1 - DESCRIPTION OF THE PLAN

General

Southwest Ambulance Pension Plan (the "Plan"), established July 1, 2004, is a defined benefit pension plan designed to provide retirement benefits to eligible employees of the Plan's sponsor, Southwest Ambulance (the "Company" or "Plan Administrator") who are subject to a collective bargaining agreement between the Company and the International Association of Fire Fighters Local I-60 or any non-highly compensated employee who is employed as a district manager. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The following description provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

Effective July 1, 2008, the Plan was amended, to allow for lump sum distributions and to adjust the benefit formula. The Plan was again amended in January 2016, to implement the benefit formula under the April 2014 arbitration decision formalized in January 2016.

Effective June 30, 2016, the Plan was amended to freeze eligibility and cease accrual of benefits under the Plan. Additionally, the normal benefit of each participant was frozen.

Plan Administration

The Plan is administered by officers and employees of the Company (the "Plan Administrator"). The Plan Administrator is responsible for controlling and managing the Plan's operations and making investment allocations. Delaware Charter Guarantee and Trust Company d/b/a Principal Trust Company (the "Trustee" or "Principal") executes investment transactions and invests cash received and investment income as directed by the Plan Administrator.

Benefits and Vesting

Until the Plan was frozen on June 30, 2016, all employees to whom the Plan has been extended were eligible for participation in the Plan upon completion of one year of service.

The normal retirement age is defined as the earlier of age 65 or age 62 with 15 years of service. The Plan permits early retirement prior to reaching the normal retirement age if the participant is at least age 55 and has 5 years of service. The annual benefit received during early retirement is reduced by 5% for each year prior to Normal Retirement Age that the distribution of benefits begins. Special early retirement is permitted by the Plan prior to reaching the normal retirement age if the participant attains 20 years of service. Benefits are not reduced when special early retirement is elected. If the actuarial equivalent of the participant's vested accrued benefit does not exceed $5,000, it will be paid in a lump sum.

Participants who have completed five years of service with the Company or have reached the age of 65 are fully vested in the Plan and are entitled to annual pension benefits beginning at normal retirement age. These benefits are payable while the retiree is alive.

1 - DESCRIPTION OF THE PLAN, CONTINUED

Benefits and Vesting, continued

There are two parts to the retirement benefit:

Flat Dollar Benefit:

1) $325 per year for years of credited service beginning July 1, 2004 and ending June 30, 2006, plus
2) $650 per year times years of credited service after July 1, 2006, up to a total of 20 years of credited service.

Percent of Pay Benefit:

1) 0.45% of final three-year average plan compensation times years of credited service beginning July 1, 2004 and ending June 30, 2006, plus
2) 0.9% of final three-year average plan compensation times years of credited service after July 1, 2006.

Federal law limits the amount of annual compensation on which benefits can be calculated ($285,000 and $280,000 for 2020 and 2019, respectively) and the amount of the maximum annual benefit ($230,000 and $225,000 for 2020 and 2019, respectively). These limitations are subject to adjustment each year by the Secretary of the Treasury.

Termination Provisions

Although it has not expressed any intent to do so, the Company has the right to discontinue its contributions at any time and to terminate the Plan, subject to the provisions of ERISA. In the event of Plan termination, participants will become 100% vested in their accounts, and Plan assets will be distributed in accordance with ERISA. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC").

Expenses of the Plan

Certain expenses of maintaining the Plan are paid by the Plan, unless otherwise paid by the Company. Expenses that are paid by the Company are excluded from these financial statements. Fees related to administrative expenses of the Plan are paid with Plan assets. Investment related expenses are included in net appreciation (depreciation) of fair value of investments.

2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan have been prepared under the accrual method of accounting in accordance with United States generally accepted accounting principles ("U.S. GAAP") from data provided to the Plan Administrator by the Trustee, which the Trustee has certified as being complete and accurate.

2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Use of Estimates

The preparation of the Plan's financial statements in conformity with U.S. GAAP requires the Plan Administrator to make estimates and assumptions that affect the reported amounts of net assets available for benefits and the accumulated plan benefits at the date of the financial statements and the changes in the net assets available for benefits and changes in accumulated plan benefits during the reporting period and, when applicable, disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ significantly from those estimates.

Benefit Payments

Benefits are recorded when paid.

Funding Policy

The Company contributes such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to participants and satisfy the ERISA minimum funding requirements and in accordance with the Internal Revenue Code ("IRC"). Annual contributions are based on the recommendations of the Plan's consulting actuary using actuarial assumptions. The Plan has met the ERISA minimum funding requirements for the years ended December 31, 2020 and 2019.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (see "Note 5 – Fair Value Measurements and Disclosures"). Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) of fair value of investments includes the Plan's gains and losses on the investments bought and sold, as well as held during the year.

Recent Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2018-13, Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement. ASU No. 2018-13 modifies the disclosure requirements for fair value measurements in Topic 820, Fair Value Measurement. The amendments are based on the concepts in the FASB Concepts Statement, Conceptual Framework for Financial Reporting—Chapter 8: Notes to Financial Statements, which the Board finalized on August 28, 2018. ASU No. 2018-13 is effective for fiscal years beginning after December 15, 2019. The adoption of ASU No. 2018-13 did not have a material effect on the Plan's financial statements.

3 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. The actuarial present value of accumulated plan benefits is determined by the Plan's actuary based on beginning of year convention and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the present value of future payments (through discounts for interest) and the probability of payment (by means of decrements for events such as death, withdrawal, or early retirement) between the valuation date and the expected date of payment. Certain assumptions require the use of management estimates which could differ from actual results. Actuarial present values of accumulated benefits were prepared by the actuary as of January 1, 2020, for the fiscal year ended January 1, 2020. Had the actuarial valuation been prepared as of December 31, 2019, there would be no material change.

The significant actuarial assumptions used in the valuation as of December 31, 2019, are as follows:

Interest rate	5.25%
Retirement ages	Earlier of age 62 with 15 years of service or age 65
Mortality rates	Based on Pri-2012 Blue collar base rate mortality table projected generationally using MP-2019

The foregoing actuarial assumptions are based upon the presumption that the Plan will continue in its frozen state. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2019, is as follows:

Vested Benefits		
Participants currently receiving payments	$	5,348,053
Inactive participants		5,076,575
Active participants		15,424,301
Total vested benefits		25,848,929
Non-Vested Benefits		3,851,852
Actuarial present value of accumulated plan benefits	$	29,700,781

3 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS, CONTINUED

The changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2019, as determined by the Plan's actuary, is as follows:

Actuarial present value of accumulated plan benefits at December 31, 2018	$	26,642,560
Increase during the year attributable to:		
Interest		1,476,216
Benefits paid to participants or their beneficiaries		(11,298,617)
Mortality improvement assumption changes		7,992,095
Accumulation of benefits and Plan experience		4,888,527

4 – FINANCIAL INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE (UNAUDITED)

The Plan Administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee of the Plan, has certified to the completeness and accuracy of all investments reported in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2020 and 2019 and the supplemental Schedule H, Line 4(i) – Schedule of Assets (held at End of Year) as of December 31, 2020, and the related investment activity reported in the Statement of Changes in Net Assets Available for Benefits for the years ended December 31, 2020 and 2019, and the related supplemental schedule of Schedule H, Line 4(j) – Schedule of Reportable Transactions for the year ended December 31, 2020.

5 - FAIR VALUE MEASUREMENTS

Investment Valuation and Leveling

FASB Accounting Standards Codification ("ASC") Topic 820 for Fair Value Measurements and Disclosures provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

NOTE 5 - FAIR VALUE MEASUREMENTS, CONTINUED

Investment Valuation and Leveling, Continued

The three levels of the fair value hierarchy under FASB ASC 820 are as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 Significant observable inputs other than quoted prices in active markets for which inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

In establishing a fair value hierarchy for the Plan's investments in accordance with ASC 820, the following value methodologies were used for each type of investment:

Pooled separate accounts: Valued at the NAV of shares held by the Plan at year end, as determined by Principal. The NAV, as provided by Principal, is used to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This NAV is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Participant transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the pooled separate accounts or common collective trusts, the Trustee reserves the right to temporarily delay withdrawals from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner. There are no unfunded commitments on these accounts at December 31, 2020 and 2019.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2020:

	Level 1	Level 2	Level 3	Total
Pooled separate accounts	$ -	$ 32,442,540	$ -	$ 32,442,540
Total investments, at fair value	$ -	$ 32,442,540	$ -	$ 32,442,540

NOTE 5 - FAIR VALUE MEASUREMENTS, CONTINUED

Investment Valuation and Leveling, Continued

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2019:

	Level 1	Level 2	Level 3	Total
Pooled separate accounts	$ -	$ 29,710,367	$ -	$ 29,710,367
Total investments, at fair value	$ -	$ 29,710,367	$ -	$ 29,710,367

NOTE 6 - TAX STATUS OF THE PLAN

The Plan obtained its latest determination letter on July 6, 2012, in which the Internal Revenue Service ("IRS") states that the Plan is in compliance with the applicable requirements of the IRC. The Plan Administrator believes that the Plan, as adopted and amended, was operating within the guidelines of the IRC, and was exempt. Accordingly, no provisions for federal income taxes has been provided in the accompanying financial statements.

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the DOL or IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE 7 - PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments are managed by an affiliate of the Trustee. Any purchases and sales of these investments, while considered party-in-interest transactions under ERISA regulations, are permitted under the provisions of the Plan and are specifically exempt from the prohibitions of party-in-interest transactions under ERISA.

NOTE 8 - RISKS AND UNCERTAINTIES

The investment allocation of the Plan is directed by the Company. Such investments are exposed to various risks, such as interest rate, market, concentration, and credit risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investments securities, it is at least reasonably possible that changes in the value of investment securities in the near term could materially affect the amount reported in the Statements of Net Assets Available for Benefits and the funding status of the Plan.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change due to uncertainty inherent in the estimations and assumptions process. It is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

NOTE 8 - RISKS AND UNCERTAINTIES, CONTINUED

As of December 31, 2020, the Plan had investments of $16,708,888 that were concentrated in three different investments. As of December 31, 2019, the Plan had investments of $18,298,061 that were concentrated in four different investments.

NOTE 9 – RECONCILIATION TO THE FORM 5500

There are no material reconciling items between the net assets reported in the audited financial statements and the Schedule H of the Form 5500 as of and for the years ended December 31, 2020 and 2019.

NOTE 10 - SUBSEQUENT EVENTS

In accordance with FASB ASC 855, "Subsequent Events," the Plan Administrator has evaluated events or transactions occurring after December 31, 2020, the Statements of Net Assets Available for Benefits date, through October 11, 2021, the date the financial statements were ready to be issued. There were no events or transactions that would impact the financial statements for the year ended December 31, 2020.

Assumptions prescribed by law

Mortality

During benefit payment period

IRS Prescribed Mortality - Static Annuitant, male and female.

Before benefit payment period

IRS Prescribed Mortality - Static Non-annuitant, male and female.

Assumptions selected by actuary

Inflation

2.25% increase per year.

See Long-Term Capital Market Assumptions link.

Asset return

5.50% for the current plan year.

The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.

Expected expense

The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.

Retirement

Table provided by Willis Towers Watson

Active and inactive participants

Years of Service	Probability of retirement - Males	Probability of retirement - Females
20	15.00%	15.00%
21-24	7.50%	7.50%
25	20.00%	20.00%
26 and over	7.50%	7.50%

100% retirement at earliest of age 62 with 15 years of vesting service and age 65.

Due to our short tenure as actuaries on this plan, we don’t have the experience necessary to set this assumption and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan’s design and as we gain experience, we will continue to monitor and make appropriate adjustments in the future.

Disability

Table provided by Willis Towers Watson

Selected rates of disability are shown below:

Age	Rate of disability - Males	Rate of disability - Females
25	0.09%	0.09%
30	0.10%	0.10%
35	0.13%	0.13%
40	0.20%	0.20%
45	0.33%	0.33%

55	1.02%	1.02%
60	1.60%	1.60%
65	2.28%	2.28%

Due to our short tenure as actuaries on this plan, we don't have the experience necessary to set this assumption and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design and as we gain experience, we will continue to monitor and make appropriate adjustments in the future.

Marriage

85% married; husbands are 3 years older than wives.

This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.

Withdrawal

Table provided by Willis Towers Watson

Selected rates of withdrawal are shown below:

Age	Rate of withdrawal - Males	Rate of withdrawal - Females
25	13.90%	13.90%
30	13.31%	13.31%
35	12.34%	12.34%
40	11.00%	11.00%
45	9.29%	9.29%
50	6.51%	6.51%
55	2.47%	2.47%
60	0.24%	0.24%

In the first 5 yeard of employment, the following rates are applicable in addition to the above rates.

years	Rate of withdrawal
0	15.00%
1	14.10%
2	12.00%
3	9.00%
4	4.50%

Due to our short tenure as actuaries on this plan, we don't have the experience necessary to set this assumption and we are relying on the assumption set by the prior actuary. This assumption is reasonable with the plan's design and as we gain experience, we will continue to monitor and make appropriate adjustments in the future.

Form of benefit

Participants are assumed to receive their benefits on the normal form at the assumed retirement age.

Methods prescribed by law

Liability measure

Funding target is the present value of the benefits accrued on the valuation date.

Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Benefit accrual

All benefits paid at decrement are considered in total and then split to determine how much is included in funding target. The following pieces are included in the funding target.

The portion based on the plan's definition of accrued benefit.

The benefit portion in excess of the accrued benefit based on the ratio of the participant's years of service on the valuation date to the years of service the participant will have at the time of decrement.

The benefits included in target normal cost are calculated similarly, by splitting the benefits. The target normal cost is based on the difference between the amount included in Funding Target and an amount calculated assuming the participant accrues service through the end of the plan year.

HCE benefit payment restrictions	A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by: any retiree benefit index or floor amounts for HCEs who were previously restricted an amount for the retiring HCE The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the non-stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

Methods selected by plan sponsor

Asset method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.
Segment rates	24-month average with no weighting to prior law basis. Use rates where December is the last month included in the average.
PBGC premium basis	Variable Rate Premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2018 plan year and this method must be used for five years before a change can be made.

Methods elected by actuary

Retirees Assets and liabilities for current and future retirees are included.

Vested benefits A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.

The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)
With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality Based on Pri-2012 Blue collar base rate mortality table projected generationally using MP-2019.

Base rates
Before benefit payment period
Employee amount-weighted, male and female

During benefit payment period
Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Blue collar base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan and has been selected due to data limitations in identifying contingent survivors. In addition, we believe beneficiary mortality isn't materially different while both participants are alive.

Mortality improvement (MI)
MP-2019 is the most recent improvement scale published by the SOA in October 2019.

Interest rate used to value liabilities	5.25% The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.
Treatment of administrative expenses	No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses. Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer. Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Optional forms of benefit payments

The optional forms of benefit payments are:
