Independent Auditor's Report

To the Administrative Committee of
Celina Aluminum Precision Technology, Inc. Defined Benefit Plan

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Celina Aluminum Precision Technology, Inc. Defined Benefit Plan (the "Plan"), which comprise the statements of net assets available for benefits - modified cash basis as of March 31, 2020 and 2019, and the related statements of changes in net assets available for benefits - modified cash basis for the years then ended, and the statement of accumulated plan benefits - modified cash basis as of April 1, 2019 and the related statement of changes in accumulated plan benefits - modified cash basis for the year then ended, and related notes to the financial statements.

Management's Responsibility for the Financial Statements

Plan management is responsible for the preparation and fair presentation of these financial statements in accordance with the modified cash basis of accounting described in Note 2; this includes determining that the modified cash basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Plan management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 5, which was certified by Northern Trust, the Trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the Plan administrator that the Trustee holds the Plan's investment assets and executes investment transactions. The Plan administrator has obtained a certification from the Trustee as of and for the years ended March 31, 2020 and 2019, that the information provided to the Plan administrator by the Trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient, appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Basis of Accounting

As described in Note 2, these financial statements are prepared on a modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the Trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Celina Aluminum Precision Technology, Inc. Defined Benefit Plan

Notes to Financial Statements

March 31, 2020 and 2019

1. Description of The Plan

The following description of the Celina Aluminum Precision Technology, Inc. Defined Benefit Plan (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

General

The Plan is a defined benefit plan covering substantially all employees of Celina Aluminum Precision Technology, Inc. (the “Company”). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

Employees with 5 or more years of service are entitled to annual pension benefits beginning at normal retirement age (65) equal to 0.75% of the annual compensation received each year of credited service. The Plan permits early retirement at ages 55-64. Employees may elect to receive their pension benefits in the form of a life annuity, a joint life and survivor annuity, or other optional forms. Benefits under \$1,000 are payable as a lump sum. As of September 2019, the Plan was amended to expand the amount of lump sum payment options.

Death Benefits

In the event of a vested married participant’s death prior to meeting the requirements for early retirement, it will be assumed the participant had terminated employment the day prior to death, survived to the early retirement date, elected a joint and one-half survivor benefit, and died the following day.

In the event of a vested married participant’s death after meeting the requirements for early retirement, the surviving spouse will receive one-half of the joint and one-half survivor benefits calculated on the day of the death.

Employee Contributions

Employee contributions are not allowed under the Plan.

Vesting

A participant becomes fully vested after 5 years of credited service.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared using the modified cash basis of accounting, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. Under this basis, contributions are recognized when received and expenses are recognized when paid. Consequently, contributions receivable and accounts payable are not included in the financial statements.

Use of Estimates

The preparation of financial statements in conformity with the modified cash basis of accounting requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

2. Summary of Significant Accounting Policies (Continued)

Investment Valuation and Income Recognition

Investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 6.

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income is recorded when received. Net investment gain (loss) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits are recorded when paid.

Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the Plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits – modified cash basis. In addition, certain investment related expenses are included in net investment income (loss) presented in the accompanying statements of changes in net assets available for benefits – modified cash basis.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on their total eligible compensation for the years ending on the date as of which the benefit information is presented (valuation date). Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of April 1, 2019 were (a) life expectancy of participants (the RP-2014 generational with blue collar adjustment for males and females), (b) retirement age assumptions (the assumed retirement ages range from 55 - 65), (c) salary projections (annual compensation is assumed to increase 2.5% per annum compounded annually), (d) termination rates (graduated rates based on 80% of the SOA Small Plan Table were used), and (e) investment return (an average rate of return of 6.8% was used). The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Celina Aluminum Precision Technology, Inc. Defined Benefit Plan

Notes to Financial Statements

March 31, 2020 and 2019

3. Funding Policy

The Plan's funding policy is for the Company to make quarterly contributions to the Plan in amounts that are estimated by the Plan's independent actuary, such that employees' benefits will be fully provided for by the time they retire. The Company's contributions for 2020 and 2019 exceeded the minimum funding requirement of ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

4. Plan Termination

In the event the Plan is terminated, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).
3. All other vested benefits (that is, vested benefits not insured by the PBGC).
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, a statutory ceiling exists, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

5. Investments

The following is a summary of the unaudited information included in the Plan's financial statements that was prepared by Northern Trust, the Trustee of the Plan and furnished to the Plan administrator (the Plan administrator has obtained certification from the Trustee that such information is complete and accurate).

Net investment income from interest in the American Honda Motor Co. Master Trust	<u>\$ 617,413</u>	<u>\$ 961,780</u>

6. Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying Statements of Net Assets Available for Benefits – Modified Cash Basis. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurements authoritative literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of inputs used to measure fair value under this accounting standard are described as follows:

- Level 1 - Quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.
- Level 2 - Observable inputs other than quoted prices included within Level 1. Inputs that are principally derived from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
- Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurement of the assets or liabilities. These include certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

Celina Aluminum Precision Technology, Inc. Defined Benefit Plan

Notes to Financial Statements

March 31, 2020 and 2019

6. Fair Value Measurements (Continued)

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets of the Master Trust measured at fair value. There have been no significant changes in methodologies used at March 31, 2020 and 2019.

Short-term investments

Level 2 assets are valued based on inputs other than unadjusted quoted prices in active markets of exchange that are observable for the asset, either directly or indirectly. Level 3 assets are valued based on unobservable inputs. Valuation techniques are provided by outside vendors such as Interactive Data or Standard & Poor's (S&P). Included in this amount is the cash collateral received as a result of securities lending activities.

Equity securities: U.S. companies

This category consists primarily of common stock. Level 1 assets represent unadjusted quoted prices in an active market or exchange.

Equity securities: Foreign

This category includes common stock and preferred stock. Level 1 assets are priced using the last trade, which are unadjusted and quoted in an active market or exchange.

Pooled funds equity

This category consists of units of commingled funds valued using the net asset value practical expedient (NAVPE) of the underlying funds minus liabilities, then divided by the number of the units outstanding. The NAVPE is accessible to the Plan and to all holders without limit.

Government and agency bonds: U.S.

The Level 2 assets are government, agency, and index linked bonds, and are valued using observable bid evaluation prices using observable market-based inputs.

Government and agency bonds: Foreign

This category includes bonds issued by foreign governments and agencies. Their purpose is the same as their U.S. counterpart. Assets are classified as Level 2 because corroborated, indicative quotes and observable market data are available.

U.S. state and local bonds

U.S. state and local bonds are issued by state, city, and other local governments, or their agencies to finance their operating or capital expenditures. A bid evaluation is used for Level 2. The sources used are the same as those under U.S. government and agencies.

Celina Aluminum Precision Technology, Inc. Defined Benefit Plan

Notes to Financial Statements

March 31, 2020 and 2019

6. Fair Value Measurements (Continued)

Corporate bonds

This category includes both U.S. and foreign corporate bonds. The Level 2 assets are various debt investments in U.S. funds and U.S. and foreign companies, and are valued using observable bid evaluation prices using observable market-based inputs. Any Level 3 assets are composed of corporate bonds for which there are no observable inputs and, where extrapolated, proprietary models and indicative quotes are used.

Pooled funds debt

This category consists of units of commingled funds valued using the NAVPE of the underlying funds minus liabilities, then divided by the number of the units outstanding. The NAVPE is accessible to the Plan and to all holders without limit.

Asset-backed securities

These are bonds or notes backed by financial assets. Institutional observable inputs are used with an income valuation technique provided by outside vendors.

Real estate

Real estate plan assets are invested in a U.S. commingled fund and are valued at NAVPE using proprietary models from the investment managers to arrive at estimated prices.

Private equity funds

Private equity funds are valued at NAVPE using proprietary models and uncorroborated data from the limited partnerships.

Hedge funds

Hedge funds generally hold liquid and readily priceable securities, such as public entities in long-short funds, exchange-traded derivatives in macro/commodity trading funds, and corporate bonds in credit-relative value funds. Hedge funds do not have readily available market quotations and are therefore valued using NAVPE per share provided by the investment advisor or third-party administrator.

Derivatives

This category includes equity contracts, interest rate forward and future contracts, interest rate option contracts, interest rate swap contracts, U.S. and foreign credit swap contracts, cash collateral, and other option contracts. Level 1 assets may be priced by the settlement price disseminated by future exchanges or the last trade price in an OTC market or exchange. Level 2 assets are priced using binding or corroborated, indicative quotes or evaluated prices using observable, market-based data. Level 3 liabilities are priced using uncorroborated indicative quotes provided by brokers, investment managers, or independent pricing providers.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Recent accounting pronouncement – In February 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-06, *Employee Benefit Plan Master Trust Reporting*. The amendment requires that a plan:

- Present its interest in the master trust and the change in its interest in the master trust in separate line items in the statement of net assets available for benefits and the statement of changes in net assets available for benefits, respectively.
- Disclose each general type of investment held by the master trust, and the dollar amount of the plan's interest in each of those general types of investment held by the master trust.
- Disclose the master trust's other assets and liabilities and the dollar amount of the plan's interest in each of those other assets and liabilities.
- Disclose the net appreciation or depreciation in the fair value of investments in the master trust and investment income for each period that a statement of changes in net assets available for benefits is presented.

6. Fair Value Measurements (Continued)

- Describe the basis used to allocate net assets and total investment income to the plan.
- Disclose its percentage interest in the master trust for each period that a statement of net assets available for benefits is presented. This disclosure applies only to a plan with an undivided interest in the master trust (that is, when the plan has a proportionate, rather than a specific, interest in the master trust). FASB ASU No. 2017-06 removes the requirement to disclose the percentage interest in the master trust for a plan with divided interests.

This standard is effective for fiscal years beginning after December 15, 2018, using a retrospective transition approach. The Plan adopted ASU 2017-06 and has presented its interest in the Master Trust in conformity with this amendment as of March 31, 2020.

In August 2018, the FASB issued ASU No. 2018-13 *Fair Value Measurement (Topic 820) Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. This ASU improves the effectiveness of the disclosure requirements to the financial statements.

The following disclosure requirements were removed from Topic 820:

- The amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy.
- The policy for timing of transfers between levels.
- The valuation processes for Level 3 fair value measurements.
- For nonpublic entities, the changes in unrealized gains and losses for the period included in earnings for recurring Level 3 fair value measurements held at the end of the reporting period.

The following disclosure requirements were modified in Topic 820:

- In lieu of a rollforward for Level 3 fair value measurements, a nonpublic entity is required to disclose transfers into and out of Level 3 of the fair value hierarchy and purchases and issues of Level 3 assets and liabilities.
- For investments in certain entities that calculate net asset value, an entity is required to disclose the timing of liquidation of an investee's assets and the date when restrictions from redemption might lapse only if the investee has communicated the timing to the entity or announced the timing publicly.

In addition, the amendments eliminate at a *minimum* from the phrase an entity shall disclose at a minimum to promote the appropriate exercise of discretion by entities when considering fair value measurement disclosures and to clarify that materiality is an appropriate consideration of entities and their auditors when evaluating disclosure requirements.

The standard is effective for all entities for fiscal years beginning after December 15, 2019. The amendments on changes in unrealized gains and losses, and the narrative description of measurement uncertainty should be applied prospectively for only the most recent interim or annual period presented in the initial fiscal year of adoption. All other amendments should be applied retrospectively to all periods presented upon their effective date. The Plan has adopted this standard effective March 31, 2020.

7. Interest in Master Trust

All of the Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and several other American Honda Motor Company, Inc. sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by Northern Trust Company.

At both March 31, 2020, and 2019, the Plan's interest in the net assets of the Master Trust was approximately 0.35%. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon average monthly balances invested by each plan.

7. Interest in Master Trust (Continued)

Investment income for the Master Trust is as follows:

	For the Years Ended March 31,	
	<u>2020</u>	<u>2019</u>
Investment income (loss)		
Net appreciation in fair value of investments	\$ 53,162,134	\$ 170,988,412

Plan interest in investment income of the Master Trust	<u>\$ 617,413</u>	<u>\$ 961,780</u>

The Master Trust participated in the trustee's Securities Lending Program for its U.S. Securities held in custody at the trustee to provide incremental income for the years ended March 31, 2020 and 2019. These securities are loaned by the trustee to third-party broker-dealers in exchange for collateral (cash and noncash), in compliance with Department of Labor collateral requirements. For U.S. securities, the collateral is at least 102% of the fair value of the borrowed securities. The collateral received (both cash and noncash) is invested in the trustee's Core U.S.A. Collateral Section Fund.

The fair value of the securities loaned that were collateralized by cash was approximately \$116,919,000 and \$358,292,000 at March 31, 2020 and 2019, respectively. Cash collateral of approximately \$120,463,000 and \$365,645,000 was held at March 31, 2020 and 2019, respectively, with offsetting liabilities. The fair value of the securities loaned collateralized by noncash collateral was approximately \$163,178,000 and \$54,921,000 at March 31, 2020 and 2019, respectively. Noncash collateral of approximately \$168,312,000 and \$56,644,000 was held at March 31, 2020 and 2019, respectively, with offsetting liabilities.

The Master Trust and the trustee each receive a percentage of net income derived from securities lending activities based on the types of securities. Income earned during the years ended March 31, 2020 and 2019, was approximately \$929,000 and \$1,273,000, respectively, which is included in interest and dividends, net of bank fees of approximately \$232,000 and \$318,000 for the years ended March 31, 2020 and 2019, respectively.

8. Tax Status

The Plan obtained its latest determination letter on April 4, 2012, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code.

Notes to Financial Statements

March 31, 2020 and 2019

8. Tax Status (Continued)

The modified cash basis of accounting requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Department of Labor or Internal Revenue Service. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of March 31, 2020, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; there are currently no audits for any tax periods in progress.

9. Risks and Uncertainties

The Plan invests in various investment options. These investment options are exposed to various risks, such as interest rate, credit and market risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the participants' account balances and the amounts reported in the statements of net assets available for benefits.

Additionally, the Master Trust has investments in foreign companies, which involve special risks and consideration not typically associated with investing in U.S. companies. These risks include devaluation of currencies, less reliable information about issuers, different securities transactions clearance and settlement practices, and possible adverse political and economic developments. Moreover, securities of many foreign companies and their markets may be less liquid and their prices more volatile than similar types of securities of comparable U.S. companies.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

10. Related-Party Transactions

Certain Master Trust investments are managed by Northern Trust, the Trustee. Any purchases and sales of these investments are open market transactions at fair value. Such transactions, while considered party-in-interest transactions under ERISA regulations, are permitted under the provisions of the Plan and are specifically exempt from the prohibition of party-in-interest transactions under ERISA.

In addition, Northern Trust facilitates securities lending activities with the Master Trust, which qualify as party-in-interest transactions under ERISA.

Total contributions per Schedule H of Form 5500	<u>\$ 2,154,000</u>

12. Subsequent Events

On January 30, 2020, the World Health Organization (WHO), announced a global health emergency stemming from a new strain of coronavirus that was spreading globally (the COVID-19 outbreak). On March 11, 2020, the WHO classified the COVID-19 outbreak as a pandemic, triggering volatility in financial markets and a significant negative impact on the global economy. As a result, the Plan's investment portfolio has incurred significant volatility in fair value since March 31, 2020. However, because the values of the Plan's individual investments have and will fluctuate in response to changing market conditions, the amount of losses, if any, that might be recognized in subsequent periods, cannot be determined. The full impact of the COVID-19 outbreak continues to evolve as of the date of this report.

The Plan's management evaluated the activity of the Plan through January 7, 2021 (the date the financial statements were available to be issued) and concluded that no other subsequent events have occurred that would require recognition in the financial statements or disclosure in the notes to the financial statements.

• Over 20 years	6.11%	4.50%
Other economic assumptions		
• Salary increases	2.50% per year	
• Expenses	\$145,000 added to current year normal cost	

Rationale for economic assumptions

- Discount rate – Prescribed by IRS and plan sponsor election.
- Salary increases – Per the plan sponsor, the long-term increase in salary is equal to inflation, as increases in labor rate are limited (by Honda mandate).
- Expenses – Best estimate of trust payable expenses for the coming year, rounded to the nearest \$5,000.

Demographic assumptions		
Mortality sponsor elections		
• Healthy participants	Section 430(h)(3) prescribed separate static annuitant and non-annuitant mortality tables. These tables are based on the SOA - RP-2014 mortality tables adjusted back to 2006 and with MP-2017 improvement scale.	
• Pre-1995 disabilities	Not Applicable.	
• Post-1994 disabilities	Not Applicable.	
Other demographic assumptions

40	7.52%
45	5.84%
50	4.48%
55	3.36%
60	2.40%

Rationale for demographic assumptions

- Mortality – Prescribed by IRS and plan sponsor election.
- Withdrawal – Termination rates were developed based on an experience study undertaken in 2015 using data from 2011 - 2015. The plan sponsor believes that this period will be representative of anticipated future experience.
- Retirement – The retirement rates are based on an experience study undertaken in 2015 using data from 2011 - 2015. The plan sponsor believes that this period will be representative of anticipated future experience.
- Benefit commencement age – The assumptions regarding benefit commencement age for future and current vested deferred are based on an experience study conducted in 2015 based on data from 2011-2015. The plan sponsor believes that this period will be representative of anticipated future experience.
- Form of payment – The optional payment elections are based on an experience study conducted in 2015 based on data from 2011- 2015. The plan sponsor believes that this period will be representative of anticipated future experience.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial methods for funding****Asset methods**

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum funding methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2019, the limit is \$225,000.

Benefits included or excluded

- **Most recent plan amendments included:** Amendment #2
- **Plan amendments excluded:** None.
- **Late retirement increases:**
 - *Active participants:* This valuation includes increases for current participants over age 65 if greater than the accrued benefit.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **Benefits Excluded:** None.

Schedule SB, Part V — Summary of Plan Provisions**Plan provisions specific to funding****Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
