INDEPENDENT AUDITOR'S REPORT

The Compensation Committee of First Financial Bancorp
First Financial Bancorp Employees' Pension Plan and Trust
Cincinnati, Ohio

Report on the Financial Statements

We have audited the accompanying financial statements of First Financial Bancorp Employees' Pension Plan and Trust, which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Plan's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

(Continued)

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2020, and changes therein for the year then ended, and its financial status as of December 31, 2019, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The information included in the 2020 supplemental Schedule H, Line 4i – Schedule of Assets (Held at End of Year) and Schedule H, Line 4j – Schedule of Reportable Transactions is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Such information is the responsibility of the Plan's management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements

December 31, 2020 and 2019

NOTE 1: DESCRIPTION OF THE PLAN

The following description of the First Financial Bancorp Employees' Pension Plan and Trust (the Plan) is provided for general information purposes only. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

General. The Plan is a defined benefit pension plan covering substantially all associates of First Financial Bancorp (the Bancorp or the Company) and its subsidiaries that meet certain age and service requirements. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Company contributes amounts sufficient to annually fund the Plan's current service cost and prior service cost, plus interest. The Plan has met the ERISA minimum funding requirements. No contributions were required during the years ended December 31, 2020 and 2019 since the plan was sufficiently funded.

SEI Private Trust Company (SEI) (the Trustee), a wholly owned subsidiary of SEI Investments, holds the Plan's investments and executes investment transactions.

Participating Corporation. The terms of the Plan provide that any corporation which is, or becomes, a subsidiary of the Bancorp may adopt this Plan for those associates which the subsidiary determines to be eligible, with consent of the Bancorp.

Vesting. All benefits immediately vest for active plan participants.

Pension Benefits. The Plan permits early retirement for associates ages 50 to 64 with ten years of vested service, provided the sum of the associate's age and vesting service is at least 65. Participants may elect to receive pension benefits in the form of lump-sum distributions or monthly annuity payments for specified periods or for life. Participants may elect to receive their annuity payments in the form of a joint and 50%, 66.67%, 75% or 100% survivor annuity or an annuity guaranteed payable for 60, 120, 180 or 240 months.

As of January 1, 2008, Plan benefits are based on a hypothetical individual account known as a Cash Balance Account. During each year of employment, each participant's account is credited with regular and interest credits. Regular credits for participants, who have a full year of benefit service, are based on the participant's covered compensation at the end of each year. Prior to January 1, 2014, the annual service credit was equal to 5% of total compensation plus 4% of excess compensation for that year of benefit service. For Plan years beginning on and after January 1, 2014, the annual service credit is equal to 5% of total compensation. Interest credits

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements (continued)

December 31, 2020 and 2019

are added to the account at the end of each Plan year and can vary from year to year. The annual interest credit rate equals: (a) the interest rate on 5-year Treasury securities as of the second full calendar month preceding the Plan Year with respect to service credits earned prior to January 1, 2014, and (b) the annual return on a portfolio invested 40% in the Vanguard Institutional Index Fund and 60% in the Vanguard Total Bond Market Index Fund with respect to service credits earned on and after January 1, 2014. While the returns in the stock market and bond market can vary over time and can result in either a positive or negative interest credit in any single plan year, the sum of the interest credits on service credits earned on and after January 1, 2014 can never be below zero.

Under other supplements of the Plan, certain participants accrued benefits as “grandfathered” employees based on hire date and participation in the plan under a covered group. Grandfathered participant benefits were calculated based upon the participant’s average compensation, the participant’s years of service, and other factors, as defined in the Plan document.

Death and Disability Benefits. For the Cash Balance benefit, if a vested terminated participant dies before retirement, a designated beneficiary will receive 100% of the benefit. For a married participant, 100% of the cash balance benefit is payable to the participant’s spouse as a life annuity or lump sum. For an unmarried participant, 100% of the cash balance benefit is payable to the beneficiary only as an immediate lump sum.

For the Traditional benefit, if the vested terminated participant dies and is married, the surviving spouse is eligible to receive the survivor portion of the 50% Joint and Survivor Annuity option of the participant’s traditional benefit as a lump sum or life annuity. If the participant dies and is not married, none of the traditional benefit is payable to the beneficiary.

Participants with at least 15 years of vested service who are no longer able to work for First Financial because of total and permanent disability are entitled to receive their normal retirement benefit under the terms of the Plan beginning on the first date of the month following their normal retirement date.

COVID-19. The spread of COVID-19 has caused significant economic disruption throughout the United States as state and local governments issued stay at home orders and temporarily closed non-essential businesses. The full potential financial impact from the pandemic is unknown at this time, however prolonged disruption may adversely impact several industries. This could cause First Financial Bancorp, and the Plan, to experience material adverse effect on operations, asset valuations, net assets available for benefits and changes in net assets available for benefits.

Subsequent Events. Management evaluated subsequent events for the Plan for recognition and disclosure through October 6, 2021, the date the financial statements were available to be issued.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation. The accompanying financial statements have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America (GAAP).

Estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements, accompanying notes and supplemental schedules. Actual realized amounts could differ materially from those estimates.

Risks and Uncertainties. The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate risk, market risk and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made, and the actuarial present value of accumulated plan benefits are reported, based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Valuation of Investments and Income Recognition. Investments are stated at fair value, which is defined as the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date (an exit price). See Note 3 – Fair Value Measurements for further discussion and disclosures related to fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net realized and unrealized appreciation (depreciation) includes the Plan's gains and losses on investments purchased and sold as well as held during the year.

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements (continued)

December 31, 2020 and 2019

Payment of Benefits. Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits. Accumulated plan benefits are future periodic payments that are attributable under the Plan's provisions for the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. Prior to January 1, 2008, benefits under the Plan were based on participants' compensation during their highest consecutive five years of vested service. Effective January 1, 2008, the Plan was amended to convert to a cash balance pension plan. Participants with vested benefits prior to this transition date continue to have a frozen benefit as calculated under the traditional formula, in addition to benefits accrued under the cash balance formula after the transition date.

Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

NOTE 3: FAIR VALUE MEASUREMENTS

The fair value framework as disclosed in the Fair Value Measurements and Disclosure Topic of FASB ASC Topic 820, (Fair Value Topic) includes a hierarchy which focuses on prioritizing the inputs used in valuation techniques. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), a lower priority to observable inputs other than quoted prices in active markets for identical assets and liabilities (Level 2) and the lowest priority to unobservable inputs (Level 3). When determining the fair value measurements for assets and liabilities, the Plan looks to active markets to price identical assets or liabilities whenever possible and classifies such items in Level 1. When identical assets and liabilities are not traded in active markets, the Plan looks to observable market data for similar assets and liabilities and classifies such items as Level 2. Certain assets and liabilities are not actively traded in observable markets and the Plan must use alternative techniques, based on unobservable inputs, to determine the fair value and classifies such items as Level 3. The level

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements (continued)

December 31, 2020 and 2019

within the fair value hierarchy is based on the lowest level of input that is significant in the fair value measurement.

The following methods, assumptions and valuation techniques were used by the Plan to measure assets and liabilities at fair value:

U.S. Government and Government Agency Securities. These securities are valued using matrix pricing models developed by a third party and consider standard input factors such as observable market data, benchmark yields, interest rate volatilities, broker/dealer quotes, credit spreads and new issue data. Matrix pricing is widely used to value securities without solely relying on quoted market prices for specific securities (Level 2).

Mutual funds. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission and are valued at the daily closing price as reported by the fund. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded (Level 1).

The Plan utilizes values provided by third-party pricing vendors to price investment securities in accordance with the fair value hierarchy of the Fair Value Topic and reviews the pricing methodologies utilized by the pricing vendors to ensure that the fair value determination is consistent with the applicable accounting guidance. The Plan's pricing process includes a series of quality assurance activities where prices are compared to recent market conditions, historical prices and other independent pricing services. Further, the Plan periodically validates the fair values of a sample of securities in the portfolio by comparing the fair values to prices from other independent sources for the same or similar securities. The Plan analyzes unusual or significant variances, conducts additional research with the pricing vendor, and if necessary, takes appropriate action based on its findings. The results of the quality assurance process are incorporated into the selection of pricing providers by the portfolio manager.

NOTE 4: ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits is determined by an actuary and is summarized as follows:

	December 31, 2019
Actuarial present value of vested benefits:	
Participants receiving payments	\$ 11,463,662
Participants with deferred benefits	14,042,245
Other participants	38,145,126
Total vested benefits	<u>63,651,033</u>
Actuarial present value of non-vested benefits	<u>0</u>
Total Accumulated Plan Benefits	<u><u>\$ 63,651,033</u></u>

The changes in accumulated plan benefits for the year ended December 31, 2019 are as follows:

Actuarial present value of accumulated	
benefits at December 31, 2018	\$ 57,385,219
Changes during the year due to:	
Benefits accumulated	5,632,760
Actuarial losses	5,138,362

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements (continued)

December 31, 2020 and 2019

The significant actuarial assumptions used in the valuations as of December 31, 2019 were as follows:

Mortality: Pri-2012 tables for males and females (separate rates for annuitants and non-annuitants) projected forward generationally with scale MP-2019.

Retirement age: Graded from age 55 to 65

Discount rate: The 2019 valuation included assumed an average rate of return of 7.25%.

Cash balance interest rate: pre-2014 cash balances: 2.77%; post-2013 cash balances: same as investment return

The applicable lump sum mortality was updated from 2019 to 2020 PPA Optional Combined Unisex Mortality.

The assumption changes presented in the previous table are mainly attributed to the discount rate and mortality changes.

NOTE 5: PLAN TERMINATION

Although it has not expressed intentions to do so, the Bancorp has the right under the Plan to discontinue the contributions of any participating Bancorp subsidiary at any time and to amend or terminate the Plan subject to the provisions set forth in ERISA. Should the Plan terminate at some future time, whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

NOTE 6: INCOME TAX STATUS

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated May 3, 2013 stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan administrator believes the

First Financial Bancorp Employees' Pension Plan and Trust

Notes to Financial Statements (continued)

December 31, 2020 and 2019

Plan is in compliance with the applicable requirements of the Code and that the Plan, as amended, is qualified and the related trust is tax-exempt.

GAAP requires plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2020 and 2019, there are no uncertain positions taken or expected to be taken.

The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2017.

NOTE 7: ADMINISTRATIVE EXPENSES

The Plan incurs administrative expenses directly related to the Plan which consist primarily of actuarial fees, PBGC fees and miscellaneous professional fees. These expenses are reported on the statements of changes in net assets available for benefits as administrative expenses. Expenses relating to purchases, sales or transfers of the Plan's investments are charged to the particular investment fund to which the expenses relate. All other expenses are paid by the Company on behalf of the Plan.

NOTE 8: PARTY-IN-INTEREST TRANSACTIONS

Certain Plan assets are invested in funds managed by an affiliate of the trustee of the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transaction rules under ERISA. The Plan is not charged for administrative services performed on its behalf by the Bancorp.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality Separate rates for non-annuitants (based on RP-2014 "Employees" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2018) and annuitants (based on RP-2014 "Healthy Annuitants" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2018).

Termination rates (not due to disability, retirement, or mortality) The rates are which participants withdraw by age and gender are given below:

Attained Age	Males (%)	Females (%)
20	12.5	15.0
25	9.0	11.0
30	6.5	8.0
35	4.5	5.5
40	2.6	3.5
45	1.3	1.7
50	0.3	0.7
55	0.0	0.0

Participants are assumed to terminate in the first 3 years at the following rates:

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age and gender are shown below.

Age	Males (%)	Females (%)
55	5	5
56	5	5
57	5	5
58	5	5
59	5	5
60	10	10
61	10	10
62	10	10
63	10	10
64	10	10
65	100	100

Percent married

For purposes of valuing the pre-retirement surviving spouse's benefit, 80% of eligible participants are assumed to be married.

Spouse age

Male spouses are assumed to be 3 years older than female spouses.

Covered pay

Plan Compensation is W-2 earnings provided by the employer for the prior year adjusted by the compensation increase rate.

Administrative expenses

\$919,817. Administrative expenses are accounted for as an addition to Target Normal Cost. Investment management expenses are included as an administrative expense.

Administrative expenses for the coming year are estimated by using the actual administrative expenses for the prior year.

Form of payment

95% of active participants are assumed to receive an immediate lump sum and 5% of active participants are assumed to elect life annuity when they retire. 100% of terminated vested participants are assumed to receive an immediate lump sum upon withdrawal. Current terminated vested participants are assumed to receive a lump sum upon attaining normal retirement age.

Calculation of lump sum	Lump sums were valued using the general rule under Proposed IRC §1.430(d)-1(f)(4) without application of generational mortality and without recognition of the phase-in of IRC §417(e)(3) assumptions. The PPA optional combined unisex table for the valuation year and January segment rates are used to determine lump sums based on the traditional formula.
Participant data	Participant data was supplied by Milliman as of the valuation date.
Tax policy	The actuarial valuation performed for the plan year ending December 31, 2020 is used to determine the maximum deductible contribution for the tax year ending December 31, 2020.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with First Financial Bancorp regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with First Financial Bancorp and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2020 via Milliman. Information on plan provisions was supplied by the plan sponsor. Assets were provided by SEI. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	<p>Pre-2014 Cash Balance Interest crediting rate:</p> <p>Cash balance accruals prior to 2014 are credited with interest at the rate of 5-year Treasuries. As an approximation of this rate, the first segment rate from the average segment rates for January disregarding the interest rate corridors has been selected.</p> <p>Post-2013 Cash Balance Interest crediting rate:</p> <p>Cash balance accruals after 2013 are credited with interest at the annual rate of return for a hypothetical investment portfolio that is invested 40% in Vanguard Institutional Index Institutional Shares (VINIX) and 60% in Vanguard Total Bond Market Index Fund Institutional Shares (VBTIX). As an approximation of this rate, the applicable Effective Interest Rate was used.</p>
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC 430, annuity benefits are valued by converting accounts to annuities using the current IRC 430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.

SCHEDULE SB ATTACHMENTS

Rates of increase in compensation	Assumed compensation increases are based on plan sponsor expectations, including general pay practices and targets, for near-term years and the effect that the assumed long-term CPI and NAW will have on compensation increases over the longer term.
Plan-related expenses	As required by regulation, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates are based on plan sponsor expectations. Assumed termination rates differ by age, sex, and service because of expected differences in termination rates.
Retirement	Retirement rates are based on plan sponsor expectations. Assumed retirement rates vary by age, because of expected differences in retirement rates as participants age.
Benefit commencement date for deferred vested benefits:	Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.
Form of payment	The form of payment assumption is based on recent experience showing a small number of annuity commencements with all remaining participants electing a lump sum upon retirement, and is believed to be a best estimate of future experience.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

The following changes in assumptions and methods were made as part of this valuation:

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The basis for the assumption remains unchanged.
- The interest crediting rate used to project pre-2014 cash balances was updated to the current first segment rate of the 24-month average from January, disregarding interest rate corridors. The basis for the assumption remains unchanged.
- The interest crediting rate used to project post-2013 cash balances was updated to the applicable effective interest rate. The basis for the assumption remains unchanged.
- The mortality table used to calculate the funding target and target normal cost was updated to use the MP-2018 projection scale as specified in the regulations under §1.430(h)(3)-1.
- The assumed plan expenses changed from \$833,310 for the 2019 plan year to \$919,817 for the 2020 plan year. The basis for the assumption remains unchanged.

Enrolled Actuary	Lorna M. Springer
Enrollment Number	20-07422

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Schedule SB, Line 22 Description of Weighted Average Retirement Age as of January 1, 2020

See Schedule SB, Part V - Statement of Actuarial Assumptions/Methods for retirement rates. The average retirement age for Line 22 was calculated by creating a hypothetical life table with retirement as the only decrement, and then computing the average retirement age for the table.

Demographic Assumptions

Inclusion date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality Separate rates for non-annuitants (based on RP-2014 "Employees" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2018) and annuitants (based on RP-2014 "Healthy Annuitants" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2018).

Termination rates (not due to disability, retirement, or mortality) The rates at which participants withdraw by age and gender are given below:

Attained Age	Males (%)	Females (%)
20	12.5	15.0
25	9.0	11.0
30	6.5	8.0
35	4.5	5.5
40	2.6	3.5
45	1.3	1.7
50	0.3	0.7
55	0.0	0.0

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age and gender are shown below.

Age	Males (%)	Females (%)
55	5	5
56	5	5
57	5	5
58	5	5
59	5	5
60	10	10
61	10	10
62	10	10
63	10	10
64	10	10
65	100	100

Percent married

For purposes of valuing the pre-retirement surviving spouse's benefit, 80% of eligible participants are assumed to be married.

Spouse age

Male spouses are assumed to be 3 years older than female spouses.

Covered pay

Plan Compensation is W-2 earnings provided by the employer for the prior year adjusted by the compensation increase rate.

Administrative expenses

\$919,817. Administrative expenses are accounted for as an addition to Target Normal Cost. Investment management expenses are included as an administrative expense.

Administrative expenses for the coming year are estimated by using the actual administrative expenses for the prior year.

Form of payment

95% of active participants are assumed to receive an immediate lump sum and 5% of active participants are assumed to elect life annuity when they retire. 100% of terminated vested participants are assumed to receive an immediate lump sum upon withdrawal. Current terminated vested participants are assumed to receive a lump sum upon attaining normal retirement age.

Calculation of lump sum	Lump sums were valued using the general rule under Proposed IRC §1.430(d)-1(f)(4) without application of generational mortality and without recognition of the phase-in of IRC §417(e)(3) assumptions. The PPA optional combined unisex table for the valuation year and January segment rates are used to determine lump sums based on the traditional formula.
Participant data	Participant data was supplied by Milliman as of the valuation date.
Tax policy	The actuarial valuation performed for the plan year ending December 31, 2020 is used to determine the maximum deductible contribution for the tax year ending December 31, 2020.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with First Financial Bancorp regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with First Financial Bancorp and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of January 1, 2020 via Milliman. Information on plan provisions was supplied by the plan sponsor. Assets were provided by SEI. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	<p>Pre-2014 Cash Balance Interest crediting rate:</p> <p>Cash balance accruals prior to 2014 are credited with interest at the rate of 5-year Treasuries. As an approximation of this rate, the first segment rate from the average segment rates for January disregarding the interest rate corridors has been selected.</p> <p>Post-2013 Cash Balance Interest crediting rate:</p> <p>Cash balance accruals after 2013 are credited with interest at the annual rate of return for a hypothetical investment portfolio that is invested 40% in Vanguard Institutional Index Institutional Shares (VINIX) and 60% in Vanguard Total Bond Market Index Fund Institutional Shares (VBTIX). As an approximation of this rate, the applicable Effective Interest Rate was used.</p>
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Annuity conversion rate for hybrid plans	As required by IRC 430, annuity benefits are valued by converting accounts to annuities using the current IRC 430 interest rates, so that the interest rates assumed are effectively the same as described above for the discount rate.

SCHEDULE SB ATTACHMENTS

Rates of increase in compensation	Assumed compensation increases are based on plan sponsor expectations, including general pay practices and targets, for near-term years and the effect that the assumed long-term CPI and NAW will have on compensation increases over the longer term.
Plan-related expenses	As required by regulation, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates are based on plan sponsor expectations. Assumed termination rates differ by age, sex, and service because of expected differences in termination rates.
Retirement	Retirement rates are based on plan sponsor expectations. Assumed retirement rates vary by age, because of expected differences in retirement rates as participants age.
Benefit commencement date for deferred vested benefits:	Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.
Form of payment	The form of payment assumption is based on recent experience showing a small number of annuity commencements with all remaining participants electing a lump sum upon retirement, and is believed to be a best estimate of future experience.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

The following changes in assumptions and methods were made as part of this valuation:

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The basis for the assumption remains unchanged.
- The interest crediting rate used to project pre-2014 cash balances was updated to the current first segment rate of the 24-month average from January, disregarding interest rate corridors. The basis for the assumption remains unchanged.
- The interest crediting rate used to project post-2013 cash balances was updated to the applicable effective interest rate. The basis for the assumption remains unchanged.
- The mortality table used to calculate the funding target and target normal cost was updated to use the MP-2018 projection scale as specified in the regulations under §1.430(h)(3)-1.
- The assumed plan expenses changed from \$833,310 for the 2019 plan year to \$919,817 for the 2020 plan year. The basis for the assumption remains unchanged.

Schedule SB, Part V Summary of Plan Provisions

Plan Provisions

The plan was amended effective April 1, 2018.

Coverage and participation

Employees become participants on the first day of the calendar month following completion of 1,000 hours of service during a year and attainment of age 21.

Definitions

Vesting service

A full year is earned for each plan year the employee completes 1,000 hours of service.

Credited service

A full year is credited for each plan year the employee completes 1,000 hours of service.

Covered compensation

Attained age 50 and 10 years of Service as of December 31, 2007: The 35-year average of Social Security Wage Bases, ending in the year Social Security Normal Retirement Age (SSNRA) is attained. The Wage Base is assumed to be constant from the year of termination to the SSNRA.

For those not meeting the age and service requirement, covered compensation is frozen as of December 31, 2007.

Excess compensation

The total cash amount paid to a participant in a particular Plan Year in excess of 50% of the contribution and benefits base under section 230 of the Social Security Act as of the first day of that Plan Year.

Excess compensation is not applicable beginning January 1, 2014.

Compensation

The total cash amount paid to a participant for services rendered to the employer that is not in excess of the applicable amount, adjusted for cost-of-living increases, in accordance with Section 401(a)(17) of the Internal Revenue Code of 1986, as amended from time to time.

Final average monthly compensation

Attained age 50 and 10 years of service as of December 31, 2007: The monthly average of the highest five consecutive years of compensation.

For those not meeting the age and service requirement, final average monthly compensation is frozen as of December 31, 2007.

Normal retirement date (NRD)

Later of Age 65 or fifth anniversary of plan participation.

Interest credit

■ Pre-2014

Interest is credited as of the end of each Plan Year and applied as of the first day of each Plan Year. Terminating participants will receive partial year interest credits. The rate is 5% for any Plan Year ending before January 1, 2008 and the interest rate on 5-year Treasury securities as of the second full calendar month preceding the Plan Year for plan years ending after December 31, 2008.

■ Post-2013

Interest is credited as of the end of each Plan Year and applied as of the first day of each Plan Year. Terminating participants will receive partial year interest credits. The rate is the annual rate of return for a hypothetical investment portfolio that is invested 40% in Vanguard Institutional Index Institutional Shares (VINIX) and 60% in Vanguard Total Bond Market Index Fund Institutional Shares (VBTIX).

Service credit

■ Pre-2014

5% of Compensation for the plan year plus four 4% of Excess Compensation for the Plan Year.

■ Post-2013

5% of compensation for the Plan Year.
