SCHEDULE SB ATTACHMENTS

Employees

It is assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to commence benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on the date of decrement.

Funding Target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during the plan year.

Asset method

The asset method is market value. Under this method, valuation assets are equal to the market value of assets as of the valuation date plus the discounted present value of contributions expected to be made after the valuation date at the prior plan year effective PPA interest rate.

Tax policy

The actuarial valuation performed for the plan year ending December 31, 2020 is used to determine the maximum deductible contribution for the tax year ending December 31, 2020.

SCHEDULE SB ATTACHMENTS

Benefits not included in valuation

The Pre-Retirement Survivor Benefit is not valued for Vested Terminated Participants. To cover the cost of such benefit the pension for Vested Terminated Participants is reduced.

Valuation of Deferred Vested Participants Past Normal Retirement Age

The valuation approach for deferred vested participants over age 65 varies depending on the available information. If the participant is known to have commenced payment during the valuation year, the commencement date and benefit amount are reflected in the valuation, along with any lump sum payment of retroactive benefits. If the participant is considered to be located but not known to have commenced, the benefit is valued with an actuarial increase applied from normal retirement age to assumed commencement age one year after the valuation date. If the participant is not located, the liability reflects the combination of an actuarial increase and the probability of survival to the current age, and includes the value of retroactive payments.

Unpredictable Contingent Events

No events are considered to have more than a de minimis likelihood of occurring.

Sources of Data and Other Information

Data Sources

Employees

It is assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to commence benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on the date of decrement.

Target normal cost

Present value of benefits expected to accrue during the plan year.

Benefits not included in valuation

The Pre-Retirement Survivor Benefit is not valued for Vested Terminated Participants. To cover the cost of such benefit the pension for Vested Terminated Participants is reduced.

Valuation of Deferred Vested Participants Past Normal Retirement Age

The valuation approach for deferred vested participants over age 65 varies depending on the available information. If the participant is known to have commenced payment during the valuation year, the commencement date and benefit amount are reflected in the valuation, along with any lump sum payment of retroactive benefits. If the participant is considered to be located but not known to have commenced, the benefit is valued with an actuarial increase applied from normal retirement age to assumed commencement age one year after the valuation date. If the participant is not located, the liability reflects the combination of an actuarial increase and the probability of survival to the current age, and includes the value of retroactive payments.

Unpredictable Contingent Events

No events are considered to have more than a de minimis likelihood of occurring.
