's provisions, to the service employees have rendered to the valuation date. These include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries.

The normal individual retirement benefit is based on a blend of credited service, annualized compensation, and a monthly pension benefit in effect when the years of credited service were earned, as described in the plan documents.

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by the independent actuary, Willis Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts and interest) and probability of payment (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The determinations were made as of January 1, 2019.

The significant actuarial assumptions underlying the actuarial computations at January 1, 2019 are as follows:

TKIS, Materials, and E&A Plans

- Actuarial cost method: Projected unit cost method
- Interest rate: 6.90, 7.30, and 6.90 percent, respectively
- Mortality basis: RP-2014 white collar mortality rates at 2012, increased by 8.50 percent and based on employee rates for nonannuitants and annuitant rates for those in payment

Rotek Aurora Hourly and Crankshaft Plans

- Actuarial cost method: Projected unit cost method
- Interest rate: 6.70 and 6.50 percent, respectively
- Mortality basis: RP-2014 blue collar mortality rates at 2011, increased by 10.90 percent and based on employee rates for nonannuitants and annuitant rates for those in payment

Rotek Salary and Florence Hourly Plan

- Actuarial cost method: Projected unit cost method
- Interest rate: 6.90 percent
- Mortality basis (salary participants): RP-2014 white collar mortality rates at 2012, increased by 8.50 percent and based on employee rates for nonannuitants and annuitant rates for those in payment
- Mortality basis (hourly participants): RP-2014 blue collar mortality rates at 2011, increased by 10.90 percent and based on employee rates for nonannuitants and annuitant rates for those in payment

The foregoing actuarial assumptions are based on the presumption that each respective plan will continue. Were any of the Plans to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Notes to Modified Cash Basis Financial Statements

December 31, 2019 and 2018

Note 2 - Summary of Significant Accounting Policies (Continued)

Benefit Payments

Benefits are recorded when paid.

There were no lump-sum payment options offered by the Plans during 2019. During 2018, lump-sum payment options were offered to all terminated vested participants in certain plans. Approximate total payments under these options were as follows:

Crankshaft Plan	\$	178,000
Rotek Salary and Florence Hourly Plan		121,000
Rotek Aurora Hourly Plan		21,000

Administrative Expenses

Various administrative expenses associated with the Plans were paid by the Company and its affiliates during the years ended December 31, 2019 and 2018.

Risks and Uncertainties

Contributions to the Plans and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statements of net assets available for benefits - modified cash basis.

Use of Estimates

The preparation of financial statements in conformity with modified cash basis of accounting requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

New Accounting Pronouncement

As of January 1, 2019, the Plans adopted Accounting Standards Update (ASU) No. 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965) - Employee Benefit Plan Master Trust Reporting*. As a result of the adoption of ASU No. 2017-06, additional disclosures related to the Plans' interest in the Master Trust have been made. This standard was adopted retrospectively and had no impact on the Plans' net assets or changes in net assets.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 7, 2020, which is the date the financial statements were available to be issued.

Notes to Modified Cash Basis Financial Statements

Note 3 - Plan Merger

Effective December 31, 2019, the E&A Plan merged and combined with The Budd-UAW Consolidated Retirement Benefit Plan (the "UAW Plan," another plan sponsored by a division of the Company), pursuant to the terms of a plan amendment. Accordingly, assets of approximately \$249,580,000 and participant accumulated plan benefits of approximately \$259,000,000 were transferred out of the E&A Plan on this date. As a result, the UAW Plan was amended and renamed The Budd Company Employee Pension Plan.

Note 4 - Unaudited Information

The Bank of New York Mellon/BNY Mellon, N.A. (the "Trustee") holds the Master Trust's investments and executes all investment transactions. The investment balances and related investment results included in the accompanying financial statements, including master trust information summarized in Note 6, are based solely on information certified by the Trustee.

Certain assets of the Master Trust are in investment funds managed by The Bank of New York Mellon/BNY Mellon, N.A. or its affiliates. Since The Bank of New York Mellon/BNY Mellon, N.A. is the Trustee of the Plans, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines. The market value of these investments was approximately \$39,000,000 and \$35,000,000 at December 31, 2019 and 2018, respectively.

Aetna Life Insurance Company (Aetna) is the paying agent on behalf of the TKIS Plan. Certain investments of the TKIS Plan are managed by Aetna. As the paying agent, Aetna is a party in interest to the TKIS Plan.

Note 5 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the independent actuary, Willis Towers Watson. The actuarial present value of accumulated plan benefits as of January 1, 2019 was as follows:

	TKIS Plan	Materials Plan	Crankshaft Plan	Rotek Salary and Florence Hourly Plan	Rotek Aurora Hourly Plan	E&A Plan
Actuarial present value of accumulated plan benefits:

During the year ended January 1, 2019, the decrement timing used in each Plan's valuation was changed from the beginning of year to rounded middle of year. Under the new method, all decrements are assumed to occur at the middle of the year, and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. The impact of this change is included with the following additional changes in actuarial assumptions to better reflect anticipated plan experience as follows:

- TKIS Plan: Increased by \$292,281 as a result of decrease in the discount rate from 7.00 to 6.90 percent
- Materials Plan: Increased by \$608,070 as a result of decrease in the discount rate from 7.40 to 7.30 percent
- Crankshaft Plan: Decreased by \$50,881, while the discount rate remained unchanged at 6.50 percent
- Rotek Salary and Florence Hourly Plan: Increased by \$129,138 as a result of a decrease in the discount rate from 7.00 to 6.90 percent
- Rotek Aurora Hourly Plan: Increased by \$72,481 as a result of a decrease in the discount rate from 6.80 to 6.70 percent
- E&A Plan: Decreased by \$1,985,518 as a result of increase in the discount rate from 6.80 to 6.90 percent

The effects of the plan merger described in Note 3 is not reflected in the calculation of the E&A Plan's accumulated plan benefits above.

Note 6 - Interest in Master Trust

The Plans' investments are in various investment units held by the Master Trust, which was established for the investment of assets of the Plans and several other pension plans sponsored by affiliated participating employers of thyssenkrupp North America, LLC. The assets of the Master Trust are held by the Trustee. Investment income (loss) is allocated to the individual plans based upon the plan's individual ownership of that associated investment unit. Administrative expenses relating to the Master Trust are allocated to the individual plans based upon their share in the net assets of the Master Trust. Any direct expenses are paid directly by the Company.

Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon month-end balances invested by each plan.

The following tables represent the net assets of the Plans and the Plans' interest in the Master Trust at December 31, 2019 and 2018:

Note 6 - Interest in Master Trust (Continued)

The investment income (loss) for the Master Trust for the years ended December 31, 2019 and 2018 is as follows:

	2019	2018
Net realized and unrealized gains (losses) in fair value of investments	\$ 104,660,760	\$ (56,462,436)
Interest and dividends	14,818,232	16,426,654
(Loss) gain on derivative instruments	(1,413,960)	624,168
Securities lending income	74,463	145,076
Net investment income (loss)	<u>\$ 118,139,495</u>	<u>\$ (39,266,538)</u>

There were no net asset balances in the E&A Plan as of December 31, 2019 due to the plan merger described in Note 3.

Securities Lending

The Master Trust participates in a securities lending program with the Trustee for its U.S. and non-U.S. securities held in custody with the Trustee. The program allows up to \$100,000,000 of the qualified assets to be on loan at any given time. These securities are lent to certain unrelated third-party brokers in exchange for cash and noncash collaterals. At December 31, 2019, U.S. assets on loan were collateralized at 102 percent of the assets' market value. There were no non-U.S. assets on loan at December 31, 2019. Both the collateral and the securities loaned are marked to market on a daily basis, with additional collateral obtained or refunded as necessary. In the event that the loaned securities are not returned by the borrower, the bank will, at its own expense, either replace the loaned securities or, if unable to purchase those securities on the open market, credit the plan's accounts with cash equal to the fair value of the loaned securities.

The net assets of the Master Trust reflect, as an asset, the collateral received under the securities lending arrangement with an offsetting liability representing the Master Trust's obligation to return the collateral to the borrower. The collateral received from borrowers totaled \$39,492,711 and \$35,484,109 as of December 31, 2019 and 2018, respectively. At December 31, 2019 and 2018, the entire balance received consisted of cash collateral, which was invested in a money market fund. In the event that a loaned security is called, the Master Trust will receive the market value of the asset in cash. The market value of loaned securities totaled \$38,607,313 and \$34,692,623 at December 31, 2019 and 2018, respectively.

Although the Master Trust's securities lending activities are collateralized as described above, and although the terms of the securities lending agreement with the custodial bank require the bank to comply with government rules and regulations related to the lending of securities held by ERISA plans, the securities lending program involves both market and credit risk. In this context, market risk refers to the possibility that the borrower of securities will be unable to collateralize the loan upon a sudden material change in the fair value of the loaned securities or the collateral or that the bank's investment of collateral received from the borrowers of the Master Trust's securities may be subject to unfavorable market fluctuations. Credit risk refers to the possibility that counterparties involved in the securities lending program may fail to perform in accordance with the terms of their contracts.

Note 6 - Interest in Master Trust (Continued)

Derivative Instruments

The Master Trust is party to certain agreements that are designed to manage exposure to foreign exchange and interest rate risks. The interest rate and foreign currency instruments are used for the purpose of hedging changes in the fair value of assets and the actuarial present value of accumulated plan benefits that result from interest rate changes and currency fluctuations or as an efficient substitute for traditional securities. The notional amount of interest rate instruments was approximately \$13,440,000 and \$13,720,000 at December 31, 2019 and 2018, respectively. Management has elected to present derivative information on a gross basis when subject to master netting arrangements. The estimated fair value of derivative instruments at December 31, 2019 and 2018 is insignificant. For the years ended December 31, 2019 and 2018, losses and gains of \$(1,413,960) and \$624,168, respectively, attributable to derivative instruments were recognized as investment losses and gains in the statements of changes in net assets available for benefits - modified cash basis.

The investment managers, on behalf of the Master Trust, manage its foreign currency and interest rate counterparty credit risks by limiting exposure to and by monitoring the financial condition of each counterparty. In the unlikely event that a counterparty fails to meet the terms of a foreign currency or an interest rate instrument, the Master Trust's risk is limited to the fair value of the instrument offset by the value of any collateral held.

Note 7 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Master Trust has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances where inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Master Trust's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

The TKIS Plan also invests in a money market fund. The fair value of the money market fund, a short-term investment, is based primarily on Level 2 inputs, as described above and in Note 2.

Note 8 - Tax Status

The Plans have each received a determination letter from the Internal Revenue Service indicating that each plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Accordingly, no provision for income taxes has been made in the accompanying financial statements. Although certain plans have been amended since receiving the determination letters, management believes that each plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 9 - Plan Termination

Should any of the Plans terminate at some future time, the respective plan's net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Actuarial value of assets for determining minimum required contributions

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2018 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with thyssenkrupp North America, Inc. and based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2019. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	For non-annuitants, assumptions used for funding purposes are as prescribed by IRC §430(h). For annuitants, plan specific mortality has been approved by the IRS.
Disabled Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	<p>Termination rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.</p> <p>Assumed termination rates differ by age because of expected differences in termination rates by age.</p>
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Form of payment	The percentage of retiring participants assumed to take joint and survivor annuities is based on observed experience over recent periods with annual review.
Percent married	The assumed percentage married is based on a blending of marital statuses of recent retirees and changes expected to occur in marriage patterns of retirement age individuals in the future.
Spouse age	The assumed age difference for spouses is based on general population statistics of the age difference for married individuals of retirement age.

Prescribed Methods

Funding methods

The methods used for funding purposes as described herein, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2017 to September 2018 and reflect the interest rate corridors of HATFA, as required by IRC §430.
- For non-annuitants, the mortality table used to calculate the funding target and target normal cost was updated to reflect the new tables, based on RP-2014 and subsequent Society of Actuaries studies, published by the IRS in October 2017 in regulation §1.430(h)(3)-1. For annuitants, the mortality table used to calculate the funding target and target normal cost was updated to plan specific mortality, which has been approved by the IRS.
- The assumed plan-related expenses added to the target normal cost were changed from \$2,036,076 for 2018 to \$1,897,878 for 2019, but the underlying assumption remains the same.
- The decrement timing used in the valuation was changed from beginning of year to rounded middle of year. Under rounded middle of year decrement timing, all decrements are assumed to occur at the middle of the year and eligibility for benefits, commencement and cessation of benefits, and other events are assumed to occur at the middle of the year. The change in funding method meets the parameters for automatic approval of software changes under IRS Rev. Proc. 2017-56.

Disablement

No disability benefit is provided under the plan. Participants on long-term disability continue to accrue credited service while employed by the employer. Upon termination or retirement, a disabled participant will receive the plan benefit that he/she is entitled under the normal, early or vested termination provisions of the plan.

Preretirement death

In the event of the death of an active participant after becoming eligible for early, normal or late retirement, the amount of the death benefit will be equal to the benefits payable as though the participant had terminated employment as of the date of death, elected the normal form of payment, and died the next day following the commencement of payments. If the employee and spouse have not been married for a full year prior to the date of death, the 50% Joint and Survivor form of payment will replace the Normal Form of payment. The participant will be treated as having given advance notice of retirement to determine the reduction factors for early commencement.

In the case where either (i) the employee was not yet eligible for early retirement at the date of death or, (ii) the participant was a former employee entitled to a deferred vested benefit, the benefit payable to the spouse is calculated as though the participant had terminated employment as of the date of death, elected the 50% Joint and Survivor form of payment commencing at the earliest age possible, and died the next day following the commencement of payments. The participant will be treated as not having given advanced notice of retirement to determine the reduction factors for early commencement.

Special Medicare benefit

A \$40 monthly benefit payable to a participant or surviving spouse at age 65. This benefit is payable while the retiree or spouse continues to pay premiums for Social Security Medicare coverage.

UAW transfers

The E&A plan assumed responsibility for the UAW benefit liability of two closed groups of former UAW participants (1989, 1994) who had previously transferred to a salaried position. UAW benefits for these employees will be based on the terms of the UAW plan, as amended, and credited service earned while covered by the UAW plan. E&A benefits for these employees will be based on the terms of the E&A plan, as amended, and credited service earned while covered by the E&A plan. All benefits for these participating (E&A and UAW) will be paid from the E&A plan.

The normal form of benefit for a single participant is a monthly annuity payable for life. The normal form for a participant who is married on his annuity starting date is a split benefit, where half of the benefit is payable in a Joint and 50% Survivor form, and the other half is payable as a Joint & 60% Survivor form, with a pop-up in the event of the spouse's death before the retiree's death, for the portion of the benefit accrued before 2008. For the portion of the benefit accrued after 2007, the normal form for married participants is the Joint and 50% Survivor form.

The option conversion factors to calculate the normal form of payment from a straight life benefit for a married participant are:

- Option factor for Joint and 50% Survivor part of benefit: 87% decreased 0.5% for each year the retiree's age exceeds the spouse's age (minimum 77%) and increased 0.5% for each year the spouse's age exceeds the retiree's age (maximum 96%).
- Option factor for Joint and 60% Survivor part of benefit: 95% decreased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years and increased 0.5% for each year the retiree's age exceeds the spouse's age by more than five years (maximum 100%).

Optional forms of payment:

In lieu of the normal form of payment, the following actuarial equivalent optional forms of payment are available:

- Life Annuity
- Joint and Survivor Annuity with a 25%, 33-1/3%, 50%, 66-2/3%, 75% or 100% survivor benefit payable to the Participant's Spouse or other designated beneficiary (continuation percentages may be restricted for a non-spouse beneficiary depending on age of participant and beneficiary).

SCHEDULE SB ATTACHMENTS

Forms of payment (continued)	For the portion of the benefit accrued before 2008, participants may elect to receive their entire benefit under the Life Annuity or Joint and Survivor Annuity or receive half of their benefit under a form of payment listed above and the other half under the Joint and 60% Survivor Annuity described as part of the Normal form of payment. Regardless of the form of payment selected, a participant other than a terminated vested participant, may elect to receive a temporary supplemental benefit of \$250, \$300 or \$350 per month payable until age 62, with an actuarially reduced benefit payable from age 62 on, for the portion of the benefit accrued before 2008. If the actuarial equivalent for a terminated vested participant is less than \$5,000, the benefit shall be paid as a single sum payment. In the event that the plan's AFTAP falls below certain thresholds employee may elect to bifurcate their benefit option or defer commencement until the option is no longer prohibited.
Pension Increases	Not applicable.
Plan participants' contributions	They are not required or permitted.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.
Substantive commitments	No substantive commitments other than the above plan provisions have been included in the valuation.

Future Plan Changes

No future plan changes were recognized in determining minimum and maximum contributions. Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Schedule SB, Line 24 Change in Actuarial Assumptions

- For annuitants, the base mortality tables used to calculate the funding target and target normal cost were updated to "substitute mortality tables" based on actual plan experience study from 2012 to 2016 allowed under IRS Revenue Procedure 2017-55.

Different mortality tables were used for before and after retirement. Per instructions, Item 23 reflects that the annuitant mortality will apply to the entire population. Below is the break out of the current population.

Population description	Population size	Mortality table
Non-annuitants (Active employees and participants with deferred benefits)	211	IRS prescribed fully generational table based on the RP/MP-2014 Society of Actuaries study and subsequent updates (including, for 2019 plan years, the use of the MP-2017 mortality improvement scale).

Schedule SB, Line 23 Information on Use of Substitute Mortality Tables

Substitute mortality tables are used for the following plan populations:

Mortality is assumed to occur according to a plan-specific substitute mortality table with separate male and female rates, as approved by the IRS in 2018 for valuations for the 2019 through 2028 plan years. The mortality rates are applied to all annuitants (including disabled annuitants). The prescribed tables apply for non-annuitants (including disabled non-annuitants). The tables were developed based on the mortality experience of the annuitant populations for qualified defined benefit pension plans sponsored by thyssenkrupp North America, Inc. for the period January 1, 2012 through December 31, 2016. The tables are generational, based on the IRS-prescribed projection scale MP-2017, with a base year of 2014. The table below presents illustrative rates for the base year.

Percentage of Participants Expected to Die Within One Year		
Age	Males	Females
25	0.0551%	0.0206%
30	0.0533%	0.0248%
35	0.0620%	0.0343%

85	9.4581%	7.5170%
90	16.5283%	13.3363%

The partial credibility weighting factor for the population determined pursuant to § 1.430(h)(3)-2(e)(2) is 0.861418.
