INDEPENDENT AUDITORS' REPORT

To the Administrator of the ProFusion Industries Marietta Plant Pension Plan:

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the ProFusion Industries Marietta Plant Pension Plan, which comprise the statements of net assets available for benefits as of September 30, 2020 and 2019, and the related statements of changes in net assets available for benefits for the years then ended, and the statement of accumulated plan benefits as of October 1, 2019, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by First State Trust Company, the trustee of the Plan, except for comparing the information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended September 30, 2020 and 2019, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient, appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matter

The supplemental Schedule of Assets (Held at End of Year) as of September 30, 2020 and Schedule of Reportable Transactions for the Year Ended September 30, 2020 are required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 and are presented for the purpose of additional analysis and are not a required part of the financial statements. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we do not express an opinion on the supplemental schedules referred to above.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements and supplemental schedules, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

PROFUSION INDUSTRIES MARIETTA PLANT PENSION PLAN
NOTES TO FINANCIAL STATEMENTS

1. THE PLAN

The following description of ProFusion Industries Marietta Plant Pension Plan (the Plan) is provided for general information purposes. Participants should refer to the plan document for more complete information.

General

The Plan is a defined benefit, noncontributory pension plan covering eligible employees of ProFusion Industries, LLC (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The Company is the Plan's sponsor and administrator. The assets of the Plan are maintained, and transactions therein are executed by the trustee. Certain expenses pertaining to administration of the Plan are paid from the assets of the Plan. For a complete description of plan provisions, reference should be made to the plan document, which is available to all plan participants.

Participation

Employees became eligible to participate in the Plan if they were included on the seniority list of the Company's Marietta plant and were covered by the agreement between the Company and the collective bargaining agreement. The Plan was frozen as to participation effective March 15, 2013.

Vesting Service

Participants become fully vested after 5 years of vesting service or upon attainment of age 65 or suffering of a disability while employed.

Pension Benefits

The Plan generally provides for pension benefits upon retirement at age 65 or earlier if a participant has completed the early retirement requirements, is eligible for disability retirement, terminates after completing vesting requirements, or succumbs to death, as defined. The monthly normal retirement benefit is based upon calculations considering years of credited service and benefit levels, as defined in the Plan. The Plan was frozen as to benefit accruals as of March 15, 2013.

As defined by the Plan, participants may receive the value of their accumulated plan benefits on a 100% or 50% joint and survivor basis, if the employee is married, on a straight-life basis otherwise, or through a lump sum.

An employee electing early retirement benefit payments to commence prior to the normal retirement date shall have the accrued benefit reduced as defined in the Plan.

Plan Termination

The plan document provides that the Company reserves the right to amend or terminate the Plan, in whole or part. In the event the Plan is terminated, the net assets of the Plan will be allocated as prescribed by ERISA regulations.

The Pension Benefit Guaranty Corporation (PBGC) insures certain benefits under the Plan if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date

of the Plan's termination subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid and the level and type of benefits guaranteed by the PBGC. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Financial Statements

The financial statements are prepared on the accrual basis of accounting.

Investments

Gains and losses on sales of securities were based on the actual cost of securities. Dividend income was recorded on the ex-dividend date. Interest from other investments was recorded as earned.

The net investment gain on the statements of changes in net assets available for benefits reflects the net gains and losses on the investments.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Benefit Payments

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in accordance with U.S. generally accepted accounting principles (US GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

3. FUNDING POLICY

The Company contributions represent amounts necessary to provide the Plan with assets sufficient to fund participants' benefits based upon actuarial calculations. Investment income is used to adjust future contributions that would otherwise be required to provide for the defined benefits under the Plan.

Under the funding rules for qualified defined benefit pension plans, plan sponsors generally must make any minimum required contributions within 8 ½ months after the plan year. However, in response to the COVID-19 pandemic, Congress passed the Coronavirus Aid, Relief and Economic Security (CARES) Act on March 27, 2020. The CARES Act extended the deadline for making any

minimum required contributions due in 2020 (both annually and quarterly contributions) until January 1, 2021, but required interest be added to these delayed contributions.

Because of the CARES Act, the Company delayed the required minimum contributions for the previous plan year. The employer contribution receivable shown on the Statements of Net Assets Available for Benefits as of September 30, 2020 and 2019, includes the delayed required minimum contribution balance owed to the plan for the previous year of \$155,136 and \$150,432, respectively. The increase of this balance at September 30, 2020 is due to accrued interest required on the delayed minimum contribution. The Company met the minimum funding requirements of ERISA in 2020 and 2019 with the passage of the CARES Act.

4. INFORMATION CERTIFIED BY THE TRUSTEE

The trustee of the Plan has certified to the completeness and accuracy of the amounts reported as investments, net investment gain (loss) and interest and dividends on the Plan's financial statements and the accompanying supplemental schedules of assets (held at end of year) and reportable transactions. Certain investments are units of funds managed by the trustee, and therefore, these transactions qualify as party-in-interest transactions.

5. FAIR VALUE MEASUREMENTS

Accounting Standard Codification (ASC) 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1	Inputs to the valuation methodology are unadjusted quoted market prices for identical assets or liabilities in active markets that the Plan has the ability to access.
---------	--

Level 2	Inputs to the valuation methodology include:
---------	--

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specific (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3	Inputs to the valuation methodology are unobservable and significant to the fair value measurement.
---------	---

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Common and preferred stock: Valued at the closing price reported on the active market on which the individual securities are traded.

Corporate obligations and government securities: Valued based on prices for similar securities. Securities are traded on an active market, but are not traded on a daily basis.

Mutual funds: Valued at the net asset value of shares held by the Plan at year end.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of September 30, 2020 and 2019:

	Level 1	Level 2	Level 3	Total

6. ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered.

Accumulated plan benefits include benefits expected to be paid to: (a) present employees or their beneficiaries, (b) retired or terminated employees or their beneficiaries and (c) beneficiaries of employees who have died.

The actuarial present value of accumulated plan benefits is determined by the actuary and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

The significant assumptions underlying the actuarial calculations as of October 1, 2019 and 2018 are as follows:

Funding method	Traditional Unit Credit Method
Discount rate (minimum contribution purposes)	6.50%
Interest Rate	Effective Interest Rate was 5.42% in 2019 and 5.61% in 2018 based upon IRS-Prescribed Three-Segment Rates
Mortality basis	\$430(h) Static Separate Annuitant/Non-Annuitant Mortality Tables
Normal retirement age	100% by age 65

Additional assumptions used in the actuarial computations include administrative expenses, and marriage, disability, and withdrawal rates.

7. TAX STATUS

The Plan obtained its latest determination letter on October 5, 2012 in which the Internal Revenue Service (IRS) stated that the Plan, including amendments through January 18, 2012, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan's management and legal counsel believe that the Plan is being operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of September 30, 2020 and 2019, there are no uncertain positions taken, or expected to be taken, that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by the IRS; however, there are currently no IRS audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2017.

8. SUBSEQUENT EVENTS

Plan management evaluated subsequent events through July 14 , 2021, the date which the financial statements were available to be issued. There were no material subsequent events that required recognition or disclosure in these financial statements.

SUMMARY OF ASSUMPTIONS

Funding Discount Rates IRS-Prescribed Three-Segment Rates, for the fourth month prior to the valuation date (June).

	Non-Stabilized	Limited to 25-Year Corridor
Segment 1:	2.74%	3.74%
Segment 2:	3.96%	5.35%
Segment 3:	4.44%	6.11%

The "Limited to 25 Year Corridor" rates are adjusted by the applicable maximum and applicable minimum percentages of the 25-year average segment rates, as set forth in the Highway and Transportation Funding Act of 2014 ('HATFA-14') for use in Minimum Required Contribution calculations. The IRS Maximum Deductible Limit Calculations use the rates from the "Non-Stabilized" column above.

The interest rates used to value the Target Liability for determining the minimum and maximum contributions are prescribed by law and based on elections made by the Plan Sponsor.

Effective Interest Rate The Effective Interest Rate (EIR) for the current Plan Year is 5.42%. For the prior Plan Year, the EIR was 5.61%.

The EIR is the single rate of interest which, if used to determine the Funding Target, would result in the same Funding Target determined using the Plan Sponsor's above-elected discount rates. The EIR is used to discount contributions for minimum funding requirements and to accumulate excess contributions to the end of the year.

Funding Expected Return on Assets The Expected Return on Assets (EROA) used in the calculation of the Actuarial Value of Assets is the lesser of (a) or (b), below:

(a) The expected long-term rate of return on assets based on policy trust allocations; or

(b) The third segment rate in the IRS-prescribed three-segment rate assumption, based on the elections made by the Plan Sponsor for minimum funding purposes.

The results are as follows:

Plan Year	Assumption (a)	Seg. III (b)	EROA (smaller of (a) or (b))
2018	6.65%	6.29%	6.29%
2017	6.65%	6.48%	6.48%

The Expected Return on Assets assumption for the calculation of Actuarial Value of Assets is based on input by the Plan's investment advisors and reflects their view of the long-term rate of return on assets, based on current and target asset allocations at each valuation date.

Funding Administrative Expenses Administrative expenses of \$300,234 were estimated to be paid from the trust in the current Plan Year and were included in the Normal Cost.

All administrative expenses are paid by the Employer.

Salary Scale None.

An experience analysis with respect to salary scale was not performed. As a result, the current assumption has been selected based on observations of recent compensation, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Inflation None.

Funding Mortality

§430(h) Static Separate Annuitant/Non-Annuitant Mortality Tables for the Current Plan Year.

Disability Mortality is assumed to be the same as that used for Healthy Retirees.

The mortality assumptions used to value the Target Liability for determining the minimum and maximum contributions are prescribed by law and based on elections made by the Plan Sponsor.

Withdrawal Rates

Benefit Commencement Age

Future deferred vested participants are assumed to commence at the Plan's Normal Retirement Age, or valuation age, if later.

An experience analysis with respect to termination was not performed. As a result, the current assumption has been selected based on observations of recent terminations, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Disability Incidence

Participants are assumed to become disabled in accordance with the following, with annual rates varying by age: RJF Marietta Disability Rates. Below is a table of representative rates.

Age	Rate
25	0.060%
30	0.070%

Benefit Commencement Age

Future disabled participants are assumed to commence immediately upon eligibility.

An experience analysis with respect to disability was not performed. As a result, the current assumption has been selected based on observations of recent disablements, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Retirement Rates

Rates varying by age:

Age	Rate
62	5%
63	2%

Benefit Commencement Age

Active retirements are assumed to commence at these ages according to the rates shown.

An experience analysis with respect to retirement performed in 2009. The current assumption has been selected based on the prior experience analysis as well as observations of recent retirements, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Spousal Assumptions 85% of males and 50% of females are assumed to be married.

Females are assumed to be the same age as males.

Form of Payment All benefits are assumed to be paid in the Normal Form defined under the terms of the Plan.

An experience analysis with respect to form of payment was not performed. As a result, the current assumption has been selected based on observations of recent form of payment elections, the actuary's experience with plans of a similar size, plan design, workforce composition, and discussions with the Plan Sponsor.

Changes in non-required funding assumptions since the prior valuation None.

SUMMARY OF METHODS

Actuarial Cost Method

The Pension Protection Act (PPA) requires the calculation of the Target Liability and Target Normal Cost. The Target Liability represents the present value of benefits accumulated as of the valuation date. The present value is calculated by projecting future payments of the accrued benefit, adjusting for probability of receipt according to demographic assumptions, and discounting the payments back to the valuation date using the segment interest rates. Payments expected within five years of the valuation date are discounted using the first segment rate, payments expected at least five but within 20 years of the valuation date are discounted using the second segment rate, and payments expected at least 20 years from the valuation date are discounted using the third segment rate. The calculation of the Target Normal Cost is identical, except that the future payment stream is based on the benefit expected to accrue during the plan year.

Asset Method

We used financial data submitted by the trustee as of the valuation date without further audit. We have reviewed the information for internal consistency, and we have no reason to doubt its substantial accuracy.

Funding Actuarial Value of Assets Method

For funding purposes, Actuarial Value of Assets is a smoothed market value assets adjusted by the applicable percentage of gain or loss calculated in each year during the smoothing period. The gain or loss is the difference between the current year's market value, and prior year's market value brought forward with contributions, benefit payments, and administrative expenses, all adjusted at the expected interest rate to the valuation date. The expected interest rate for each year is the lesser of the expected rate of return and the third segment rate. The applicable percentage is 66-2/3% for the year preceding the valuation date, and 33-1/3% for the second year preceding the valuation date. The Actuarial Value of Assets will be adjusted to be no greater than 110% and no less than 90% of the market value of assets as of the current year valuation date.

Accrued contributions are discounted back to the valuation date at the prior year's effective interest rate.

Changes in methods since the prior valuation

None.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
