Normal pension benefit

Annual pension equals the sum of the yearly Retirement Annuities purchased for the member. Commencing October 1, 1955 the yearly Retirement Annuity purchased for a member equals 1/2% of the first \$4,200 of his earnings during the year, plus 1-1/2% of the excess of his earnings over \$4,200. In addition, there is an annual minimum benefit equal to \$132 times years of service up to 15 years, plus \$150 times service from 15 years to 30 years, plus \$168 times service over 30 years. For those retiring after January 1, 1981 and whose pension benefit is calculated using the minimum benefit formula, the benefit will increase \$60 per year of service before January 1, 1984 up to 15 years and \$78 per year of service before January 1, 1984 for each year over 15 years. The above benefit is held to a maximum of \$50,000 annually.

Benefit accruals are frozen as of May 31, 2009.

Normal Form of Benefit: monthly annuity for single employees or an actuarially equivalent 50% joint and survivor monthly annuity for married employees.

Monthly preretirement death benefit

Eligibility: Completed 5 years of continuous service and benefit has not been revoked. Subsequent pensions are reduced in order to provide this death benefit.

Benefit: A pre-retirement death benefit is payable to an eligible spouse equal to the amount the spouse would have been entitled to receive under the 50% Joint and Survivor pension if the participant had retired on the day immediately preceding his death.

Eligibility for Benefits

Normal retirement

Retirement on NRD.

Early retirement

A member who has at least 15 years of service may retire between ages 55 and 65 with a reduced retirement pension. The reduction is based on the number of years before age 65 that early retirement occurs.

Postponed retirement

Retirement after NRD.

Vested termination

Termination for reasons other than death, disability, or retirement after completing five years of vesting service

Other Plan Provisions

Forms of payment

Preretirement death benefits are payable only as described above.

Monthly pension benefits may be paid in the following optional forms (in lieu of the Normal Form):

Life only, 50%, 75% and 100% Joint and Survivor (based upon appropriate actuarial factors).

Actuarial equivalence shall mean a benefit computed on the basis of the actuarial factors and assumptions included in the Projected Annuity Mortality Table (a table prepared from the unadjusted mortality rates used in constructing the published GA-1951 Mortality Table for males projected 14 years by Scale C and set back five years for females) at 6% interest adjusted to a unisex basis for a participant population deemed to be 90% male and 10% female.

Pension Increases

For certain plan participants, a one time adjustment is made to such participants' accrued benefit as of September 30, 1967.

Plan participants' contributions

Contributions by plan participants are not required or permitted.

Maximum limits on benefits and pay

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are not assumed for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension obligation or in determining minimum and maximum contributions. Willis Towers Watson is not aware of any future plan changes which are required to be reflected.

Changes in Benefits Valued Since Prior Year

There have been no changes in benefits valued since the prior year.

Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.
-----------------------------------	---

Methods

Valuation date	First day of plan year
-----------------------	------------------------

Funding target	Present value of accrued benefits as required by regulations under IRC §430.
-----------------------	--

Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
---------------------------	---

Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

SCHEDULE SB ATTACHMENTS

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Hynes Industries, Inc. regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with Hynes Industries, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of 1/1/2020. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations. No data adjustments were made and we are unaware of any data adjustments made by the data provider.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Plan-related expenses

As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Rates of increase in:

■ Assumed return for asset smoothing

The assumed return of 6.11% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor's investment policy we believe the rate to be above the third segment rate for the 2019 plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Disabled Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Termination

Termination rates utilize an age/sex-graded assumption based on plan sponsor expectations for future employee turnover. Annual consideration is given as to whether any conditions have changed that would be expected to produce different results in the future.

Retirement

Retirement rates were based on plan sponsor expectations for future retirements, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions effective with the 2020 plan year for IRC §430.
- The mortality projection scale used to calculate the funding target and target normal cost was updated from Scale MP-2017 to Scale MP-2018, as required by IRC §430.
- The assumed plan-related expense amount added to the target normal cost was changed from \$96,909 for 2019 to \$100,297 for 2020.

Retirement

The rates at which participants retire by age and gender are shown below.

Percentage retiring during the year		
Age	Males	Females
60	5%	5%
61	5%	5%
62	5%	5%
63	5%	5%
64	5%	5%
65	60%	60%
66	30%	30%
67	40%	40%
68	50%	50%
69	60%	60%
70	100%	100%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have been eligible for retirement.
- Deferred vested benefit The later of age 65 or termination of employment.
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment

Married participants are assumed to elect a 50% J&S annuity and single participants are assumed to elect a single life annuity.

Percent married

For purposes of valuing the pre-retirement surviving spouse's benefit, 85% of eligible male participants are assumed to be married and 75% of eligible female participants are assumed to be married.

Spouse age

Male participants are assumed to be 3 years older than their spouses and female participants are assumed to be 3 years younger than their spouses.

Covered pay

Not applicable.

Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month.
-----------------------------------	---

Methods

Valuation date	First day of plan year
-----------------------	------------------------

Funding target	Present value of accrued benefits as required by regulations under IRC §430.
-----------------------	--

Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
---------------------------	---

Decrement timing	The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Hynes Industries, Inc. regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with Hynes Industries, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor furnished participant data as of 1/1/2020. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations. No data adjustments were made and we are unaware of any data adjustments made by the data provider.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Plan-related expenses

As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, actuarial, accounting, legal, administration and trustee fees to be paid from the trust).

Rates of increase in:

■ Assumed return for asset smoothing

The assumed return of 6.11% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, based on an analysis of the plan sponsor's investment policy we believe the rate to be above the third segment rate for the 2019 plan year under U.S. GAAP. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Disabled Mortality

Assumptions used for funding purposes are as prescribed by IRC §430(h).

Termination

Termination rates utilize an age/sex-graded assumption based on plan sponsor expectations for future employee turnover. Annual consideration is given as to whether any conditions have changed that would be expected to produce different results in the future.

Retirement

Retirement rates were based on plan sponsor expectations for future retirements, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions and methods since prior valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated to the current valuation date as required by IRC 430. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions effective with the 2020 plan year for IRC §430.
- The mortality projection scale used to calculate the funding target and target normal cost was updated from Scale MP-2017 to Scale MP-2018, as required by IRC §430.
- The assumed plan-related expense amount added to the target normal cost was changed from \$96,909 for 2019 to \$100,297 for 2020.

Normal pension benefit

Annual pension equals the sum of the yearly Retirement Annuities purchased for the member. Commencing October 1, 1955 the yearly Retirement Annuity purchased for a member equals 1/2% of the first \$4,200 of his earnings during the year, plus 1-1/2% of the excess of his earnings over \$4,200. In addition, there is an annual minimum benefit equal to \$132 times years of service up to 15 years, plus \$150 times service from 15 years to 30 years, plus \$168 times service over 30 years. For those retiring after January 1, 1981 and whose pension benefit is calculated using the minimum benefit formula, the benefit will increase \$60 per year of service before January 1, 1984 up to 15 years and \$78 per year of service before January 1, 1984 for each year over 15 years. The above benefit is held to a maximum of \$50,000 annually.

Benefit accruals are frozen as of May 31, 2009.

Normal Form of Benefit: monthly annuity for single employees or an actuarially equivalent 50% joint and survivor monthly annuity for married employees.

Monthly preretirement death benefit

Eligibility: Completed 5 years of continuous service and benefit has not been revoked. Subsequent pensions are reduced in order to provide this death benefit.

Benefit: A pre-retirement death benefit is payable to an eligible spouse equal to the amount the spouse would have been entitled to receive under the 50% Joint and Survivor pension if the participant had retired on the day immediately preceding his death.

Eligibility for Benefits

Normal retirement

Retirement on NRD.

Early retirement

A member who has at least 15 years of service may retire between ages 55 and 65 with a reduced retirement pension. The reduction is based on the number of years before age 65 that early retirement occurs.

Postponed retirement

Retirement after NRD.

Vested termination

Termination for reasons other than death, disability, or retirement after completing five years of vesting service

Other Plan Provisions

Forms of payment

Preretirement death benefits are payable only as described above.

Monthly pension benefits may be paid in the following optional forms (in lieu of the Normal Form):

Life only, 50%, 75% and 100% Joint and Survivor (based upon appropriate actuarial factors).

Actuarial equivalence shall mean a benefit computed on the basis of the actuarial factors and assumptions included in the Projected Annuity Mortality Table (a table prepared from the unadjusted mortality rates used in constructing the published GA-1951 Mortality Table for males projected 14 years by Scale C and set back five years for females) at 6% interest adjusted to a unisex basis for a participant population deemed to be 90% male and 10% female.

Pension Increases

For certain plan participants, a one time adjustment is made to such participants' accrued benefit as of September 30, 1967.

Plan participants' contributions

Contributions by plan participants are not required or permitted.

Maximum limits on benefits and pay

All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are not assumed for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension obligation or in determining minimum and maximum contributions. Willis Towers Watson is not aware of any future plan changes which are required to be reflected.

Changes in Benefits Valued Since Prior Year

There have been no changes in benefits valued since the prior year.
