Note 1 - Plan Description

The following description of Ohio CAT Employees' Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement and related union agreements, if applicable, for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering all employees of Ohio Machinery Company d/b/a Ohio CAT (the "Company") who are part of the Company's eastern region and who are members of the International Union of Operating Engineers (the "Union"). Eligible employees become participants on their date of employment. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits

Employees with five or more years of service are entitled to annual pension benefits equal to the accrued benefit, which is years of credited service times the benefit rate, beginning at normal retirement age (65), with 60 monthly payments guaranteed. The Plan permits early retirement after age 60, as defined, with 10 years of service. If employees terminate before rendering five years of service, they forfeit the right to receive their accumulated plan benefits. Upon retirement or termination, employees may elect to receive their entire benefit as a joint and survivor annuity or life annuity. Employees who have retired may elect to receive the present value of their plan benefits accrued through November 30, 1996 as a lump-sum distribution, with the remainder paid out as an annuity payable monthly from retirement. Employees whose accrued benefits are \$5,000 or less at the time of termination will receive involuntary distributions. In the event employees receiving involuntary distributions between \$1,000 to \$5,000 do not elect rollovers to other qualified plans or lump-sum distributions, the amounts will be distributed in the form of direct rollovers to individual retirement accounts, as designated by the plan administrator.

Death and Disability Benefits

If an active employee dies before receiving benefits, the employee's spouse will receive the qualified joint and survivor annuity of the employee's accrued benefit. If an employee dies after beginning to receive payments, the balance of the employee's vested benefit will be paid to the employee's beneficiaries, at least as rapidly as it was being paid to the employee.

Active employees who become totally and permanently disabled become 100 percent vested and receive the actuarial equivalent of their accrued benefits. In the event of terminated participants' total and permanent disability subsequent to their termination of employment, they shall receive the benefits as though they had retired.

Funding

Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. There was no minimum required contribution under ERISA funding guidelines for the year ended November 30, 2021.

Party-in-interest Transactions

Certain plan assets are in investment funds managed by U.S. Bank National Association or its affiliates. U.S. Bank National Association is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

November 30, 2021 and 2020

Note 2 - Summary of Significant Accounting Policies

Investment Valuation and Income Recognition

Investments held by the Plan are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 7 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date.

Benefit Payments

Benefits are recorded when paid.

Administrative Expenses

Various administrative costs are paid by the Company.

Actuarial Assumptions

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on employees' years of service times the effective rate. The accumulated plan benefits for active employees are based on their years of service preceding the valuation date. Benefits paid under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee services rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at November 30, 2021 and 2020 are summarized as follows:

Actuarial cost method	Projected unit credit
Assumed rate of return	6.75 percent per annum
Mortality basis	- Pri-2012 Blue Collar Mortality Table projected with Scale MP-2020 (November 30, 2020) - Pri-2012 Blue Collar Mortality Table projected with Scale MP-2021 (November 30, 2021)

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

November 30, 2021 and 2020

Note 2 - Summary of Significant Accounting Policies (Continued)***Risks and Uncertainties***

Contributions to the Plan and the accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Subsequent Events

Subsequent to year end, the Plan's investment portfolio has incurred a significant decline in fair value, consistent with the general decline in financial markets. However, because the values of individual investments fluctuate with market conditions, the amount of losses that will be recognized in subsequent periods, if any, cannot be determined.

The financial statements and related disclosures include evaluation of events up through and including September 8, 2022, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

U.S. Bank National Association (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedules of assets held at end of year and reportable transactions are based solely on information certified by the Trustee.

Note 4 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries. The calculations of the actuarial present value of accumulated plan benefits attributable to participants in the Plan, which were made as of and for the years ended November 30, 2021 and 2020, the most recent actuarial valuations, are as follows:

	2021	2020
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	\$ 16,930,291	\$ 16,261,448
Other participants	12,308,798	12,570,766
Total vested benefits	29,239,089	28,832,214
Nonvested benefits	275,740	271,618
Total actuarial present value of accumulated plan benefits	\$ 29,514,829	\$ 29,103,832

November 30, 2021 and 2020

Note 4 - Accumulated Plan Benefits (Continued)

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended November 30, 2021 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	\$ 29,103,832
Increase (decrease) during the year attributable to:	
Benefits accumulated	511,654
Changes in actuarial assumptions	62,860
Interest due to the decrease in the discount period	1,896,131
Benefits paid	<u>(2,059,648)</u>
Net increase	<u>410,997</u>
Actuarial present value of accumulated plan benefits - End of year	<u>\$ 29,514,829</u>

The change in actuarial assumptions is primarily the result of a change in the mortality table used.

Note 5 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Accordingly, no provision for income taxes has been made in the accompanying financial statements.

Note 7 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

November 30, 2021 and 2020

Note 7 - Fair Value Measurements (Continued)

In instances where inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

The following valuation methodologies have been used to value the Plan's investments:

Mutual Funds

Mutual funds are valued at quoted prices reported in active markets.

Money Market Fund

The money market fund is valued at quoted prices reported in active markets.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at November 30, 2021 and 2020:

		Assets Measured at Fair Value on a Recurring Basis at November 30, 2021

Assumptions Made In Valuing Spouse's Benefit

Eighty-five percent of the employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Optional Form Selection

40% of active and terminated participants are assumed to take their November 30, 1996 benefit as a lump sum distribution when they retire. The remaining 60% will take this portion of their benefit in the normal form.

All active and terminated participants will take their benefits earned after November 30, 1996 in the normal form.

Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.

Standing Elections

The client has not signed an election that provides for the automatic use of the Carryover Balance and/or Prefunding Balance if necessary to meet the minimum funding requirement.

Asset Method

Market Value of Assets plus any contributions for prior plan years that will be made in this plan year. For funding purposes only, contributions made after the end of the prior plan year will be discounted for interest at the prior year's effective rate.

Funding Method

Pure Unit Credit

Appendix B (Continued)

Employees Valued

Only participants as of the valuation date were valued.

Changes in Assumptions and Methods since the Last Actuarial Valuation

The interest rates used for determining the funding target were 3.74%, 5.35% and 6.11%. These rates were updated to the rates required for the current plan year.

The mortality table for the funding target was changed as required under PPA '06.

Justification for Changes in Actuarial Assumptions

The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
