Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Report of Independent Auditors

To the Administrator of Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

We have audited the accompanying financial statements of Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc. (the “Plan”), which comprise the statements of net assets available for benefits as of December 31, 2020 and 2019, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2020 and changes therein for the year then ended and its financial status as of December 31, 2019, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

1. Plan Description

The following description of the Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc. (the "Plan") is for general information purposes only. Participants should refer to the Summary Plan Description or the Plan Document for a complete description of the Plan's provisions.

General

The Plan is a defined benefit plan that covers substantially all former employees of the former Greenville Division of Raytheon E-Systems, Inc. represented by the International Union, United Automobile, Aerospace, and Agricultural Implement Workers of America ("UAW"). The Plan provides for pension, disability, and death benefits.

On March 7, 2002, Raytheon's Aircraft Integration Systems business was sold to L-3 Corporation. The Plan was not terminated as it still holds the accrued benefits for vested and retired employees. On April 3, 2020 ("Company Merger Date"), the Company became a wholly-owned subsidiary of Raytheon Technologies Corporation ("RTC").

Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). During the period covered by the annual report that these financial statements accompany, and until the Company Merger Date, the Plan was administered by the Plan Administrator (for purposes of Section 3(16) of ERISA) who was appointed by the Company's Vice President of Human Resources. From and after the Company Merger Date, the Plan Administrator of the Plan (for purposes of Section 3(16) of ERISA) is RTC and the Plan is administered by the Raytheon Technologies Corporation Plan Administration and Investment Committee, which operates pursuant to a vote of the RTC Board of Directors.

Investments were held in a Master Trust. During the period covered by these financial statements, and until December 1, 2020 ("Master Trust Merger Date"), the Plan's assets were held in the Raytheon Company Master Pension Trust ("RTN Master Trust"). On the Master Trust Merger Date, the RTN Master Trust merged into the United Technologies Master Trust ("UTC Master Trust") to create the Raytheon Technologies Master Trust ("RTC Master Trust"). Throughout this document, all uses of "Master Trust" refer to the applicable Master Trust at that time, as defined above.

Effective December 31, 2020, the Plan was merged into and became a part of the United Technologies Corporation Pension Plan. Assets totaling \$30,704,676 were transferred from the Plan on that date. Participants will remain in the United Technologies Corporation Pension Plan under the same provisions as the Plan.

Benefits, Eligibility and Vesting

The Plan provides for the payment of normal monthly retirement benefits at the age of 65 payable for life. The total benefit payment will be calculated using the appropriate pension rate multiplied by the number of years of benefit service. If an employee who has benefit service under the Plan prior to April 1, 1994, terminates after age 60, the employee is eligible for an optional early pension. If an employee hired after April 1, 1994 terminates after age 60, ten years of vesting service is required for optional early retirement. The benefit is computed as for normal retirement and payable for life. If an employee terminates after age 55 with ten or more years vesting service, the employee is eligible for an early pension with reduced benefits. An employee who terminates due to total and permanent disability after completion of ten or more years of vesting service is eligible for a disability pension commencing one year after the disability occurred or, if later, the date written application is made, payable for life or until the disability ceases.

Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

Notes to Financial Statements As of December 31, 2020 and 2019

Employees of the Raytheon Company (the "Company") who meet the eligibility requirements, as defined by the Plan, may participate in the Plan. Participants are fully vested upon completion of five years of vesting service.

Contributions

The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan does not permit contributions by participants.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is stated at fair value. Net investment income (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan's interest in the Master Trust. See Note 5 for additional information.

Contributions

Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

Benefit Payments

Benefit payments to participants are recorded when paid.

Administrative Expenses

All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management and performance fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Master Trust investment income."

Use of Estimates

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP"). This requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements, the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period, and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from the estimates included in the financial statements.

New Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-13, *Fair Value Measurement: Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement ("Topic 820")*, which eliminates the disclosure requirement of the amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy and modifies certain disclosure requirements related to Level 3 recurring and nonrecurring fair value measurements. The new standard was effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Plan adopted

Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

Notes to Financial Statements

As of December 31, 2020 and 2019

the standard on the effective date of January 1, 2020, and it did not have a material impact on its financial statements or disclosures.

Other new pronouncements issued but not effective until after December 31, 2020 are not expected to have a material impact on the Plan's financial statements or disclosures.

3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable, under the Plan's provisions, to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, and (b) beneficiaries of deceased employees. Benefits are based on a stated benefit rate multiplied by the number of years of covered service. Benefits payable under all circumstances (such as retirement, death, disability, and termination of employment) are included to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for retirement, death, disability, or withdrawal) between the valuation and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2019 and 2018, are as follows:

Assumed rate of return on
investments for accumulated
benefits (discount rate)

As of December 31, 2019: 7.0%

As of December 31, 2018: 7.5%

Mortality basis

As of December 31, 2019:

Pri-2012 sex-distinct, separate employee and retiree table(s) with contingent survivor adjustments for existing survivors with no collar adjustments applied, adjusted by a factor of 95% and projected generationally using the MP-2020 mortality improvement scale.

As of December 31, 2018:

Modified version of the RP-2014 employee/retiree no collar tables, which has the projection scale backed off to 2006 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period for given ages, but a 15-year downgrade for birth cohorts, and an ultimate improvement rate of 1.20% at age 64 to 0% at age 115.

**Retirement Plan for Hourly Employees of the
Greenville Division of E-Systems, Inc.
Notes to Financial Statements
As of December 31, 2020 and 2019**

Retirement

Various rates, varying by age from 62 to 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Assumption Changes

The changes in actuarial assumptions since the prior valuation of the Plan are as follows:

- The discount rate was changed from 7.5% to 7.0% to reflect current capital market assumptions.
- The mortality assumption was updated as noted above to better reflect anticipated future experience.

As of December 31, 2019, the most recent valuation date, the actuarial present value of accumulated plan benefits is as follows:

Vested Benefits

Participants receiving benefits	\$ 4,813,889
Participants with deferred benefits	15,350,974
Total actuarial present value of accumulated plan benefits	<u>\$ 20,164,863</u>

The following is an analysis of changes in the present value of accumulated benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2018	\$ 18,340,504
Benefits accumulated and non-investment (gains) losses	(198,912)
Increase for interest due to decrease in discount period	1,358,216
Benefits paid	(428,489)
Change in actuarial assumptions	1,093,544
Actuarial present value of accumulated plan benefits as of December 31, 2019	<u>\$ 20,164,863</u>

4. Funding Policy

The employer's contributions are actuarially determined and generally fund any existing unfunded liability on account of qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act of 2006). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions above the ERISA minimum funding requirements may be made to the Plan. Contributions for the years ended December 31, 2020 and 2019, met the minimum funding requirements of ERISA.

Notes to Financial Statements As of December 31, 2020 and 2019

5. Master Trust

Summary Financial Information

The Plan's assets are held in a Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Bank of New York Mellon ("BNY Mellon", the "Trustee").

During the period covered by these financial statements, and until the Company Merger Date, the Plan's assets were held in the RTN Master Trust. The Raytheon Company Investment Committee, which was appointed by the CEO of Raytheon Company, regularly reviewed the asset allocation and performance of the investments held in the RTN Master Trust.

From the Company Merger Date until the Master Trust Merger Date, the Plan's assets continued to be held in the RTN Master Trust. The PAIC operated pursuant a resolution of the RTC Board of Directors and reviewed the asset allocation and performance of the investments held in the RTN Master Trust.

On the Master Trust Merger Date, the RTN Master Trust merged into the UTC Master Trust to create the RTC Master Trust. The PAIC continues to review the asset allocation and performance of the investments held in the RTC Master Trust. The assets of the RTC Master Trust are held by BNY Mellon.

The investment policy, as approved by the PAIC (and formerly the Raytheon Company Investment Committee), permits asset diversification to include a combination of cash and cash equivalents, fixed-income securities, publicly traded U.S. and international equity securities, private equity and private real estate funds, and other investments such as commingled funds, real estate, insurance contracts and derivatives. Participating plans receive units of participation in the applicable Master Trust based on their contributions to that Master Trust.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the Plan's Statements of Net Assets Available for Benefits.

Certain prior year disclosures related to the RTN Master Trust have changed from prior filings for purposes of comparability with current year presentations.

Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required:

- | | |
|-----------------|---|
| Level 1: | Unadjusted quoted prices in active markets for identical assets or liabilities. |
| Level 2: | Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities. |
| Level 3: | Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities. |

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

Level 3 Investments

For the years ended December 31, 2020 and December 31, 2019, there were no material transfers in or out of Level 3 in the applicable Master Trusts.

For the year ended December 31, 2019, Level 3 investments consist mainly of unallocated insurance contracts. Unallocated insurance contracts represent less than 1% of the Master Trust assets and are valued at their contract price, which approximates fair value.

The following table represents the Master Trust's Level 3 financial instruments as of December 31, 2020, the valuation techniques used to measure the fair value of those financial instruments, and the significant unobservable inputs and the ranges of the values for those inputs:

Level 3 Investment	Fair Value	Principal Valuation Technique	Significant Unobservable Inputs	Range of Significant Input Values
Real Estate	\$ 1,642,133,661	Discounted Cash Flow Analysis	Revenue Growth Rate Discount Rate Exit Cap Rate	0%-11% 6.5%-9.5% 5.75%-9%

In estimating fair value of the investments in Level 3, the Plan Administrator may use third-party pricing sources. In substantiating the reasonableness of the pricing data provided by third-parties, the Plan Administrator evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values the Master Trust investments as follows:

Cash and cash equivalents, which includes a short-term investment fund, are valued at amortized cost, which approximates fair value. The short-term investment fund is not valued using on a quoted price in an active market and is therefore classified as a Level 2 investment in the fair value hierarchy.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities, and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in registered investment companies are valued at their last reported net asset value.

Investments in commingled funds, private equity funds, and private real estate funds are stated at fair market value, which primarily utilizes net asset values reported by the investment manager

Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

Notes to Financial Statements As of December 31, 2020 and 2019

or fund administrator. Management reviews additional valuation and pricing information from fund managers, including audited financial statements, to evaluate the net asset values.

Real estate assets are valued quarterly and consistently with the Real Estate Information Standards. The income approach (discounted cash flow models), sales comparison approach, or cost approach are utilized depending on the approach that most accurately portrays the anticipated behavior of the property and buyers in the market.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Valuation policies for derivative investments are disclosed in the Derivatives Policy section.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Investment Income (Loss)

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Master Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Derivatives Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) manage a portion of the Master Trust's portfolio against exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded derivatives such as equity and fixed income futures and option contracts and over-the-counter ("OTC") derivatives such as forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in OTC derivatives and forward foreign currency exchange contracts ("forward currency contracts"), there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. As needed for material exposures, the Master Trust manages these exposures through credit approvals, limits, monitoring procedures, and, to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

Notes to Financial Statements As of December 31, 2020 and 2019

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Futures Contracts

The Master Trust may invest in futures contracts. A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, interest rate, and commodities futures contracts to manage exposure to the market. Buying futures contracts increases the Master Trust's exposure to the underlying instrument. Selling futures contracts decreases the Master Trust's exposure to the underlying instrument held or mitigates the risk of changes in fair value of other investments held in the Master Trust.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. The accumulated balance of such receipts or payments is recorded within "Cash held at broker for derivative contracts" on the Statement of Net Assets for the Master Trust. The Master Trust will also record an unrealized gain or loss on futures contracts, which is calculated as the difference between the notional cost and the notional market value of open futures contracts. The unrealized gains or losses on are recorded within "Unrealized appreciation (depreciation) on futures contracts" on the Statement of Net Assets for the Master Trust.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that the change in the value of the futures contract may not correlate exactly with the change in value of the corresponding investments held in the Master Trust.

At December 31, 2020, there were no U.S. Government Bonds pledged by the RTC Master Trust as collateral for open futures contracts. At December 31, 2020, a cash balance of \$340,319,507 was pledged by the RTC Master Trust to cover margin requirements for open futures contracts.

At December 31, 2019, U.S. Government Bonds with a par value of \$19,447,000 (fair value of \$19,979,822) were pledged by the RTN Master Trust as collateral for open futures contracts. These bonds are restricted from trading until the futures contracts for which they are pledged as collateral are settled. A cash balance of \$27,116,980 was pledged by the RTN Master Trust to cover margin requirements for open futures contracts.

Forward Currency Contracts

The Master Trust invested in forward currency contracts during the years ended December 31, 2020 and December 31, 2019. A forward currency contract is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to manage a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies, and the difference between contract value and market value is recorded within "Other derivatives" on the Statement of Net Assets for the Master Trust. When the forward exchange contract is settled, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was entered into and the value at the time it was settled or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to manage currency exposure, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

Option Contracts

The Master Trust was invested in option contracts during the year ended December 31, 2020. The market value of option contracts held in the Master Trust is recorded within "Other derivatives" on the Statement of Net Assets of the Master Trust. An option contract is a contract in which the writer of the option contract grants the buyer of the option contract the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain option contracts, including option contracts on indices, will require cash settlement by the Master Trust if the option contract is exercised. The Master Trust may enter into put or call option contracts in order to manage potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments, to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments, and/or to enhance potential gain.

When the Master Trust purchases or writes an option contract, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option contract purchased or written. Option contracts purchased or written

Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

Notes to Financial Statements

As of December 31, 2020 and 2019

are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and ask prices or at the most recent ask price (bid for purchased option contracts) if no bid and ask price are available. OTC purchased or written option contracts are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is settled.

If the Master Trust writes a covered call option contract, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option contract period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option contract, it accepts the risk of a decline in the value of the underlying security below the exercise price. OTC option contracts have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased option contracts is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts and a change in value of the option contract may not correlate exactly with changes in the value of the underlying security.

Swaps

The Master Trust was invested in swap contracts during the years ended December 31, 2020 and December 31, 2019. The Master Trust may invest in interest rate swap contracts, credit default swap contracts, and currency swap contracts. The market value of swap contracts held in the Master Trust is recorded within "Other derivatives" on the Statement of Net Assets of the Master Trust.

The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified variable interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

The Master Trust may invest in credit default swap contracts. Credit default swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase a Master Trust's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease a Master Trust's exposure to the underlying instrument held by the Master Trust or hedge the fair value of other Master Trust investments. Credit default swap contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through valuation date. Changes in the value of the credit default swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Trustee of the Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

6. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- (a) The assets comprising the Plan, including the net income (loss) of the Plan shall be revalued at market by the Trustee.
- (b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- (c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (the "PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan Document for more information.

7. Certain Transactions Involving Related Parties and Parties-in-Interest

BNY Mellon, as the Trustee and Custodian of the Plan, incurs expenses in connection with these services to the Plan and Master Trust, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY Mellon. The Plan Sponsor, Raytheon Company, is a party-in-interest with respect to the Plan and incurs expenses in connection with the administration of the Plan and the Master Trust.

The following table is a summary of expenses paid to BNY Mellon and Raytheon Company for the years ended December 31, 2020 and December 31, 2019:

	<u>Year Ended 2020</u>	<u>Year Ended 2019</u>
Expenses specifically related to the Plan	\$ -	\$ 43
Plan's allocation of expenses paid directly by the Master Trust	7,590	9,735

The Plan also incurs certain administrative expenses paid to parties-in-interest.

All of these transactions either fall outside the scope of or are exempt from ERISA's prohibited transaction rules.

8. Tax Status

The Internal Revenue Service (the "IRS") has determined and informed the Company by letter dated September 23, 2013, that the design of the Plan meets the requirements for qualification

Retirement Plan for Hourly Employees of the Greenville Division of E-Systems, Inc.

Notes to Financial Statements

As of December 31, 2020 and 2019

under Internal Revenue Code ("Code") section 401(a) on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company's benefits counsel believe that the current design and operation of the Plan are consistent with continued qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures. The Company, on behalf of the Plan, applied for a new determination letter on January 29, 2016.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentation, and disclosure of uncertain tax positions. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2020 and 2019. The Plan is subject to examinations by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to federal tax examination for years prior to 2017.

9. Risks and Uncertainties

The Plan financial statements are based on the application of GAAP, which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are exposed to various risks, such as interest rate, currency, market, and credit risks. See Note 5 for additional information with respect to investment risk.

10. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2020 through the date the Plan's financial statements were available to be issued, October 15, 2021.

On March 11, 2021, the American Rescue Plan Act (ARPA) was signed into law. ARPA contains provisions that are expected to reduce minimum contribution requirements for pension plans as early as 2020 depending on when the sponsoring employer chooses to apply them. RTC has not yet adopted these provisions.

Mortality sponsor elections		
• Healthy participants	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the IRS-defined 2006 Base Tables with mortality improvement based on the IRS methodology and projection scale MP-2018.	
• Disabled participants	Same as healthy	
Other economic assumptions		
• Salary increases	N/A	
• Social Security wage base	N/A	
• Inflation	N/A	
• Expected investment return	The expected investment return is 7.00% per year but not greater than the 3rd segment rate in effect for each year Rationale: The expected long-term return on assets assumption was developed based on the plan's current target investment allocation and a building block approach, which looked at the weighted average expected return for each asset class based on long-term capital market assumptions. The expected return for each asset class is composed of inflation plus a risk free rate of return, plus an expected risk premium for each asset class. The resulting return was then adjusted for administrative, investment management and trading expenses as well as recognition of alpha for active management.	
• Expenses	\$400,000 (added to current year target normal cost) Rationale: Based on actual administrative expenses incurred in the prior plan year increased with inflation, excluding the prior year PBGC expenses plus the estimated current year PBGC expenses.	
• Terminated vested participants over age 65	Retroactive payments for terminated vested participants over age 65 are accumulated using an assumed interest rate of 4.20%.

Actuarial Methods for Funding**Asset Methods**

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Conduent, Inc. provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

On March 7, 2002, the active participants of the Retirement Plan for Hourly Employees of Greenville Division of E-Systems, Inc. became terminated employees as a result of being a part of the AIS divestiture. As a result, the terminated vested employees in this group have a pension multiplier of \$36.

Schedule SB, Part V — Summary of Plan Provisions

Early retirement															
• Eligibility	Age 55 and 10 years of vesting service.														
• Benefit	If the benefit commences prior to age 60, it is reduced according to the following table:														
	<table> <tr> <th><u>Age at Date of Commencement</u></th><th><u>Percent Reduced</u></th></tr> <tr> <td>55</td><td>25%</td></tr> <tr> <td>56</td><td>16%</td></tr> <tr> <td>57</td><td>9%</td></tr> <tr> <td>58</td><td>4%</td></tr> <tr> <td>59</td><td>1%</td></tr> <tr> <td>60 or later</td><td>0%</td></tr> </table>	<u>Age at Date of Commencement</u>	<u>Percent Reduced</u>	55	25%	56	16%	57	9%	58	4%	59	1%	60 or later	0%

55	25%														
56	16%														
57	9%														
58	4%														
59	1%														
60 or later	0%														
	Participants sold as part of the AIS divestiture that attained age 55 and completed 10 or more years of vesting service on March 7, 2002 will receive the subsidized early retirement reduction according to the table above on their benefit.														
Optional Early retirement															
• Eligibility	Hired prior to June 26, 1991: Age 60 (attained or reached during the normal recall period if laid off) Hired after June 26, 1991: Age 60, and 10 years of vesting service														
• Benefit	The monthly benefit, commencing immediately and payable for life with a minimum of 60 monthly payments, is computed as for normal retirement considering service and compensation to date of retirement and projected primary Social Security.														
Level Income Supplemental Allowance (LISA)	If an employee terminates with 20 years of benefit service at or after age 60 but prior to age 62 and agrees to restrict his post-retirement earnings, he is eligible for a LISA in addition to his early pension.														
Deferred vested															
• Eligibility	Five years of service														
• Benefit	The monthly annuity, commencing at age 65 if the employee is then living is computed by multiplying his benefit service by the pension rate in effect at termination. An actuarially reduced pension may commence after age 55 and completion of 10 years of vesting service.														
Disability															
• Eligibility	Participants who become totally and permanently disabled with 10 years of vesting service														
• Benefit	<p>The monthly annuity will commence one year after the disability occurred and will be payable for life or until disability ceases. If the employee qualifies for disability Social Security benefits, his monthly pension will be computed as for normal retirement, considering service to disablement.</p> <p>For any month in which the employee does not qualify for disability or unreduced old age Social Security, his benefit will be two times the amount computed above.</p>

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated effective January 16, 2015, are included in this valuation:

- **Most recent plan amendments included:** Not applicable.
- **Plan amendments excluded:** None.
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued with retroactive payments from age 65.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
