Independent Auditor's Report

To the Participants and Plan Administrator of
Stress Engineering Services, Inc. Employee Stock Ownership Plan
Houston, Texas

Opinion

We have audited the financial statements of Stress Engineering Services, Inc. Employee Stock Ownership Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2020 and 2019, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with US GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued. Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — Supplementary Information Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information listed in the table of contents as of and for the year ended December 31, 2020 is presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with US GAAS.

The Participants and Plan Administrator of
Stress Engineering Services, Inc. Employee Stock Ownership Plan

In forming our opinion on the supplementary information, we evaluated whether the supplementary information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Stress Engineering Services, Inc. Employee Stock Ownership Plan

Notes to Financial Statements (Modified Cash Basis)

Note 1. Description of the Plan

The following brief description of the Stress Engineering Services, Inc. Employee Stock Ownership Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for complete information.

General

Stress Engineering Services, Inc. (the Company) established the Plan effective as of January 1, 2005. As of January 1, 2008, the Plan was amended and operates, in relevant part, as an employee stock ownership plan (ESOP) and is designed to comply with section 4975(e)(7) and the regulations thereunder of the Internal Revenue Code of 1986, as amended (IRC), and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan is administered by a Plan Committee comprising up to three persons appointed by the Company's board of directors. The Plan's Trustee, a trust department of an independent third-party bank, receives direction from the Plan Committee and is also appointed by the Company's Board of Directors.

Eligibility

Full-time employees of the Company are generally eligible to participate in the Plan upon satisfying the age requirement of 21. Part-time employees must satisfy the age requirement of 21 and work at least 1,000 hours during such Plan year. Participants who do not have at least 1,000 hours of service during each Plan year or are not employed on the last working day of a Plan year are generally not eligible for an allocation of Company contributions for such year.

Contributions

Contributions are to be allocated to participants pro-rata based upon the compensation of employees who are actively employed on the last day of the Plan year and have been credited with 1,000 hours of service during the plan year. Participants terminated as a result of retirement, disability, or death, are also eligible to receive the contribution. The Company's contribution is paid in cash or shares of Company stock valued at fair value, as determined by an independent appraiser. A discretionary contribution of $1,212,990 and $1,301,588 was paid by the Company and allocated among eligible participant accounts for the years ended December 31, 2020 and 2019, respectively. There are no participant contributions in the Plan and no participant-directed investments.

Payment of Benefits

Normal retirement age under the Plan is 65. Early retirement is the attainment of age 60 and the completion of five years of participation in the Plan and 20 years of service with the Company. Terminated participants due to death, retirement, or disability, and terminated participants with vested account balances of less than $20,000 receive a lump-sum distribution. Terminated participants with vested account balances over $20,000 receive a distribution in three annual installments. The distribution of the participant's common stock account may be increased by one year, up to five additional years, for each $205,000 over $1,035,000, adjusted for cost-of-living. Distributions are paid in stock or cash.

Upon the attainment of age 55 and completion of ten years of participation in the Plan, a participant may direct the investment of up to 25 percent of the participant's Company stock account, less shares previously diversified, for five years and up to 50 percent in the sixth year. During 2020, certain participant met the requirements and elected to diversify approximately 4,898 shares of common stock valued at $1,577,057. During 2019, certain participant met the requirements and elected to diversify approximately 3,765 shares of common stock valued at $1,257,405.

Administrative Expenses

As provided by the Plan agreement, administrative expenses may be paid either by the Plan or by the Company. The Company has historically paid the operating expenses for the Plan.

Voting Rights

The Committee directs the Plan trustee regarding votes on behalf of Plan participants, except with respect to certain major corporate events where participants/beneficiaries are entitled to direct the trustee.

Participant Accounts

Individual accounts are maintained for each Plan participant. Each participant's account is credited with allocations of (a) Company contributions, (b) participant forfeitures, and (c) Plan earnings. Allocations are based on the participant's eligible compensation or investment account balance, as defined by the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Vesting in the Company's contributions plus earnings thereon is based on years of continuous service. A participant must complete 1,000 hours of service during a plan year to qualify for a year of service and count toward vesting. Participants hired on or before January 1, 2005 are 20 percent vested after one year of service and vest an additional 20 percent each year, becoming 100 percent vested after five years of service. Participants hired after January 1, 2005, with no credited hours of service after January 1, 2007, are 20 percent vested after three years of service and vest an additional 20 percent each year, becoming 100 percent vested after seven years of service. Participants hired after January 1, 2005, with at least one credited hour of service after January 1, 2007, are 20 percent vested after two years of service and vest an additional 20 percent each year, becoming 100 percent vested after six years of service. A participant shall become immediately vested upon death, retirement, or permanent and total disability.

Put Option

The employer stock that is held by the Plan and its participants and is not readily tradable on an established market, or is subject to trading limitations, is considered a put option under federal income tax regulations. The put option is a right to demand the Company buy any shares of its stock distributed to participants for which there is no market. The put price is representative of the current appraised value of the stock. The Company can pay for the purchase with interest over a period of five years. The purpose of the put option is to ensure that the participant has the ability to ultimately obtain cash.

Diversification

Diversification is offered to participants close to retirement so that they may have the opportunity to move part of the value of their investment in Company common stock into investments that are more diversified. Participants who are at least age 55 with at least 10 years of participation in the Plan may elect to diversify a portion of their account. Diversification is offered to each eligible participant over a six-year period. In each of the first five years, a participant may diversify up to 25 percent of the number of shares allocated to his or her account, less any shares previously diversified. In the sixth year, the percentage changes to 50 percent. Participants who elect to diversify receive a cash distribution year-end.

Forfeitures

Plan forfeitures are allocated to each participant's account based upon the relation of the participant's eligible compensation to total eligible compensation for the Plan year. Forfeitures allocated to participants during December 31, 2020 and 2019 totaled $103,495 and $71,573, respectively. All forfeitures were reallocated to participants at December 31, 2020 or 2019. There were no forfeitures used to reinstate the nonvested account of a rehired employee or pay Plan administrative expenses during 2020 or 2019.

Note 2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the modified cash basis, which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles, and is an acceptable method of reporting under Department of Labor regulations. The modified cash basis of accounting utilizes the cash basis of accounting while carrying investments at fair value and recording investment income (loss) on the accrual basis. Consequently, contributions are recognized when received rather than when earned, and expenses are recorded when paid rather than when the obligation is incurred.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Plan considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Investment Valuation and Income Recognition

The shares of Company stock are reported at fair value. See Note 4 for discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned on the accrual basis. S corporation distributions are recorded on the ex-distribution date.

Net appreciation (depreciation) in fair value of investments consists of the net change in unrealized appreciation (depreciation), determined by using the fair value of the investments as of the beginning of the year or the purchase price, if acquired since that date, and the fair value of the investments as of the end of the year. The Committee received an opinion from an independent appraiser that the fair value of the Company common stock was $228 and $322 per share at December 31, 2020 and 2019, respectively.

Payment of Benefits

Benefits are recorded when paid.

Management's Review of Subsequent Events

The Plan has evaluated subsequent events through October 14, 2021, the date the financial statements were available to be issued.

Note 3. Investments

The Plan's investments, at December 31, 2020, are presented in the following table:

	Number of Shares	Cost	Fair Value
Common stock			
Allocated	155,859	$ 50,466,689	$ 35,535,855
Cash and cash equivalents	-	2,746,319	2,746,319
Total	155,859	$ 53,213,008	$ 38,282,174

The Plan's investments, at December 31, 2019, are presented in the following table:

	Number of Shares	Cost	Fair Value
Common stock			
Allocated	160,736	$ 51,985,153	$ 51,757,114
Cash and cash equivalents	-	5,207,334	5,207,334
Total	160,736	$ 57,192,487	$ 56,964,448

Note 4. Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures,* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2020 and 2019.

Cash and cash equivalents: Held primarily in short-term money market funds, which are valued at cost plus accrued interest.

Company common stock: Valued at estimated fair value based upon an independent appraisal. This appraisal was based upon discussions with management, the Company's historical performance, industry trends, capitalized cash flow analysis, market - comparable companies' analysis, and other information.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2020 and 2019:

	2020	2019
Level 1:		
Cash and cash equivalents	$ 2,746,319	$ 5,207,334
Level 3:		
Stress Engineering Services, Inc. common stock	35,535,855	51,757,114
Investments at fair value	$ 38,282,174	$ 56,964,448

Changes in Fair Value of Level 3 Assets and Related Gains and Losses

The following table sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the years ended December 31, 2020 and 2019.

	2020	2019
Balance, beginning of year	$ 51,757,114	$ 53,685,950
Unrealized depreciation in estimated fair value	(14,645,410)	(1,928,836)
Shares purchased	(1,575,849)	-
Shares distributed	-	-
Balance, end of year	$ 35,535,855	$ 51,757,114
The amount of total gains or losses for the period included in changes in net assets attributable to the change in unrealized gains and losses relating to assets still held at the reporting date	$ (14,645,410)	$ (1,928,836)

Gains and losses (realized and unrealized) included in changes in net assets for the periods above are reported in net appreciation (depreciation) in fair value of investments in the statement of changes in net assets available for benefits.

The valuation process involves the selection of an appraiser annually. Plan management accumulates the data for the appraiser from audited financial statements of the Company. The appraiser prepares a preliminary report with Plan management, along with the Plan's independent fiduciary, reviews in detail, discusses and approves. The results of the process are documented in the minutes of the Plan fiduciary.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 5. Related Party Transactions and Party in Interest Transactions

The Plan invests in Company common stock. These are related party and party in interest transactions. As described in Note 1, the Company pays all plan expenses. The Plan has a number of service providers. Such providers are parties in interest under ERISA.

Note 6. Risks and Uncertainties

The Plan is subject to a concentration of credit risk from cash deposits in the commercial account being in excess of federally insured limits. The plan administrator places this cash with a financial institution that is considered a high quality financial institution by the plan administrator. At times, such cash deposits may be in excess of federally insured limits.

The Plan investments consist primarily of the Company's common stock, which is exposed to various risks such as interest rate, market, and credit risks, as well as valuation assumptions based on earnings, cash flows and/or other such techniques. Due to the level of risk associated with the investment in the common stock and to uncertainties inherent in the estimations and assumptions, it is at least reasonably possible that changes in the value of the common stock will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits

Note 7. Plan Termination

Although it has not expressed any intent to do so, the Company reserves the right to discontinue contributions and terminate the Plan at any time, subject to Plan provisions. Upon termination of the Plan, participants would become 100% vested in their accounts. Subsequently, the interest of each participant in the trust fund will be distributed to such participant or his or her beneficiary at the time prescribed by the Plan terms and the IRC.

Note 8. Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS) December 30, 2014, stating that the Plan qualified under the IRC and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan has been amended since receiving the determination letter. However, Plan management believes that the Plan is currently designed, and being operated, in compliance with the applicable requirements of the IRC. Therefore, they believe that the Plan was qualified, and the related trust was tax-exempt as of the financial statement date.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken a significant uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Independent Auditor's Report

To the Participants and Plan Administrator of
Stress Engineering Services, Inc. Employee Stock Ownership Plan
Houston, Texas

Opinion

We have audited the financial statements of Stress Engineering Services, Inc. Employee Stock Ownership Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2020 and 2019, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with US GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued. Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Matter — Supplementary Information Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information listed in the table of contents as of and for the year ended December 31, 2020 is presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with US GAAS.

The Participants and Plan Administrator of
Stress Engineering Services, Inc. Employee Stock Ownership Plan

In forming our opinion on the supplementary information, we evaluated whether the supplementary information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying supplementary information is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Stress Engineering Services, Inc. Employee Stock Ownership Plan

Notes to Financial Statements (Modified Cash Basis)

Note 1. Description of the Plan

The following brief description of the Stress Engineering Services, Inc. Employee Stock Ownership Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for complete information.

General

Stress Engineering Services, Inc. (the Company) established the Plan effective as of January 1, 2005. As of January 1, 2008, the Plan was amended and operates, in relevant part, as an employee stock ownership plan (ESOP) and is designed to comply with section 4975(e)(7) and the regulations thereunder of the Internal Revenue Code of 1986, as amended (IRC), and is subject to the applicable provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Plan is administered by a Plan Committee comprising up to three persons appointed by the Company's board of directors. The Plan's Trustee, a trust department of an independent third-party bank, receives direction from the Plan Committee and is also appointed by the Company's Board of Directors.

Eligibility

Full-time employees of the Company are generally eligible to participate in the Plan upon satisfying the age requirement of 21. Part-time employees must satisfy the age requirement of 21 and work at least 1,000 hours during such Plan year. Participants who do not have at least 1,000 hours of service during each Plan year or are not employed on the last working day of a Plan year are generally not eligible for an allocation of Company contributions for such year.

Contributions

Contributions are to be allocated to participants pro-rata based upon the compensation of employees who are actively employed on the last day of the Plan year and have been credited with 1,000 hours of service during the plan year. Participants terminated as a result of retirement, disability, or death, are also eligible to receive the contribution. The Company's contribution is paid in cash or shares of Company stock valued at fair value, as determined by an independent appraiser. A discretionary contribution of $1,212,990 and $1,301,588 was paid by the Company and allocated among eligible participant accounts for the years ended December 31, 2020 and 2019, respectively. There are no participant contributions in the Plan and no participant-directed investments.

Payment of Benefits

Normal retirement age under the Plan is 65. Early retirement is the attainment of age 60 and the completion of five years of participation in the Plan and 20 years of service with the Company. Terminated participants due to death, retirement, or disability, and terminated participants with vested account balances of less than $20,000 receive a lump-sum distribution. Terminated participants with vested account balances over $20,000 receive a distribution in three annual installments. The distribution of the participant's common stock account may be increased by one year, up to five additional years, for each $205,000 over $1,035,000, adjusted for cost-of-living. Distributions are paid in stock or cash.

Upon the attainment of age 55 and completion of ten years of participation in the Plan, a participant may direct the investment of up to 25 percent of the participant's Company stock account, less shares previously diversified, for five years and up to 50 percent in the sixth year. During 2020, certain participant met the requirements and elected to diversify approximately 4,898 shares of common stock valued at $1,577,057. During 2019, certain participant met the requirements and elected to diversify approximately 3,765 shares of common stock valued at $1,257,405.

Administrative Expenses

As provided by the Plan agreement, administrative expenses may be paid either by the Plan or by the Company. The Company has historically paid the operating expenses for the Plan.

Voting Rights

The Committee directs the Plan trustee regarding votes on behalf of Plan participants, except with respect to certain major corporate events where participants/beneficiaries are entitled to direct the trustee.

Participant Accounts

Individual accounts are maintained for each Plan participant. Each participant's account is credited with allocations of (a) Company contributions, (b) participant forfeitures, and (c) Plan earnings. Allocations are based on the participant's eligible compensation or investment account balance, as defined by the Plan. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting

Vesting in the Company's contributions plus earnings thereon is based on years of continuous service. A participant must complete 1,000 hours of service during a plan year to qualify for a year of service and count toward vesting. Participants hired on or before January 1, 2005 are 20 percent vested after one year of service and vest an additional 20 percent each year, becoming 100 percent vested after five years of service. Participants hired after January 1, 2005, with no credited hours of service after January 1, 2007, are 20 percent vested after three years of service and vest an additional 20 percent each year, becoming 100 percent vested after seven years of service. Participants hired after January 1, 2005, with at least one credited hour of service after January 1, 2007, are 20 percent vested after two years of service and vest an additional 20 percent each year, becoming 100 percent vested after six years of service. A participant shall become immediately vested upon death, retirement, or permanent and total disability.

Put Option

The employer stock that is held by the Plan and its participants and is not readily tradable on an established market, or is subject to trading limitations, is considered a put option under federal income tax regulations. The put option is a right to demand the Company buy any shares of its stock distributed to participants for which there is no market. The put price is representative of the current appraised value of the stock. The Company can pay for the purchase with interest over a period of five years. The purpose of the put option is to ensure that the participant has the ability to ultimately obtain cash.

Diversification

Diversification is offered to participants close to retirement so that they may have the opportunity to move part of the value of their investment in Company common stock into investments that are more diversified. Participants who are at least age 55 with at least 10 years of participation in the Plan may elect to diversify a portion of their account. Diversification is offered to each eligible participant over a six-year period. In each of the first five years, a participant may diversify up to 25 percent of the number of shares allocated to his or her account, less any shares previously diversified. In the sixth year, the percentage changes to 50 percent. Participants who elect to diversify receive a cash distribution year-end.

Forfeitures

Plan forfeitures are allocated to each participant's account based upon the relation of the participant's eligible compensation to total eligible compensation for the Plan year. Forfeitures allocated to participants during December 31, 2020 and 2019 totaled $103,495 and $71,573, respectively. All forfeitures were reallocated to participants at December 31, 2020 or 2019. There were no forfeitures used to reinstate the nonvested account of a rehired employee or pay Plan administrative expenses during 2020 or 2019.

Note 2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the modified cash basis, which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles, and is an acceptable method of reporting under Department of Labor regulations. The modified cash basis of accounting utilizes the cash basis of accounting while carrying investments at fair value and recording investment income (loss) on the accrual basis. Consequently, contributions are recognized when received rather than when earned, and expenses are recorded when paid rather than when the obligation is incurred.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Plan considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Investment Valuation and Income Recognition

The shares of Company stock are reported at fair value. See Note 4 for discussion of fair value measurements. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned on the accrual basis. S corporation distributions are recorded on the ex-distribution date.

Net appreciation (depreciation) in fair value of investments consists of the net change in unrealized appreciation (depreciation), determined by using the fair value of the investments as of the beginning of the year or the purchase price, if acquired since that date, and the fair value of the investments as of the end of the year. The Committee received an opinion from an independent appraiser that the fair value of the Company common stock was $228 and $322 per share at December 31, 2020 and 2019, respectively.

Payment of Benefits

Benefits are recorded when paid.

Management's Review of Subsequent Events

The Plan has evaluated subsequent events through October 14, 2021, the date the financial statements were available to be issued.

Note 3. Investments

The Plan's investments, at December 31, 2020, are presented in the following table:

	Number of Shares	Cost	Fair Value
Common stock			
Allocated	155,859	$ 50,466,689	$ 35,535,855
Cash and cash equivalents	-	2,746,319	2,746,319
Total	155,859	$ 53,213,008	$ 38,282,174

The Plan's investments, at December 31, 2019, are presented in the following table:

	Number of Shares	Cost	Fair Value
Common stock			
Allocated	160,736	$ 51,985,153	$ 51,757,114
Cash and cash equivalents	-	5,207,334	5,207,334
Total	160,736	$ 57,192,487	$ 56,964,448

Note 4. Fair Value Measurements

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures,* provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2020 and 2019.

Cash and cash equivalents: Held primarily in short-term money market funds, which are valued at cost plus accrued interest.

Company common stock: Valued at estimated fair value based upon an independent appraisal. This appraisal was based upon discussions with management, the Company's historical performance, industry trends, capitalized cash flow analysis, market - comparable companies' analysis, and other information.

The following table sets forth by level, within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2020 and 2019:

	2020	2019
Level 1:		
Cash and cash equivalents	$ 2,746,319	$ 5,207,334
Level 3:		
Stress Engineering Services, Inc. common stock	35,535,855	51,757,114
Investments at fair value	$ 38,282,174	$ 56,964,448

Changes in Fair Value of Level 3 Assets and Related Gains and Losses

The following table sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the years ended December 31, 2020 and 2019.

	2020	2019
Balance, beginning of year	$ 51,757,114	$ 53,685,950
Unrealized depreciation in estimated fair value	(14,645,410)	(1,928,836)
Shares purchased	(1,575,849)	-
Shares distributed	-	-
Balance, end of year	$ 35,535,855	$ 51,757,114
The amount of total gains or losses for the period included in changes in net assets attributable to the change in unrealized gains and losses relating to assets still held at the reporting date	$ (14,645,410)	$ (1,928,836)

Gains and losses (realized and unrealized) included in changes in net assets for the periods above are reported in net appreciation (depreciation) in fair value of investments in the statement of changes in net assets available for benefits.

The valuation process involves the selection of an appraiser annually. Plan management accumulates the data for the appraiser from audited financial statements of the Company. The appraiser prepares a preliminary report with Plan management, along with the Plan's independent fiduciary, reviews in detail, discusses and approves. The results of the process are documented in the minutes of the Plan fiduciary.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 5. Related Party Transactions and Party in Interest Transactions

The Plan invests in Company common stock. These are related party and party in interest transactions. As described in Note 1, the Company pays all plan expenses. The Plan has a number of service providers. Such providers are parties in interest under ERISA.

Note 6. Risks and Uncertainties

The Plan is subject to a concentration of credit risk from cash deposits in the commercial account being in excess of federally insured limits. The plan administrator places this cash with a financial institution that is considered a high quality financial institution by the plan administrator. At times, such cash deposits may be in excess of federally insured limits.

The Plan investments consist primarily of the Company's common stock, which is exposed to various risks such as interest rate, market, and credit risks, as well as valuation assumptions based on earnings, cash flows and/or other such techniques. Due to the level of risk associated with the investment in the common stock and to uncertainties inherent in the estimations and assumptions, it is at least reasonably possible that changes in the value of the common stock will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits

Note 7. Plan Termination

Although it has not expressed any intent to do so, the Company reserves the right to discontinue contributions and terminate the Plan at any time, subject to Plan provisions. Upon termination of the Plan, participants would become 100% vested in their accounts. Subsequently, the interest of each participant in the trust fund will be distributed to such participant or his or her beneficiary at the time prescribed by the Plan terms and the IRC.

Note 8. Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS) December 30, 2014, stating that the Plan qualified under the IRC and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the IRC to maintain its qualification. The Plan has been amended since receiving the determination letter. However, Plan management believes that the Plan is currently designed, and being operated, in compliance with the applicable requirements of the IRC. Therefore, they believe that the Plan was qualified, and the related trust was tax-exempt as of the financial statement date.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken a significant uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.
