1 Description of Plan

The following description of the Plan provides only general information. Participants should refer to the Plan document for a complete description of the Plan's provisions.

General:

The Plan, which began October 1, 1963 is a defined benefit plan covering all qualifying employees of Transdigm Inc. Wiggins Connectors Division (the "Company") who meet the service requirements. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective January 1, 2020, the Plan was restated to reflect the benefit increases adopted in accordance with the collective bargaining agreement.

Eligibility:

Qualifying employees become participants in the Plan on their first date of employment with the Company.

Participants are 100% vested in their accumulated benefits after five years of service.

Participants in the Plan who have reached the age of 65 are eligible to retire and receive a monthly, normal retirement benefit (depending upon the participant's retirement date) ranging from $5 to $44 multiplied by their years of service. If a participant with at least five years of service terminates employment prior to age 65, the Plan provides for deferred retirement benefits. Participants who have at least 15 years of service and attained the age of 55 are eligible to elect an early retirement pension benefit at a reduced benefit amount.

Funding Policy:

The Plan is funded by employer contributions from the Company based on reports from a consulting actuary, which meet the minimum funding requirements of ERISA. The Plan does not provide for employee contributions.

Payment of Benefits:

The normal form of benefits under the Plan consists of payments during the life of the participant. If a participant is married, the normal form of benefit payment is a qualified joint and survivor annuity, unless the participant elects and the spouse consents otherwise. Participants may elect any optional form of benefit which is the actuarial equivalent of the normal form of benefit. If a participant dies with five years of vesting service under the Plan but before any retirement benefit payments have begun, the surviving spouse (if any) will be eligible for a lifetime survivor benefit.

1 Description of Plan, Continued

CARES Act Provisions:

On March 27, 2020, the "Coronavirus Aid, Relief, and Economic Security (CARES) Act" was signed into law. The CARES Act, among other things, includes several relief provisions available to tax-qualified retirement plans and their participants. Plan management evaluated the relief provisions available to plan participants under the CARES Act and implemented the following provision: deferral of employer contributions for the 2020 plan year to January 1, 2021.

2 Summary of Significant Accounting Policies

Basis of Accounting:

The Plan's transactions are reported on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Recent Accounting Pronouncements:

In August 2018, the FASB issued Accounting Standards Update No. 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement (ASU 2018-13). The new standard removes or modifies certain existing disclosure requirements and adds additional disclosure requirements related to fair value measurement. The Plan elected to adopt ASU 2018-13 for the year ended December 31, 2020. The effect of the adoption is an overall reduction in disclosures related to fair value measurement.

Valuation of Investments:

Investments held in the Plan are stated at fair value. Marketable securities are reported at fair market value as of the balance sheet date. Fair market values represent quoted market prices or, if quoted market prices are not available, estimated fair values as determined by the Plan's investment broker.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

2 Summary of Significant Accounting Policies

Actuarial Present Value of Accumulated Plan Benefits:

Accumulated Plan benefits represent future periodic payments for services employees have rendered. Accumulated Plan benefits include benefits expected to be paid to:

a) Retired or terminated employees or their beneficiaries;
b) Beneficiaries of employees who have died;
c) Present employees or their beneficiaries

The accumulated Plan benefits for active employees are based on Plan provisions ending on the date as of which the benefit information is presented. Benefits payable upon retirement, death, disability, and termination of employment are included, to the extent they are deemed attributable to employee service rendered to the valuation date. The actuarial present value of accumulated Plan benefits was determined by the consulting actuary and is the amount which results from applying actuarial assumptions to adjust the accumulated Plan benefits to reflect the time value of money (through discounts for interest) and the probability for payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Administrative Fees:

All administrative fees are paid by the Plan or the Company.

Payment of Benefits:

Benefit payments are recorded when paid.

Plan Termination:

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, to vested participants based upon the plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees.

2 Summary of Significant Accounting Policies, Continued

Risks and Uncertainties:

The Plan includes investments in mutual funds and a stable value fund with varying degrees of risk, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the Statement of Net Assets Available for Plan Benefits.

Plan contributions are made and the actuarial present value of accumulated benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is reasonably possible that changes in these estimates and assumptions could materially affect the amounts reported in the Statement of Net Assets Available for Benefits and the Statement of Changes in Net Assets Available for Benefits.

Reclassifications:

Certain prior year amounts have been reclassified to conform with the current year's presentation.

Subsequent Events:

Management evaluates subsequent events occurring subsequent to the date of the financial statements in determining and the accounting for and disclosure of transactions and events that affect the financial statements.

Subsequent events have been evaluated through October 8, 2021, which is the date the financial statements were available to be issued.

3 Tax Status

On December 9, 2020 the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken uncertain tax positions that more-likely-than-not would not be sustained upon examination by applicable taxing authorities. The Plan administrator has analyzed tax positions taken by the Plan and has concluded that, as of December 31, 2020, there are no uncertain tax positions taken, or expected to be taken, that would require recognition of a liability or that would require disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. However, currently no audits for any tax periods are in progress.

4 Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The three levels of the fair value hierarchy under Topic 820 are described as follows:

* Level 1: Inputs to the valuation methodology are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Plan can access at the measurement date.

* Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

    * Quoted prices for similar assets or liabilities in active markets
    * Quoted prices for identical or similar assets or liabilities in inactive markets
    * Inputs other than quoted prices that are observable for the asset or liability
    * Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

  If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

* Level 3: Inputs that are unobservable inputs for the asset or liability.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2020 and 2019.

Mutual Funds:

The fair value of the mutual funds are based on quoted market prices. Mutual funds held by the Plan are open-ended funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value and to transact at that price. The mutual funds held by the plan are deemed to be actively traded and are classified in the Level 1 category of the valuation hierarchy.

Stable Value Fund:

The fair value of the stable value fund is based on the underlying assets of the general account of the Transamerica Life Insurance Company. The assets of the general account are supported by the financial stability of Transamerica Life Insurance Company. Transactions (purchases and sales) may occur daily, and the investment advisor may impose up to a 12-month delay period on all withdrawal requests. The stable value fund is classified in the Level 2 category of the valuation hierarchy.

4 Fair Value Measurements, Continued

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2020 and 2019. Classification within the fair value hierarchy table is based on the lowest level of any input that is significant to the fair value measurement.

One of the Plan's investments is made available through Transamerica Life Insurance & Annuity Co., the trustee as defined by the Plan, and therefore, this transaction qualifies as party-in-interest. Usual and customary fees were paid by the mutual fund for the investment management services. In addition, the Plan has arrangements with various service providers and these arrangements qualify as party-in-interest.

Appendix A – Summary of Actuarial Methods

Actuarial Cost Method: Unit Credit.

The actuarial cost method used in the valuation is the accrued benefit (unit credit) cost method as prescribed by PPA. In this method, the regular plan cost arises from two sources: a Normal Cost and an amortization payment for the Funding Target Shortfall.

The Funding Target is determined as the actuarial present value of benefits as of the valuation date. The Shortfall is equal to the Funding Target less the Plan Assets (with adjustments for credit balances). The amortization payment for a plan year is the aggregate total of the Shortfall Amortization payments, which are based on amounts necessary to amortize the additional Shortfall of each year in level annual installments over a 7-year period beginning with such year.

The Normal Cost is the actuarial present value of benefits expected to accrue during the valuation year plus anticipated administrative expense, if any.

Asset Valuation Method: The asset valuation technique determines valuation assets as the adjusted market value of assets.

Interest Rate Election for Determining Plan Liabilities: Segment rates with 4 month look back.

Economic Assumptions

Interest Rates

Interest Rates for Funding: 2020 Segment Rates with 4 month look back, subject to Segment Rate Stabilization.

	Minimum Funding	Maximum Deductible
Segment 1 (0-5 years)	3.64%	2.79%
Segment 2 (5-20 years)	5.21%	3.92%
Segment 3 (20+ years)	5.94%	4.38%
Effective Interest Rate	5.38%	4.07%

ERISA minimum funding:

Assumption: 24-month average segment rates, using a four-month lookback period, adjusted to reflect the applicable segment rate stabilization corridor.

Rationale for assumption: This is a prescribed assumption set by the Internal Revenue Code (IRC) Section 430. The plan sponsor has elected to utilize a four-month lookback with rates averaged over a 24-month period, limited to applicable minimum and maximum values in accordance with MAP-21, HATFA, and BBA.

Maximum Deductible Contribution:

Assumption: 24-month average segment rates, using a four-month lookback period, but not adjusted to reflect the applicable segment rate stabilization corridor.

Rationale for assumption: This is a prescribed assumption set by the Internal Revenue Code (IRC) Section 430. The plan sponsor has elected to utilize a four-month lookback with rates averaged over a 24-month period.

Inflation (CPI)

Assumption: 2.30%, compounded annually. This assumption represents an estimate of future experience and is based in part on observations of estimates inherent in market data.

Rationale for assumption: We utilized the 30-year breakeven inflation rate on December 31, 2019 in combination with the CBO's 75-year forecast to arrive at this assumption.

Administrative Expenses

Assumption: Prior plan year's actual expenses rounded to next $1,000 plus the expected PBGC premium.

Rationale for assumption: This assumption represents an estimate of future experience. We believe the assumption selected is reasonable for the contingency being measured and is not anticipated to produce significant cumulative actuarial gains or losses over the measurement period.
