Report of Independent Auditors

To the Administrator of Johnson & Johnson Savings Plan

We have audited the accompanying financial statements of Johnson & Johnson Savings Plan (the “Plan”), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, and the related statement of changes in net assets available for benefits for the year ended December 31, 2020, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2020 and 2019 and the changes in net assets available for benefits for the year ended December 31, 2020, in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental Schedule of Assets (Held at End of Year) as of December 31, 2020 and Schedule of Delinquent Participant Contributions for the year ended December 31, 2020 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

1. Description of the Plan

General

The Johnson & Johnson Savings Plan (the “Plan”) is a participant directed defined contribution plan which was established on June 1, 1982 for eligible salaried and certain hourly employees of Johnson & Johnson (the “Plan Administrator” or the “Company”) and certain domestic subsidiaries. The Plan was designed to enhance the existing retirement program of eligible employees. The funding of the Plan is made through employee and Company contributions. The net assets of the Plan are held in the Johnson & Johnson Pension and Savings Plans Master Trust (the “Trust” or “the Master Trust”). Transactions in the Trust are executed by the trustee, State Street Bank and Trust Company (“State Street” or “Trustee”). Recordkeeping services are provided by Alight Solutions. The Plan’s interest in the Trust is allocated to the Plan based upon the total of each participant’s share of the Trust.

This brief description of the Plan is provided for general information purposes only. Participants should refer to the Plan document for complete information.

CARES Act

In March 2020, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) was signed into law. The CARES Act allowed retirement plans to provide participants who were impacted by the coronavirus (as defined in the CARES Act) with greater access to their savings. As permitted by the CARES Act, the Plan implemented the following provisions:

- Through December 31, 2020, qualified individuals were permitted to take a distribution in an amount up to \$100,000 from the Plan. Any such distribution was not subject to the 10% early distribution penalty or the mandatory 20% federal income tax withholding rate. Participants who took a qualified distribution had the option to have the distribution taxed over a three-year period, with the ability to recontribute up to the full amount of the distribution within three years and not be subject to federal income tax as a result.
- Loans repayments with respect to qualified participants could be delayed between March 27, 2020 and December 31, 2020 upon participant request. Loan repayments were resumed in January 2021.
- Required minimum distributions for calendar year 2020 were waived for retired and retirement-aged individuals.

Contributions

In general, full-time salaried employees and certain hourly, part-time and temporary employees can contribute to the Plan. There is no service requirement for employee contributions. If a participant does not take action to enroll or decline enrollment in the Plan within their first 30 days of employment, they will be automatically enrolled for pre-tax employee contributions equal to 6% of their eligible pay and these contributions will be invested in the Plan's default investment option. Prior to September 30, 2019, the default investment option was the Balanced Fund. Effective September 30, 2019, the Plan's default investment option is the Target Retirement Fund that aligns with, or is closest to, the year in which the participant will turn age 62.

Contributions are made to the Plan by participants through payroll deductions and by the Company on behalf of the participants. Participating employees may contribute a minimum of 3% up to a maximum of 50% of eligible pay, as defined by the Plan. Contributions can be pre-tax, Roth, post-tax or a combination of all three. Pre-tax and Roth contributions may not exceed the smaller of (i) 50% of a participant’s base salary (and 1/2 paid commissions, if applicable) or (ii) \$19,500 for 2020. The maximum contributions to a participant’s account including participant pre-tax, Roth and post-tax contributions and the Company match is \$57,000 for 2020.

Participants age 50 and over are eligible to contribute extra pre-tax and/or Roth contributions (“catch-up contributions”) above the annual Internal Revenue Service (“IRS”) limitation up to \$6,500 in 2020. Participants can elect an amount to be contributed from each paycheck as their catch-up contribution. This amount will be in addition to the pre-tax, Roth and post-tax contribution percentages that participants have elected. The catch-up contribution is not eligible for the Company matching contribution.

Participants receive a Company matching contribution equal to 75% of the first 6% of a participant's contributions. The Company matching contribution is comprised of cash and invested in the current investment fund mix chosen by the participant.

Investments

Participants may invest in one or more of the various investment funds offered by the Plan. On September 30, 2019, the Plan eliminated the Balanced Fund and introduced the Target Retirement Funds as new investment options for Plan participants. Each of the Plan's funds represents a mix of various investments. The investment mix chosen by the participant will apply to employee and Company matching contributions. Rollover contributions are invested at the election of the participant.

Participants receive dividends on Johnson & Johnson Common Stock shares held in the Johnson & Johnson Stock Fund and Johnson & Johnson Stock Contributions Fund. The dividends are automatically reinvested in the Johnson & Johnson Stock Fund unless specific elections are made to receive a cash payment. The 2020 dividend pass-through amount paid to participants of \$6,546,190 is reflected in benefits paid to participants in the Statement of Changes in Net Assets Available for Benefits. For all other funds, the Trustee reinvests all dividend and interest income.

Effective September 1, 2020, participants are not permitted to (1) direct more than 20% of any contribution made to the Plan to the Johnson & Johnson Common Stock Fund or (2) transfer or reallocate amounts into the Johnson & Johnson Common Stock Fund if, immediately after such transfer or reallocation, the aggregate value of their investments in the Johnson & Johnson Common Stock Fund and the Johnson & Johnson Stock Contributions Fund would exceed 20% of their aggregate Plan Balance. This limitation does not (a) affect investments resulting from transfers before September 1, 2020 or (b) restrict percentages in excess of 20% that result from investment performance or reinvestment of dividends.

Vesting

A participant's contributions (pre-tax, after-tax, Roth and rollover) and the earnings on them are always fully vested.

For the Company matching contributions, if a participant was hired before March 1, 2017, the Company matching contributions were made to the participant's account after a one-year eligibility period was satisfied. These contributions and the associated earnings are fully vested. If a participant was hired on or after March 1, 2017, the Company matching contributions made to the participant's account, and the earnings on these contributions, become vested after the participant has completed a three-year period of service. These contributions become vested if, while employed by the Company, the participant should die, become disabled, or reach age 55. If the Company matching contributions and associated earnings are not vested when the participant employment ends, they will be forfeited unless the participant returns to employment with the Company before (1) taking a total distribution of their vested account balance and (2) incurs a break in service (a period of at least five consecutive years in which the participant is not employed by the Company).

Forfeitures

Forfeitures of non-vested Company contributions are used to reduce future Company contributions. During 2020 and 2019, \$2,591,824 and \$1,958,605, respectively, of forfeited participant accounts were used to reduce the Company's contributions. At December 31, 2020, there were \$133,648 of forfeitures that have not yet been applied to reduce the Company's contributions.

Payment of Benefits

Participants are allowed to withdraw an amount equal to their pre-August 1, 2003 post-tax contributions and earnings thereon, unmatched post-tax contributions made after August 1, 2003 by the employee and earnings thereon, rollover contributions and earnings thereon, and pre-2003 Company match and earnings thereon, at any time. Prior to December 13, 2019, participants were able to withdraw pre-tax, Roth or post-tax matched contributions, and the vested employer match after August 1, 2003, only upon meeting certain hardship conditions. Effective December 13, 2019, participants are able to withdraw from all vested contribution types upon meeting certain hardship conditions. The benefits to which participants are entitled are the amounts provided by contributions (Company and participant) and investment earnings thereon, including net realized and unrealized gains and losses which have been allocated to the participant's account balance. Participants have the option of receiving all or part of their vested balance in the Johnson & Johnson Stock Fund and/or the Johnson & Johnson

Stock Contributions Fund as either cash or in shares of Johnson & Johnson Common Stock (plus cash for fractional shares) for lump sum distributions other than a hardship.

Benefits are also paid to participants upon termination of employment, long-term disability or retirement. Effective January 1, 2020, participants can elect to defer payment until (a) age 70 1/2 for members who attain age 70 1/2 before January 1, 2020 and (b) age 72 for participants who attain age 70 1/2 after December 31, 2019 if their vested account balances are greater than \$5,000. Distributions are paid either in a lump sum payment, partial payments or installment payments made on a monthly, quarterly, or annual basis over a period of years selected by the participant.

A participant's vested account may be distributed to his/her beneficiaries in lump sum, partials, in installments or maintained in the Trust upon the participant's death only if the beneficiary is a spouse. Otherwise, it is paid to the beneficiary in a lump sum, either directly or rolled over to an Individual Retirement Account ("IRA").

Administrative Expenses

All third-party administrative expenses are paid by the Plan, unless otherwise provided for by the Company.

Notes Receivable from Participants

Participants may borrow up to a maximum of 50% of their vested account balance. The minimum loan amount is \$1,000 and the maximum amount of all outstanding loans cannot exceed \$50,000. Loans bear an interest rate of prime plus 1% and are repayable within one to five years. Due to acquisitions, there are some existing loans extending beyond five years, which must be allowed to continue once transferred into the Johnson & Johnson Savings Plan. The collateralized balances in the participant's accounts have interest rates that range from 3.25% to 11.33%. Principal and interest is paid ratably through payroll deductions for active employees. Loans must be paid within two months following retirement or termination of employment with the Company. If the loan is not repaid in full, the unpaid balance, plus accrued interest, will be deducted from the participant's account balance and reported to the IRS as a distribution.

Termination

Although it has not expressed an intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of a partial or full Plan termination, all Plan funds must be used exclusively for the benefit of the Plan participants, in that each participant would receive the respective value in their account.

2. Summary of Significant Accounting Policies

Recent Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU) 2018-13, Fair Value Measurement (Topic 820), Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement which removes, modifies and adds disclosures to Topic 820. The amendments in this ASU 2018-13 apply to all entities that are required, under existing U.S. Generally Accepted Accounting Principles (GAAP), to make disclosures about recurring or nonrecurring fair value measurements. The amendments in this ASU 2018-13 are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The adoption of this update did not have a material impact on the Plan's financial statements.

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting in accordance with accounting principles generally accepted in the United States of America.

Investment Valuation and Income Recognition of the Trust

The Plan's interest in the Trust is stated at fair value, except for the fully benefit-responsive investment contracts which are stated at contract value. The investment in the Trust represents the Plan's interest in the net assets of the Trust.

As the investment funds contain various underlying assets such as stocks and short-term investments, the participant's account balance is reported in units of participation, which allows for immediate transfers in and out of the funds. The purchase or redemption price of the units is determined by the Trustee, based on the current market value of the underlying assets of the funds. Each fund's net asset value for a single unit is computed by adding the value of the fund's investments, cash and other assets, and subtracting liabilities, then dividing the result by the number of units outstanding.

Purchases and sales of securities are recorded on a trade-date basis. Gains and losses on the sale of investment securities are determined on the average cost method. Dividend income is recorded on the ex-dividend date. Interest income and administrative expenses are recorded on an accrual basis.

The Plan presents, in the Statement of Changes in Net Assets Available for Benefits, the net investment income/loss for the Plan's interest in the Trust which consists of the Plan's allocated change in unrealized appreciation and depreciation of the underlying investments, realized gains and losses on sales of investments and investment income/loss based upon the total of each participant's share of the Trust.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Derivatives

The Trust mitigates risk through structured trading with reputable parties and continual monitoring procedures. The Trust enters into forward foreign exchange contracts to hedge against adverse changes in foreign exchange rates related to non-U.S. dollar denominated investments. The Trust is exposed to credit risk for non-performance by the counterparty and to market risk for changes in interest and currency rates. The Trust accounts for forward foreign exchange contracts at fair value.

The fair value of a forward foreign exchange contract is the aggregation by currency of all future cash flows discounted to its present value at the prevailing market interest rates and subsequently converted to the U.S. Dollar at the current spot foreign exchange rate.

The Trust actively manages risk by periodically investing in interest rate swaps, credit default swaps and fixed income options. Interest rate swaps are used to manage interest rate risk and provide an effective means to adjust portfolio duration, maturity mix and term-structure. Credit default swaps are used to either synthetically add or reduce credit risk to an individual issuer or a basket of issuers. Depending on the type of contract, the counterparty risk exposure can be either with the exchange or another counterparty. Fixed income options are used in various ways including: to pursue upside exposure to a portion of the yield curve, to capitalize on anticipated changes in market volatility, to focus on generating income, and to serve as a hedge. The Trust records interest rate swaps, credit default swaps and options at fair value. Interest rate swaps are valued daily using underlying yield curves based upon broker/dealer sources, the present value of expected cash flows, and frequency of which they compound and pay. Credit default swaps are valued using daily underlying yield curves and/or credit curves and spreads based upon broker/dealer/index sources, the present value of expected cash flows, and the frequency of which they compound and pay including a weighted default calculation. Options are valued using market-based inputs to models, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency, where such inputs and models are available. Alternatively, the values may be obtained through unobservable management determined inputs and/or management's proprietary models. Where models are used, the selection of a particular model to value an option depends upon the contractual terms of, and specific risks inherent in, the option as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, measures of volatility and correlations of such inputs.

A futures contract is an agreement to buy or sell a security or other asset for a set price on a future date. These contracts are traded on major exchanges and are marked to market daily, thus minimizing counterparty risk. The Trust enters into futures contracts mainly to manage the duration and refine the curve positioning of the fixed income portfolios, thus, allowing the investment managers to achieve the overall investment portfolios' objectives. These contracts are priced by an exchange and the fair value is the daily mark to market, which is a function of price movements for the contract relative to the level it was originally entered into.

There have been no changes in the methodologies used at December 31, 2020 and 2019.

Use of Estimates

The preparation of the Plan's financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of Net Assets Available for Benefits at the date of the financial statements and the Changes in Net Assets Available for Benefits during the reporting period and the applicable disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan provides for various investment options in funds which can invest in a combination of equity, fixed income securities and other investments. Investments are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in risks in the near term could materially affect participants' account balances and the amounts reported in the Statements of Net Assets Available for Benefits and the Statement of Changes in Net Assets Available for Benefits.

Reporting of Fully Benefit-Responsive Investment Contracts

Fully benefit-responsive investment contracts are reported at contract value. Contract value is the relevant measurement criteria for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan.

3. Johnson & Johnson Pension and Savings Plans Master Trust

The assets of the Johnson & Johnson Savings Plan, the Johnson & Johnson Retirement Savings Plan, the Retirement Plan of Johnson & Johnson and Affiliated Companies, the Johnson & Johnson Retirement Plan for Union Represented Employees, and the Johnson & Johnson Retirement Plan for Puerto Rico Employees comprise the total of the Trust which is held by State Street.

a. Fair Value Measurements

The Plan's valuation methodologies were applied to all of the Trust's investments carried at fair value. Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, fair value is based upon models that primarily use, as inputs, market-based or independently sourced market parameters, including yield curves, interest rates, volatilities, equity or debt prices, foreign exchange rates and credit curves.

While the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Valuation Hierarchy

FASB Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1 - Quoted prices in active markets for identical assets and liabilities.
- Level 2 - Significant other observable inputs.
- Level 3 - Significant unobservable inputs.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following is a description of the valuation methodologies used for the investments measured at fair value:

- Short-term investment funds - The assets are comprised of cash and quoted short-term instruments which are valued at the closing price or the amount held on deposit by the custodian bank where quoted prices are available in an active market and are classified as Level 1. Other investments are through investment vehicles valued using the Net Asset Value ("NAV") provided by the administrator of the fund. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV is a quoted price in a market that is not active and classified as Level 2. In addition, derivatives are included in this category. In general, derivatives that are exchange listed and actively traded are classified as Level 1, while derivatives that are not exchange listed but still actively traded in observable markets are classified as Level 2.
- Government and agency securities - The assets are comprised of government and agency securities and U.S. Treasury bills and notes of varying maturities. These are all considered Level 2 fair values which are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows.
- Debt instruments - The assets are comprised of corporate debt and commercial loans and mortgages. Fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows and are generally classified as Level 2. Level 3 debt instruments are priced based on unobservable inputs.
- Equity securities - U.S. and International equity securities are valued at the closing price reported on the major market on which the individual securities are traded. Substantially all equity securities are classified within Level 1 of the valuation hierarchy.

- Common Collective Trusts (CCT's) - The fair value of all CCT interests have been determined using NAV as a practical expedient. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The CCT's are included in Investments measured at Net Asset Value. A majority of the CCT's are used for liquidity purposes for both the defined benefit and defined contribution plans within the Trust. The CCTs are primarily passive funds that provide daily liquidity with no prior notice for participant transactions, and 2-day prior notice for Plan Sponsor transactions for the various Plan investment options. Participant directed purchases and sales are transacted at the NAV. At December 31, 2020 and 2019, approximately 68% and 73%, respectively, of the CCT's are invested in passive strategies that mimic the indices, and 32% and 27%, respectively, in active strategies. Additionally, at December 31, 2020 and 2019, 65% and 70%, respectively, of the active and passive CCT's are invested in U.S. equities, 24% and 24%, respectively, are invested in global equities and emerging markets, and the remaining 11% and 6%, respectively, are invested in fixed income. There are no unfunded commitments for any of the CCT's that the Trust invests in.
- Limited Partnerships ("LP") - The Trust invests in LP investments including a Hedge Fund, Emerging Market Long-Only Equity Funds and Private Market Funds. As of December 31, 2020 and 2019, approximately 24% and 41%, respectively, of these investments are invested in the Hedge Fund, 38% and 35%, respectively, in Emerging Market Long-Only Equity Funds and 38% and 24%, respectively, in Private Market Funds.

The Trust's private market program has invested as a limited partner in a well-diversified portfolio of funds managed by general partners. The program is being managed to ensure adequate diversification by general partner, strategy type (private equity, real assets, and private credit), and geographic region. As of December 31, 2020 and 2019, approximately 57% and 56%, respectively, of these investments are invested in private equity, 22% and 27%, respectively, in real assets, and 21% and 17%, respectively, in private credit. The Trust has entered into a number of private markets agreements that commit the Trust, upon request, to make additional investment purchases up to predetermined amounts. As of December 31, 2020, and 2019, the Trust had aggregate unfunded commitments of \$1,343,995,206 and \$1,096,139,808 respectively. These commitments are expected to be satisfied with distributions from existing funds, reinvestment of proceeds and/or periodic rebalancing of existing investments. The LP investments have target maturity dates ranging from 2021 to at least 2032 with the possibility of 2 to 4 years of extensions in accordance with the respective LP's governing documents. Distributions to the Trust from LP investments are driven by portfolio company liquidation in the public and private markets. Otherwise, the LP investments are not redeemable. The fair value of the Trust's LP investments has been determined using NAV provided by the respective general partners as a practical expedient. The NAV is the pro-rata share of the Trust's position based on the value of the underlying assets owned by the LP, minus its liabilities.

b. Guaranteed and Synthetic Investment Contracts

The Trust holds investments in traditional and synthetic GICs. The weighted average insurance financial strength rating of the insurers for these contracts is Aa2. These investments are recorded at their book values. The traditional and synthetic GICs' contract value represents book value plus reinvested income adjusted for net cash flows. Both the traditional and synthetic GICs are fully benefit-responsive. Participants may under most circumstances direct the withdrawal or transfer of all or a portion of their investment at contract value. Currently no reserves are needed against contract values for credit risk of the contract issuers or otherwise.

The traditional GICs provide a fixed return on principal over a specified period of time through fully benefit-responsive contracts issued by an insurance company, which are backed by the general account of that insurer. The contract value of the traditional GICs was \$0 and \$329,647,652 at December 31, 2020 and December 31, 2019, respectively.

The synthetic GICs provide a return over a period of time through a fully benefit-responsive contract, or wrapper contract, which is backed by the underlying assets owned by the Trust. The portfolio of assets with overall Aa2/AA credit quality, underlying the synthetic GICs primarily includes government and agency securities, corporate debt, mortgage backed securities, and asset backed securities. The contract value of the synthetic GICs was \$2,340,548,670 and \$1,770,066,026 at December 31, 2020 and December 31, 2019, respectively.

There are certain events not initiated by Plan participants that limit the ability of the Plan to transact with the issuer of a GIC at its contract value. Specific coverage provided by each traditional and synthetic GIC may be different from each issuer. Examples of such events include: the Plan's failure to qualify under the Internal Revenue Code ("IRC") of 1986 as amended; full or partial termination of the Plan; involuntary termination of employment as a result of a corporate merger, divestiture, spin-off, or other significant business restructuring, which may include early retirement incentive programs or bankruptcy; changes to the administration of the Plan which decreases employee or employer contributions, the establishment of a competing plan by the plan sponsor, the introduction of a competing investment option, or other Plan amendment that has not been approved by the contract issuers; dissemination of a participant communication that is designed to induce participants to transfer assets from this investment option; events resulting in a material and adverse financial impact on the contract issuer, including changes in the tax code, laws or regulations. The Plan fiduciaries believe that the occurrence of any of the aforementioned events, which would limit the Plan's ability to transact with the issuer of a GIC at its contract value, is not probable.

c. Derivatives

Presented in the following table is the fair value of derivatives within the Trust as of December 31, 2020 and 2019. For the written credit default swaps, the recourse provisions are determined either by the International Swaps and Derivatives Association ("ISDA") agreements or the exchange. Where the Trust is a seller of credit default swaps and if a credit event occurs due to the default of the underlying security or the underlying tranche, this would result in a net loss to the Trust. At December 31, 2020, the maximum payout for outstanding credit default swaps aggregated to \$83,421,000 with terms as follows:

December 31, 2020		
Number of Contracts	Maturity	Total Value
17	Less than 1 Year	\$ 31,600,000
5	2 Years	2,900,000
9	3 Years	5,600,000
10	4 Years	28,321,000
3	5 Years	15,000,000

At December 31, 2019, the maximum payout for outstanding credit default swaps aggregated to \$102,700,000 with terms as follows:

December 31, 2019		
Number of Contracts	Maturity	Total Value
28	Less than 1 Year	\$ 57,900,000
2	1 Year	1,600,000

4. Notes Receivable from Participants

The Plan had participant loans outstanding at December 31, 2020 and December 31, 2019 of \$104 million and \$110 million, respectively. The net decrease of \$6 million for 2020 represents loan issuances of \$44 million less loan retirements and payments toward outstanding loans of \$50 million. Delinquent notes receivable from participants are reclassified to benefit payments based on terms of the Plan document.

5. Tax Status

The IRS has determined and informed the Company by a letter dated August 17, 2017, that the Plan is in compliance with applicable sections of the IRC. Although the Plan has been amended since receiving the determination letter,

the Plan Administrator believes that the Plan is currently designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain tax position that more likely than not would not be sustained upon examination by the IRS. The Plan Administrator has concluded that as of December 31, 2020 and December 31, 2019, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

6. Related Party Transactions

Certain Plan investments, such as shares of CCT's managed by State Street Global Advisors, a division of State Street, and shares of State Street common stock and bonds, qualify as party-in interest transactions as State Street is the Trustee as defined by the Plan. As of December 31, 2020 and December 31, 2019, the total market value of investments in these interests allocated to the Plan and managed by State Street was \$6,218,652,107 and \$4,742,077,035, respectively.

The Plan also invests in shares of the Company. The Company is the Plan sponsor and, therefore, these transactions qualify as party-in-interest transactions. As of December 31, 2020 and December 31, 2019, the fair value of investments in Johnson & Johnson Common Stock was \$3,756,929,248 and \$3,648,789,117, respectively. During the year ended December 31, 2020, the Plan made purchases of \$202,550,644 and sales of \$371,192,502 of the Company's common stock. The total dividend income received during 2020 was \$95,770,948. The total realized and unrealized gains during 2020 were \$178,329,874 and \$1,943,342,625, respectively.
