1. Description of the Plan

The following description of the TIMET Defined Benefit Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit pension plan sponsored by Titanium Metals Corporation (the Company), a wholly owned subsidiary of Precision Castparts Corp. (PCC). The assets are invested in the Precision Castparts Corp. Master Trust (Master Trust) with The Bank of New York Mellon (BNYM). The Plan is subject to the provisions of the Employee Retirement Income Securities Act of 1974 (ERISA).

The Company has appointed an administrative committee to oversee the administration of the Plan, with local human resources personnel providing day-to-day support functions. The Master Trust Investment Committee determines the appropriateness of the Plan's investments and monitors investment performance.

Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirements. No participant contributions are permitted. The minimum funding requirements of ERISA were met for 2020 and 2019.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

Eligibility and Vesting

Salaried employees hired from January 1, 1987 through December 31, 1988, who attained the age of 21 and completed one year of continuous service, were eligible to participate in the Plan. Effective January 1, 1989, the Plan was closed to new participants, and participants ceased accruing additional service credit under the Plan. Effective April 2, 1994, participants also ceased accruing credit for additional salary increases. Benefits accruing to salaried employees prior to January 1, 1987, were provided through the TMC Retirement Plan (the Prior Plan) and were fully vested as of December 31, 1986. Such accrued benefits are funded by annuities purchased from Metropolitan Life Insurance Company and American International Life Assurance Company of New York as discussed further below.

The Plan also provides benefits to substantially all individuals who were hourly employees of the Company at the Toronto, Ohio and Henderson, Nevada plants prior to July 1, 1995 and April 1, 1994, respectively. The Plan was closed to new participants effective July 1, 1995 for the Toronto, Ohio plant and effective April 1, 1994 for the Henderson, Nevada plant. Hourly employees at the applicable plants who attained the age of 21 and completed one year of continuous service prior to the closure dates were eligible to participate in the Plan. The Company has the right to alter, amend or terminate the Plan at any time.

Pension Benefits

Monthly benefit payments are determined for each participant according to the retirement option selected. Pension benefits for salaried participants are based on compensation through April 2, 1994 and years of service in the Plan through December 31, 1988. Pension benefits for hourly participants are based on years of continuous service, as defined by the Plan agreement, multiplied by specified dollar amounts. Specific terms of the Plan provide other retirement options with a combination of age and years of credited service factors. Vesting occurs upon the completion of five years of service or age 65. Monthly benefit payments by the Plan are reduced by amounts funded by annuity contracts purchased from insurance companies to provide for benefits accrued prior to December 31, 1986, under the Prior Plan.

Annuities were purchased to fund certain benefits accrued under the Prior Plan. The insurance companies remit funds to the Plan's trust account on a monthly basis and payments to participants for benefits accrued under the Prior Plan are made from the respective trust accounts. Benefits paid to participants are shown net of $1,226,620 and $1,232,222 of funds received from the insurance companies for the years ended December 31, 2020 and 2019, respectively, as these funds are immediately remitted to the retirees and are not obligations of the Plan.

Death and Disability Benefits

If a vested participant dies before normal or early retirement age, a death benefit equal to the actuarial equivalent of 50 percent of the value of the participant's accumulated retirement benefits is paid to the participant's beneficiary in the form of a straight life annuity. Active participants who become totally disabled will continue to accrue service years while disabled until normal retirement age. Benefits shall be determined on the basis of years of service and the applicable monthly regular pension factor. At the participant's election, in lieu of a disability retirement pension, the participant may elect to commence receipt of a 62/10 retirement pension, 55/10 retirement pension or a 55/30 retirement pension.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosures of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying Statements of Changes in Net Assets Available for Benefits. In addition, certain investment related expenses are included in the Plan's interest in the net investment income of the Master Trust presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is reported at fair value based on the underlying investments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation in the value of investments is allocated by the Master Trust to the Plan based upon the Plan's daily weighted average percentage of net assets for a given month.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died and (c) present employees or their beneficiaries. Benefits under the Plan are based on years of credited service and employee compensation. The accumulated plan benefits for active employees will equal the accumulation of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances such as retirement, death, disability and termination of employment are included, to the extent they are attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary as of January 1, 2020 and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of January 1, 2020 is as follows:

Vested benefits:	
Participants and beneficiaries currently receiving payments	$ 45,113,055
Other participants	12,865,789
Total vested benefits	57,978,844
Nonvested benefits	20,360
Total actuarial present value of accumulated plan benefits	$ 57,999,204

The changes in the actuarial present value of the accumulated plan benefits for the year ended December 31, 2019 are summarized as follows:

Actuarial present value of accumulated plan benefits, at beginning of year	$ 63,048,926
Increase (decrease) during the year attributable to:	
Benefits accumulated	280,569
Increase for interest due to decrease in discount period	4,344,200
Benefits paid	(6,369,310)
Plan amendments	2,213
Change in actuarial assumptions	(2,569,725)
Actuarial gain	(737,669)
Actuarial present value of accumulated plan benefits, at end of year	$ 57,999,204

Significant assumptions underlying the actuarial computations are as follows:

a) Mortality - Pri-2012 Private Retirement Plans Healthy Blue Collar Mortality Tables projected with Scale MP 2019 on a generational basis.

b) Discount Rate - 7.25 percent

c) Eligible employees were assumed to retire according to the following table:

Retirement Age	Retirement Rate Percentage
55 - 59	3.0 %
60 - 61	10.0
62	25.0
63 - 64	10.0
65 - 69	30.0
70	100.0

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The mortality assumption was updated to incorporate a more recent mortality table and projection scale to reflect both current and expected mortality improvements. These changes resulted in a decrease of approximately $2.6 million in the actuarial present value of accumulated benefits in 2020.

Recent Accounting Standard

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2018-13, *Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement*. ASU No. 2018-13 modifies the disclosure requirements for fair value measurements in Topic 820, *Fair Value Measurement*. The amendments are based on the concepts in the FASB Concepts Statement, *Conceptual Framework for Financial Reporting—Chapter 8: Notes to Financial Statements*, which the FASB finalized on August 28, 2018. ASU No. 2018-13 is effective for fiscal years beginning after December 15, 2019. Management has adopted the provisions of this new standard for the year ended December 31, 2020. This update was retrospectively applied.

Subsequent Events

The Plan has evaluated subsequent events for recognition or disclosure through October 7, 2021, the date the financial statements were available to be issued.

3. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets held in the Master Trust measured at fair value. The Plan is able to purchase or sell units of the Master Trust on a daily basis. The Master Trust asset allocation strategy is designed with the objective of achieving the asset return assumption consistently over the long-term in order to fund future payment obligations, while minimizing contributions and plan sponsor economic risk. The asset categories are described below, along with the valuation methodologies and investment level classifications. There have been no changes in the methodologies used at December 31, 2020 and 2019.

Public Equity - Public equity investments consist of publicly traded equity securities, as well as hedged equity investment strategies which may add short positions in equities or equity futures in order to generate absolute returns regardless of equity market direction. Equity investments held directly are valued based upon closing prices reported in active trading markets and classified as Level 1. Other fund investments are valued using the most recent net asset value (NAV) of the fund.

Private Equity - Private equity investments consist of investments in nonpublic companies made directly or through limited partnerships or commingled vehicles with managers who purchase interests in nonpublic companies. Sub-categories of private equity may include venture capital, early stage, special situations or restructuring funds. Private equity typically has low liquidity, a ten year or longer investment commitment and valuation methodologies that require the use of significant unobservable inputs. Direct private equity investments are classified as Level 3, while investments made through funds are typically valued at the most recent NAV of the fund. As of December 31, 2020 and 2019, unfunded capital commitments to private equity investments were approximately $4 million.

Alternative Strategies - Alternative strategies are investments with managers who seek specified levels of absolute returns with minimal correlation to market movements. Alternatives managers typically invest in futures, forwards or options on a variety of asset classes. Investments are typically made in investment funds with values stated at fund NAVs. Royalty investments were historically made through investment funds which purchase income-producing royalties derived from sales of pharmaceutical products, with the fund's underlying royalty investments subject to independent fair valuation methodologies used in determining the fund's NAV. Liquidity was typically arranged in the secondary market with trades occurring at the most recent NAV. During 2020, the Company's significant royalty investment fund holding was restructured and now trades as a publicly listed equity security. As such, this investment was recategorized during 2020 as a Public Equity holding and classified as Level 1.

Fixed Income - Fixed income investments consist of private fixed income securities of non-U.S. corporate issuers classified as Level 3, as well as publicly traded investment funds classified as Level 1.

Cash/Other - Cash and other investments include highly liquid money market securities, demand deposits and other cash equivalents. Cash and other investments are classified as Level 1, or stated at NAV for private money market funds.

4. Undivided Interest in the Precision Castparts Corp. Master Trust

All of the Plan's investments are in the Master Trust. The Plan's interest is calculated based on the fair value at the end of the previous period, plus any contributions and income received, less benefit payments and expenses paid for each plan during the period.

At December 31, 2020 and 2019, the Plan's interest in the net assets of the Master Trust was 5.93 percent and 6.00 percent, respectively. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon the amount of time the Plan's assets were invested in the Master Trust.

The following table presents the net assets of the Master Trust as of December 31, 2020 and 2019:

	2020		2019	
	Master Trust	Plan's Proportionate Share	Master Trust	Plan's Proportionate Share

During 2020 and 2019, investment income for the Master Trust is as follows:

The table below sets forth a summary of certain changes in the fair value of the Master Trust's Level 3 assets for the years ending December 31, 2020 and 2019:

	2019		
	Private Equity	**Fixed Income**	**Total**
Purchases	$ 700,000	$ -	$ 700,000
Issuances	-	-	-
Transfers in and/or out of Level 3	-	-	-

Gains and losses (realized and unrealized) included in the change in net assets for the periods above are reported in plan interest in net investment income of Master Trust in the Statements of Changes in Net Assets Available for Benefits.

Transfers Between Levels - The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. We evaluate the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. In 2020, the Plan had $10,235,205 of transfers from Level 3 to Level 1. In 2019, there were no transfers between levels.

5. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.

b) Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.

c) All other vested benefits (that is, vested benefits not insured by PBGC).

d) All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

6. Related-Party and Party in Interest Transactions

The Plan's investments are administered under a contract with BNYM, the trustee of the Plan. Contributions are held and managed by BNYM, who invests cash received, interest and dividend income and make distributions to participants. These transactions qualify as party in interest transactions which are exempt from the prohibited transactions rules of ERISA.

As described in Note 2, the Plan paid certain expenses related to plan operations and investment activity to various service providers. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan.

7. Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated July 21, 2017, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

8. Risks and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

9. Information Certified by Trustee

The plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA for 2020 and 2019. Accordingly, BNYM, the trustee of the Plan, has certified to the completeness and accuracy of all investments reported in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2020 and 2019 and the related investment activity reported in the Statements of Changes in Net Assets Available for Benefits for the years then ended.

Actuarial Cost Method

For purposes of calculating the Funding Target, we calculated the actuarial present value of benefits accrued as of the beginning of the plan year. This cost method is typically referred to as the Unit Credit method.

Actuarial Value of Assets

For funding requirements, the Plan uses the 24 month average value of assets per IRS Notice 2009-22.

Discount Rates

As selected by TIMET, the rates for calculating the PPA Funding Target are the September 2019 segment rates. As prescribed by segment rate stabilization legislation without the American Rescue Plan Act, in 2020 these rates must be between 90% and 110% of the 25-year average rates published by the IRS.

- Segment 1 payments under 5 years 3.64%
- Segment 2 payments between 5 and 20 years 5.21%
- Segment 3 payments after 20 years 5.94%

Salary Scale

Pay rates were assumed to increase 3.00% per year for Toronto, Ohio, and Henderson, Nevada, bargaining plant participants. Pay rates are included in the calculation of the Special Payment Benefit.

Compensation for salaried members was frozen April 1, 1994, so the salary scale does not apply.

Future Service

Each active participant is assumed to earn one year of service in each future plan year prior to the year of retirement, death, or withdrawal.

Withdrawal

Withdrawals prior to retirement for reasons other than death were assumed to follow the 2003 SOA Pension Plan Turnover Study Small Plan Service Table. Withdrawal rates at sample ages are shown below:

Service	Withdrawal Rate
0	19.8%
1	18.1%
2	16.5%
5	12.3%
10	7.4%
15	4.4%
20	2.5%
25	1.4%
30	0.8%
50	0.1%

Retirement

Eligible employees were assumed to retire prior to normal retirement according to the following table:

Age(s)	Retirement Rate
55-59	3.0%
60-61	10.0%
62	25.0%
63-64	10.0%
65-69	30.0%
70	100.0%

Assumed retirement dates for vested terminated participants were provided by the plan administrator.

Mortality

For calculating the Funding Target, mortality follows the RP-2014 annuitant and non-annuitant static mortality tables for 2020 as prescribed by the IRS for all participants.

Disability

No employees were assumed to terminate due to disability.

Administrative Expenses

Administrative expenses are estimated to be the sum of the prior year expenses, less the prior year PBGC premium, plus the current year PBGC premium, payable at the beginning of the year.

Probability of Marriage

85% of non-retired participants are assumed to be married. A three-year age difference between spouses is assumed with the males being older.

Form of Benefit

Non-retired participants are assumed to elect from the following forms of payment at retirement at the rates shown:

Probability	Form of Payment
40%	Single Life Annuity
60%	50% Joint & Survivor Annuity

Change in Actuarial Assumptions

- The Funding Target discount rates and mortality assumption were updated as required and as described above.
