Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditor's Report

Ferro Corporation Plan Administrator
Ferro Corporation Pension Plan for Legacy Employees
Mayfield Heights, Ohio

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit for of 2020 Financial Statements

We have performed an audit of the financial statements of Ferro Corporation Pension Plan for Legacy Employees (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C). The financial statements comprise the statement of net assets available for benefits as of December 31, 2020, and the related statement of changes in net assets available for benefits for the year then ended, and the related notes to the financial statements (2020 financial statements).

Management, having determined it is permissible in the circumstances, has elected to have the audit of the 2020 financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA (ERISA Section 103(a)(3)(C) audit). As permitted by ERISA Section 103(a)(3)(C), our audit need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency (qualified institution), provided that the investment information is prepared and certified to by the qualified institution in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Management has obtained certifications from qualified institutions as of December 31, 2020, and for the year then ended, stating that the certified investment information, as described in Note 3 to the financial statements, is complete and accurate.

Opinion on the 2020 Financial Statements

In our opinion, based on our audit and the procedures performed as described in the *Auditor's Responsibilities for the Audit of the 2020 Financial Statements* section of our report

- the amounts and disclosures in the accompanying 2020 financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP); and
- the certified investment information in the accompanying 2020 financial statements agrees to, or is derived from, in all material respects, the information prepared and certified by qualified institutions that management determined meet the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion on the 2020 Financial Statements

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the 2020 Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are issued or available to be issued.

Management is responsible for maintaining a current plan instrument, including all plan amendments. Management is also responsible for administering the Plan and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the 2020 Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit of the 2020 Financial Statements* section of our report, our objectives are to obtain reasonable assurance about whether the 2020 financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audit did not extend to the certified investment information, except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the 2020 financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the 2020 financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter – 2020 Supplemental Schedules Required by ERISA

The supplemental Schedule of Assets (Held at End of Year) as of December 31, 2020 and Schedule of Reportable Transactions for the year ended December 31, 2020 are presented for purposes of additional analysis and are not a required part of the 2020 financial statements but are supplementary information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the 2020 financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the 2020 financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the 2020 financial statements or to the 2020 financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified

investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.
- the certified investment information in the supplemental schedules agrees to, or are derived from, in all material respects, the information prepared and certified by qualified institutions that management determined meet the requirements of ERISA Section 103(a)(3)(C).

Other Matter – Report on the 2019 Financial Statements

We were engaged to audit the statement of net assets available for benefits of the Plan as of December 31, 2019 and the related statement of changes in net assets for the year then ended. As permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information certified by the qualified institution. Our audit report, dated October 14, 2020, indicated that (a) because of the significance of the information that we did not audit, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an opinion and accordingly, we did not, express an opinion on the financial statements, and (b) the form and content of the information included in the 2019 financial statements other than that derived from the information certified by the qualified institution, were presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

1. Description of the Plan

The following brief description of the Ferro Corporation Pension Plan for Legacy Employees (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan was established on October 31, 2017 as a result of a spin-off from the Ferro Corporation Pension Plan and is a frozen defined benefit pension plan sponsored by Ferro Corporation (the Company or Employer) under which certain salaried and hourly rate employees at various facilities of the Company have frozen accrued benefits. Assets and benefit obligations were transferred to the Plan from the Ferro Corporation Pension Plan (the predecessor plan) as part of a spin-off. Participants and beneficiaries meeting certain requirements were transferred to the Plan.

Benefits

Plan participants stopped accruing benefits at various dates prior to January 1, 2011. Under terms of the Plan document, participants are eligible for monthly normal retirement benefit payments upon retirement after reaching age 65, or they may retire on or after age 55 (age 60 at the Baton Rouge, Niagara Falls and Nashville facilities) and receive early retirement benefits provided they are credited with at least 10 years of Credited Service (15 years of Credited Vesting Service at the Niagara Falls and Nashville facilities). Normal monthly benefits are determined by multiplying the number of years of credited service by a monthly benefit factor. Refer to the Plan document for a more complete description of the different applicable benefit factors and the dates on which benefit accruals ceased at the covered locations.

In December 2017, the Plan purchased annuities from an insurance carrier for a select group of participants and transferred the Plan's liability to make annuity payments for this group to the insurance company, which significantly reduced the actuarial present value of accumulated plan benefits (See Note 6).

The Plan was amended, effective April 15, 2020, to allow distributions to eligible participants who have attained age 59 1/2 and who have not separated from employment at the time of such distribution (subject to Department of Labor regulations related to disability claims).

Death and Disability Benefits

Prior to January 1, 2011, the predecessor plan provided for disability benefits for active participants who terminated employment due to permanent and total disability. A range of five to fifteen years of Credited Vesting Service, depending on the facility, were needed to become vested in accrued benefits under the Plan.

If a participant eligible for vested benefits dies before benefit payments begin, the surviving spouse may be entitled to a death benefit equal to the survivor portion under the Plan's joint and 50% survivor annuity. Any active participant who became eligible for disability retirement payments under the Plan prior to January 1, 2011, receives disability benefits that are equal to his or her accrued benefit as of the time of disability.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

Cash-outs

If a participant terminates employment, and the present value of his or her vested accrued benefit on his or her severance date does not exceed \$1,000, the Plan will distribute the present value of such vested accrued benefit to the participant.

Trustees and Custodians

Under the terms of the fiduciary agreement between SEI Private Trust Company (SEI) and the Plan, SEI manages certain assets of the Plan and has been granted discretionary authority concerning purchases and sales of investments in the trust fund. The investments as of December 31, 2020 and 2019 and investment income of the Plan assets for the years then ended (as disclosed in the accompanying financial statements and supplemental schedules) have been certified as complete and accurate as reported to the Plan by SEI.

Under the terms of the fiduciary agreement between Prudential Retirement Insurance & Annuity Company (Prudential) and the Plan, Prudential manages certain assets of the Plan and has been granted discretionary authority concerning purchases and sales of investments in the trust fund. The investments of the Plan are maintained by Prudential in a general account and several separate pooled investment accounts. The investments as of December 31, 2020 and 2019 and investment income of the Plan assets for the years then ended (as disclosed in the accompanying financial statements and supplemental schedules) have been certified as complete and accurate as reported to the Plan by Prudential.

Under the terms of the fiduciary agreement between Aetna Life and Casualty Insurance Company (Aetna) and the Plan, Aetna manages certain assets of the Plan and has been granted discretionary authority concerning purchases and sales of investments in the trust fund. The investments of the Plan are maintained by Aetna in a general annuity contract. The investments as of December 31, 2020 and 2019 and investment income of the Plan assets for the years then ended (as disclosed in the accompanying financial statements and supplemental schedules) have been certified as complete and accurate as reported to the Plan by Aetna.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Administrative Expenses

All expenses of administering the Plan are paid from the Plan assets. Expenses directly related to the Plan are paid from the Plan unless the Company elects to pay them.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

Investment Valuation and Income Recognition

Investments, with the exception of investments at contract value, are reported at fair value. Fair market value is measured by the quoted market price as of the end of the Plan year. Purchases and sales of mutual funds are recorded on a settlement-date basis and purchases and sales of stocks are recorded on a trade-date basis plus one day. Realized gains and losses are recorded on the same day as the sales. The above method does not have a material impact on the financial statements when compared to recording on a trade-date basis.

The Plan invests in assets contained in pooled separate accounts consisting principally of investments at net asset value (NAV) in intermediate-term, privately placed debt securities; high-grade, publicly traded debt securities; publicly marketed equity securities; and real estate equities. The investments and changes therein of the pooled separate accounts have been reported to the Plan by Prudential Retirement Insurance & Annuity Company at fair value.

The Plan also invests in a group annuity contract with Aetna Life and Casualty Insurance Company. The valuation of the investment and changes therein are stated at contract value.

Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements. Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to the uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

On January 30, 2020, the World Health Organization (WHO) announced a global health emergency because of a new strain of coronavirus (the COVID-19 outbreak) and the risks to the international community as the virus spreads globally beyond its point of origin. In March 2020, the WHO classified the COVID-19 outbreak as a pandemic, based on the rapid increase in exposure globally.

The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. This pandemic has adversely affected global economic activity and contributed to volatility in financial markets. Since the values of the Plan's investments have and will fluctuate in response to changing market conditions, the amount of losses that will be recognized in subsequent periods, if any, cannot be determined. The value of the Plan's investments have a direct impact on its funded status. As a result of fluctuations in market value and possible changes to the actuarial assumptions used in determining the present value of accumulated plan benefits, the Plan Sponsor may need to make greater cash contributions to fund the Plan. Based on the Plan's funded percentage, there may be certain benefit limitations imposed. However, the actual impact, if any, on future required contributions, Plan liquidity, and benefit limitations cannot be determined at this time.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

CARES Act

On March 27, 2020, former President Trump signed into law the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The CARES Act, among other things, includes several relief provisions available to tax-qualified retirement plans and their participants. Plan management has implemented the provisions available and determined that they do not significantly impact the Plan.

Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Evaluation of Subsequent Events

The Plan's management has evaluated subsequent events and transactions through October 13, 2021, which is the date that the financial statements were available to be issued, for possible recognition or disclosure in the financial statements.

Effective January 11, 2021, an amendment to the Plan was executed to adjust the computation of interest to be included in determining the amount of a refund of Employee Contributions. The amount of interest to be included in determining the amount of a refund of Employee Contributions shall be equal to 120% of the Federal mid-term rate as in effect for the first month of the Plan year. There were no other such events that were required to be recognized or disclosed.

3. Certified Information (Unaudited)

The plan administrator has elected the method of annual reporting compliance permitted by ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, SEI (the trustee), Prudential and Aetna (the custodians), qualified institutions, have certified that the following investment information included in the accompanying financial statements and ERISA-required supplemental schedules is complete and accurate:

- Investments as shown in the statements of net assets available for benefits as of December 31, 2020 and 2019.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

- Investment income, net as shown in the statements of changes in net assets available for benefits for the years ended December 31, 2020 and 2019.
- Investment information included in the schedule of assets (held at end of year) as of December 31, 2020, as shown on the ERISA-required supplemental schedules.

At the request of the plan administrator, the Plan's independent auditors did not perform auditing procedures with respect to this certified investment information, except for comparing such certified investment information to the related investment information included in the financial statements and ERISA-required supplemental schedule.

4. Investment Contracts with Insurance Companies

The Plan has a benefit-responsive investment fixed annuity contract with Prudential Retirement Insurance & Annuity Company. Assets contained in the general account consist of an immediate participation guarantee contract, which is invested primarily in publicly traded and privately placed debt securities and mortgage loans. Participants of the guaranteed deposit account receive a book value account interest rate that is determined based on the anticipated market returns in the general fund, in addition to any plan-specific contract charges. The declared interest rates for the years ended December 31, 2020 and December 31, 2019 ranged from 2.05% to 3.28% and 3.30% to 3.33%, respectively.

The Plan has a benefit-responsive investment group annuity contract with Aetna Life and Casualty Insurance Company. Assets contained in the general account consist of an immediate participation guarantee contract, which is invested primarily in publicly traded and privately placed debt securities and mortgage loans. Participants of the fixed income account receive a book value account interest rate that is determined based on the anticipated market returns in the general fund, in addition to any plan-specific contract charges. The average annual effective interest rate for the years ended December 31, 2020 and December 31, 2019 was 5.10% and 5.64%, respectively. This rate does not reflect any reduction due to contract service fees.

Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment contract value.

5. Fair Value Measurements

Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosure, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobserved inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include:
 - Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability; and

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurements.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value.

Ferro Corporation common stock: Valued at the closing price reported on the active market on which the individual security is traded.

Registered investment companies (equity and fixed income mutual funds): Valued at the daily closing price as reported by the fund manager. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Prudential Trust Company pooled separate accounts: The fair values of participation units in the pooled separate accounts are based upon the net asset values of such accounts, which are provided by the fund manager. The NAV is based on the underlying assets owned by the account less liabilities and then divided by the number of shares outstanding. There are no redemption restrictions or unfunded commitments on this investment, except Prudential reserves the right to restrict transfers for up to 30 days. The Plan has the ability to redeem the investment at the NAV (or its equivalent) in the near term.

Common/collective trust: Valued at the NAV of units of the collective trust. The NAV, as provided by the fund manager, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Transactions (purchases and sales) may occur daily. Were the Plan to initiate a full redemption of the collective trust, the investment adviser reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner. There are no unfunded commitments as of December 31, 2020 and 2019. The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2020 and 2019:

	Level 1	Level 2	Level 3	Total
Equity Mutual Funds	\$ 135,790,357	\$ -	\$ -	\$ 135,790,357

Balance, December 31, 2019	\$ 206,109,950	\$ -	\$ -	\$ 221,168,052

*In accordance with ASC 820-10, certain investments that were measured at NAV (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the tables above for the investments in common/collective trusts and pooled separate accounts are to permit reconciliation of the fair value hierarchy to the line items presented in the statements of net assets available for benefits.

6. Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits was determined by an actuarial consulting firm, and it is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the probability of payment and the time-value of money (through discounts for interest) between the valuation date and the expected date of payment. The significant actuarial assumptions used to calculate the value of vested benefits and accrued benefits for the year beginning January 1, 2020 and for the plan year beginning January 1, 2019 include:

- Expected investment return rate of 7.00% for 2020 and 2019;
- Assumed rates of mortality, turnover, and disability based on published statistical data;
- Assumed a range of 70% to 85% of participants are married, with males having spouses who are three years younger and females having spouses who are three years older;
- Normal retirement at age 63,
- Administrative expenses will continue to be paid from the trust.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The total actuarial present value of accumulated plan benefits as of January 1, 2020 and January 1, 2019 is as follows:

	January 1, 2020	January 1, 2019
Vested benefits		
Participants currently receiving payments	\$ 158,916,678	\$ 160,534,609
Other participants	49,629,695	54,499,681
Total vested benefits	208,546,373	215,034,290
Non-vested benefits	190,933	907,061
Total actuarial present value of accumulated plan benefits	\$ 208,737,306	\$ 215,941,351

The changes in the actuarial present value of accumulated plan benefits from the previous benefit information date were as follows:

Actuarial present value of accumulated plan benefits, January 1, 2019	\$ 215,941,351
Increase (decrease) during the year due to:	
Benefits accumulated and losses	345,299
Increase in discount period	14,373,091
Benefits paid	(19,590,413)
Change in actuarial assumptions	(2,332,022)
Actuarial present value of accumulated plan benefits, January 1, 2020	\$ 208,737,306
Actuarial present value of accumulated plan benefits, January 1, 2018	\$ 222,310,957
(Decrease) increase during the year due to:	
Benefits accumulated and gains	(1,112,404)
Increase in discount period	14,543,036
Benefits paid	(19,501,858)
Change in actuarial assumptions	(298,380)
Actuarial present value of accumulated plan benefits, January 1, 2019	\$ 215,941,351

Notes to Financial Statements

7. Funding Policy

The Company has voluntarily agreed to make contributions to the Plan sufficient to provide the Plan with assets with which to pay pension benefits to Plan participants. The Company's contributions are determined pursuant to an actuarial cost method and are designed to meet the minimum funding requirements of ERISA. The Company's contributions for 2020 and 2019 met the ERISA minimum funding requirements as determined by independent actuaries.

8. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to provisions set forth in ERISA.

Under provisions of ERISA, if the Plan is terminated, the Company may be obligated to make termination payments to the Plan and participants may be eligible for continuation of benefits under insurance provided by the Pension Benefit Guaranty Corporation (PBGC).

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan and the amount of benefit protection is subject to certain limitations.

In the event of a complete termination of the Plan, the assets then remaining in the Plan, after providing for expenses of administration, shall be allocated, to the extent that they shall be sufficient, for the purpose of funding the accrued benefits to the date of termination of the Plan for all pensioners, participants, vested former participants, and beneficiaries in the manner and order of precedence required under the terms of Section 4044 of ERISA. Any funds remaining in the Plan after funding in full all of the accrued benefits to the termination date of the Plan, shall revert to the Company. In the event of a partial termination of the Plan, the portion of the assets of the Plan relating to the terminated portion of the Plan shall be allocated as aforesaid for the purpose of funding the accrued benefits of pensioners, participants, vested former participants, and beneficiaries whose benefit rights are affected by such partial termination.

9. Party-in-Interest Transactions

Certain Plan investments were/are managed by SEI Private Trust Company, Prudential Retirement Insurance & Annuity Company and Aetna Life and Casualty Insurance Company. The Plan paid certain expenses related to plan operations and investment activities to these service providers.

10. Federal Income Tax Status

The Plan obtained its latest determination letter on July 13, 2018, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. The plan administrator and the Plan's tax counsel believe that the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Ferro Corporation Pension Plan for Legacy Employees

Notes to Financial Statements

U.S. GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the tax authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Rationale for Demographic Assumptions**

- **Retirement Age** – Retirement age assumption was updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Turnover Rates** – Turnover rates have been developed based on the historical experience of the plan. The turnover rates were reviewed based on an experience study conducted in 2019 using data from the January 1, 2015 through January 1, 2019 valuations. This assumption provided similar results to actual experience of the plan, thus no update was made. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Retirement Rates** – Retirement rates have been developed based on the historical experience of the plan and the retirement subsidies the plan offers at various ages. The retirement rates were reviewed based on an experience study conducted in 2019 using data from the January 1, 2015 through January 1, 2019 valuations. This assumption provided similar results to actual experience of the plan, thus no update was made. The plans sponsor believes that this period will be representative of anticipated future experience.
- **Disability Rates** – Based on the 1985 Pension Disability Study rates, applicable to the populations of each former plan. Annual review of the experience has shown that these rates provide similar results to the actual rates of disability experienced under the plan.
- **Percent Married/Spouse Age Difference** – The assumptions regarding percent married/spouse age difference at benefit commencement were updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Form of Payment Election** – The assumptions regarding form of payment election at benefit commencement were updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial Methods for Funding****Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data for only those employees who have completed the plan's eligibility requirements and are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** Liabilities and assets from insurance contracts have been included in the valuation.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides benefits that are not a function of a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the ratio of the participant's service at the beginning of the plan year to their service at each decrement age and is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- This plan provides disability/death benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

b. Funding target increases not already reflected in (a.) due to amendments, UCEBs, etc.	0	0	0
c. Annuity purchases for non-HCEs in prior two plan years	0	0	0
d. Adjusted funding target: (a.) + (b.) + (c.)	\$ 242,563,078	\$ 234,820,641	\$ (7,742,437)
3. 2020 AFTAP/FTAP: (1.e.) ÷ (2.d.)	90.19%	92.05%	1.86%

¹ The final certified AFTAP reflected receivable contributions that were made based on the Minimum Required Contribution ("MRC") for the 2020 plan year prior to Ferro electing to retroactively adopt ARPA relief. Due to the reduction in the MRC after reflecting ARPA, Ferro was able to reallocate excess contributions to a later plan year reducing the receivable contributions included in the final actuarial value of asset.

² Due to Ferro's retroactive adoption of ARPA, the MRC for the 2020 plan year was reduced which allowed for Ferro to create additional credit balance from excess contributions.

³ The final certified AFTAP was based on the funding target before reflecting Ferro's decision to retroactively adopt ARPA interest rates to the 2020 plan year.

- **Mortality sponsor elections** – These are the current IRS prescribed table and mortality improvement projection scale. The plan sponsor elected this methodology from alternative IRS prescribed options.
- **Expected investment return** – This is based on a 65% historical and 35% forward-looking blend of the capital market assumptions published in Mercer Investment Consulting's Capital Market Outlook dated July 2019 for the plan's target asset mix, net of an adjustment of 20 basis points for investment expenses assumed to be paid from plan assets, rounded to the nearest 25 basis points.
- **Expenses** – Expenses are based on year-by-year experience for actual administrative expenses paid from plan assets. Adjustments are made for any known significant changes.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Rationale for Demographic Assumptions**

- **Retirement Age** – Retirement age assumption was updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Turnover Rates** – Turnover rates have been developed based on the historical experience of the plan. The turnover rates were reviewed based on an experience study conducted in 2019 using data from the January 1, 2015 through January 1, 2019 valuations. This assumption provided similar results to actual experience of the plan, thus no update was made. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Retirement Rates** – Retirement rates have been developed based on the historical experience of the plan and the retirement subsidies the plan offers at various ages. The retirement rates were reviewed based on an experience study conducted in 2019 using data from the January 1, 2015 through January 1, 2019 valuations. This assumption provided similar results to actual experience of the plan, thus no update was made. The plans sponsor believes that this period will be representative of anticipated future experience.
- **Disability Rates** – Based on the 1985 Pension Disability Study rates, applicable to the populations of each former plan. Annual review of the experience has shown that these rates provide similar results to the actual rates of disability experienced under the plan.
- **Percent Married/Spouse Age Difference** – The assumptions regarding percent married/spouse age difference at benefit commencement were updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Form of Payment Election** – The assumptions regarding form of payment election at benefit commencement were updated based on the results of an experience study conducted during 2019 using data from the January 1, 2015 through January 1, 2019 valuations. The plan sponsor believes that this period will be representative of anticipated future experience.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial Methods for Funding****Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data for only those employees who have completed the plan's eligibility requirements and are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** Liabilities and assets from insurance contracts have been included in the valuation.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides benefits that are not a function of a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the ratio of the participant's service at the beginning of the plan year to their service at each decrement age and is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- This plan provides disability/death benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Summary of Plan Provisions

-
- **Accrued benefit for Former Corporate Plan** The product of (i) and (ii):
 - (i) the greater of 60% of Credited Basic Compensation minus 50% of the Primary Social Security Benefit, and \$750; and
 - (ii) The fraction whose numerator is Credited Benefit Service at the determination date (not greater than 30), and whose denominator is 30.

Benefit accruals are frozen as of March 31, 2006. Former TAM Plan participants: benefits previously earned under the TAM Plan based on credited service accrued under that plan, plus benefits earned under the Retirement Plan based on credited service accrued after December 31, 1999.

Former DMC2 Plan participants: benefits previously earned under the DMC2 Plan based on credited service accrued under that plan, plus benefits earned under the Retirement Plan based on credited service accrued after September 7, 2001.

- **Accrued benefit for Former Hourly Plan** For the Penn Yan plant:
 Greater of \$36.00 or 1.1% of average monthly earnings, multiplied by Credited Benefit Service at any date of determination. Average monthly earnings are computed by dividing total earnings for the 60 full consecutive calendar months prior to termination by 60. Special rules apply if the participant has worked fewer than 60 months, or if breaks in service have occurred.

For the Cleveland location:

Average monthly earnings times 33% plus 1.2% for each year of service in excess of 30 if 30 or more years of service, or 1.1% for each year of service if less than 30. This amount determined above is then increased by 15% effective October 12, 1993. Average monthly earnings times present benefit level based on years of service.

Minimum pension for Cleveland location equal to:

\$17.50 for each of the 1st 15 years of service plus \$19.00 for each of the next 15 years plus \$20.50 for each additional year.

Schedule SB, Part V — Summary of Plan Provisions

Pre-retirement death

- Eligibility Five years of vesting service.

- Primary death benefit

Former Corporate Plan

Ten years certain annuity, payable to the named beneficiary on the earliest date the participant would have been eligible to receive a benefit (or deferred to no later than the participant's Normal Retirement Date). In the event of the death of an active vested participant, the monthly payments will equal the amount the participant would have been eligible to receive on the Commencement Date had employment been terminated on the date of death. Otherwise, the benefit will equal the amount the participant would have been eligible to receive on the Commencement Date had the death not occurred.

Former Hourly Plan

The benefit is equal to one half of the benefit the employee could have received by electing early retirement payments under a 50% joint and survivor option commencing on the earliest retirement age. This benefit will commence following the month in which the earliest retirement age occurs and will continue until the death of the spouse.

- Supplemental spouse's benefit

Former Corporate Plan

Single life annuity payable to the Qualified Spouse, equal to one-half of the Primary Death Benefit amount, commencing with the month following the final payment of the Primary Death Benefit.

Former Hourly Plan**For the Cleveland Plant only:**

An employee with 15 years of service who is eligible to retire with an immediate benefit, or a participant who is receiving retirement benefits, who at the date of death has been married to his spouse continuously for one year will be entitled to a supplemental spouse's death benefit. The benefit will be equal to one-half of the accrued benefit as of the date of death. The benefit will commence following the month in which death occurs and will continue until the month in which the death of the spouse occurs.

Schedule SB, Part V — Summary of Plan Provisions**Benefits Included or Excluded**

Unless noted below, all benefits provided by the plan, as effective and amended through the Second Amendment, are included in this valuation.

- **Most recent plan amendments included:** The Second Amendment is included because it was adopted prior to the valuation date.
- **Plan amendments excluded:** The Third Amendment is excluded from the valuation because it was adopted after the valuation date.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Sections 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The valuation includes an assumption that Unpredictable Contingent Event Benefits will be paid during the 2020 plan year as the result of a plant shutdown for the Cleveland location.

Plan Provision Changes Since Prior Valuation

Maximum benefit amounts under IRS rules were updated from 2019 to 2020.

Schedule SB, Line 24 — Change in Actuarial Assumptions**Actuarial assumption changes since prior valuation**

- Interest discounts and mortality rates were updated from 2019 to 2020 in accordance with PPA.
- Form of Payment:
 - Assumed 50% of eligible participants elect a lump sum.
 - Updated Hourly assumption from 50% elect single life annuity / 50% elect 50% joint and survivor annuity to 60% elect single life annuity / 40% elect 100% joint and survivor annuity.
- Terminated Vested Participant Commencement Age: Reduced expected TV commencement age from 65 to 63.
- Spousal Age Difference: Updated spousal age assumptions from +/- 3 years to assume male participants are 1 year older than spouses and female participants are 2 years younger than spouses.
- Percent Married:
 - Reduced former Corporate married percentage assumption for female participants from 70% to 50%.
 - Reduced former Hourly married percentage assumption for male and female participants from 85% to 50%.
- The expense component of normal cost decreased from \$2,020,000 to \$1,800,000 to reflect our expectations for the current plan year.
- Unpredictable Contingent Event Assumption: The valuation includes an assumption that Unpredictable Contingent Event Benefits will be paid during the 2020 plan year as the result of a plant shutdown for the Cleveland location. We have assumed that all participants eligible for special benefits (i.e. actives under 65, who are at least 55 with 15 years of vesting service or with combined years of age and service greater than 80) will retire immediately upon termination and those eligible will receive unreduced early retirement benefits plus a \$230/month supplemental benefit until age 62.

Schedule SB, Line 32 — Schedule of Amortization Bases

The total shortfall amortization charge is the sum of the individual shortfall amortization installments for each plan year since the IRC Section 430 changes made by the Pension Protection Act of 2006 (PPA) took effect for the plan. Ferro Corporation elected to retroactively apply the 15-year shortfall amortization period as defined in the American Rescue Plan Act of 2021 (“ARPA”) starting in the 2019 plan year. Under ARPA, this election results in a fresh start in the 2019 plan year that eliminates all previously existing shortfall bases and amortizes the total outstanding balance over 15 years.

Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than \$0.

Shortfall bases Post-ARPA Relief

d. Adjusted funding target: (a.) + (b.) + (c.)	\$ 242,563,078	\$ 234,820,641	\$ (7,742,437)
3. 2020 AFTAP/FTAP: (1.e.) ÷ (2.d.)	90.19%	92.05%	1.86%

¹ The final certified AFTAP reflected receivable contributions that were made based on the Minimum Required Contribution ("MRC") for the 2020 plan year prior to Ferro electing to retroactively adopt ARPA relief. Due to the reduction in the MRC after reflecting ARPA, Ferro was able to reallocate excess contributions to a later plan year reducing the receivable contributions included in the final actuarial value of asset.

² Due to Ferro's retroactive adoption of ARPA, the MRC for the 2020 plan year was reduced which allowed for Ferro to create additional credit balance from excess contributions.

³ The final certified AFTAP was based on the funding target before reflecting Ferro's decision to retroactively adopt ARPA interest rates to the 2020 plan year.

Schedule SB, Part V — Summary of Plan Provisions

Pre-retirement death

- Eligibility Five years of vesting service.

- Primary death benefit

Former Corporate Plan

Ten years certain annuity, payable to the named beneficiary on the earliest date the participant would have been eligible to receive a benefit (or deferred to no later than the participant's Normal Retirement Date). In the event of the death of an active vested participant, the monthly payments will equal the amount the participant would have been eligible to receive on the Commencement Date had employment been terminated on the date of death. Otherwise, the benefit will equal the amount the participant would have been eligible to receive on the Commencement Date had the death not occurred.

Former Hourly Plan

The benefit is equal to one half of the benefit the employee could have received by electing early retirement payments under a 50% joint and survivor option commencing on the earliest retirement age. This benefit will commence following the month in which the earliest retirement age occurs and will continue until the death of the spouse.

- Supplemental spouse's benefit

Former Corporate Plan

Single life annuity payable to the Qualified Spouse, equal to one-half of the Primary Death Benefit amount, commencing with the month following the final payment of the Primary Death Benefit.

Former Hourly Plan**For the Cleveland Plant only:**

An employee with 15 years of service who is eligible to retire with an immediate benefit, or a participant who is receiving retirement benefits, who at the date of death has been married to his spouse continuously for one year will be entitled to a supplemental spouse's death benefit. The benefit will be equal to one-half of the accrued benefit as of the date of death. The benefit will commence following the month in which death occurs and will continue until the month in which the death of the spouse occurs.

Schedule SB, Part V — Summary of Plan Provisions**Benefits Included or Excluded**

Unless noted below, all benefits provided by the plan, as effective and amended through the Second Amendment, are included in this valuation.

- **Most recent plan amendments included:** The Second Amendment is included because it was adopted prior to the valuation date.
- **Plan amendments excluded:** The Third Amendment is excluded from the valuation because it was adopted after the valuation date.
- **Late retirement increases:**
 - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Sections 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The valuation includes an assumption that Unpredictable Contingent Event Benefits will be paid during the 2020 plan year as the result of a plant shutdown for the Cleveland location.

Schedule SB, Line 32 — Schedule of Amortization Bases

The total shortfall amortization charge is the sum of the individual shortfall amortization installments for each plan year since the IRC Section 430 changes made by the Pension Protection Act of 2006 (PPA) took effect for the plan. Ferro Corporation elected to retroactively apply the 15-year shortfall amortization period as defined in the American Rescue Plan Act of 2021 (“ARPA”) starting in the 2019 plan year. Under ARPA, this election results in a fresh start in the 2019 plan year that eliminates all previously existing shortfall bases and amortizes the total outstanding balance over 15 years.

Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than \$0.

Schedule SB, Line 24 — Change in Actuarial Assumptions**Actuarial assumption changes since prior valuation**

- Interest discounts and mortality rates were updated from 2019 to 2020 in accordance with PPA.
- Form of Payment:
 - Assumed 50% of eligible participants elect a lump sum.
 - Updated Hourly assumption from 50% elect single life annuity / 50% elect 50% joint and survivor annuity to 60% elect single life annuity / 40% elect 100% joint and survivor annuity.
- Terminated Vested Participant Commencement Age: Reduced expected TV commencement age from 65 to 63.
- Spousal Age Difference: Updated spousal age assumptions from +/- 3 years to assume male participants are 1 year older than spouses and female participants are 2 years younger than spouses.
- Percent Married:
 - Reduced former Corporate married percentage assumption for female participants from 70% to 50%.
 - Reduced former Hourly married percentage assumption for male and female participants from 85% to 50%.
- The expense component of normal cost decreased from \$2,020,000 to \$1,800,000 to reflect our expectations for the current plan year.
- Unpredictable Contingent Event Assumption: The valuation includes an assumption that Unpredictable Contingent Event Benefits will be paid during the 2020 plan year as the result of a plant shutdown for the Cleveland location. We have assumed that all participants eligible for special benefits (i.e. actives under 65, who are at least 55 with 15 years of vesting service or with combined years of age and service greater than 80) will retire immediately upon termination and those eligible will receive unreduced early retirement benefits plus a \$230/month supplemental benefit until age 62.
