Appendix B (Continued)

Rates of Retirement, Rates of Disability, Rates of Turnover	N/A, no active employees.
Assumptions Made In Valuing Spouse's Benefit	100% of participants included in the valuation are assumed to be married. Wives are assumed to be three years younger than the husband.
Optional Form Election	All employees are assumed to elect the normal form of payment.
Provision for Expenses	The expected administrative (i.e. non-investment) expenses, if any, that will be paid from the assets, which were assumed to equal actual administrative expenses paid during the prior year were added to the Target Normal Cost for minimum contribution purposes.
Standing Elections	The client has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.
Asset Method	Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
Employees Valued	Only participants as of January 1, 2020 were valued.
Changes in Assumptions and Methods since the last Valuation	<p>The interest rates used for determining the funding target were 3.74%, 5.35%, and 6.11%. These rates were updated to the rates required for the current plan year.</p> <p>The Expected Return on Assets was 8.00%.</p> <p>The report was revised to reflect the plan sponsor's elected provisions under ARPA.</p>
Justification for Changes in Actuarial Assumptions	The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
