NOTES TO FINANCIAL STATEMENTS

December 31, 2020

Note 1. Description of the Plan

The following description of the Clearon Corp. Employees Pension Plan (the Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan, which was adopted on January 1, 1996, and restated on January 1, 2015, by Clearon Corporation LP (the Plan Sponsor), is a defined benefit plan covering substantially all employees of the Plan Sponsor who were hired prior to December 1, 2005. The Plan was frozen on December 31, 2014 with respect to salaried employees, allowing no additional benefits to accrue after that date. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Pension benefits

Employees with five or more years of service are entitled to annual pension benefits beginning at normal retirement age (65) equal to the greater of (a) 1.0% of the participant's average annual compensation multiplied by the years of service or (b) 1.5% of average annual compensation times the years of benefit service, minus the lesser of 1/70th of the participant's primary Social Security Benefit (SSB) multiplied by the years of benefit service up to a maximum of 35 years, or 50% SSB times actual years of service over total years at normal retirement date, computed using the highest salary levels for three out of the last ten plan years prior to the participant's retirement. If an employee continues employment after normal retirement age, the employee is entitled to benefits based on the formula above as of the later retirement date. Employees may elect to receive the value of their accumulated plan benefits as a single life annuity or as a joint and survivor annuity payable monthly from retirement.

Death and disability benefits

If an active vested employee dies, a benefit equal to the value of the employee's accumulated pension benefits is paid to the employee's beneficiary. A participant who has a nonforfeitable benefit and who becomes disabled shall be treated as if continuing in employment, with earnings equaling the sum of the participant's compensation actually paid during such calendar year (specifically excluding any lump sum cash out of vacation or sick pay attributable to the participant's last calendar year of active service or any lump sum severance or terminal pay), plus an amount which is determined by multiplying the participant's monthly base pay determined as of his last day of active service in the calendar year by the number of months remaining in the calendar year for which he is not being paid wages, salary, or severance. Such participant shall continue to accrue benefit service until normal retirement is elected.

Vesting

Participants vest in the Plan at a rate of 20% per year and are fully vested after five years of credited service.

Funding policy

The Plan Sponsor's funding policy is to contribute such amounts as necessary to provide assets sufficient to meet the benefits to be paid to Plan participants and meet or exceed the annual ERISA minimum funding requirement. The Plan Sponsor's present intention is to make contributions in amounts sufficient to fund the Plan's current service cost on a current basis. The Plan Sponsor's contributions for 2020 and 2019 met the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Employer has the right under the Plan to discontinue its contributions at any time and terminate the Plan subject to the provisions set forth in ERISA.

Plan termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. Government agency) up to the applicable limitations.
- All other vested benefits (that is, vested benefits not insured by the PBGC).
- All non-vested benefits.

Benefits to be provided via contracts with MetLife, which is obligated to pay the benefits, would be excluded for allocation purposes.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or those who elect to receive their benefits in a form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward. Certain benefit improvements attributable to plan amendments may not be fully guaranteed even though total benefit entitlements fall below the aforementioned ceilings.

NOTES TO THE FINANCIAL STATEMENTS

December 31, 2020

Note 1. Description of the Plan (Continued)

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

Tax status

The Plan obtained its latest determination letter on December 29, 2015, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan Sponsor believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the plan and recognize a tax liability (or asset) if the plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2020, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements.

Note 2. Summary of Significant Accounting Policies

Basis of accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

Investment valuation and income recognition

The Plan's investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Employee Benefits Committee determines the Plan's valuation policies utilizing information provided by the investment advisers, custodians and insurance company. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Note 2. Summary of Significant Accounting Policies (Continued)

Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions based on service provided by participants. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' highest average compensation during any three out of the last ten years of credited service. The accumulated plan benefits for active employees are based on their highest average compensation during any three out of the last ten years ending on the date of which the benefit information is presented (the valuation date). Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2020 and 2019 were (a) life expectancy of participants (b) retirement age assumptions (the assumed average retirement age was 64), and (c) investment return. The 2020 and 2019 valuations both included an assumed average rate of return of 6.5%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2020 and 2019, as detailed further in Note 5.

Administrative expenses

Administrative expenses of the Plan are paid by both the Plan and the Plan Sponsor.

Payment of benefits

Benefits are recorded upon distribution.

Subsequent events

Subsequent events have been evaluated through October 12, 2021, the date the financial statements were available to be issued.

Note 3. Unaudited Information Certified by the Custodian

MetLife, the custodian, holds the Plan's investments and executes investment transactions. The Plan Administrator has obtained a certification from the custodian that the information furnished to the Plan by the custodian is complete and accurate as follows:

- Investment assets
- Investment transactions
- Investment income
- Schedule H, Line 4i-Schedule of Assets (Held at End of Year)
- Schedule H, Line 4j-Schedule of Reportable Transactions (Held at End of Year)

Note 4. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets
- quoted prices for identical or similar assets or liabilities in inactive markets
- inputs other than quoted prices that are observable for the asset or liability
- inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2020 and 2019.

Separate Accounts: Unit value calculated based on the observable net asset value of the underlying investment.

Assets measured at fair value on a recurring basis consisted of the following at December 31:

	Level 2:	
	2020	2019
Separate accounts	\$ 19,404,784	\$ 18,360,573

Note 5. Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements, such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Information regarding the actuarial present value of accumulated benefits as of January 1, 2020 and 2019, are as follows:

	<u>2020</u>	<u>2019</u>
Actuarial present value of accumulated benefits:		
Vested benefits:		
Vested benefits for other participants	\$ 2,959,408	\$ 3,862,860
Participants currently receiving benefits	14,242,459	13,276,285
Non-vested benefits	<u>250,398</u>	<u>294,707</u>
Total actual present value of accumulated benefits	<u>\$ 17,452,265</u>	<u>\$ 17,433,852</u>

Changes in the actuarial present value of accumulated plan benefits for the Plan years ended December 31, 2020 and 2019, are as follows:

	<u>2020</u>	<u>2019</u>
Actuarial present value of accumulated plan benefits at beginning of year:	\$ 17,433,852	\$ 17,169,736
Change during the year attributable to:		
Benefits accumulated and other	345,540	373,723
Interest accumulation	1,092,362	1,079,276
Assumption changes	(142,828)	(39,803)
Benefits paid	<u>(1,276,661)</u>	<u>(1,149,080)</u>
Actuarial present value of accumulated plan benefits, January 1	<u>\$ 17,452,265</u>	<u>\$ 17,433,852</u>

The significant assumptions underlying the actuarial computation are as follows:

Mortality rate	PRI-2012 Aggregate generational table projected by scale MP-2019
Interest rate	6.5% in 2020 and 2019
Retirement age	Normal retirement age (an average of 64)
Social Security taxable wage base	National wage 3.5% per year
Surviving spouse benefits	100% of males and females have an eligible spouse of the same age

Note 5. Accumulated Plan Benefits (Continued)

The following assumptions underlying the actuarial computations at January 1, 2019, were changed for the actuarial computations at January 1, 2020:

Mortality rate	RP-2006 the aggregate generational table projected by scale MP-2018 to PRI-2012 aggregate generational table projected by scale MP-2019
----------------	---

These actuarial assumptions are based on the presumption that the Plan will continue. Should the Plan terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 6. Related Party and Party-In-Interest Transactions

The Employer pays certain administrative expenses on behalf of the Plan, including legal, actuarial, accounting, and insurance fees. Also, certain administrative functions are performed by officers or employees of the Company. These employees may also be Plan participants. No such officer or employee received compensation from the Plan.

Certain investments of the Plan are insurance contracts managed by MetLife Insurance Company, custodian of the Plan, and therefore qualify as party-in-interest transactions.

Note 7. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 8. COVID-19

In March of 2020, the World Health Organization classified the COVID-19 outbreak as a global pandemic, adversely affecting global economic activity and financial markets. As the COVID-19 outbreak continues to evolve, the extent of the impact on Plan Sponsor's operations, plan activity, and plan investments is uncertain and cannot be predicted. Additionally, the Plan was able to take advantage of the American Rescue Plan Act of 2021 (ARPA) amortization provision to reduce minimum required funding and delay payment for the 2020 Plan Year.

Note 9. Subsequent Event

In July 2021, all assets of the Plan were transferred to John Hancock.

Plan Name: Clearon Corporation Employees Pension Plan
Plan Sponsor: Clearon Corporation

PN: 002

Actuarial Cost Method**Funding Target / Target Normal Cost**

An Actuarial Cost Method is an allocation of the expected cost of a pension plan on a year-by-year basis. The primary objective of an Actuarial Cost Method is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits.

The Pension Protection Act of 2006 (PPA) mandates the use of the Traditional Unit Credit Actuarial Cost Method. Under this method, the accrued benefit is estimated based upon service and, if applicable, earnings as of the valuation date. The Funding Target is equal to the actuarial present value of all accrued benefits as of the valuation date. The Target Normal Cost is the actuarial present value, as of the valuation date, of the expected increases in projected accrued benefit attributable to service expected to be completed during the plan year (i.e. if applicable, one year's salary growth is reflected in the determination of Target Normal Cost).

For tax deduction purposes, the Funding Target may reflect the value of future pay increases on accrued benefits, if applicable.

PPA Discounting Method

The plan sponsor is responsible for making the following decisions with regard to the discounting method:

- Full yield-curve spot rates or a segmented yield-curve of 24-month average rates of corporate bond rates
- If the segmented yield curve is used, the rates as of the month of the valuation may be used or as of a lookback month up to 4 months prior to the valuation date (the full yield curve must use the rates as of the month of the valuation starting in 2010)

For purposes of this valuation, the following discounting method was used and is assumed to be approved by the plan sponsor:

- Segment rates through the month of August preceding the valuation date adjusted such that each segment rate is no less than the applicable minimum percentage* of the corresponding 25-year average segment rate for the calendar year that contains the first day of the plan year and no more than the applicable maximum percentage** of that 25-year average segment rate.

Asset Valuation Method

The Plan Assets for purposes of this Actuarial Valuation are valued under the asset averaging method, including, if applicable, discounted receivable contributions. The value of plan assets is set equal to the average of the fair market value of assets on the valuation date and the adjusted fair market value of assets (including expected earnings) determined for the two earlier annual determination dates. Expected earnings are calculated using a rate no greater than the third segment rate of the segmented yield-curve in effect at the beginning of each valuation year. The resulting average value must be constrained so that it falls between 90 and 110 percent of the fair market value of assets on the valuation date.

* Minimum is 95% through 2025, 90% in 2026, 85% in 2027, 80% in 2028, 75% in 2029 and 70% in 2030 and later.

** Maximum is 105% through 2025, 110% in 2026, 115% in 2027, 120% in 2028, 125% in 2029 and 130% in 2030 and later.
