Independent Auditor's Report

To the Participants and Plan Administrator of
Marathon Petroleum Retirement Plan

Report on the Financial Statements

We have audited the accompanying financial statements of Marathon Petroleum Retirement Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to financial statements.

Plan's Management Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP); this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with the auditing standards generally accepted in the United States of America (US GAAS). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by Plan management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2019, and the changes in net assets available for benefits for the year then ended, and its financial status as of December 31, 2018 and changes therein for the year then ended, in accordance with US GAAP.

Independent Auditor's Report

To the Participants and Plan Administrator of
Marathon Petroleum Retirement Plan

Report on the Financial Statements

We have audited the accompanying financial statements of Marathon Petroleum Retirement Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to financial statements.

Plan's Management Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP); this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with the auditing standards generally accepted in the United States of America (US GAAS). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by Plan management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2019, and the changes in net assets available for benefits for the year then ended, and its financial status as of December 31, 2018 and changes therein for the year then ended, in accordance with US GAAP.

Marathon Petroleum Retirement Plan

Notes to Financial Statements

December 31, 2019 and 2018

1. Description of the Plan

The following description of the Marathon Petroleum Retirement Plan (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”).

General

The Plan was adopted on April 1, 1998. The Plan is a non-contributory employer defined benefit pension plan covering eligible employees of Marathon Petroleum Company LP (“MPC”) and other participating employers. The Plan is sponsored and administered by MPC, 539 S. Main Street, Findlay, Ohio 45840. The Northern Trust Company is the Plan’s trustee (“Trustee”). Fidelity Investments is the record keeper for the Plan.

The plan consists of: a base plan, which sets forth Plan provisions generally applicable to all Plan components; a “Marathon component”; a “Catlettsburg Component”; a “Northwestern Component”; a base plan for the Catlettsburg and Northwestern Components, and, effective at the close of December 31, 2019, on account of the plan merger described below, an “Andeavor Component.”

Plan Merger

The Andeavor Pension Plan was merged with and into the Marathon Petroleum Retirement Plan to form a single plan, effective at the close of December 31, 2019. As part of this merger, net assets of \$569,670,255 were transferred into the Plan, with \$11,892,401 getting transferred from the Plan to the Speedway Retirement Plan on account of the concurrent spin-off of a portion of the Andeavor Pension Plan to the Speedway Retirement Plan. A \$3,000,000 contribution was included in this transfer. As a result of this merger beginning immediately after the effective time of such merger, the Andeavor Component to the Plan applies to participants and beneficiaries with an accrued benefit under the merged Andeavor Pension Plan.

Pension Benefits

Marathon Component

Generally, any employee of a participating employer who is either a United States citizen (or performs services in the United States) is eligible to participate in the Plan; except, however, that the Plan excludes individuals regularly classified as follows: (1) union employees (unless their collective bargaining agreement provides for their participation); (2) leased employees; (3) employees participating in another employer-sponsored retirement plan other than a Section 401(k) plan; (4) independent contractors; (5) contract employees whose contracts exclude their participation; and (6) employees of Speedway LLC or Speedway Prepaid Card LLC except for employees in salary grades 12 or above of Speedway LLC or Speedway Prepaid Card LLC who were active participants in the Plan on December 31, 2018. Employees hired prior to January 1, 2010 vest in their benefit at the earlier of attainment of the normal retirement age of 65 or after completion of five years of vesting service, as defined by the Plan. Effective January 1, 2010, vesting service for current eligible employees changed to the completion of three years of vesting service. Early retirement benefits payable under the legacy benefits portion of the Plan are reduced proportionately based on the early retirement factors as described in the Plan. The Plan provides a single life annuity, joint and survivorship annuities, in addition to other optional forms of benefit, including lump sum. The Plan also provides surviving spouse benefits. The total amount of the Plan’s monthly retirement benefit is the legacy benefit plus the cash balance benefit (as described below). Accruals under the legacy benefit

Marathon Petroleum Retirement Plan

Notes to Financial Statements

December 31, 2019 and 2018

were frozen as of January 1, 2010, but participants who had a legacy benefit as of such date were eligible for compensation updates through December 31, 2012.

Commencing with the 2013 Plan Year, the Pension Benefit Guaranty Corporation ("PBGC") immediate annuity rate and the PBGC deferred vested interest rate as determined by the current Plan provisions for purposes of calculating lump sums is limited to an annual increase as determined by the following table:

Calculated Annual Plan Rate (Unadjusted)	Maximum Annual Plan Rate Increase
$\geq 0.25 - 3.00$	.25
$\geq 3.25 - 5.00$	.50
≥ 5.25	.75

If, however, the Plan provisions for calculating the annual lump sum interest rates result in a rate lower than the previous year's published Plan rate, such lower rate will be used without regard to any cap on the size of the reduction.

The amount of the monthly retirement legacy benefit of a participant who retires on their normal retirement date or thereafter with at least 37 years and 6 months of Plan participation is 60 percent of the participant's "final average pay" less 50 percent of the participant's primary social security benefit. Final average pay is the highest total gross pay (as defined by the Plan) of a participant for any consecutive 36-month period during their final 10 years of active employment (ending on December 31, 2012), divided by 36. "Primary social security benefit" is the participant's estimated social security benefit based on the social security law and benefit levels in effect on December 31, 2012.

Effective January 1, 2010, the Plan was amended to add a cash balance component. The cash balance design uses an annual pay credit formula, calculated on a point schedule using a participant's age plus service and a monthly interest crediting rate tied to the greater of the 30-year Treasury Bill rate or 3 percent.

Catlettsburg Component

Effective January 1, 1999, the Oil, Chemical, and Atomic Workers International Union Plan ("OCAW Plan") merged into the Plan. Included in the OCAW Plan were Catlettsburg Unions 3-214 and 3-505. The Catlettsburg Component applies to union represented employees who were employed at MPC's Catlettsburg, Kentucky facility prior to October 1, 1998. The Catlettsburg Component was frozen on October 1, 1998, such that no additional service and no additional compensation after September 30, 1998 is taken into account for benefit accrual purposes.

Benefit accrual service in the Catlettsburg Component is the largest of the following three calculations based on years of service and compensation:

- The career average benefit equal to the sum of: (1) the product of (i) 50 percent, and (ii) the total contributions, if any, made by a participant to the Plan during the period of time beginning on March 1, 1951 and ending on July 31, 1967, inclusive; (2) the product of (i) 75 percent and (ii) the total contributions, if any, made by a participant to the Plan during the period of time beginning on August 1, 1967 and ending on April 30, 1969, inclusive; (3) for each year of

Marathon Petroleum Retirement Plan

Notes to Financial Statements

December 31, 2019 and 2018

credited service, if any, of a participant after April 30, 1969 and before October 1, 1989, the sum of (i) 1.5 percent of that part of such participant's compensation for such year which is at an annual rate not in excess of \$6,600 plus (ii) 2.25 percent of that part of such participant's compensation for such year which is at an annual rate in excess of \$6,600; (4) for each year of crediting service (not to exceed 35 years) after September 30, 1989, the sum of (i) 1.83 percent of compensation less than \$6,600, (ii) 2.25 percent of compensation in excess of \$6,600, and (iii) the product of \$21.78 and number of years of credited service prior to October 1, 1989; or

- b) The minimum benefit equal to the difference between (i) product of \$168 and years of continuous service less (ii) an amount determined from calculation (a) above; or
- c) The alternate minimum benefit equal to the sum of (i) the product of number of years of credited service (maximum of 35 years) prior to February 1, 1993 and 1.25 percent of the participant's final average compensation and (ii) the product of number of years of credited service (maximum of 35 years combined with (i)) on or after February 1, 1993 and 1.35 percent of the participant's final average compensation.

The total benefit payable from the Plan for Catlettsburg Component participants is determined by first calculating the monthly benefit under the Catlettsburg Component (including the OCAW Plan benefit accrual service) for the age of retirement or termination and offsetting that benefit by the monthly benefit accrued for the age of retirement or termination under the terms of the Catlettsburg Component for benefit accrual service prior to December 31, 1998. Lump sum distributions in excess of \$5,000 are not permitted for benefits accrued under the OCAW Plan through December 31, 1998.

Northwestern Component

The Northwestern Component applies to certain Teamsters union represented current and former employees at MPC's St. Paul Park, Minnesota facility. Effective September 1, 1999, the Northwestern Component was frozen as to participation and further benefit accruals.

Benefit accrual service in the Northwestern Component is composed of two separate segments: eligible service prior to February 1, 1987 and eligible service subsequent to January 31, 1987 and through August 31, 1999. Normal pension benefits for Northwestern Component participants is equal to the sum of the benefit accrual rate multiplied by years and fractional years of service prior to February 1, 1987 and the larger of (a) the career average benefit for each year after January 31, 1987 and through August 31, 1999 calculated as the sum of 1.5 percent of compensation less than \$12,000 and 2.25 percent of compensation in excess of \$12,000 or (b) the product of years and fractional years of credited service and 1 percent of the final average compensation not in excess of \$9,000 and 1.5 percent of final average compensation in excess of \$9,000.

The total benefit payable from the Plan for Northwestern Component participants is determined by first calculating the monthly benefit under the Marathon Component (including the Northwestern Component benefit accrual service from February 1, 1987 and through August 31, 1999) for the age of retirement or termination and offsetting that benefit by the monthly benefit accrued for the age of retirement or termination under the terms of the Northwestern Component for benefit accrual service from February 1, 1987 through August 31, 1999. Lump sum distributions in excess of \$5,000 are not permitted for benefits accrued under the NWR Pension Plan through August 31, 1999.

purposes (but not for benefit accrual purposes) under the Plan.

2. Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan were prepared using the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

Date of Management's Review

Subsequent events were evaluated through October 15, 2020 which is the date the financial statements were available to be issued.

Use of Estimates

The preparation of financial statements in accordance with US GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the financial statements and the reported amounts of additions and deductions during the respective reporting periods. Actual amounts could differ from those estimates and assumptions.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in fair value of investments includes gains and losses on investments bought and sold as well as held during the year, and expenses related to the Plan's investment portfolio.

Contributions

Contributions to the Plan are recorded in the period that the Plan's actuary determines they relate to except that a contribution receivable is recorded to the extent that amounts due are pursuant to formal commitments as well as legal or contractual requirements in existence at the end of the Plan year.

Payment of Benefits

Benefits are recorded when paid.

Administrative Expenses

Expenses incurred in the administration of the Plan are paid out of Plan assets unless MPC, in its discretion, pays such expenses.

Risks and Uncertainties

The Plan invests in various investment options. Investments are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investments will occur in the near term and those changes could materially affect the amounts reported in the statement of Net Assets Available for Benefits at the Plan Level and the Statement of Changes in Net Assets Available for Benefits.

Marathon Petroleum Retirement Plan

Notes to Financial Statements

December 31, 2019 and 2018

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Recently Issued Accounting Standards

In February 2017, the FASB issued ASU 2017-06, "Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): Employee Benefit Plan Master Trust Reporting." ASU 2017-06 was adopted by the Plan beginning January 1, 2019. This new standard amends current disclosure requirements relating to plan investments in master trusts. This standard has an immaterial impact on the Plan's financial statements.

In July 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards ("ASU") No. 2018-09, "Codification Improvements". ASU No. 2018-09 requires prospective application and is effective January 1, 2019, with early adoption permitted. This standard reflects several provisions, with the amendment that is relevant to the Plan being the disclosure requirements relating to stable value common collective trust funds. This accounting standard has no impact on the Plan's disclosures.

In August 2018, FASB issued ASU No. 2018-13, "Fair Value Measurement (Topic 820) - Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement". The ASU No. 2018-19 modifies the disclosure requirements for the fair value measurements in Topic 820, including the elimination, modification to, and addition of certain disclosures. The ASU is effective January 1, 2020. The updated guidance is not expected to have a material impact on the Plan's financial statements.

4. Fair Value Measurements

The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. There are three approaches for measuring the fair value of assets and liabilities: the market approach, the income approach and the cost approach, each of which includes multiple valuation techniques. The fair value hierarchy consists of three broad levels:

- Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and liabilities. These inputs have the highest priority;
- Level 2 inputs consist of observable market-based inputs or unobservable inputs that are corroborated by market data, and are either directly or indirectly observable as of the measurements date;
- Level 3 inputs are unobservable inputs that are not corroborated by market data and may be used with internally developed methodologies that result in management's best estimate of fair value. These inputs have the lowest priority.

The Plan's investments in the Master Retirement Trust and the Group Trust are reported at fair value in the accompanying statements of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. The following provides a description of the valuation techniques employed for each major plan asset category:

- **Cash and cash equivalents** – Cash and cash equivalents include a collective fund serving as the investment vehicle for the cash reserves and cash held by third-party investment managers. The collective fund is valued at net asset value ("NAV") on a scheduled basis using a cost approach, and is considered a Level 2 asset. Cash and cash equivalents held by third-party investment managers are valued using a cost approach and are considered Level 2 assets. The non-Master Retirement Trust cash and cash equivalents include cash on deposit and an investment in a money market mutual fund that invests mainly in short-term instruments and cash, both of which are valued using a market approach and are considered Level 1 assets. The money market mutual fund is valued at the NAV of shares held.
- **Equity** – Equity investments include common and preferred stock, mutual and pooled funds, public and non-public investment trusts, and S&P 500 exchange-traded funds. Common and preferred stock is valued using a market approach. These assets are priced daily in active markets and are considered Level 1 assets. Mutual and pooled equity funds are well diversified portfolios, representing a mix of strategies in domestic, international, and emerging markets. Mutual funds are publicly registered, valued at NAV on a daily basis using a market approach, and are considered Level 1 assets. Pooled funds are valued at NAV using a market approach, and are considered Level 2 assets. Investments in public trusts and S&P 500 exchange traded funds are valued using a market approach at the closing price reported in an active market and therefore are considered Level 1 assets. Non-public

investment trusts are considered Level 2 assets and are valued using a market approach based on the underlying investments in the trust, which are publicly traded securities.

- **Fixed Income** – Fixed income investments include corporate bonds, U.S. dollar treasury bonds, and municipal bonds. These securities are priced on observable inputs using a combination of market, income, and cost approaches. These securities are considered Level 2 assets. Fixed income also includes a well-diversified bond portfolio structured as a pooled fund. This pooled fund is valued at NAV on a daily basis using a combination of market, income, and cost approaches. It is considered a Level 2 asset. U.S. dollar denominated bank loans are also a fixed income investment. Based on the price source of these instruments they are categorized as Level 3 assets.
- **Private Equity** – Private equity investments include interests in limited partnerships which are valued using information provided by external managers for each individual investment held in the fund. These holdings are considered Level 3 assets.
- **Real Estate** – Real estate investments consist of interests in limited partnerships. These holdings are either appraised or valued using investment manager's assessment of assets held. These holdings are considered Level 3 assets.
- **Other** – Other investments include two limited liability companies ("LLCs") with no public market. The LLCs were formed to acquire timberland in the northwest United States. These holdings are either appraised or valued using investment manager's assessment of assets held. These holdings are considered Level 3 assets.
- **Derivative Options and Swaps** – The Plan values derivative instruments using pricing models based on the prevailing forward exchange rate of the underlying currencies taking into account the counterparties' creditworthiness.

5. Derivative Instruments

The Plan (through the master trust) may enter into foreign currency forward exchange contracts primarily to hedge against foreign currency exchange rate risks on its U.S. dollar denominated investment securities. When entering into a forward currency contract, the Plan agrees to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an agreed future date. The Plan's net equity therein, representing unrealized gain or loss on the contracts, as measured by the difference between the forward foreign exchanges rates at the dates of entry in the contracts and the forward rates at the reporting date is included in the master trust's statement of net assets. Realized and unrealized gains and losses are included in the master trust's statement of changes in net assets. These instruments involve market risk, credit risk, or both kinds of risks in excess of the amount recognized in the statement of net assets. Risks arise from the possible inability of counterparties to meet the terms of their contracts and movement in currency and securities values and interest rates. The year-end balance is indicative of the average volume during the year.

The following table provides the aggregate fair value of assets and liabilities of the Plan's derivatives not under hedge accounting included in derivative financial instruments and foreign exchange contracts receivable/payable as reported in the statements of net assets available for benefits at December 31, 2019 and 2018:

	December 31, 2019			December 31, 2018

(a) Represents fair value of foreign currency contracts and underlying principal value for all other derivatives.

At December 31, 2019 and 2018, there were no derivatives accounted for as cash flow or fair value hedges and no amounts recognized in accumulated other comprehensive income. Accordingly, for the year ended December 31, 2019, there were no gains or losses related to derivatives recognized in, or reclassified from, other comprehensive income.

Gains and losses on derivative financial instruments are recognized as fair values change. Generally, gains and losses on the derivative financial instruments held would be offset by similar fair value gains and losses on the related securities. The following table provides changes in fair value of the Plan's derivatives not under hedge accounting included in net appreciation in fair value of investments as reported in the statement of changes in net assets available for benefits for the year ended December 31, 2019:

6. Accumulated Plan Benefits

A third party actuary determines the actuarial present value of accumulated plan benefits. The amount results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for termination after becoming vested, death, disability, withdrawal, and retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in determining accumulated plan benefits as of January 1, 2019 are as follows:

Interest Rate:	6.00%
Mortality Rates:	Aggregate 2006 base rates from the RP-2014 mortality study, projected generationally from 2006 using scale MP-2018
Average Retirement Age:	60

The interest rate assumption used to value accrued benefits was 6.00 and 6.50 percent in 2019 and 2018 respectively. The actuarial assumptions are based on the presumption that the Plan will continue. If the Plan is terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Marathon Petroleum Retirement Plan

Notes to Financial Statements

December 31, 2019 and 2018

The accumulated plan benefits information as of January 1, 2019 is as follows:

Actuarial present value of accumulated Plan benefits

Vested benefits	
Participants currently receiving payments	\$ 117,115,024
Other participants	1,197,950,627
Total vested benefits	1,315,065,651
Nonvested benefits	18,842,700
Total actuarial present value of accumulated Plan benefits	<u>\$ 1,333,908,351</u>

The change in the actuarial present value of accumulated plan benefits from last actuary valuation, to current actuary valuation date, is attributed to the following:

Actuarial present value of accumulated Plan benefits, as of January 1, 2018	\$ 1,354,460,979
(Decrease)/increase during the year attributable to:	
Benefit payments	(223,275,631)
Interest accumulation	80,897,740
Actuarial assumptions	9,649,828
Benefits accumulated, net of experience gain or loss or changes in data	112,175,435
Net change	<u>(20,552,628)</u>
Actuarial present value of accumulated Plan benefits, as of January 1, 2019	<u>\$ 1,333,908,351</u>

The computations of actuarial present value of accumulated Plan benefits were made as of January 1, 2019. Had the valuations been performed as of December 31, 2018, there would be no material difference.

7. Securities Lending Activities

The Plan participates in a securities lending program through the Trustee. Under this program, the Plan's investment securities are loaned to pre-approved investment brokers for a fee. Securities loaned are fully collateralized by cash, letters of credit, and acceptable securities. The initial collateral level is no less than 100% of the market value of securities lent for loans collateralized by assets that are denominated in United States dollars. However, if the collateral is for any loaned securities that are foreign securities that are principally cleared and settled outside the United States, or any other loaned securities, then the initial collateral is no less than 105% and 102% of the market value of the securities lent, respectively. Marking to market is performed every business day. All borrowers are required to provide additional collateral if the market value of securities lent falls below the required collateral level.

At December 31, 2019, securities with an aggregate market value of \$77,552,668, were on loan to brokers that provided cash collateral and \$10,695,541 were on loan to brokers that provided non-cash collateral. The loans were secured by cash collateral of \$79,602,889 and non-cash collateral of \$10,978,798 at December 31, 2019. For the year ended December 31, 2019 and 2018, the Plan earned \$229,376 and \$114,022, respectively, from securities lending.

Notes to Financial Statements

8. Funding Policy

The actuarial cost method used for funding of the Plan is the “projected unit credit” method of actuarial valuation. The funding policy provides that MPC will contribute amounts necessary to maintain the Plan on a sound actuarial basis and in accordance with the minimum funding requirements of ERISA plus any additional amounts which may be approved from time to time. No payments were made for the 2019 plan year. A payment of \$185 million was made on September 13, 2019 for the 2018 plan year. Minimum required funding has been met for the 2019 and 2018 plan years.

9. Risks and Uncertainties

The Plan invests in various investment securities which are exposed to various risks, such as interest rate, credit and overall market risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

10. Party-In-Interest Transactions

Fees paid by the Plan to the Trustee, in its capacity as the Plan’s Trustee, for 2019 and 2018 were \$457,744 and \$317,221, respectively.

The Trustee has been identified as parties-in-interest and these transactions are exempt from the prohibited transaction rules.

11. Plan Termination

Although it has not expressed any intent to do so, MPC has retained the right to amend, terminate, or otherwise modify the Plan, including the right to discontinue the contributions thereto, at any time, solely at the discretion of MPC. In the event of the termination of the Plan, the assets thereof shall be distributed in accordance with Section 4044 of ERISA. The Plan is a covered plan under the plan termination insurance provisions of ERISA, and the PBGC guarantees the payments of certain benefits thereunder. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants’ benefits. Whether a particular participant’s accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets, while other benefits may not be provided for at all.

12. Income Tax Status

The Internal Revenue Service (“IRS”) has determined, and informed MPC by letter dated January 25, 2017, that the Plan is qualified under Section 401(a) of the Internal Revenue Code (“Code”). Although the Plan has been amended since receiving the determination letter, the Plan Administrator and the Plan’s tax counsel believe that the Plan, as amended, is designed and is currently being operated in compliance with the applicable requirements of the Code.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2019 and 2018, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

13. Commitments

At December 31, 2019 and 2018, the Plan’s allocation of additional funding commitments related to various real estate and limited partnership investments in the Group trust amounted to \$10 million and \$14 million, respectively.

14. Subsequent Events

The COVID-19 pandemic and the responses of governmental authorities, companies and the self-imposed restrictions by many individuals across the world to stem the spread of the coronavirus have significantly reduced global economic activity. The COVID-19 pandemic has also led to significant volatility in financial markets and has affected, and may continue to affect, the market price of MPC’s common stock and other Plan assets.
