(1) Description of Plan

The following is a brief description of the Cargill, Incorporated and Associated Companies Pension Plan for Union Represented Hourly Wage Employees (the Plan). Participants should refer to the Plan document for more complete information.

(a) General

The Plan is a defined-benefit pension plan designed to provide benefits to eligible employees. The Plan sponsor is Cargill, Incorporated (the Company) and the Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan includes all union-represented hourly employees of the Company, or of an associated company whose participation is required by a collective bargaining agreement. Employees are eligible to participate in the Plan on the date they are hired in an eligible position.

The Plan is administered by the Company. The Cargill, Inc. People Team has overall responsibility for plan design and operations except to the extent it has delegated such responsibilities. Plan investment oversight is provided by the Cargill, Inc. Pension Investment Committee (the Committee), which has responsibility for establishing investment strategy and monitoring investment performance. Both Cargill, Inc. People Team and Cargill, Inc. Pension Investment Committee report to the Cargill, Inc. Board of Directors. Bank of New York Mellon serves as the trustee of the Plan (the Plan Trustee). Transactions are executed by the Trustee, as directed by the Committee in its capacity as Plan Administrator.

On June 1, 2013, the Cerestar USA, Inc. Pension Plan (the Cerestar Plan) was merged into the Plan. On this date, assets of the Cerestar Plan were transferred to the Plan. Benefits earned under the Cerestar Plan were maintained.

The Cerestar Plan covers substantially all eligible production and maintenance employees covered by the collective bargaining agreement between Cerestar USA, Inc. and the Oil, Chemical, and Atomic Workers International Union, Local 7-210 (the Union) who are employed at Cargill, Incorporated's Hammond, Indiana plant. Under the terms of the Cerestar Plan, participants are entitled to a monthly benefit upon reaching age 62, the normal retirement age. Any participant with five years of continuous service is entitled to a benefit. Participants who qualify may elect to receive a reduced early retirement benefit. Some participants may be eligible for certain death benefits if the participant meets certain requirements. The benefit rate used to calculate the participants final benefit will be based on the rate that is negotiated with the Union that is in effect at the time of the employee's termination.

(b) Funding Policy

The funded status of the Plan is continually monitored by the Company. The Company makes contributions to the Plan sufficient to provide the Plan with assets with which to fund pension benefits to Plan participants. Contributions to the Plan are determined by the actuary using the Unit Credit method. The Company's contributions for 2020 and 2019 equaled or exceeded the minimum funding requirements of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Company made no contribution in 2020 and a $30,000,000 contribution in 2019.

(Continued)

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

(c) Pension Benefits

Under the terms of the Plan, participants are entitled to monthly benefits upon reaching age 65, the normal retirement age. Any participant with five years of 1,000 hours of service per year is entitled to a vested benefit. Participants who qualify may elect to receive a reduced early retirement benefit. The retirement benefit is computed by multiplying the years of credited service by the benefit level stated in the Plan document.

The Plan was closed to new participants effective May 1, 2017. The Plan is frozen with respect to employees at certain locations specified in the Plan.

(d) Death and Disability Benefits

If an employee dies and has a surviving spouse or domestic partner, the benefit is payable to the surviving spouse or domestic partner as an annuity for his or her lifetime. The surviving spouse benefit is payable at the employee's earliest retirement date. The benefit is payable to a domestic partner beginning the year following the employee's death or as a lump sum if the employee is not at least age 50 at date of death. An active employee who becomes disabled after obtaining age 45 with 15 years of service is eligible for a disability benefit. If they remain disabled until normal retirement age, they will no longer need to be disabled to continue receiving the benefit.

(e) Mosaic

The Mosaic Company is a participating employer in this Plan and has negotiated freeze dates for the locations of Tampa and Savage as of December 31, 2007, Pekin as of June 20, 2008, Fort Meade, South Fort Meade, and Hookers Prairie as of December 31, 2008, and Bartow as of December 31, 2010. Some participants at the Bartow, Houston, Fort Meade, South Fort Meade, and Hookers Prairie locations elected to freeze their defined benefit and began participating in Mosaic's Defined Contribution Retirement Plan as of April 1, 2007.

(2) Summary of Accounting Policies

The following are the significant accounting policies followed by the Plan:

(a) Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual amounts could differ from those estimates.

(c) Risks and Uncertainties

The Plan has investments across a range of investment strategies. Investments, in general, are exposed to various risks, such as interest rate, market, and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of these investments will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in these estimates and the assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(d) Investment and Income Recognition.

The Company established, effective September 3, 1985, a master trust fund (the Master Trust). The purpose of the Master Trust is to pool investment transactions and achieve uniform rates of return on comparable funds under each plan in the Master Trust. Each plan deposits investable funds in the Master Trust and each owns an undivided interest in the net assets of the trust. The Plan's investment in the Master Trust represents its pro rata interest in the net assets of the trust. The unaudited financial statements of the Master Trust are separately filed with the Department of Labor (note 6).

Transactions and assets of the Master Trust are accounted for separately from those of the Plan. Securities transactions are recognized on the date the order to buy or sell is executed. Net appreciation and depreciation of investments include realized and unrealized gains and losses.

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Pension Investment Committee determines the Plan's valuation policies utilizing information provided by its investment advisers, custodians, and insurance company. See note 7 for a discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

(e) Derivatives

Derivative financial instruments are used by the Master Trust's investment managers primarily to rebalance the fixed income and equity allocation of the Master Trust's portfolio. The derivatives most commonly used by the investment managers are highly liquid exchange-traded equity and fixed-income futures. The fair value of the derivative instruments, none of which are accounted for as hedge instruments under Financial Accounting Standards Board (FASB) Accounting Standards Codification topic 815, *Derivatives and Hedging*, are included in the Master Trust's statement of assets under plan interest in investment income/(loss) of the Cargill Master Trust. The use of derivative instruments is not believed to materially increase the credit or market risk of the Master Trust's investments.

(Continued)

(f) Payment to Participants

Benefit payments to participants are recorded upon distribution.

(g) Administrative Expenses

Some expenses are paid out of the Master Trust by the Plan Trustee. Any expenses that are directly incurred by the plans, such as Pension Benefit Guaranty Corporation (PBGC) insurance premiums, and actuarial, audit, and benefits administration fees, are allocated to the plans based on actual costs. These expenses totaled $1,115,220 and $3,897,056 for 2020 and 2019, respectively. Expenses incurred by the Master Trust, such as Trustee and investment management costs, are allocated to the individual plans based upon beginning of month balances invested in the Master Trust. These expenses totaled $1,266,438 and $2,529,996 in 2020 and 2019, respectively. Certain plan administration costs are absorbed by the plan administrator.

(h) Recent Accounting Pronouncements

ASU 2018-13 - Changes to the Disclosure Requirements for Fair Value Measurement – In August 2018, the FASB issued guidance on modifying the disclosure requirements on fair value measurements as part of the disclosure framework project. The guidance modified, among other things, the disclosures required for Level 3 fair value measurements, including the range and weighted average of significant unobservable inputs. The guidance removed, among other things, the requirement to disclose transfers between Levels 1 and 2. The guidance was adopted on January 1, 2020 and did not have a material impact on the Plan's financial statements.

(3) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to service rendered by employees. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died; and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided through annuity contracts have been reduced from plan assets and removed from the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits, including both vested (benefits to which participants are entitled, regardless of future service with the Company) and nonvested benefits, is determined as of the beginning of the plan year by the independent actuarial firm Mercer, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements for death, disability, termination, or retirement) between the valuation date and expected dates of payment.

Significant assumptions used in the valuation of the Plan's actuarial present value of accumulated plan benefits include: (a) withdrawal and disability rates based upon past experience; (b) assumed mortality rates based upon published statistical data using the PRI-2012 table projected using Scale MMP-2020 for

preretirement and the MILES (Mercer Industry Longevity Experience Study) for the Consumer Goods, Food & Drink industry group projected using Scale MMP-2020 for postretirement; (c) assumed retirement age varies from 55 to 65; (d) assumed rate of return of 5.88% and 6.10% for 2020 and 2019, respectively.

(4) Plan Termination

While the Company has not expressed any intent to terminate the Plan or to discontinue contributions, it is free to do so at any time, subject to the provisions set forth in ERISA. Should the Plan be terminated at some future time, all participants become 100% vested in benefits earned as of the termination date.

In the event the Plan terminates, the benefit of any Highly Compensated Employee (and any Highly Compensated Former Employee), as defined in the Plan, is limited to a benefit that is nondiscriminatory under Section 401(a)(4) of the Internal Revenue Code (IRC).

If the termination is the result of the bankruptcy or near bankruptcy of the Company and the Plan's assets are not adequate to pay all benefits vested prior to the termination, the PBGC will take over the Plan and will pay those benefits that it guarantees. In this case, some participants may receive a smaller benefit than if the Plan had continued. Whether a particular participant's accumulated plan benefits will be paid, depends on both the priority of those benefits (as described in the Plan document) and the level of benefits guaranteed by the PBGC at that time.

If, however, the Plan is terminated for any reason other than the bankruptcy or near bankruptcy of the Company and the Plan has insufficient assets, the Company will be required to pay to the Plan an amount that, together with the plan assets, will satisfy all benefits accumulated to the date of the plan termination.

(5) Information Certified by Trustee

The Plan Trustee holds the Plan's investment assets, executes transactions therein pursuant to discretionary authority granted to the Plan Trustee concerning purchases and sales of investments in the Trust fund, and collects the related investment income.

The Plan Trustee has provided the plan administrator with certifications as to the completeness and accuracy of investment assets and investment income of the Plan and Master Trust as of and for the years ended December 31, 2020 and 2019 as outlined in the following table:

	2020	2019
Plan Interest in Cargill Master Trust:		
Investment at fair value	$ 543,750,071	453,893,854
Investment income	87,586,908	83,537,259
Cargill Master Trust:		
Investment at fair value	$ 3,493,573,009	3,047,344,309
Investment income	565,510,010	554,130,826

(Continued)

Such amounts are included in the accompanying financial statements, notes thereto, and supplemental schedules of the Plan based on such certifications from the Plan Trustee.

(6) Interest in Master Trust

Most of the Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and several other Company-sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust. The assets of the Master Trust are held by the Plan Trustee. The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Trust plus actual contributions and allocated investment income, including realized and unrealized gains and losses, less actual distributions, and allocated administrative expenses. At December 31, 2020 and 2019, the Plan's interest in the net assets, including realized and unrealized gains and losses, of the Master Trust was approximately 15.6% and 14.9%, respectively. Investment income related to the Master Trust is allocated to the individual plans based upon beginning of the month balances invested in the Plan.

Fair values of investments, prior to consideration of accrued administrative expenses, for the Master Trust are as follows:

	Plan's Interest in Master Trust		Total Master Trust Assets

The Master Trust has $982,783,381 of investments in alternative investment funds as of December 31, 2020, which are reported at NAV. The NAV is used as a practical expedient to estimate the fair value of the investment. Such investments are redeemable with the fund at NAV under the original terms of the partnership agreements and/or subscription agreements and operations of the underlying funds. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the NAV of the funds and, consequently, the fair value of the Master Trust's interests in the funds.

(Continued)

The following table summarizes the redemption terms for Master Trust alternative investments, which were measured at fair value using the NAV as a practical expedient as of December 31, 2020.

	Fair value	Unfunded Commitments	Objective	Redemption terms and restrictions
Real estate	$ 244,384,232	65,755,135	Portfolio diversification, yield enhancement and inflation protection	Redemption not permitted. For these investments, the Master Trust receives distributions through liquidation of underlying assets over their remaining life of up to 10 years.
Private equity	306,006,147	58,545,811	Return enhancement and portfolio diversification	Redemption not permitted. For these investments, the Master Trust receives distributions through liquidation of underlying assets over their remaining life of up to 10 years.

(7) Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below.

Basis for Fair Value Measurement:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices of similar or identical assets in markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability

(Continued)

- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimizes the use of unobservable inputs.

The following tables present the level within the fair value hierarchy at which the Master Trust investment assets are measured on a recurring basis as of December 31, 2020 and 2019.

	2020			
	Level 1	**Level 2**	**Level 3**	**Total**

Investments measured at NAV (3)				982,783,381

	2019			
	Level 1	**Level 2**	**Level 3**	**Total**
Equity securities (1):				
United States	$ 82,656,076	162,964,870	—	245,620,946
Non-United States	47,985,278	347,487,389	—	395,472,667
Debt securities (2)	—	1,387,910,546	—	1,387,910,546
Short-term investment funds (4)	—	48,308,201	—	48,308,201
Total asset in the fair value hierarchy	$ 130,641,354	1,946,671,006	—	2,077,312,360
Investments measured at NAV (3)				970,031,949
Total				$ 3,047,344,309

(1) Individual securities held directly whose values are based on quoted prices in active markets in which they trade (Level 1), and individual securities held through Collective Investment Trusts where the securities are valued based on quoted prices but the Trust is not actively traded (Level 2).

(2) Individual securities whose value is based on quoted NAV and corporate bonds with significant inputs which are observable in the market. As such, they are classified as Level 2 within the fair value hierarchy.

(3) As a result of the application of ASU 2015_07, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. It consists of limited partnership interests that invest in real estate, private equity, hedge funds, and public equities. Real estate includes debt and equity investments in U.S. and non-U.S. securities. Private equity includes debt and equity investments in U.S. and non-U.S. securities across buyouts, growth capital, distressed debt, mezzanine debt, and venture capital. Real estate and private equity valuations require significant management judgment due to the absence of quoted market prices. Hedge fund investments are diversified by manager, geography, and strategy. Hedge funds are valued based on quoted NAV as determined by the fund administrator. Public equities are managed by an investment management fund in domestic and international markets and are highly illiquid.

(4) Short-term investment funds are valued using the NAV provided by the fund administrator to participants in the fund only. As such, they are classified as Level 2 within the fair value hierarchy.

The Plan did not significantly change valuation techniques from the prior period.

(Continued)

(8) Tax Status

The Plan obtained its latest tax determination letter dated June 24, 2014 in which the Internal Revenue Service stated that the Plan, as then designed, qualified under Section 401(a) of the IRC and the Trust created thereunder was exempt from federal income taxes under Section 501(a). The Plan has been amended since this determination letter. However, the Company believes the Plan continues to meet the requirements of Section 401(a) of the Code and that the related trust is exempt from income tax under Section 501(a) of the Code. Therefore, no provisions for income taxes have been made.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan and has concluded there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2014.

(9) Party-in-Interest Transactions

Transactions resulting in plan assets being transferred to or used by a related party are prohibited under ERISA unless a specific exemption applies. The Plan Trustee is a party in interest as defined by ERISA as a result of its investing plan assets in certain of their funds. The Master Trust, a master trust established by the plan administrator, is a party in interest as defined by ERISA as a result of the Plan purchasing participation units of the Master Trust. The transactions described above are exempt under Section 408(b)(8) and are not prohibited by ERISA.

(10) Subsequent Events

The Plan has evaluated subsequent events from the statement of net assets available for benefits date through August 30, 2021, the date at which the financial statements were available to be issued, and determined there are no other items to disclose.

Mortality sponsor elections	
• All participants	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the RP-2014 mortality tables adjusted back to 2006 and projected with the MP-2018 mortality improvement scale.

Other economic assumptions	
• Salary increases	Not applicable.

• Expected investment return	6.32% for 2018; 6.10% for 2019; 5.88% for 2020
• Expenses	$1,300,000 added to current year normal cost

Rationale for Economic Assumptions - Funding

- Discount rate – Prescribed by the IRS and based on the company's current elections.
- Expected investment return – The 2020 assumption is equal to the long-term rate of return on assets assumption used to determine the ASC 715 expense for the fiscal year beginning June 1, 2020 limited to the stabilized third segment discount rate. This assumption was confirmed for reasonableness, i.e., not higher than the 65th percentile result from Mercer's Portfolio Return Calculator for January 2020, based on the plan's target asset mix provided by Cargill Inc. as of December 31, 2019.
- Expenses – Based on the actual administrative expenses from the prior year (excluding the PBGC premiums paid in the prior year) plus expected PBGC premiums for the current year.

Rationale for Demographic Assumptions - funding

- Mortality – Prescribed by the IRS.
- Withdrawal – Withdrawal rates are based on an experience study undertaken in 2019 using data from 2013-2017 and the expectation that the future withdrawal patterns and circumstances of the employer will not differ significantly from the period studied.
- Retirement age – Retirement rates are based on an experience study undertaken in 2019 using data from 2013-2017 and the expectation that the future retirement patterns and circumstances of the employer will not differ significantly from the period studied.
- Form of payment – Based on a plan experience study completed in 2019; it is expected that future form of payment elections will not differ significantly from the period studied.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Actuarial Methods for Funding

Asset Methods – Effective January 1, 2009

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods – Effective January 1, 2008

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.

- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.

- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods – Effective January 1, 2008

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.

- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.

- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.
