Report of Independent Auditors

To the Administrator of Raytheon Non-Bargaining Retirement Plan

We have audited the accompanying financial statements of Raytheon Non-Bargaining Retirement Plan (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2019 and 2018, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2019 and changes therein for the year then ended and its financial status as of December 31, 2018, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

1. Plan Description

The following description of the Raytheon Non-Bargaining Retirement Plan (the "Plan") is for general information purposes only. Participants should refer to the Summary Plan Description or the Plan Document for a complete description of the Plan's provisions.

General

The Plan was established on December 18, 1997, to provide retirement benefits to eligible non-collectively bargained employees as part of the Raytheon Company's (the "Company") merger with the defense business of Hughes Electronics ("Hughes") on December 17, 1997. A proportionate allocation of the liabilities and assets of the preexisting Hughes Non-Bargaining Retirement Plan (the "Hughes Plan") was transferred to the Plan. Effective October 1, 2011, the Raytheon Subsidiary Retirement Plan was merged into and became a part of the Plan. Effective July 1, 2014, the Raytheon Marine Systems Retirement Plan was merged into and became a part of the Plan. On April 3, 2020 ("Company Merger Date"), the Company became a wholly-owned subsidiary of Raytheon Technologies Corporation ("RTC").

Investments are held in the Raytheon Master Pension Trust ("Master Trust"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). During the period covered by the annual report that these financial statements accompany, and until the Company Merger Date, the Plan was administered by the Plan Administrator (for purposes of Section 3(16) of ERISA) who was appointed by the Company's Vice President of Human Resources. From and after the Company Merger Date, the Plan Administrator of the Plan (for purposes of Section 3(16) of ERISA) is RTC and the Plan is administered by the Raytheon Technologies Corporation Plan Administration and Investment Committee, which operates pursuant to a vote of the RTC Board of Directors.

Benefits, Eligibility and Vesting

The Plan is a defined benefit plan covering certain employees of the Company. The Plan provides specified benefits to be paid from the net assets available for benefits. Each employee who was a participant in the Hughes Plan on December 17, 1997, continued as a participant in the Plan with all prior service recognized. Other salaried employees working in a non-collectively bargained unit in the defense business formerly operated by Hughes generally became eligible under this Plan following completion of a year of service. The level of benefits depends upon the status of each participant as a member of a specified legacy benefit structure.

Benefits are based principally upon years of service and compensation. Annual earnings in excess of the limit provided for that year by Section 401(a)(17) of the Internal Revenue Code ("Code") are not used in determining benefits under the Plan.

Effective January 1, 2007, employees who are either hired or rehired (after the expiration of any salary continuation payments) are not eligible to participate in the Plan. In addition, former employees who are rehired on or after March 1, 2007, and have received or are receiving payment from a Company-sponsored pension plan are not eligible to participate in the Plan.

Effective November 30, 2019, the Plan was amended to include lump sums paid under the severance plan covering terminations resulting from the Company Merger as pensionable earnings.

Non-Contributory Benefit Structure

Most salaried employees of the defense businesses formerly operated by Hughes, who were hired between August 1, 1990 and September 1, 1999, participate in the non-contributory benefit structure of the Plan.

After completing five years of service under the Plan, participants are entitled to monthly pension benefits, beginning at their Social Security retirement date, defined as a percentage of their final average monthly compensation multiplied by their years of service. The non-contributory portion of the Plan provides for normal retirement, early retirement, deferred vested, and death benefits. The standard form of retirement benefit to unmarried participants is a monthly payment beginning the month following retirement and continuing until death. The standard form of benefit to married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms of benefits are also available including a 10-year certain and continuous benefit, a 10- or 15-year period certain benefit, and 50%, 75%, and 100% contingent annuity.

Contributory Benefit Structure
Employees hired or rehired by Hughes on or before August 1, 1990, are eligible to participate in the contributory benefit structure of the Plan. Employees who, in 1990, chose to continue participation in the contributory benefit structure, may elect to contribute 3% of their pay to the Plan. Participants are always vested in their contributions and interest earned on the contributions.

After completing five years of service as an employee of Hughes or Raytheon Company, a participant is entitled to monthly pension benefits beginning at their normal retirement date based upon the greatest of three formulas (a career average formula, a minimum benefit formula, and a final average compensation formula). The pension under the contributory benefit may be adjusted annually to reflect changes in the cost of living (maximum annual increase or decrease of 4%). The contributory portion of the Plan provides for normal retirement, early retirement, deferred vested, and death benefits. The early retirement pension is the same as the age 65 pension for a retiree who is at least 55 at termination of employment and whose age plus continuous service (both at termination) total at least 75. The standard form of retirement benefit to unmarried participants is a monthly payment beginning the month following retirement and continuing until death. The standard form of benefit to married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms of benefits are also available including a 5-, 10-, or 15-year certain and continuous benefit, a 5-, 10-, or 15-year period certain benefit, 5-, 10-, or 15-year temporary modified cash refund annuity, and 50%, 66 2/3%, 75%, and 100% contingent annuity, and Social Security level income options.

Benefit Structure for Former Salaried Employees of General Dynamics
Employees who are former salaried employees of General Dynamics whose employment was transferred to Hughes on August 22, 1992, are eligible to participate in the General Dynamics benefit structure of the Plan.

After completing five years of service under the General Dynamics benefit structure, participants are entitled to monthly pension benefits beginning at their normal retirement date based upon the greatest of three formulas (a career average formula, a minimum benefit formula, and a final average compensation formula). The General Dynamics portion of the Plan provides for normal retirement, early retirement, deferred vested, and death benefits. The standard form of retirement benefit to unmarried participants is a monthly payment beginning the month following retirement and continuing until death. The standard form of benefit to married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms of benefits are also available.

Benefit Structure for Participants in the Former Raytheon Subsidiary Retirement Plan
This portion of the Plan provides for normal retirement, early retirement, deferred vested, and death benefits. Vesting occurs after a period of five years of service. The standard form of retirement benefit to unmarried participants is a monthly payment based upon 1% of compensation for each

year of benefit accrual service beginning the month following retirement and continuing until death. The standard form of benefit to married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms are also available.

Benefit Structure for Participants in the Former Raytheon Marine Systems Retirement Plan
This portion of the Plan provides for normal retirement, early retirement, deferred vested, disability, and pre-retirement death benefits. All participants with accrued benefits under this benefit structure are currently fully vested. Participants are entitled to monthly pension benefits beginning at age 65 equal to the greatest of (a) the accrued benefit available from the participant's account balance in the cash balance portion of the Plan, (b) $39 times the years of credited service, or (c) for members of other legacy plans, the benefit under the legacy plan as of that date. In the cash balance portion of the Plan, participants earn pay credits which are determined as a percentage of eligible compensation as defined by the Plan plus a supplemental percentage for such eligible compensation exceeding the Social Security wage base. Both percentages increase with the participant's years of service. An interest credit is applied to the cash balance account based on an interest rate benchmark described in the Plan Document. Participants may elect various optional forms of benefit payment.

Contributions
The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. Participants in the contributory portion of the Plan, except those on inactive status, are required to contribute to the Plan.

2. Summary of Significant Accounting Policies

Basis of Presentation
The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition
The Plan's interest in the Master Trust is stated at fair value. Net investment income (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan's interest in the Master Trust. See Note 5 for additional information.

Contributions
Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information. Participants in the contributory portion of the Plan contribute 3% of eligible compensation as defined under the Plan Document.

Benefit Payments
Benefit payments to participants are recorded when paid.

Administrative Expenses
All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management and performance fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master

Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Raytheon Master Pension Trust investment income (loss)."

Use of Estimates

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP"). This requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period, and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from the estimates included in the financial statements.

New Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-13, *Fair Value Measurement: Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement ("Topic 820")*, which eliminates the disclosure requirement of the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy and modifies certain disclosure requirements related to Level 3 recurring and nonrecurring fair value measurements. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. The adoption of this standard is not expected to have a significant impact on the Plan's financial statements or disclosures.

In February 2017, FASB issued ASU 2017-06, *Plan Accounting: Defined Benefit Pension Plans (Topic 960)*, *Defined Contribution Pension Plans (Topic 962)*, *and Health and Welfare Benefit Plans (Topic 965) - Employee Benefit Plan Master Trust Reporting*. ASU 2017-06 amends the master trust disclosure to require additional disclosures related to the Plan's interest in the Master Trust. This ASU is effective for fiscal years beginning after December 15, 2018, and is required to be applied retrospectively for all comparative periods presented. The adoption of this standard is reflected in the Plan's financial statements for the current year and retrospectively updated for the comparative period, and as a whole, did not result in a material change to the presentation.

3. Actuarial Present Value of Accumulated Pension Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable, under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries. The level of benefits depends upon the status of each participant as either in the contributory portion or the non-contributory portion or the benefit structure applicable to former salaried employees of General Dynamics of the Plan. Benefits are based principally upon years of service and compensation. Benefits payable under all circumstances (such as retirement, death, disability, and termination of employment) are included to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, Mercer, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for retirement, death, disability, or withdrawal) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2018 and 2017, are as follows:

Assumed rate of return on investments for accumulated benefits (discount rate)	7.5%
Mortality basis	Modified version of the RP-2014 employee/retiree no collar tables, which has the projection scale backed off to 2006 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period for given ages, but a 15-year downgrade for birth cohorts, and an ultimate improvement rate of 1.20% at age 64 to 0% at age 115.
Retirement	Several rates, varying by age from 55 to 70
Post-retirement cost-of-living adjustment	2.25% for contributory participants

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Assumption Changes
The changes in actuarial assumptions since the prior valuation of the Plan are as follows:

- The segmented interest rate basis for conversion to a certain only form of payment was changed to reflect the current interest rate environment.
- For conversion to certain only and lump sum forms of payment (as applicable), the mortality basis was changed to the 2019 static 417(e) mortality table prescribed by the IRS.
- The assumption for participants with deferred benefits past normal retirement age changed from assuming 40% to assuming 65% of these participants will be located and will commence benefits.

As of December 31, 2018, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested Benefits	
Participants receiving benefits	$ 3,180,879,350
Participants with deferred benefits	377,570,155
Active participants	1,417,606,641
Total vested benefits	4,976,056,146
Nonvested benefits	156,170,468
Total actuarial present value of accumulated plan benefits	$ 5,132,226,614
Employee contributions with interest as of December 31, 2018 (2.62% interest rate)	$ 221,217,760

The following is an analysis of changes in the present value of accumulated benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2017	$ 5,570,542,417
Benefits accumulated and non-investment (gains) losses	189,844,350
Increase for interest due to decrease in discount period	377,201,024
Benefits paid	(999,130,021)
Change in actuarial assumptions	(6,231,156)
Actuarial present value of accumulated plan benefits as of December 31, 2018	$ 5,132,226,614

4. Funding Policy

The employer's contributions are actuarially determined to fund the Plan's current normal costs on a current basis and to generally fund the existing unfunded liability related to qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act of 2006). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions above the ERISA minimum funding requirements may be made to the Plan. Contributions for the years ended December 31, 2019 and 2018, met the minimum funding requirements of ERISA.

Participants who choose the option to participate in the contributory portion of the Plan contribute 3% of their eligible compensation as defined under the Plan. Employee contributions are placed into a trust fund. If a participant does not earn a benefit under the Plan, any contributions made to the Plan plus interest, will be returned to the participant or designated beneficiary.

5. Master Trust

Summary Financial Information
The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Bank of New York Mellon ("BNY Mellon", the "Trustee"). The relevant Plan Committee (see below) regularly reviews the asset allocation and performance of the investments held in the Master Trust. The investment policy, as approved by the relevant Plan Committee, permits asset diversification to include a combination of cash and cash equivalents, publicly traded U.S. and international equity securities, private equity funds, fixed-income securities, private real estate funds, real assets, and other investments such as commingled funds, insurance contracts and derivatives.

During the period covered by the annual report that these financial statements accompany, and until the Company Merger Date, the relevant Plan Committee for purposes of the preceding paragraph was the Raytheon Company Investment Committee, which was appointed by the CEO of Raytheon Company. On the Company Merger Date, the Company became a wholly-owned subsidiary of RTC. From and after the Company Merger Date, the relevant Plan Committee for this purpose is the Raytheon Technologies Corporation Plan Administration and Investment Committee, which operates pursuant to a resolution of the RTC Board of Directors.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

As of December 31, 2019 and 2018, the Plan owned approximately 29% and 30%, respectively, of the fair value of the Master Trust net assets. The following table includes the Statements of Net Assets for the Master Trust, along with the Plan's interest in the Master Trust, as of December 31, 2019 and 2018.

Fair Value Measurements
The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required:

Level 1:	Unadjusted quoted prices in active markets for identical assets or liabilities.
Level 2:	Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
Level 3:	Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

Changes in Fair Value Levels
The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2019 and December 31, 2018, there were no material transfers in or out of Levels 1, 2, or 3.

The following tables summarize the fair value of investment assets and liabilities as of December 31, 2019:

Level 3 Investments

Level 3 investments consist mainly of unallocated insurance contracts. Unallocated insurance contracts represent less than 1% of the Master Trust assets and are valued at their contract price which approximates fair value.

A reconciliation of investments with significant unobservable inputs (Level 3) has not been provided as the amounts are immaterial.

The table below summarizes the fair value measurements of the investments in certain entities that are valued using net asset value as the practical expedient as of December 31, 2019.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values Master Trust investments as follows:

Cash and cash equivalents, are valued at amortized cost, which approximates fair value.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities, and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Investments in registered investment companies are valued at their last reported net asset value.

Investments in commingled funds, private equity funds, private real estate funds, and real asset funds are stated at fair market value, which primarily utilizes net asset values reported by the investment manager or fund administrator. Management reviews additional valuation and pricing information from fund managers, including audited financial statements, to evaluate the net asset values.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Valuation policies for derivative investments are disclosed in the Derivatives Policy paragraph.

Investment Income (Loss)
The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Raytheon Master Pension Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Derivatives Policy
The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) manage a portion of the Master Trust's portfolio against exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded derivatives such as equity and fixed income futures and option contracts and over-the-counter ("OTC") derivatives such as forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in OTC derivatives and forward foreign currency exchange contracts ("forward currency contracts"), there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. As needed for material exposures, the Master Trust manages these exposures through credit approvals, limits, monitoring procedures, and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

The following tables present the values of derivatives (not accounted for as hedging instruments) carried on the Statement of Net Assets for the Master Trust and Summary of Investment Earnings as of and for the year ended December 31, 2019:

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Currency Contracts
A forward currency contract is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to manage a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded within “Unrealized appreciation (depreciation) on forward foreign currency contracts” on the Statement of Net Assets for the Master Trust. When the forward exchange contract is settled, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was entered into and the value at the time it was settled or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to manage currency exposure, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

As of December 31, 2019 and 2018, the total aggregate face value of open forward currency contracts in the Master Trust was ($16,652,826) and ($12,243,177), respectively.

Futures Contracts
A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, interest rate, and commodities futures contracts to manage exposure to the market. Buying futures contracts increases the Master Trust's exposure to the underlying instrument. Selling futures contracts decreases the Master Trust's exposure to the underlying instrument held or mitigates the risk of changes in fair value of other investments held in the Master Trust.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. The accumulated balance of such receipts or payments is recorded within “Collateral held at broker for futures contracts” on the Statement of Net Assets for the Master Trust. The Master Trust will also record an unrealized gain or loss on futures contracts, which is calculated as the difference between the notional cost and the notional market value of open futures contracts. The unrealized gains or losses on are recorded within “Unrealized appreciation (depreciation) on futures contracts” on the Statement of Net Assets for the Master Trust.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction.

Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that the change in the value of the futures contract may not correlate exactly with the change in value of the corresponding investments held in the Master Trust.

At December 31, 2019, U.S. Government Bonds with a par value of $19,447,000 (fair value of $19,979,822) were pledged as collateral for open futures contracts. These bonds are restricted from trading until the futures contracts for which they are pledged as collateral are settled. A cash balance of $27,116,980 was pledged to cover margin requirements for open futures contracts.

At December 31, 2018, U.S. Government Bonds with a par value of $21,064,000 (fair value of $21,283,081) were pledged as collateral for open futures contracts. These bonds are restricted from trading until the futures contracts for which they are pledged as collateral are settled. A cash balance of $18,001,664 was pledged to cover margin requirements for open futures contracts.

A summary of the open futures contracts as of December 31, 2019 are presented below:

Option Contracts

The Master Trust may invest in option contracts. An option contract is a contract in which the writer of the option contract grants the buyer of the option contract the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain option contracts, including option contracts on indices, will require cash settlement by the Master Trust if the option contract is exercised. The Master Trust may enter into put or call option contracts in order to manage potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments, to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments, and/or to enhance potential gain.

When the Master Trust purchases or writes an option contract, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option contract purchased or written. Option contracts purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and ask prices or at the most recent ask price (bid for purchased option contracts) if no bid and ask price are available. OTC purchased or written option contracts are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is settled.

If the Master Trust writes a covered call option contract, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option contract period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option contract, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC option contracts have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased option contracts is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts and a change in value of the option contract may not correlate exactly with changes in the value of the underlying security.

As of December 31, 2019 and 2018, the Master Trust was not invested in any option contracts.

Swaps
The Master Trust may invest in interest rate swap contracts, currency swap contracts, and credit default swap contracts. During the fiscal year ended December 31, 2019, the Master Trust was invested in interest rate swap contracts.

The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified variable interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Trustee of the Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

As of December 31, 2019 and 2018, the Master Trust was not invested in any swap contracts.

6. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

(a) The assets comprising the Plan, including the net income (loss) of the Plan, shall be revalued at market by the Trustee.

(b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.

(c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the PBGC to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan Document for more information.

7. Certain Transactions Involving Related Parties and Parties-in-Interest

BNY Mellon, as the Trustee and Custodian of the Plan, incurs expenses in connection with these services to the Plan and Master Trust, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY Mellon. The Plan Sponsor, Raytheon Company, is a party-in-interest with respect to the Plan and incurs expenses in connection with the administration of the Plan and the Master Trust.

The following table is a summary of expenses paid to parties-in-interest for the years ended December 31, 2019 and 2018:

	Year Ended 2019	Year Ended 2018
Expenses specifically related to the Plan	$ 444,791	$ 237,869
Plan's allocation of expenses paid directly by the Master Trust	2,060,961	1,598,632

All of these transactions either fall outside the scope of or are exempt from ERISA’s prohibited transaction rules.

8. Tax Status

The Internal Revenue Service (the “IRS”) has determined and informed the Company by letter dated May 1, 2012, that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company’s benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures. The Company, on behalf of the Plan, applied for a new determination letter on January 29, 2016.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentation and disclosure of uncertain tax positions. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2019 and 2018. The Plan is subject to examinations by taxing jurisdictions; however there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to federal tax examinations for years prior to 2016.

9. Risks and Uncertainties

The Plan financial statements are based on the application of GAAP, which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are exposed to various risks, such as interest rate, market, and credit risks. See Note 5 for additional information with respect to investment risk.

10. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2019 through the date the Plan's financial statements were available to be issued, October 9, 2020.

In December 2019, a novel strain of coronavirus ("COVID-19") was reported to have surfaced in Wuhan, China. In January 2020, COVID-19 began to spread to other regions of the world, including, among others, North America, Europe and the Middle East, and in March 2020, was categorized as a pandemic by the World Health Organization. COVID-19 has adversely affected, and may continue to adversely affect, economic activity globally, nationally and locally. Following the COVID-19 outbreak, the values of certain investment securities have become more volatile. These economic and market conditions and other effects of the COVID-19 outbreak may continue to impact the volatility in the investments of the Master Trust. The extent of any impacts of the COVID-19 outbreak on the amounts reported in the 2019 statement of net assets available for benefits cannot be predicted at this time.

On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security (CARES) Act was passed by Congress. The CARES Act contains a provision that delays minimum required contributions for single-employer defined pension plans during 2020 to January 1, 2021. Accordingly, payment of the minimum required contribution to the Plan has been delayed to October 1, 2020.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

• Cost-of-living adjustment (post-retirement)	2.25% per year for Raytheon Nonbargaining Retirement Plan Rationale: The retiree cost-of-living adjustment is assumed to average 2.25% due to the fact that there is a 4% cap that is applied annually to the cost-of-living adjustment. The 25bp spread represents the expected impact of the 4% annual cap in the context of the 2.5% long-term inflation assumption.
• Expected investment return	The expected investment return is 7.50% per year but not greater than the third segment rate in effect for each year Rationale: The expected long-term return on assets assumption was developed based on the plan's current target investment allocation and a building block approach, which looked at the weighted average expected return for each asset class based on long-term capital market assumptions. The expected return for each asset class in composed of inflation plus a risk free rate of return, plus an expected risk premium for each asset class. The resulting return was then adjusted for administrative, investment management and trading expenses as well as recognition of alpha for active management.
• Expenses	$22,900,000 (added to current year target normal cost) Rationale: Based on actual administrative expenses incurred in the prior plan year increased with inflation, excluding the prior year PBGC expenses plus the estimated current year PBGC expenses.
• Actuarial equivalence for conversion to certain only forms of payment	The basis for valuation is based on whichever of the following bases that yields a greater lump sum value: • PBGC interest rates of 1.25% for plan year 2019, 1.75% for 2020, 2.25% for 2021, and 2.75% thereafter and 1971 GAM Table (blended 80% males, 20% females) or • Segmented interest rates of 3.10% for 5 years, 4.15% for the next 15 years and 4.46% thereafter for 2019; 3.75% for 5 years, 4.25% for the next 15 years and 4.50% thereafter for 2020; 4.25% for 5 years, 4.50% for the next 15 years and 4.75% thereafter for 2021; 4.75% thereafter for 2022 and beyond. Mortality is based on the 2019 static 417(e) mortality table prescribed by the IRS. Rationale (PBGC interest rates): Based on long-term historical trends in the PBGC rate which suggests a range of 40 to 200 basis points below the long government bond. The assumption for long government bond is periodically published by Mercer Investment Consulting's Capital Markets Outlook. Rationale (Segmented interest rates): Based on a long-term view of the three segment rates extrapolated by bootstrapping the forward rates from the current year's PPA full yield curve. Rationale (mortality): Based on the current year table prescribed by the IRS.
• Interest accumulation on employee contributions	5.00% per year for Raytheon Nonbargaining Retirement Plan participants only.

DEMOGRAPHIC ASSUMPTIONS

- Withdrawal

See tables of sample rates for 3 distinct groups of employees.

Rationale: Based on review of experience undertaken from 2012 to 2015 using data from 2012 – 2016 and the expectation that future withdrawal patterns and circumstances of the employer will not differ significantly from the period studied.

- Disability incidence

See table of sample rates: 1985 Pension Disability Mortality tables for Class 1 Occupations for males and females (PRA participants only)

Rationale: These assumptions are based on the benefit structure under the plan and the actuary's experience with similar plans. Annual review of the experience has shown that these assumptions provide similar results to the actual experience under the plan.

ACTUARIAL METHODS FOR FUNDING

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- **Participants included:** Conduent, Inc. provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.

- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. In addition, for retirees who have elected a contingent annuitant form of payment and for whom no beneficiary data was provided, one-third of future beneficiaries are assumed to die prior to receiving benefits.

- **Insurance contracts**: The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.

- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.

- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

- An annual interest rate of 5.27% (the 2019 effective interest rate) was applied for the period from the valuation date to earlier of the actual contribution date and the original contribution due date.

Schedule SB, Part V — Summary of Plan Provisions

SUMMARY OF MAJOR PLAN PROVISIONS – NONBARGAINING RETIREMENT PLAN

Effective date and plan year	Original plan: December 17, 1997 when Raytheon Company acquired the Defense Business of Hughes Electronics Corporation. Effective December 1, 2000, the Hughes Personal Retirement Account Plan merged into the Raytheon Nonbargaining Retirement Plan. Restated plan: January 16, 2015 Plan year: January 1
Status of the plan	The plan has ongoing benefit accruals but is closed to new entrants.
Significant events that occurred during the year	None
DEFINITIONS	
• Covered employees	Employees hired before the date on which payroll processing functions are transferred to Raytheon's payroll center.
• Participation	Completion of 12 months of Vesting Service.
• Employee contributions	3.0% of pay if covered under the formula for contributing participants.
• Vesting service	Continuous service from the employee's date of hire.
• Credited service	Total service accrued monthly from first of the month eligibility commenced.
• Pensionable earnings	Basic compensation subsequent to the effective date of the plan and prior to retirement date, including regular pay, bonuses, results-sharing, overtime pay, shift differential, sick leave pay, workers' compensation, vacation and holiday pay, and bereavement or leave pay, but excluding any other extraordinary compensation.
• Final average earnings	The aggregate Compensation prior to separation from service attributed to the five highest twelve month periods in the last ten years, or all twelve-month periods if less than five, in which a Participant had at least one hour of Benefit Accrual Service each month, divided by the applicable number of twelve-month periods. For General Dynamics salaried employees, the highest twelve month periods must be consecutive.
• Primary Social Security benefit	Estimated social security benefit, calculated using actual earnings when available, and estimating prior historical earnings using a 6% salary scale.
• Social Security normal retirement age	(i) For a participant born prior to 1938, the first day of the calendar month coincident with or next following his/her sixty-fifth (65th) birthday, (ii) For a participant born after 1937 and before 1955, the first day of the calendar month coincident with or next following his/her sixty-sixth (66th) birthday, and (iii) For a participant born after 1954, the first day of the calendar month coincident with or next following his/her sixty-seventh (67th) birthday.

Schedule SB, Part V — Summary of Plan Provisions

• Actuarial equivalence	**Contributing and noncontributing participants**: Interest rate used by the PBGC for valuing immediate annuities on the October 1 (or December 1, if less) preceding the plan year including the annuity start date and the 1971 Group Annuity Mortality Table 80% males, 20% females. **General Dynamics salaried employees**: • For nondecreasing annuities – 7% and the 1984 Uninsured Pension Mortality Table (including specified setbacks) • Other forms of payment – Interest rate used by the PBGC for valuing immediate annuities on the January 1 of the calendar year in which distributions commence and the 1984 Uninsured Pension Mortality Table (including specified setbacks) Actuarial equivalence is also subject to the "applicable interest rate" and "applicable mortality table" pursuant to 417(e)(3)(A)(ii) of the Internal Revenue Code for benefits that are not payable in the form of a nondecreasing annuity.
NORMAL RETIREMENT	
• Eligibility	First of the month coinciding with or next following the attainment of age 65.
• Benefit	**Contributing participants**: The benefit is the greatest of (i), (ii), or (iii) below: (i) Accrued benefit through December 31, 1975 plus 1% of the first $3,600 of compensation and 2% of compensation in excess of $3,600, for all compensation received after December 31, 1975. (ii) The product of (1) and (2): (1) Benefit Accrual Service (2) $156 plus 0.5% of Final Average Compensation (iii) The result of (1) minus (2): (1) The product of Benefit Accrual Service and 1.75% of Final Average Compensation (2) The product of Benefit Accrual Service projected to age 65 (maximum 33-1/3 years) and 1.5% of the reduced Primary Insurance Amount, multiplied by the ratio of Benefit Accrual Service to Benefit Accrual Service projected to age 65.
	Noncontributing participants: Benefit A offset by Benefit B, where: (i) Benefit A equals the sum of: (1) 1.5% of Final Average Compensation multiplied by years of Benefit Accrual Service (not in excess of 35 years) (2) 0.5% of Final Average Compensation multiplied by years of Benefit Accrual Service in excess of 35 years (ii) Benefit B equals 0.6% of Final Average Compensation (not in excess of Covered Compensation) multiplied by years of Benefit Accrual Service (not in excess of 35 years).

Schedule SB, Part V — Summary of Plan Provisions

	General Dynamics salaried employees: The monthly benefit is the greatest of (i), (ii), or (iii) below: (i) Accrued benefit through December 31, 1998, plus 1.75% (2.00% for Benefit Accrual Service in excess of 35 years) of the first $23,400 in base pay plus 2.00% of base pay in excess of $23,400 for all compensation received after December 31, 1998 (ii) The product of Benefit Accrual Service and 1.3333% of Final Average Compensation (iii) The product of Benefit Accrual Service and $312. **General Dynamics Hourly employees**: The monthly benefit is equal to the product of Benefit Accrual Service and: (i) $120 for NAPI and Fort Defiance participants (ii) $216 for Camden participants.
EARLY RETIREMENT	
• Eligibility	Age 55 and 5 years of vesting service.
• Benefit	**Contributing participants**: Actuarial equivalent of Normal Retirement benefit unless eligible for unreduced benefit under Rule of 75 (sum of attained age and continuous service is at least 75). **Noncontributing participants**: Accrued benefit reduced based on Actuarial Equivalence or 6% per year prior to Social Security Normal Retirement Age, whichever produces a greater amount. Unreduced early retirement available three years prior to Social Security Normal Retirement Age with ten years of continuous service.
	General Dynamics salaried employees: If eligible for unreduced final average pay benefit (10 years of continuous service), accrued benefit reduced 2.5% per year prior to age 62. If eligible for unreduced career average pay benefit (satisfaction of required points based on sum of attained age and continuous service), accrued benefit reduced by the lesser of 2.5% per year prior to Normal Retirement and 2.5% times excess of required over actual points. Otherwise, Actuarial Equivalent of Normal Retirement benefit.
LATE RETIREMENT	
• Benefit	Normal Retirement Benefit determined as of actual retirement date.

• Credited service	100% of the service with the Singer Company credited to the employee through August 31, 1988 during the time the employee made required contributions to the Singer Plan. Service measured on an elapsed time basis from the later of September 1, 1988 or date of hire with Hughes
• Pensionable earnings	Regular or base salary or wages (excluding overtime or bonus), including 401(k) salary deferrals. There is a $200,000 limit, indexed each year beginning in 2002 ($275,000 for 2018), on compensation used for benefit accrual purposes.
Estimated Singer Accrued Benefit	The estimated accrued benefit, whether or not fully vested, determined as of August 22, 1988 using the provisions of the Singer Plan payable at age 65 under the normal form of payment.
Account Balance	The notional value assigned to a participant's account based on the participant's initial account balance, pay-based credits (3% of Compensation before age 40 and 4% of Compensation after age 40) and increases based upon the Periodic Adjustment Percentage or Minimum Adjustment Percentage (a factor equal to 1/12th of the applicable annual rate of interest set forth in the plan document). As of November 30, 1995 (Training Systems employees) or June 30, 1996 (other employees), no additional pay credits will be made to a participant’s account, and interest adjustments will be based solely on the Minimum Adjustment Percentage.
Periodic Adjustment Percentage	The three-year average of the yield on one-year treasury constant maturities for October through December, as published in the Wall Street Journal, subject to plan maximums.

Schedule SB, Part V — Summary of Plan Provisions

Accrued Benefit	A monthly amount of benefit, payable in the form of a straight life annuity commencing at the participant's Normal Retirement Date (NRD) equal to one-twelfth of the amount determined in accordance with the formula [$(A/F)*(1+M)^n$] where: • A equals the participant's Account Balance; • F equals the Actuarial Factor (GAM-83 mortality and the plan's annuity purchase rate) at the later of the determination date and the participant's NRD; • M equals the Minimum Adjustment Percentage as of the determination date; • N equals the number of months, if any, from the determination date until the participant's NRD. The plan's annuity purchase rate is set each year and equals the yield on 10-year Treasury notes plus 100 basis points.
NORMAL RETIREMENT	
• Eligibility	First of the month coincident with or next following attainment of age 65 with 5 years of vesting service.
• Benefit	The Accrued Benefit payable at Normal Retirement.
EARLY RETIREMENT	
• Eligibility	Age 55 and 5 years of vesting service.
• Benefit	Actuarial equivalent based on the 10-year Treasury rate + 1% and the 1983 Group Annuity Mortality Table.
LATE RETIREMENT	
• Eligibility	Retirement after Normal Retirement eligibility.
• Benefit	The Accrued Benefit calculated as of late retirement.
DEFERRED VESTED	
• Eligibility	5 years of vesting service.
• Benefit	Accrued Benefit payable at age 65 or the actuarial equivalent, as described in the “Early Retirement” section above, of the participant's Account Balance as of the determination date.
DISABILITY	
• Eligibility	First of the month coincident with or next following Total and Permanent Disability provided the employee has at least 15 years of Vesting Service. Total and Permanent Disability means disability as determined by the Social Security Administration.
• Benefit	Accrued Benefit payable at Normal Retirement. Interest and pay-based credits continue to accrue during a participant's Disability Retirement until Normal Retirement, or, if earlier until recovery from disability. Accruals for all employees ceased as of the applicable freeze date, as described under Account Balance.

Schedule SB, Part V — Summary of Plan Provisions

PRE-RETIREMENT DEATH	
• Eligibility	If a vested married participant dies prior to Normal Retirement eligibility, the surviving spouse is entitled to a lifetime benefit as described below.
• Benefit	The actuarial equivalent of the participant's Account Balance, or if greater, 50% of the amount which would have been payable to the spouse had the participant terminated or retired on the first day of the month in which death occurred, having elected a 50% joint and survivor annuity. Benefits begin immediately if the participant was at least age 55. Otherwise, benefits begin on the first of the month when the participant would have attained the age of 55.
UNPREDICTABLE CONTINGENT EVENT BENEFITS	Not applicable.
FORM OF BENEFITS	
• Automatic form for unmarried participants	Single life annuity
• Automatic form for married participants	Actuarially equivalent 50% Joint & Survivor Annuity
• Optional forms	50% Joint & Survivor Annuity 75% Joint & Survivor Annuity 100% Joint & Survivor Annuity Lump Sum Single life annuity
• Optional form conversion factors	See Actuarial Equivalence section above.
MISCELLANEOUS	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2019, the limit is $280,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2019, the limit is $225,000.

Schedule SB, Part V — Summary of Plan Provisions

SUMMARY OF MAJOR PLAN PROVISIONS – RAYTHEON SUBSIDIARY RETIREMENT PLAN

Effective date and plan year	Original plan: December 17, 1997 Restated plan: January 31, 2011 Plan year: January 1
Status of the plan	The plan has ongoing benefit accruals but is closed to new entrants.
Significant events that occurred during the year	None
NORMAL RETIREMENT	
• Eligibility	First of the month coinciding with or next following the attainment of age 65.
• Benefit	1.0% of Compensation during each period of Benefit Accrual Service.
EARLY RETIREMENT	
• Eligibility	Age 55 and 5 years of Vesting Service.
• Benefit	Actuarial equivalent of the Normal Retirement Benefit. Actuarial equivalence for this purpose is based on the interest rate used by the PBGC for valuing immediate annuities for the October 1st preceding the plan year including the annuity start date and the 1971 Group Annuity Mortality Table blended 80% males, 20% females.
LATE RETIREMENT	
• Benefit	Normal Retirement Benefit determined as of actual retirement date.
DEFERRED VESTED	
• Eligibility	Termination for reasons other than death or retirement after completing 5 years of Vesting Service
• Benefit	Benefit accrued to date of termination payable at age 65 or the actuarial equivalent, as described in the “Early Retirement” section above, payable for commencement after age 55 and prior to age 65.
PRE-RETIREMENT DEATH	
• Eligibility	5 years of Vesting Service.
• Benefit	Benefit accrued to date of death, calculated as if the Participant had retired at the earliest retirement age and elected the 50% contingent annuitant option or, if already eligible for early retirement, elected to retire and had elected the 100% contingent annuitant option on the day before death. The benefit is actuarially reduced with benefit payments to the spouse commencing on the date when the Participant would have become eligible for retirement benefits.

Schedule SB, Part V — Summary of Plan Provisions

UNPREDICTABLE CONTINGENT EVENT BENEFITS	Not applicable.
FORM OF BENEFITS	
• Automatic form for unmarried participants	Single life annuity
• Automatic form for married participants	Actuarially equivalent 50% Joint & Survivor Annuity
• Optional forms	75% Joint & Survivor Annuity 100% Joint & Survivor Annuity 10 or 15 year Certain Only
• Optional form conversion factors	Optional forms are based on actuarial equivalence, i.e., the interest rate used by the PBGC for valuing immediate annuities for the October 1 preceding the plan year including the annuity start date and the 1971 Group Annuity Mortality Table blended 80% males, 20% females.
MISCELLANEOUS

Schedule SB, Part V — Summary of Plan Provisions

SUMMARY OF MAJOR PLAN PROVISIONS – MARINE SYSTEMS RETIREMENT PLAN

Effective date and plan year	February 28, 1997. Amended and restated as of April 30, 2007. Plan year: January 1
Status of the plan	The plan has ongoing benefit accruals but it is closed to new entrants
Significant events that occurred during the year	None
DEFINITIONS	
• Account balance	The actuarial equivalent of the participant's accrued benefit on April 1, 1992, plus pay and interest credits. Pay, credits are made monthly based on the following table: **Credited Service** / **Percent of compensation** / **Percent of compensation in Excess of the Social Security Wage Base** 0-4 / 3.5% / 3.5% 5-9 / 4.5% / 4.5% 10-14 / 5.5% / 5.5% 15-19 / 6.5% / 5.5% 20-24 / 7.5% / 5.5% 25+ / 8.5% / 5.5% Interest is credited monthly on the account balance based on the average rate for one year Treasury Bills constant maturities for the 12 months ending September 30.
• Accrued Benefit	Account balance divided by an appropriate factor as described in plan document: 225.0 for increasing life annuity, or an age 65 immediate annuity factor determined using applicable mortality and interest under Code section 417(e) for fixed life annuity.
• Actuarial equivalent	Based on 417(e) applicable interest and mortality. For purposes of determining the actuarial equivalent of the minimum or grandfathered benefits, the actuarial equivalent is determined using the grandfathered early retirement factor (see below) multiplied by an immediate annuity factor. For the minimum benefit, this cannot be less than the deferred annuity factor.

Schedule SB, Part V — Summary of Plan Provisions

<table>
<tr><td>• Grandfathered early retirement factor</td><td>Rule of 85: For Participants at least age 55 at termination and the sum of age plus credited service is at least 85, an amount computed as for normal retirement, reduced by the factor derived from the following for the straight life annuity for commencement before age 60:

Schedule SB, Part V — Summary of Plan Provisions

• Benefit	The greater of (1) or (2) below. (1) The accrued benefit available from the participant's account balance (2) Actuarial equivalent of minimum monthly benefit equal to $39 times years of service of credited service. Participants whose age plus service totaled 50 or more on April 1, 1992 are guaranteed to receive at least the actuarial equivalent of their prior plan benefit.
EARLY RETIREMENT	
• Eligibility	Age 55 with 5 years of credited service.
• Benefit	An amount computed as for normal retirement, reduced by the factor derived from the following for the straight life annuity: 1- .009 * (65 – Participant's Age)
DEFERRED VESTED	
• Eligibility	5 years of vesting service.
• Benefit	An amount computed as for normal retirement, reduced by factors described in the plan document.
PRE-RETIREMENT DEATH	
• Eligibility	Completion of 5 years of service but not yet receiving retirement benefits.
• Benefit	100% of the value of the participant's account balance.
UNPREDICTABLE CONTINGENT EVENT BENEFITS	Not applicable.
FORM OF BENEFITS	
• Automatic form for unmarried participants	The equivalent increasing life annuity
• Automatic form for married participants	The equivalent increasing 50% Joint & Survivor Annuity
• Optional forms	Benefits are optionally available in the following forms: • Life annuity • Increasing life annuity • Social Security level income option • 50% or 100% joint and survivor • Increasing 50% or 100% • Lump sum at 65 • Lump sum at 62 (retirees only) • Annuity with lump sum at 62 (retirees only)

Schedule SB, Part V — Summary of Plan Provisions

MISCELLANEOUS	
• Maximum compensation	Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2019, the limit is $280,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2019, the limit is $225,000.

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated effective January 16, 2015, are included in this valuation.

- **Most recent plan amendments included:** Not applicable.
- **Plan amendments excluded:** None.
- **Late retirement increases:**
  - *Active participants:* Current active participants are assumed to receive a suspension of benefits notice at their normal retirement date. After age 71, they are valued with both continuing accruals and the late retirement actuarial increase.
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued with retroactive payments from age 65.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

PLAN PROVISIONS SPECIFIC TO FUNDING

Additional Benefits Included or Excluded

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* N/A
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.

Schedule SB, Part V — Summary of Plan Provisions

  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.

- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

PLAN PROVISION CHANGES SINCE PRIOR VALUATION

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2018 to 2019.

Schedule SB, line 32 — Schedule of Amortization Bases

The total shortfall amortization charge is the sum of the individual shortfall amortization installment for each plan year covered under PPA. Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than $0.

SHORTFALL BASES					
YEAR ESTABLISHED		OUTSTANDING BALANCE	YEARS REMAINING		2019 INSTALLMENT
2018	$	91,153,358	6	$	16,809,093
2019		36,070,474	7		5,861,001
Total	$	127,223,832		$	22,670,094

Schedule SB, line 24 — Change in Actuarial Assumptions

ACTUARIAL ASSUMPTION CHANGES SINCE PRIOR VALUATION

Funding

- Expense load on the normal cost changed from $24,500,000 to $22,900,000 to reflect our best estimate of the current plan year's expenses.

- For conversion to certain only forms of payment, the segmented interest rate basis was changed from 2.50% for 5 years, 3.75% for the next 15 years and 4.50% thereafter for 2019; 3.25% for 5 years, 4.00% for the next 15 years and 4.50% thereafter for 2020; 3.75% for 5 years, 4.25% for the next 15 years, 4.50% thereafter for 2021; 4.50% for 5 years, 4.50% for the next 15 years and 4.50% thereafter for 2022 and beyond to 3.10% for 5 years, 4.15% for the next 15 years and 4.46% thereafter for 2019; 3.75% for 5 years, 4.25% for the next 15 years and 4.50% thereafter for 2020; 4.25% for 5 years, 4.50% for the next 15 years, 4.75% thereafter for 2021; 4.75% for 5 years, 4.75% for the next 15 years and 4.75% thereafter for 2022 and beyond.

- For conversion to certain only forms of payment, the lump sum mortality was changed from 2018 417(e) unisex mortality projected generationally based on the MP-2017 projection scale to the 2019 static 417(e) mortality table prescribed by the IRS

- The bonus smoothing percentage was updated from 13.5% to 14.3%.

- For terminated vested participants over age 65, the assumption that the participants will be located and will commence benefits was updated from 40% to 65%.
