## 1. DESCRIPTION OF PLAN:

The following description of the Charles F. Kettering Foundation Deferred Compensation Plan (the Plan) provides only general information. Participants should refer to the plan agreement for a more complete description of plan provisions.

### General

The Plan is a defined contribution 403(b) plan covering all eligible employees of the Charles F. Kettering Foundation (the Employer). An employee becomes a participant in the elective deferral portion of the Plan on their first day of employment. Employees who have attained age 21 and have completed one year of service, as defined by the Plan, are eligible for Employer contributions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

### Contributions

Participants may contribute up to 5% of eligible compensation, as defined, to the Plan, subject to certain limitations established by law. Employees are automatically enrolled in the Plan at 5% of eligible compensation upon obtaining age 30 and three years of service, unless the employee has elected to decline participation or has elected another percentage. Participants are also permitted to deposit into the Plan distributions from other qualified plans. Participants who have attained age 50 can make catch-up contributions.

The Plan provides for a discretionary Employer contribution. For the years ended December 31, 2014 and 2013, the discretionary Employer contribution was 10% of eligible compensation and 3% of eligible compensation in excess of the Social Security Taxable Wage Base under Section 230 of the Social Security Act in effect at the beginning of the Plan years.

### Participant accounts

Each participant’s account is credited with participant contributions, Employer contributions, and an allocation of plan earnings. Allocations of plan earnings are based upon the performance of the investment funds chosen by the participant. The benefit to which a participant is entitled is the benefit that can be provided from the participant’s vested account. The Plan’s investments are participant directed.

### Vesting

Participants are immediately vested in all contributions plus actual earnings thereon.

### Payment of benefits

Normal retirement age is age 65. Upon termination of service, death, disability, retirement, or reaching age 59 ½, distributions may be made to the participant or beneficiary in a single lump sum payment, partial payments, installment payments or a single life annuity contract.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

### Basis of accounting

The financial statements of the Plan are prepared using the accrual basis of accounting.

### Use of estimates

The presentation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

**Investment valuation and income recognition**
Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to full benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan.

The Plan holds an investment contract with Teachers Insurance and Annuity Association (TIAA). Contributions may be deposited into the insurance company's general accounts under unallocated contracts. The insurance company is contractually obligated to repay the principal and a specific interest rate for contributions deposited into their general accounts. A portion of the unallocated insurance contracts have surrender charges and other restrictions on withdrawals and are therefore, not considered to be fully benefit-responsive.

The Plan's investments are reported at fair. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Purchase and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

**Payment of benefits**
Benefit distributions are recorded when paid.

**Administrative expenses**
Certain administrative expenses are paid by the Employer and are excluded from these financial statements.

**Subsequent events**
The Plan evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements. The plan has evaluated subsequent events through January 21, 2021, the date the financial statements were available to be issued.

## 3. INFORMATION CERTIFIED BY THE CUSTODIAN:

The following information included in the accompanying financial statements and supplemental schedule as of and for the years ended December 31, 2014 and 2013 was obtained from data that has been prepared and certified as complete and accurate by TIAA-CREF, the custodian as defined by the Plan:

Investments
Net appreciation in fair value of investments
Interest and dividend income
Assets held at end of year

## 4. INVESTMENTS:

Investments at fair value that represent 5% or more of the Plan's net assets available for benefits at December 31:

| | | 2014 | 2013 |
|---|---|---|---|
| TIAA Traditional Annuity Contract - Non Benefit Responsive | $ | 11,009,052 | 10,932,783 |
| College Retirement Equities Fund Stock Account | | 9,629,403 | 9,956,020 |

During the years ended December 31, 2014 and 2013, the plan's investments (including gains and losses on investments bought, sold and held during the year) appreciated in values as follows:

| | | 2014 | 2013 |
|---|---|---|---|
| Registered investment companies | $ | 907,514 | 2,986,778 |
| Unallocated insurance contracts | | 354,968 | 342,248 |
| Pooled separate account | | 47,420 | 31,658 |
| | $ | 1,309,902 | 3,360,684 |

## 5. POOLED SEPARATE ACCOUNT:

The Plan has investments in a pooled separate account that primarily holds real estate. The account is credited with earnings on the underlying investment and charged for Plan withdrawals. The account is included in the accompanying financial statements at fair market value (See Note 6), as reported to the Plan by TIAA-CREF.

## 6. FAIR VALUE MEASUREMENTS:

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described as follows:

Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 — Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 — Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following are descriptions of the valuation methodologies used for assets measured at fair value:

- *Registered investment companies:* Certain registered investment company investments are in open-ended investments that are not traded on an active market and are valued at the net asset value (NAV) of the shares held by the Plan at year end. Accordingly, these registered investment companies are shown in Level 2. The investment objectives of the companies include the preservation of capital, or to attain certain income or balance performance levels based on different tolerance levels of risk. There are no unfunded commitments related to the registered investment companies' accounts and units are redeemable at net asset value on a daily basis. To reduce market timing and excessive trading, currently the College Retirement Equities Funds (CREF) lock out trading for 90 days if purchase, sale and repurchase with that account is made within a 60-day period with the exception of the CREF Money Market Account. The remaining registered investment companies have no restrictions.

  Certain registered investment company investments are mutual funds which are traded on an active market and valued at quoted daily prices. Accordingly, these registered investment companies are shown in Level 1.

- *Unallocated insurance contract*: The unallocated insurance contract that is not considered fully benefit-responsive is valued at fair value, which equals contributions made under the contract, plus interest credited, less participant withdrawals and administrative expenses. The valuation of the investment contract considers prices from prior transactions; therefore, additional disclosure of quantitative unobservable inputs is not necessary.

- *Pooled separate account:* The fair value of the TIAA Real Estate Account is based on the fair value of the underlying investments within the fund, which represents the net asset value of the units held by the Plan at year-end. The value of the underlying investments is determined by the investment manager using standard valuation techniques such as independent appraisals for real estate projects and discounted cash flow analysis for debt securities that consider various factors including current interest rates and the credit quality of the counterparty. The investment objective of the fund is a favorable long-term rate of return primarily through rental income and capital appreciation from real estate investments. Transfers are limited to one per calendar quarter. There are no unfunded commitments.

In determining the reasonableness of the methodology of Level 3 investments, the Charles F. Kettering Foundation Deferred Compensation Plan evaluates a variety of factors including review of existing contracts, economic conditions, industry development, and overall credit ratings.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014 and 2013. Classification within the fair value hierarchy table is based on the lowest level of any input that is significant to the fair value measurement:

| | Assets at Fair Value as of December 31, 2014 | | | |
|---|---|---|---|---|
| | Fair Value | Level 1 | Level 2 | Level 3 |

## 7. PARTY-IN-INTEREST TRANSACTIONS:

Certain Plan investments are managed by TIAA-CREF, the custodian as defined by the Plan. These transactions qualify as party-in-interest transactions.

## 8. RISKS AND UNCERTAINTIES:

The Plan invests in various investment securities. Investments are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

## 9. PLAN TERMINATION:

Although it has not expressed any intent to do so, the Employer has the right under the Plan to discontinue contributions at any time and to terminate the Plan subject to the provisions of ERISA.

## 10. INCOME TAX STATUS:

The Plan adopted a combination Annuity Contract Plan and Custodial Account Plan with TIAA-CREF. The Plan was established under Section 403(b) of the Internal Revenue Code (IRC) and has been designed to qualify under Section 403(b) of the IRC. The Plan is required to operate in conformity with the IRC to maintain the tax-exempt status for plan participants under Section 403(b).

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability if the plan has taken an uncertain position that more likely than not would not be sustained upon examination. The plan administrator has analyzed the tax positions taken by the plan, and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2011.

## 11. CONTINGENCY:

Plan management is in the process of correcting operational errors that may have occurred in the management of the Plan. Amounts due to the Plan for corrections or changes to the Plan document are not known at this time, however, they are not believed to be significant.
