Retirement Plan for Union Employees of Smithco Engineering, Inc.

Notes to Financial Statements

February 29, 2020 and February 28, 2019

Note 1: Description of the Plan

The following description of the Retirement Plan for Union Employees of Smithco Engineering, Inc. (Plan) provides only general information. Additional information about the vesting and benefit provisions and the Pension Benefit Guaranty Corporation's (PBGC) benefit guarantee is contained in the Plan Document and *Summary Plan Description*, which are available from the Plan administrator.

General

The Plan is a noncontributory defined benefit plan that covers employees of the Company that are covered by a collective bargaining agreement with the Company, who have attained two months of service, and provides for retirement, death and disability benefits. The Plan is subject to provisions of the *Employee Retirement Income Security Act of 1974* (ERISA). Wells Fargo Bank, N.A. is the trustee of the Plan and serves as custodian.

Contributions

The Company has agreed to voluntarily contribute such amounts that are necessary to provide assets sufficient to meet the benefits to be paid to Plan members. The Company's present intention is to make contributions in amounts sufficient to annually fund the Plan's current service cost and the initial past service costs, plus interest on them, over a period of 30 years. The Plan has met the minimum funding requirements established by the federal government.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

Participants are entitled to pension benefits that are generally equal to a monthly factor of \$15 to \$28 multiplied by years of benefit service multiplied by a fraction, the numerator of which is the participant's years of benefit service and the denominator of which is the total years of benefit service the participant would complete if he or she were to continue to participate until his or her normal retirement age (65). The minimum monthly benefit amount utilized in the calculation is \$250. Employees that terminated employment prior to May 14, 2004, utilize different factors in the determination of their benefits based on the union contracts in place for such preceding years. In the event that a participant's frozen accrued benefit as of the last day of the Plan year beginning before January 1, 1994, is higher than the benefit calculated under the aforementioned formula, then the participant is eligible to receive such frozen benefit. Accrued benefits are payable as an annuity over the participant's lifetime or as a qualified joint and one-half survivor annuity. Participants may elect to begin receiving benefits upon attainment of early retirement age (60) and 10 years of service at a reduced amount.

Notes to Financial Statements

February 29, 2020 and February 28, 2019

Death and Disability Benefits

The spouse of a participant will receive a 50% survivor annuity, as defined in the Plan, upon the death of the participant. The surviving spouse annuity is equal to 50% of the participant's monthly benefit. This benefit is immediately payable to the spouse if the participant was already receiving benefits. If the participant was not already receiving benefits, payments to the spouse may commence as of the earliest date the participant would have received benefits.

Active employees who become totally disabled receive annual disability benefits that are equal to the equivalent normal retirement benefit they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age, at which time disabled participants will receive the normal retirement benefit computed as though they had been employed to normal retirement age.

Vesting

Upon completion of vesting service, but prior to becoming eligible for a normal retirement benefit, a participant is entitled to a deferred vested termination benefit equal to a percentage of their accrued retirement benefit. Eligible employees are fully vested upon completion of five years of vesting service.

Note 2: Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets and changes in net assets available for benefits, disclosure of contingent assets and liabilities and the actuarial present value of accumulated Plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation of Income Recognition

Investments are reported at fair value. Quoted market prices, if available, are used to value investments. Mutual funds are valued at quoted market prices, which represents the net asset value of shares held by the Plan at year-end.

Retirement Plan for Union Employees of Smithco Engineering, Inc.

Notes to Financial Statements

February 29, 2020 and February 28, 2019

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold, as well as held during the year.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Administrative expenses may be paid by the Company or the Plan, at the Company's discretion.

Accumulated Plan Benefits

Accumulated Plan benefits (Note 7) are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Present employees or their beneficiaries

Benefits under the Plan are based on employees' compensation during their last five years of credited service. The accumulated Plan benefits for active employees are based on their average compensation during the five years preceding the valuation date. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated Plan benefits.

Note 3: Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have

Retirement Plan for Union Employees of Smithco Engineering, Inc.

Notes to Financial Statements

February 29, 2020 and February 28, 2019

been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

- c. Other vested benefits insured by the PBGC, up to the applicable limitations discussed below.
- d. Vested benefits not insured by the PBGC.
- e. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 4: Certification of Plan Trustee

The Company has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, Wells Fargo Bank, N.A., the trustee of the Plan, has certified the following information included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments as shown in the statements of net assets available for benefits and related disclosures as of February 29, 2020, and February 28, 2019
- Investment income (loss) as shown in the statements of changes in net assets available for benefits for the years ended February 29, 2020, and February 28, 2019
- Investment information included in the accompanying schedule of assets (held at end of year) as of February 29, 2020, and schedule of reportable transactions for the year ended February 29, 2020

The Plan's independent auditors did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

Notes to Financial Statements February 29, 2020 and February 28, 2019

Note 5: Party-in-Interest Transactions

Party-in-interest transactions include those with fiduciaries or employees of the Plan, any person who provides services to the Plan, an employer whose employees are covered by the Plan, an employee organization whose members are covered by the Plan, a person who owns 50% or more of such an employer or employee association or relatives of such persons.

The Plan invests in a certain investment of the Plan trustee. Fees for administrative services paid by the Plan to the trustee were \$5,630 and \$6,302 for the years ended February 29, 2020, and February 28, 2019, respectively. The Company provides certain administrative services at no cost to the Plan.

Note 6: Disclosure About Fair Value of Plan Assets and Liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. The hierarchy comprises of three levels of inputs that may be used to measure fair value:

- Level 1** Quoted prices in active markets for identical assets or liabilities
- Level 2** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
- Level 3** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

Notes to Financial Statements February 29, 2020 and February 28, 2019

Recurring Measurements

The following table presents the fair value measurements of assets recognized in the accompanying statements of net assets available for benefits measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at February 29, 2020, and February 28, 2019:

Notes to Financial Statements

February 29, 2020 and February 28, 2019

Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a recurring basis and recognized in the accompanying statements of net assets available for benefits, as well as the general classification of such assets pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the years ended February 29, 2020, and February 28, 2019. The Plan had no liabilities measured at fair value on a recurring basis. In addition, the Plan had no assets or liabilities measured at fair value on a nonrecurring basis.

Investments

Where quoted market prices were available in an active market, investments were classified within Level 1 of the valuation hierarchy. If quoted market prices were not available, then fair values were estimated by using quoted prices of securities with similar characteristics or independent asset pricing services and models, the inputs of which are market-based or independently sourced market parameters, including, but not limited to, yield curves, interest rates, volatilities, prepayments, defaults, cumulative loss projections and cash flows. Such investments were classified in Level 2 of the valuation hierarchy. In certain cases where Level 1 or Level 2 inputs were not available, investments were classified within Level 3 of the hierarchy.

Note 7: Accumulated Plan Benefits

An independent actuary determines the actuarial present value of accumulated Plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Changes in the actuarial present value of accumulated Plan benefits were as follows:

 Actuarial present value of accumulated Plan benefits at March 1, 2019	 <u><u>\$ 2,141,858</u></u>

Significant assumptions underlying the actuarial computations are:

- Accounting Standards Codification Topic 960 interest rate: 5.50% per annum, compounded annually
- Mortality basis: Pri-2012 Mortality Table with Projection Scale MP-2020
- Retirement: At normal retirement age (65)
- Withdrawal rates: Table T-3 from the Actuary's Pension Handbook

Retirement Plan for Union Employees of Smithco Engineering, Inc.

Notes to Financial Statements February 29, 2020 and February 28, 2019

The foregoing actuarial assumptions are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

Note 8: Tax Status

The Plan obtained its latest determination letter on October 22, 2020, in which the Internal Revenue Service (IRS) stated the Plan and related trust, as then designed, were in compliance with the applicable requirements of the Internal Revenue Code and, therefore, not subject to tax.

Note 9: Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 10: Subsequent Events

Subsequent events have been evaluated through December 14, 2020, which is the date the financial statements were available to be issued.

Plan Amendment

Upon acceptance of the sponsor's IRS voluntary correction program filing in July 2020, an amendment was executed to align certain benefit formula provisions with the current collection bargaining agreement and to change the Plan sponsor. The amendment was executed to be retroactively effective January 1, 2017.

**Notes to Financial Statements
February 29, 2020 and February 28, 2019**

Change in Trustee and Custodian

Effective August 1, 2020, Massachusetts Mutual Life Insurance Company became the trustee and custodian of the Plan.

COVID-19

As a result of the spread of the COVID-19 coronavirus, economic uncertainties have arisen, which have resulted in significant volatility in the investment markets. The duration of these uncertainties and the ultimate financial effects cannot be reasonably estimated at this time.

Schedule SB, Part V – Statement of Actuarial Assumptions/Methods

Plan Name: Retirement Plan for Union Employees of Smithco Engineering, Inc. EIN: 74-1586257
Plan Sponsor: Hudson Products Corporation PN: 002

Summary of Actuarial Methods

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. A plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that a plan will be adequately and systematically funded. Annual contributions are also affected by a plan's "asset valuation method" (as well as plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the Plan's ERISA funding requirements and the FASB ASC Topic 960 values is the Unit Credit method. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The Plan's Normal Cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The Plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's benefits. This method is prescribed for ERISA funding requirements by the Pension Protection Act of 2006.

Asset Valuation Method

The Adjusted Market Value of Assets is equal to the Market Value of Assets as of the valuation date, except that employer contributions made after the valuation date are discounted back to the valuation date using the Effective Interest Rate for the prior plan year. The expected investment return for a plan year is based on the lesser of the expected rate of return on plan assets (currently 5.50% per year) or the applicable statutory interest rate for the year.

Amortization Method

For the Plan's ERISA funding requirements, incremental Funding Shortfall amounts are amortized over a seven-year period, and the related shortfall amortization payment is determined on the first valuation date following the plan year in which it arises based on the segment rates used for ERISA minimum funding purposes on that date, as prescribed under IRC Section 430.

CHANGES IN ACTUARIAL METHODS SINCE PRIOR VALUATION

Summary of Actuarial Assumptions

ECONOMIC ASSUMPTIONS

Interest Rates

The current funding and PBGC interest rates are as follows. The funding interest rates are prescribed under IRS regulations based on the Plan Sponsor's interest rate election. The PBGC interest rates are based on the Plan Sponsor's elected method for determining the premium funding target.

	Minimum Funding	Maximum Deductible	PBGC Premium
Segment 1 (0–5 years)	3.74%	2.43%	3.01%
Segment 2 (5–20 years)	5.35%	3.89%	4.11%
Segment 3 (20+ years)	6.11%	4.49%	4.41%
Effective Interest Rate	5.65%	4.17%	4.24%

ERISA minimum funding: 24-month average segment rates, using a four-month lookback period, adjusted to reflect the applicable segment rate stabilization corridor.

Maximum Deductible Contribution: 24-month average segment rates, using a four-month lookback period, but not adjusted to reflect segment rate stabilization.

PBGC premium: Spot segment rates for the month preceding the valuation date, but not adjusted to reflect segment rate stabilization. The standard method is used for the PBGC variable-rate premium calculation.

FASB ASC Topic 960: 5.50% per year. This is the assumed rate of return for the Plan's entire portfolio of assets, net of investment expenses. It is based on the Plan's investment policy, including target asset allocation, and Milliman's capital market expectations.

Asset Returns

ERISA minimum funding and Maximum Deductible Contribution: 5.50% per year. It is based on the Plan's investment policy, including target asset allocation, and Milliman's capital market expectations.

Compensation Increases

Not applicable.

Administrative Expenses

An administrative expense load equal to the prior year's actual expenses (rounded to the nearest \$1,000) was added to the Target Normal Cost.

If in any subsequent Plan Year the Plan ceases to be a Top-Heavy Plan, the above vesting schedule will continue to apply unless the Plan Sponsor elects, in writing, to revert to the original vesting schedule.
