INDEPENDENT AUDITOR'S REPORT

To the Employee Benefit Plans Committee of
The Boeing Company
Arlington, Virginia

Opinion

We have audited the financial statements of The Boeing Company Employee Retirement Plan, Boeing North American Retirement Plan, BSS Retirement Plan, BSS Retirement Plan for Bargained Employees, Employee Retirement Income Plan - Hourly East, Employee Retirement Income Plan - Hourly West, Non-Contributory Retirement Plan, and The Pension Value Plan for Employees of The Boeing Company (collectively, the "Plans"), which comprise the statements of net assets available for benefits as of December 31, 2021 and 2020, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Plans as of December 31, 2021 and 2020, and the changes in their net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plans and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plans, and determining that the Plans' transactions that are presented and disclosed in the financial statements are in conformity with the Plans' provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

1. DESCRIPTION OF THE PLANS

The following is a brief description of the following plans (collectively, the "Plans"), and provides only general information:

The Boeing Company Employee Retirement Plan ("BCERP Plan")
Boeing North American Retirement Plan ("BNA Plan")
BSS Retirement Plan ("BSS Plan")
BSS Retirement Plan for Bargained Employees ("BSSB Plan")
Employee Retirement Income Plan – Hourly East ("Hourly East Plan")
Employee Retirement Income Plan – Hourly West ("Hourly West Plan")
Non-Contributory Retirement Plan ("NCRP Plan")
The Pension Value Plan for Employees of The Boeing Company ("PVP Plan")

Each of the Plans is sponsored by The Boeing Company (the "Company"). Eligible participants as defined by the Plans ("Participants") should refer to the plan documents for a more complete description of the Plans' provisions.

General —

BCERP Plan:
The BCERP Plan is a noncontributory defined benefit pension plan covering certain bargained employees of the Company. The BCERP Plan is closed to various unions. These closure dates range from January 1, 2009 through December 31, 2016. Effective January 1, 1999, the assets and liabilities under the BCERP Plan attributable to accrued benefits of active nonunion salaried Participants were transferred to the PVP Plan. Benefit accruals under the BCERP Plan were also frozen to various unions with freeze dates ranging from December 31, 2015 to December 31, 2018. For certain Participants who are members of the Society of Professional Engineering Employees in Aerospace, their benefit service was frozen effective December 31, 2018, however, their benefit accruals continue to grow based on pay increases.

BNA Plan:
The BNA Plan is a noncontributory defined benefit pension plan covering certain employees formerly of Boeing North American, Inc. (formerly Rockwell International Corporation), a subsidiary merged into the Company effective December 1996. The BNA Plan is made up of various sub-plans with varying plan provisions. Since 2000, the only sub-plan with active employees is the BNA Sub-Plan R02/Aerospace Hourly Plan ("R02 Sub Plan"). Effective January 1, 2009, the R02 Sub Plan was closed to new entrants and all benefit accruals in the R02 Sub Plan were frozen effective December 31, 2016.

BSS Plan:
The BSS Plan is a contributory defined benefit pension plan covering certain nonbargained employees formerly of Boeing Satellite Systems, Inc. ("BSS"), a subsidiary merged into the Company effective October 2000. The BSS Plan was closed to new entrants for the contributory benefit structure effective January 1, 1991. Noncontributory benefits of the BSS Plan were transferred to the PVP Plan on April 1, 2003. All benefit accruals under the BSS Plan were frozen as of December 31, 2015.

1. DESCRIPTION OF THE PLANS (CONTINUED)

BSSB Plan:
The BSSB Plan is a defined benefit pension plan with both contributory and noncontributory benefit structures covering certain bargained employees formerly of BSS. Eligible active employees are located in Southern California represented by Cabinet Makers, Millmen and Industrial Carpenters, Local No. 721 (formerly Electronic and Space Technicians Local No. 1553). The contributory portion of the BSSB Plan has been closed to new Participants since 1992. Effective January 1, 2012, the noncontributory portion of the BSSB Plan was closed to new entrants. Benefit accruals under the BSSB Plan were frozen effective December 31, 2018.

Hourly East Plan and Hourly West Plan:
The Hourly East Plan and Hourly West Plan are noncontributory defined benefit pension plans covering certain employees formerly of McDonnell Douglas Corporation ("MDC"), which merged with the Company effective August 1997. The Hourly East Plan and Hourly West Plan are closed to all unions. These closure dates range from January 1, 2012 through January 1, 2014 for the Hourly East Plan and January 1, 2010 through February 1, 2014 for the Hourly West Plan. All benefit accruals under the Hourly East Plan and Hourly West Plan were frozen by December 31, 2018.

NCRP Plan:
The NCRP Plan is a noncontributory defined benefit pension plan covering certain bargained employees of the Company, represented by United Automobile, Aerospace and Agricultural Implement Workers of America, Local 1069, in Ridley Park, Pennsylvania. Effective January 1, 2014, the NCRP Plan was closed to new entrants. All benefit accruals under the NCRP Plan were frozen effective December 31, 2016.

PVP Plan:
The PVP Plan is a noncontributory defined benefit pension plan covering certain nonunion salaried employees of the Company. Effective January 1, 2009, the PVP Plan was closed to new entrants. Benefit accruals under the PVP Plan were frozen, other than interest credits applied to Participants' cash balance hypothetical accounts to the extent required by law, effective December 31, 2015.

See Note 8 for recent plan amendments, including changes to plan benefits.

The assets of the Plans, along with two other plans sponsored by the Company and not included in the accompanying financial statements, are held in The Boeing Company Employee Retirement Plans Master Trust (the "Master Trust"). J.P. Morgan Chase, N.A. ("J.P. Morgan") serves as the trustee for the Master Trust. The Employee Benefit Plans Committee has the overall responsibility for the operation and administration of the Plans. The Plans are subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

The "Total (Memorandum Only)" columns in the accompanying Statements of Net Assets Available for Benefits and Statements of Changes in Net Assets Available for Benefits represent the total activity for the Plans and are provided for information purposes only.

1. DESCRIPTION OF THE PLANS (CONTINUED)

Employee Contributions —Prior to January 1, 2019, for the BSSB Plan and prior to January 1, 2016, also for the BSS Plan, a Participant's current rate of contribution was 3% of eligible compensation. Participants could suspend contributions, but they did not accrue benefit service for periods when they did not contribute; however, contribution suspension did not interrupt their continuous service or years of vesting service. If contributions were suspended, Participants had to wait 12 calendar months before they could begin to contribute again, provided they were still eligible. Participants are always vested in their own contributions to the respective BSS Plan and BSSB Plan. Effective January 1, 2016, employee contributions were no longer allowed under the BSS Plan as all benefit accruals under the BSS Plan were frozen. Effective January 1, 2019, employee contributions were no longer allowed under the BSSB Plan as all benefit accruals under the BSSB Plan were frozen.

Employer Contributions — The funding policy of the Company is to contribute an amount at least equal to the minimum required contribution under ERISA to each of the Plans. The Plans have met the minimum funding requirements of ERISA, and no cash contributions were required under ERISA for the years ended December 31, 2021 and 2020. Although no contributions were required under ERISA, the Company may make discretionary contributions to the Plans. During 2020, the Company elected to contribute $2,983,499,934 in total in the form of shares of its common stock to the BCERP Plan, Hourly East Plan, NCRP Plan and PVP Plan.

Pension Benefits — Generally, except as noted for the specific Plans below, Participants with five or more years of vesting service are entitled to benefits under the Plans. The Plans generally provide for normal retirement benefits upon reaching age 65 and have provisions for early retirement benefits. Benefits are payable in the form of a joint and survivor annuity, a single life annuity, or other payment forms, as specified in the applicable plan document. Monthly pension benefits beginning at normal retirement age are generally determined as follows:

Plan	Determination of Benefit Payment Amount
BCERP Plan	The greater of (1) a final average monthly earnings formula, or (2) a rate, based on union affiliation, multiplied by each year of credited service
BNA Plan	For the BNA R02 Sub Plan (the only sub-plan with Participants who were actively accruing benefits prior to the Plan freeze), benefits are based on a rate multiplied by each year of benefit service. Other benefits vary per applicable sub-plan.
BSS Plan	The contributory benefit is funded by the Company, as well as employee contributions. The contributory benefit is the best of three formulas: 1) a career average formula, 2) a final average monthly compensation formula, and 3) a minimum benefit formula. *Cost of Living Adjustment ("COLA") —* Monthly benefits under the contributory benefit may be adjusted annually to reflect changes in the cost of living. The adjustment is made every January 1 and is based on the change in the Consumer Price Index ("CPI") relative to the year before; however, if the BSS Plan is terminated, no COLA will be provided except to Participants who are already receiving retirement payments. To be eligible for a COLA, Participants must have retired on their early, normal, or late retirement date.

1. DESCRIPTION OF THE PLANS (CONTINUED)

BSSB Plan	Participants could accrue benefits in one of two benefit structures of the BSSB Plan (contributory and noncontributory); however, if they were accruing in the noncontributory structure, they may also have prior contributory accruals. The noncontributory benefit is funded solely by contributions made to the BSSB Plan by the Company, as defined by the plan document. Benefits are based on a formula, including final average monthly earnings, service, and covered compensation. The contributory benefit is funded by the Company, as well as employee contributions. The contributory benefit is the best of three formulas: 1) a career average formula, 2) a final average monthly compensation formula, and 3) a minimum benefit formula. *COLA* — Monthly benefits under the contributory benefit may be adjusted annually to reflect changes in the cost of living. The adjustment is made every January 1 and is based on the change in the CPI relative to the year before; however, if the BSSB Plan is terminated, no COLA will be provided except to Participants who are already receiving retirement payments. To be eligible for a COLA, Participants must have retired on their early, normal, or late retirement date and with a contributory benefit.
Hourly East Plan	A rate, based on union affiliation, multiplied by each year of benefit service while employed with a covered group
Hourly West Plan	A rate, based on union affiliation, multiplied by each year of benefit service while employed with a covered group
NCRP Plan	A rate multiplied by each year of credited service

<td>PVP Plan</td>
<td>Participants with three or more years of vesting service and Participants who are at least age 62 at termination with one or more years of service are entitled to benefits under the PVP Plan.

PVP Plan features that are relevant to the benefit include, but are not limited to:

• Participants in the PVP Plan maintain a hypothetical separate account similar to a defined contribution plan, although the Company makes all contributions to the PVP Plan. Participants are not permitted to make contributions.

• Interest credits applied to Participants' hypothetical accounts are based on the yield of the 30-year U.S. Treasury bond (but not less than an interest credit minimum rate of 5% (5.25% prior to January 1, 2016) or greater than an interest credit maximum rate of 10%). The crediting rate was 5% as of December 31, 2021 and 2020.

• Benefits relating to prior service and transferred to the PVP Plan ("Heritage Benefits") were generally earned under the BCERP Plan, BNA Plan, BSS Plan, and the former McDonnell Douglas Corporation — Salaried Plan ("MDC-Salaried"); Heritage Benefits increased in relation to growth in base pay but not for service earned after these benefits were transferred into the PVP Plan.

Monthly pension benefits beginning at normal retirement age (65) equal the greater of the combined benefits described in (1) plus (2) or the benefit described in (3) below:

1. The benefit credits, including a percentage of eligible pay based on the Participant's age for each year he or she works for the Company, plus interest credits divided by an annuity conversion factor of 11. This annual benefit is then divided by 12 to calculate a monthly benefit.

2. Heritage Benefits transferred to the PVP Plan, plus growth due to increases in base pay after the transfer date.

3. A rate multiplied by each year of benefit service.

Benefits for certain frozen plans have been merged into the PVP Plan. Those benefits remain frozen and are payable based on the provisions of the specific related plans merged into the PVP Plan.</td>
</tr>
</table>

Death and Disability Benefits — Death benefits are payable from the Plans under certain circumstances. See plan documents for specific provisions.

There are no provisions for disability benefits from the BSS Plan and BSSB Plan. Since December 1, 2004, the PVP Plan has not provided for disability benefits. Disability benefits for the other Plans are payable from the other Plans under certain circumstances. See plan documents for specific provisions.

1. DESCRIPTION OF THE PLANS (CONTINUED)

Purchase of Annuity Contracts - Net — During 2020, cash was transferred from Metropolitan Life Insurance Company ("MetLife") to the BNA Plan and PVP Plan, as a result of refunds of a portion of the premium payment for the 2019 purchase of allocated annuity contracts. MetLife assumed the responsibility of benefit payments under these contracts effective January 1, 2020.

Asset Transfer Out to Insurance Carriers - Net — During 2020, the investment contracts held in the BNA Plan, BSS Plan, BSSB Plan, Hourly East Plan and PVP Plan were discontinued and the related assets were transferred to Aetna Life Insurance Company ("Aetna"). Allocated contracts were purchased for the benefit of the Participants in the associated Plans.

Receivable - Other — At December 31, 2020, Pension Benefit Guaranty Corporation ("PBGC") premium refund receivable of $59,927,175 was included in receivables – other on the BCERP Plan's statement of net assets available for benefits.

Termination — Although it has not expressed any intention to do so, the Company has the right under each of the individual plans, in certain circumstances, to discontinue its contributions at any time and to terminate any of the Plans subject to the provisions set forth in ERISA. In the event a plan terminates, the net assets of the specific plan will be allocated for payment of plan benefits to Participants in an order of priority determined in accordance with ERISA and the applicable plan document.

Certain benefits under the Plans are insured by the PBGC if the Plans terminate. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions; however, the PBGC does not guarantee all types of benefits under the Plans, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plans are guaranteed at the level in effect on the date of the Plans' termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all Participants receive their benefits should a plan terminate at some future time will depend on the sufficiency, at that time, of the net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty, while other benefits may not be provided for at all.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting — The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Use of Estimates — The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial Present Value of Accumulated Plan Benefits ("PVAB") at the date of the financial statements. Actual results could differ from those estimates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Risks and Uncertainties — The Master Trust utilizes various investment instruments. Investment instruments, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term, and such changes could materially affect the values reported in the financial statements.

The COVID-19 outbreak, which was declared a pandemic by the World Health Organization on March 11, 2020, has negatively impacted the world economy and common stock share prices for most companies, including the Company's common stock share price. The Master Trust's investment in the Company's common stock is stated at fair value based on the closing price at December 31, 2021. The impact of COVID-19 on companies continues to evolve and its future effects on the Plans' net assets available for benefits and changes in net assets available for benefits are uncertain.

Plan contributions are made and the actuarial PVAB is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Valuation of Investments — Investments in the Master Trust are stated at fair value. Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The Master Trust's investments stated at fair value are valued as follows:

- Corporate bonds, government bonds, mortgage-backed and asset-backed securities, and municipal bonds are primarily valued using a market approach using matrix pricing, which considers a security's relationship to other securities for which quoted prices in an active market may be available, or alternatively based on an income approach, which uses valuation techniques to convert future cash flows to a single present value amount. The valuation approach is designed to maximize the use of observable inputs, such as observable trade prices, multiple broker-dealer quotations, related yield curves, and other assumptions about the security (prepayment projections, cash flows, other security characteristics, etc.) and minimize unobservable inputs. The securities are valued as of the last trading day of the year.

- Common and preferred stock and certain other investments, including real-estate investment trusts, American depository receipts, global depository receipts, rights, and warrants traded in active markets on national and international exchanges are primarily valued using a market approach based on the closing market prices of identical instruments on the last trading day of the year.

- Mutual funds, which are registered investment companies, are valued using quoted market prices to represent the net asset value ("NAV") at year-end.

- Short-term investments include treasury bills, commercial paper, certificates of deposits, and discounted notes with original maturities of up to one year. These investments are primarily valued using a market approach based on matrix pricing as referenced above. In the event that an instrument with an original maturity of less than three months does not have a market price, then those investments are valued at amortized cost, which approximates fair value.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- Other investments include physical commodities and over-the-counter ("OTC") derivatives, such as options and swap contracts. Physical commodities are valued on a market approach using spot prices for the specific commodity. OTC derivatives are valued based upon the expected amount that the Master Trust would receive or pay to exit the derivative at the reporting date. The valuation methodology uses the income approach and relies on inputs, including, but not limited to, benchmark yields, swap curves, cash flow analysis, ratings updates, and interdealer broker rates. Credit risk of the derivative counterparties is offset by collateralizing the expected amount that the Master Trust would receive or pay to terminate the derivative.

- Investments in funds that do not have a readily determinable fair value and meet the criteria of investment companies are valued using the NAV, as the practical expedient. The NAV or its equivalent, such as member units or membership units in partners' capital to which a proportionate share of net assets is attributed, is based on the value of underlying investments. The NAV measurement may be adjusted to estimate net asset value per share for the investment in a manner consistent with measurement principles for investment companies. There were no adjustments in 2021 or 2020.

    - Investments in commingled funds, which include common/collective trusts/pooled funds ("CCTs") are valued based on the year-end unit values. Unit values are determined by the issuer, investment manager or third-party administrator by dividing the fair values of the total net assets at year-end by the outstanding units.

    - Investments in partnerships are recorded based upon year-end valuations at NAV, which represent the unit of account, and are determined by the general partner and reflected in the audited financial statements of the partnerships. Where necessary, adjustments may be made to general partner valuations to reflect fair value when such valuations are inconsistent with NAV practical expedient criteria.

    - Investments in hedge funds consist of direct hedge funds. Direct hedge fund NAV is based on valuation of the underlying holdings including other assets and liabilities of the fund.

- Forward and spot currency contracts are valued using a market value approach based on spot foreign currency rates if the contract tenor is two days or less and interpolated forward rates for any contracts with a tenor greater than two days. Forward and spot currency contracts are included in other receivables and other liabilities on the Master Trust's statements of net assets.

- To-be-announced securities ("TBAs") and treasury forwards, which have a delayed future settlement, are valued similarly to securities in active markets. The unrealized market appreciation or depreciation is included in other receivables and other liabilities on the Master Trust's statements of net assets.

Cash and Cash Equivalents — Cash and cash equivalents include cash and cash collateral. Cash includes cash collateral received from counterparties on derivatives. Cash collateral is related to the collateral posted on derivatives.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment Income — Net investment income or loss reflected in the statements of changes in net assets includes the Master Trust's net appreciation/depreciation in fair value of investments, interest income, and dividend income, less administrative expenses. The net appreciation/depreciation in fair value of investments includes both realized and unrealized gains and losses and is calculated as the difference between the fair value of the investments as of the beginning of the year or the purchase date in the current year and either the sales price or the end-of-year fair value. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Valuation Oversight — Management of the Plans has implemented processes that are designed to ensure that fair value measurements used by the Master Trust are appropriate and reliable, that they are based on observable inputs wherever possible, and that the valuation approaches are consistently applied and the assumptions used are reasonable. The valuation framework has a set of processes that provides for oversight and validation of the fair value methodologies, as well as valuations.

The Board of Directors of the Company has delegated the fiduciary oversight of plan assets over various retirement plans held within the Master Trust structures to the Employee Benefit Investment Committee ("EBIC"). The EBIC has sub-delegated this responsibility to the Chief Investment Officer ("CIO"), who manages Trust Investments and chairs the Valuation Committee. Trust Investments is responsible for the oversight of the Master Trust assets including selection and monitoring of investment managers, asset strategies, and risk management. The Valuation Committee is responsible for the oversight of the valuation practices of the Master Trust and is represented by members of Trust Investments, including Risk Management and Trust Operations, Public Markets, and Investment Strategy. The Valuation Committee meets periodically with the purpose of fulfilling the following responsibilities and provides an annual review to the EBIC of its findings and actions:

- Review and approve annually the valuation practices, including those used by third parties
- Review and approve the year-end valuations, including the methods used to develop and substantiate the unobservable inputs used in the fair value measurement
- Review analysis and benchmarks used by the Company and the Master Trust to assess the reasonableness of the year-end valuations and changes in fair value measurements from period to period
- Review and approve annual financial statement disclosures of the investments held in the Master Trust

Investments in funds are generally valued using the NAV or its equivalent. This includes partnerships, hedge funds, and other commingled investments. Valuations provided by the funds are reviewed at least quarterly. The fund's audited financial statements are used in the Master Trust's annual financial reporting process, where applicable. Assessments of reasonableness include regular asset manager meetings and review of quarterly reports, third-party reviews and reconciliations, which includes escalation to Trust Investments for exceptions, quarterly CIO investment reviews, and reviews of manager valuation policies. Valuation policies are reviewed when a new mandate is entered into with an asset manager, on a rolling three-year basis for existing managers, or as changes to policies are provided by managers.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Corporate bonds, government bonds, mortgage-backed and asset-backed securities, municipal bonds, common and preferred stocks, mutual funds and derivative instruments are generally valued using valuations obtained from pricing vendors. Pricing vendor valuation methodologies and custodian pricing controls and related documentation are assessed for reasonableness on an annual basis. The pricing vendor due diligence process includes reviews of pricing controls and procedures, as well as discussions in order to maintain a current understanding of the valuation processes and related assumptions and inputs that may be used by the vendors to price instruments. The custodian due diligence process includes reviews of pricing controls and procedures that are carried out on the Master Trust's behalf. This includes various levels of tolerance checks on price changes, review of stale or unchanged prices, multiprice source comparisons, and vendor price challenges. Additionally, on a monthly basis, the custodian reconciles its valuations to valuations obtained from each investment manager and any exceptions are reported to Trust Investments for resolution, which may include escalation to the Valuation Committee.

Benefits — Benefits are recorded when paid.

Administrative Expenses — Necessary and proper expenses of the Plans are paid from plan assets, at both the Plan and Master Trust levels, except for those expenses the Company is required by law or chooses to pay.

Subsequent Events — Subsequent events were evaluated through September 16, 2022, the date the financial statements were available to be issued.

3. ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments and lump sum distributions attributable under the Plans' provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated vested employees or their beneficiaries, (2) beneficiaries of employees who have died, and (3) present employees or their beneficiaries. The PVAB has been determined by an independent actuary and is the sum of accumulated benefits adjusted to reflect the probability of payment (by means of decrements, such as death, disability, termination, or retirement) and the time value of money (through discounts for interest) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the December 31, 2020 valuations, the latest valuations, were as follows:

Actuarial cost method: Unit Credit

Assumed rate of return: 6.50%

Mortality: RP-2006 tables without collar or amount adjustments, projected to 2015 with scale MP-2017, but adjusted based on a study of annuitant mortality experience during the 2013-2017 plan years. Rates are projected generationally from 2015 using an adjustment to the MP-2020 scales based on the Social Security Administration's intermediate estimate long-term rate of mortality improvement.

Average retirement age range: 57 – 63

Cash balance interest indexing rate (applicable to the PVP Plan only): 5.00%

The foregoing actuarial assumptions are based on the presumption that the Plans will continue in operation. If a plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial PVAB.

Assumption changes for the year ended December 31, 2020 include an update in the mortality MP scale, a change in the discount rate from 6.75% to 6.50%, a change in the interest rate for lump sums from 4.50% to 3.75%, and a change in the cash balance interest crediting rate from 5.15% to 5.00% (for the PVP Plan only).

For the BSS Plan, the accumulated contributions of active employees are presented as of the beginning of the plan year. As of December 31, 2020 and 2019, the accumulated contributions of active employees, including interest credited on those contributions, amounted to approximately $16,386,000 and $20,190,000, respectively. As of December 31, 2020 and 2019, the rates for which interest was credited on the contributions were 1.77% and 2.94%, respectively.

For the BSSB Plan, the accumulated contributions of active employees are presented as of the beginning of the plan year. As of December 31, 2020 and 2019, the accumulated contributions of active employees, including interest credited on those contributions, amounted to approximately $2,322,000 and $2,810,000, respectively. As of December 31, 2020 and 2019, the rates for which interest was credited on the contributions were 1.77% and 2.94%, respectively.

4. MASTER TRUST

The Master Trust facilitates the commingling of employee benefit plan assets for investment and administrative purposes. Assets are invested in accordance with the Master Trust's investment policy. As of December 31, 2021 and 2020, the Master Trust consisted of only the Investment Control Pool ("IC Pool"). The four plan-specific pools held investment contracts established to benefit Participants in specific Plans. During 2020, the plan-specific pools were discontinued and fully liquidated. The IC Pool is diversified among various asset classes. These assets are invested in individual investment accounts, separately held assets, and investments held in various types of funds, all of which are managed in accordance with established investment guidelines. The IC Pool is valued at year end based on the fair value of underlying assets.

The BNA Plan, BSS Plan, BSSB Plan, Hourly East Plan, Hourly West Plan, and PVP Plan have allocated annuity contracts for certain retirees who were covered under the BNA Plan, BSS Plan, BSSB Plan, Hourly East Plan, Hourly West Plan, and PVP Plan in prior years. These contracts remain intact. The activity related to the allocated annuity contracts for retirees receiving benefits from these allocated contracts is excluded from the financial statements as well as the related obligation. With limited exceptions, the BNA Plan, BSS Plan, BSSB Plan, Hourly East Plan, Hourly West Plan, and PVP Plan receive no income from these allocated annuity contracts.

Effective January 1, 2020, assets of the Continental Graphics Employee Pension Plan were transferred into the Master Trust. The fair value of the assets transferred was $81,466,059.

As of December 31, 2021 and 2020, the assets of the Plans, the Aviall, Inc. Retirement Plan and the Continental Graphics Employee Pension Plan were combined in the Master Trust.

On a daily basis, the Plans may have contributions, withdrawals, asset transfers (in combination with a liability transfer), and/or expense charges. The trustee calculates a market value for each plan for each day of the month. At month-end, these "dollar days" are aggregated to determine a daily dollar-weighted-average market value for each participating plan in the IC Pool for the prior month. This average is then used to allocate to each participating plan its share of realized gains/losses, unrealized appreciation/depreciation, income, and share expenses in the IC Pool to arrive at each plan's ending beneficial interest in the IC Pool. All expenses that are plan specific are recorded on that basis. Similarly, the trustee calculated a participating factor in the investment contract pools, which were associated with specific plan(s). A plan's total participation in the Master Trust is the sum of the beneficial interests it owns in the various pools.

4. MASTER TRUST (CONTINUED)

Securities Purchased with an Agreement to Resell — Resale agreements are treated as financing arrangements in receivables and are carried at contract amounts reflective of the amounts at which the securities will be subsequently resold, as specified in the respective agreements. Resale agreements are collateralized by high-quality, fixed-income securities. The Master Trust's policy is to take physical possession or control of the securities purchased under agreements to resell and is permitted by contract to sell or repledge. The Master Trust monitors the market value of the underlying securities as compared to the related receivable, including accrued interest, and requires additional collateral where deemed appropriate. There were no resale agreements as of December 31, 2021. At December 31, 2020, the fair value of the securities received as collateral for resale agreements of $19,400,000 was $19,760,044.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Accounting Standards Codification ("ASC") 820, *Fair Value Measurement,* establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 for financial assets and financial liabilities are described below:

Level 1 — Values are based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical and unrestricted assets or liabilities. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 — Values are based on (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in markets that are not active; or (c) valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Level 3 — Values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant who owns an asset or owes a liability. Accordingly, when market observable data is not readily available, assumptions are set to reflect those that market participants would be presumed to use in pricing the asset or liability at the measurement date. Prices and inputs are used that are current as of the measurement date, including during periods of market disruption. In periods of market disruption, the ability to observe prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2, Level 1 to Level 3, or Level 2 to Level 3.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

The following tables set forth by level within the fair value hierarchy a summary of the Master Trust investments by general types of assets and liabilities measured at fair value on a recurring basis as of December 31, 2021 and 2020. As required by ASC 820, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Master Trust's statements of net assets.

Master Trust net assets at fair value classified within Level 3 primarily consisted of investments in corporate bonds, mortgage-backed and asset-backed securities and municipal bonds as of December 31, 2021 and 2020. Such amounts were 0.29% and 0.35% of net assets as of December 31, 2021 and 2020, respectively.

Transfers Between Levels — The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

During 2021, $8,987,000 of corporate bonds, $23,563,593 of mortgage-backed and asset-backed securities, and $1,084,880 of municipal bonds were reclassified from Level 2 to Level 3, and $3,902,469 of common and preferred stock were reclassified from Level 1 to Level 3, as valuation used significant unobservable inputs. In addition, $26,390,866 of mortgage-backed and asset-backed securities and $51,248,865 of municipal bonds were reclassified from Level 3 to Level 2, as valuation used significant other observable inputs.

During 2020, $15,741,235 of corporate bonds, $2,506,740 of government bonds, $7,949,727 of mortgage-backed and asset-backed securities, and $66,584,734 of municipal bonds were reclassified from Level 2 to Level 3, as valuation used significant unobservable inputs. In addition, $257,498,480 of mortgage-backed and asset-backed securities were reclassified from Level 3 to Level 2, as valuation used significant other observable inputs.

5. FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

Other Financial Instruments — The Master Trust and the Plans hold other assets and liabilities not measured at fair value on a recurring basis, including cash and cash equivalents, receivables and liabilities. The fair value of these assets and liabilities approximates the carrying amounts in the Master Trust's and the Plans' financial statements due to the short maturity of the instruments.

6. INVESTMENTS MEASURED AT NET ASSET VALUE

In accordance with ASC 820, the following is a summary of the Master Trust investments in which the NAV per share of the investment is used to estimate its fair value. The summaries below are categorized by general types of assets as disclosed in the Master Trust's statements of net assets. For each general type of assets utilizing the NAV, the fair value, redemption frequency, and redemption notice period as of December 31, 2021 and 2020 are disclosed.

Commingled Funds — This category includes investments in U.S. and non-U.S. securities held by a CCT, real estate and real asset investments via commingled funds and insurance company pooled separate accounts. Generally, redemptions may occur daily, weekly, monthly or quarterly depending upon the fund. For a majority of the funds, redemption notices may be given daily or up to five business days in advance, with redemption notices of up to 30 to 90 days in advance for certain funds. If the fund determines that it would be detrimental to the interests of remaining fund investors to pay wholly or in part with cash based on availability of cash for distributions, distributions may also include securities in kind. Additionally, for large withdrawals, the portfolio manager of the fund may require additional time (up to several weeks) to liquidate assets to satisfy the withdrawal requests. Under extraordinary circumstances, some of the funds may temporarily delay distributions or make distributions of securities in kind. For the CCTs with a quarterly redemption frequency, the notice period ranges from 30 to 90 days in advance of quarter-end. These funds are restricted to a redemption queue. A redemption queue is a restriction on withdrawals from a fund due to liquidity restrictions. The fund manager restricts the percentage of the fund that is available for redemption during each redemption period. All investors in the queue receive an equal portion of the available liquidity. The queue continues until all investor redemption requests are satisfied or the queue is lifted in its entirety.

6. INVESTMENTS MEASURED AT NET ASSET VALUE (CONTINUED)

Partnerships — This category includes investments in private equities held by limited partnerships that may include buyout, venture, special situations, distressed debt, or fund-of-fund strategies. This category also includes investments in private real estate (such as office, retail, apartment, and industrial properties) and real assets (such as infrastructure, energy, farmland, and timber) made through limited partnerships. Generally, limited partnerships require investors to commit to contribute additional capital during an investment period and do not provide redemption rights. As such, the Master Trust may receive distributions from the proceeds as the underlying assets are sold or income is distributed. The Master Trust maintains an active portfolio of private equity and real estate/real asset limited partnership investments that are in various stages of investment. The current portfolio of investments is expected to liquidate over a period of up to ten years.

Hedge Funds — This category includes investments in hedge funds. Common hedge fund strategies include event-driven, relative value, long-short, and market neutral. Types of hedge fund investments may include direct investments in various hedge funds and investments through fund-of-fund vehicles. The fund-of-fund vehicles are used for the purpose of making investments in a diverse portfolio of hedge funds, while the direct investments allow for larger targeted investments without the additional fund-of-fund fee structure.

Each hedge fund has its own redemption rights and distribution process specified in the fund prospectus. Redemption is generally allowed subject to liquidity and certain restrictions. These restrictions generally include fund-level gates and lockup periods. A "gate" provision allows a hedge fund manager to limit the amount of withdrawals on any withdrawal date to not more than a stated percentage of a fund's net assets — often 10% to 25%, depending on how frequently investors have a right to withdraw capital. A "lock-up" provision restricts an investor's ability to withdraw capital from a hedge fund for some stated period of time. It is common for hedge funds to lock-up an investor's investments for one or two years. As of December 31, 2021, the lock-up restrictions had expired based on each individual fund's contractual terms. For the funds in liquidation, the timing of liquidation has not been communicated by the funds.

7. DERIVATIVE FINANCIAL INSTRUMENTS

ASC 815, *Derivatives and Hedging*, requires disclosures on how and why derivatives are used, accounted for, and affect the results of operations and financial position. Derivative instruments held by the Master Trust are not designated as hedging instruments under ASC 815. The Master Trust investments are exposed to the following financial instrument risks:

Interest Rate Risk — Interest rate risk is the risk of change in the market value of the assets due to a change in interest rates. Bond futures, interest rate swaps, and interest rate swaptions are generally used to manage interest rate risk or adjust portfolio duration. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Interest rate swap agreements involve the exchange by the Master Trust, with a counterparty, of respective commitments to pay or receive interest, e.g., an exchange of floating rate payments for fixed rate payments, with respect to the notional amount of principal. Interest rate swaptions are options to enter into an interest rate swap based on predetermined conditions.

Credit Risk — Credit risk is the risk of change in the market value of assets due to the change in creditworthiness of the underlying issuer. Credit default swaps are used to manage the credit exposure of a security or basket of securities. Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation, or index. Credit default options (also known as credit default swaptions) are options on credit default swaps. A credit default option gives its holder the right, but not the obligation, to buy (call) or sell (put) protection on a specified reference entity for a specified future time period for a certain spread.

Foreign Currency Risk — Currency risk is the risk of a change in market value due to the change in foreign currency exchange rates. Generally, currency futures and forward contracts are used to achieve the desired currency exposure, or generate value-added performance. Foreign currency futures and forwards are agreements between two parties to buy and sell a set of currencies at a set exchange rate on a specified future date. A currency option gives the buyer the right, but not the obligation, to buy one currency or sell another currency at a set exchange rate on or before a given date.

Equity Risk — Equity risk is the risk of a change in market value of assets due to the change in equity or equity index prices. Equity futures, contracts for difference, and equity swaps are generally used to manage the market exposure of a security or index, or rebalance the total portfolio to the target asset allocation. An equity futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. A contract for difference is an agreement between two parties in which the seller will pay to the buyer the difference between the current value of an asset and its value at contract time (if the difference is negative, then the buyer will pay the seller). Equity swaps generally exchange the return on a stock or stock index for the return of another financial instrument such as a different stock or equity index or LIBOR, SOFR (Secured Overnight Financing Rate) or other similar alternative reference rates.

Commodity Risk — Commodity risk is the risk of change in the market value of the underlying commodity due to a change in the price of the commodity. Commodity futures, swaps, and options are generally used to achieve the desired market exposure to commodities. A futures contract is an agreement between two parties to buy and sell a commodity at a set price on a future date. Commodity swaps are agreements involving the exchange by the Master Trust, with a counterparty, of respective commitments to pay or receive cash flows, e.g., an exchange of payments based on the price

7. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

movement for the commodity, with respect to the notional amount of principal. Commodity options give the buyer the right, but not the obligation, to buy one commodity or sell another commodity at a set price on or before a given date.

Future Settlement Risk — Future settlement risk is the risk of counterparty nonperformance resulting in not receiving the asset or associated gains specified in the contract. Gains are derived from the change in market value of the contract due to a change in price of the underlying security. Mortgage TBAs are used to manage the market exposure of a security or asset class. A TBA is a contract for the purchase or sale of agency mortgage-backed securities to be delivered at a future agreed-upon date.

As of December 31, 2021 and 2020, the Master Trust has invested in derivative contracts, which are reflected in the Master Trust's statements of net assets as follows:

Realized gains and losses and the change in unrealized gains and losses are reflected in the Master Trust's statements of changes in net assets as net appreciation or depreciation in the fair value of investments. The effects of derivative contracts realized gains and losses and the change in unrealized gains and losses for the years ended December 31, 2021 and 2020, are reflected in the following tables:

The following tables summarize the gross notional value of derivative contracts outstanding as of December 31, 2021 and 2020. The gross notional amounts give an indication of the volume of the Master Trust's derivative activities and significantly exceed the fair value of the derivative investments, which is more representative of the theoretical economic exposure associated with derivatives in the Master Trust.

Derivatives are generally used to manage the market exposure of a security, index or currency, interest rate risk, or adjust the portfolio duration. Derivative contracts are instruments that derive their value from underlying assets, indices, reference interest rates, or a combination of these factors. Refer to Note 2 for further description of how derivative instruments are valued. Certain cash instruments, such as mortgage-backed TBAs, meet the definition of a derivative instrument under U.S. GAAP.

The nature of the counterparty and the settlement mechanism of the derivative affect the credit risk to which the Master Trust is exposed. For OTC derivatives such as swaps, forwards, options and TBAs, the Master Trust is exposed to the credit risk of the derivative counterparty.

For exchange-traded derivatives, such as futures and options, and "cleared" OTC swaps, the Master Trust is generally exposed to the credit risk of the relevant exchange or clearinghouse. Where possible, the Master Trust seeks to mitigate its credit risk exposures arising on derivatives transactions through the use of legally enforceable master netting arrangements and collateral agreements.

7. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

The Master Trust is also exposed to liquidity risk in the following situations:

1) When the derivative contracts require the Master Trust to post additional cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties' favor and the Master Trust's receivables under related contracts are unavailable for offset or insufficient in value to offset the payment obligation to the counterparty.

2) When certain derivative contracts have credit-related contingent features under the International Swaps and Derivatives Association Master Agreement (generally swaps) with counterparties for contracts in a net liability position.

The Master Trust has liquidity risk if its assets decline by various, pre-specified rates over predetermined time periods. If this occurs, the Master Trust is required to post more collateral or may be required to pay off the open liability contracts given the counterparty's right to terminate the contract. At December 31, 2021 and 2020, the Master Trust had a fair value of $27,113,703 and $7,667,523, respectively, in contracts in a net liability position with contingent features. $28,878,734 and $4,292,977, respectively, were posted in collateral against derivative contracts. There was no additional collateral required to be posted in the event that a contingent event had occurred at December 31, 2021 and December 31, 2020. Certain derivatives contracts also provide for the right to terminate the contract if a contingent event occurs. At December 31, 2021 and 2020, these terminations would have required the Master Trust to settle trades with a fair value of $30,178,599 and $2,615,430, respectively.

The Master Trust holds credit derivatives which are included in other investments and other liabilities on the Master Trust's statements of net assets. The fair value of credit derivatives where the Master Trust is the seller of the credit derivatives is $7,814,317 and $8,761,950 as of December 31, 2021 and 2020, respectively. The total gross notional value of credit derivatives where the Master Trust is the seller is $445,156,377 and $481,201,091 (0.66 and 0.70% of net assets) as of December 31, 2021 and 2020, respectively.

8. PLAN AMENDMENTS

The BCERP Plan was ratified in October 2020 to allow the lump sum optional form of payment, beginning in May 2021, for Participants in a certain union.

9. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Certain Master Trust investments are managed by J.P. Morgan Asset Management. J.P. Morgan Asset Management is an affiliate of J.P. Morgan, the trustee for the Master Trust and the Plans; therefore, these transactions qualify as related party and party-in-interest transactions. The investment management fees to J.P. Morgan Asset Management are paid at the Master Trust level.

During 2020, the Company contributed $2,999,999,934 in the form of shares of its common stock to certain Plans in the Master Trust. At December 31, 2021 and 2020, the Master Trust held 9,352,727 and 15,405,726 shares, respectively, of common stock of the Company, with fair value of $1,882,891,000 and $3,297,749,708, and a cost basis of $1,677,505,115 and $2,763,171,015, respectively. The common stock of the Company is included in common and preferred stock on the Master Trust's statements of net assets as of December 31, 2021 and 2020.

The EBIC has delegated exclusive authority for management and disposition of the common stock of the Company held within the Master Trust to Newport Trust Company ("Newport"), an independent fiduciary and investment manager. When Newport disposes of shares, the proceeds are used for liquidity needs or reinvested into other asset classes.

10. NONEXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain reportable nonexempt party-in-interest transactions occurred. The Plans were corrected according to the guiding principles of the Department of Labor's Voluntary Fiduciary Correction Program, which involved remitting the total principal and associated lost earnings to the Plans. The table below details the principal amounts of the prohibited transactions ("PT") for each Plan.

Date PT Occurred	Date PT Corrected	Description of PT	BCERP Plan	BNA Plan	BSS Plan	BSSB Plan	Hourly East Plan	Hourly West Plan	NCRP Plan	PVP Plan

11. TAX STATUS

The Internal Revenue Service ("IRS") determined and informed the Company by letters dated March 6, 2015 (for the BCERP Plan, BNA Plan, BSSB Plan, Hourly East Plan, and Hourly West Plan), May 7, 2015 (for the NCRP Plan), June 9, 2015 (for the BSS Plan) and July 8, 2021 (for the PVP Plan) that the Plans and related trust are designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plans have been amended since receiving their determination letters. The Plans' administrator believes that the Plans are designed and are currently being operated in compliance with the applicable requirements of the IRC. Therefore, the Plans' administrator believes the Plans' tax-exempt status has not been affected, and no provision for income taxes has been included in the Plans' financial statements. The Plans are subject to routine audits by taxing jurisdictions. The BCERP Plan is currently under examination by the IRS.

Mortality

- Healthy

The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants (based on RP-2006 “Healthy Annuitants” table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019) and non-annuitants (based on RP-2006 “Employees” table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019) (Exhibit A).

- Disabled

Alternative disabled life mortality table after 1994, as defined under IRS Revenue Ruling 96-7 (Exhibit B).

Disability

0.25% at each eligible age.

SCHEDULE SB ATTACHMENTS

Retirement

Rates varying by age. Average age 60.

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the rates at which participants retire by age are shown below.

Age	Rate
50	15.0%
51-54	10.0%
55	15.0%
56-59	10.0%
60-61	12.0%
62-64	25.0%
65-69	30.0%
70	100%

Rates are 0.0% if not eligible to retire.

Benefit commencement date:

- Survivor benefits: If participant has less than 10 years of vesting service and is not yet eligible to retire at date of death, surviving spouse benefits commence at the date the participant would have attained age 65. Otherwise, surviving spouse benefits commence at the later of the death of the active participant or the date the participant would have been eligible to retire.
- Layoffs: Those who are laid-off due to the C-17 plant closure we assumed to commence benefits at the later of age 55 or age on the event date.
- Termination: The later of age 62 or termination of employment
- Disability: Immediately if participant has at least 10 years of vesting service, otherwise age 65.
- Retirement: Upon termination of employment.

Benefit commencement for terminated vested participants

Terminated vested participants are assumed to commence benefits at age 62, or immediately if between age 62 and 65. Terminated vested participants over age 65 are assumed to commence benefits immediately and collect a retroactive payment equal to the sum of their missed payments plus interest. Terminated vested participants

	over age 72 are included in the valuation unless identified as lost by the plan administrator.
Missing participants	Terminated vested participants who have been identified by the Plan Administrator as missing, as indicated by a forfeiture flag in the data, are included in the participant counts and demographic information, but have zero liability. It is assumed that no claim for these benefits will be made.
Form of payment	Life annuity: 100% of single participants and participants retiring from terminated vested status. 6.25% of married male participants, and 58.33% of married female participants, retiring from active status. 55% joint and survivor annuity with "pop-up" (actuarially reduced from the life annuity): 93.75% of married male participants, and 41.67% of married female participants, retiring from active status.
Percent married	80% of males; 60% of females.
Spouse age	Actual age is used if available. Otherwise assume female spouse three years younger than male employee, and male spouse two years older than female employee.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.
Actuarial value of assets	Average of the market value of assets on the valuation date and the preceding two valuation dates, adjusted for contributions, benefits, administrative expenses and expected return (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of the market value on the valuation

SCHEDULE SB ATTACHMENTS

date, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

Funding policy

The funding policy of the Plan is to contribute an amount each year that is at least equal to the minimum required contribution under federal law and that is tax-deductible under the Internal Revenue Code.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued based on discussions with Boeing regarding the likelihood that these benefits will be paid. Willis Towers Watson has reviewed the plan provisions with Boeing and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

Willis Towers Watson used asset data supplied by Boeing. Boeing furnished the dates and amounts of any plan contributions. Boeing, through its third-party administrator, furnished participant data as of January 1, 2021. Data for active plan participants as of January 1, 2021, includes accrued benefits for frozen participants determined by the plan administrator. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available. Data estimates and assumptions are documented in a data assumptions memo sent to Boeing on July 2, 2021.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Considerations due to COVID-19

The COVID-19 pandemic has disrupted Boeing's business operations as well as the economic outlook. Accordingly, Willis Towers Watson has reviewed and evaluated the non-prescribed economic and demographic assumptions to determine whether adjustments may be warranted. Below is a summary of this review for applicable significant assumptions:

Termination and retirement from active status - Although the plan experienced higher than anticipated levels of terminations and retirements during 2020, decrements have not been changed given the expectation that experience will revert to the long-term assumption after 2020.

Assumptions Rationale - Significant Economic Assumptions

Discount rate — The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

SCHEDULE SB ATTACHMENTS

Plan-related expenses	As required by regulations, plan-related expenses are based on the prior year's actual administrative expenses and expected changes in PBGC premiums rounded up to two significant figures.
Assumed Earnings Rate on Investments for Asset Smoothing	The assumed return of 5.94% used for asset smoothing is the third segment rate. Although we have not explicitly determined an expected return on assets, the expected return on assets assumption chosen by Boeing with the help of their investment advisers under U.S. GAAP for 2020 is 6.50%. Although determining the expected rate of return on plan assets was not within the scope of our work, it is the client's best estimate and we determined that it does not significantly conflict with what would be reasonable based on their asset allocation.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are among the choices prescribed by IRC §430(h).
Disabled Mortality	IRC §430(h)(3)(D) provides for the use of separate mortality tables with respect to certain individuals who are entitled to benefits on account of disability. Disabled mortality tables from IRS Revenue Ruling 96-7 have been selected. These separate mortality tables are permitted to be used with respect to disabled individuals in lieu of the generally applicable mortality tables provided pursuant to IRC §430(h)(3)(A) or the substitute mortality tables under IRC §430(h)(3)(C). Disabled mortality improvement is not assumed beyond the valuation date because the degree of improvement, if any, is unknown and the assumption is considered to be immaterial.
Termination	Termination rates were based on an experience study conducted in 2020, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. The analysis of historical termination rates was last reviewed in the experience study delivered to Boeing on September 23, 2020.
Retirement	The assumed rates of retirement from active employment are based on actual retirement experience by the plan, with considerations for future conditions that might be expected to produce different results in the future. The analysis of historical retirement rates was last

SCHEDULE SB ATTACHMENTS

	reviewed in the experience study delivered to Boeing on September 23, 2020.
Benefit commencement date for deferred benefits	Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement, based on plan experience. The analysis of historical ages of benefit commencement for deferred vested participants was presented in the experience study delivered to Boeing on September 23, 2020.

Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation	■ The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2019 to September 2020 before application of interest rate stabilization corridors. In addition, the segment interest rates were updated from reflecting interest rate corridors applicable for a January 1, 2020 valuation to those applicable for a January 1, 2021 valuation. ■ The assumed mortality for healthy participants has been updated to use the MP-2019 projection scale as specified in the regulations under §1.430(h)(3)-1 ■ In the prior valuation, data provided by a third-party vendor (PBI) was used to identify participants believed to be deceased. Those among this group who were listed as deferred in the Plan Administrator's census data were given a "presumed dead" flag and valued by applying a 40% multiplier to their liability, as a simplifying assumption to reflect the value of a Qualified Pre-retirement Survivor Annuity (QPSA) for the portion who are assumed to be married under the valuation assumptions. The current valuation relies on data from the Plan Administrator with no simplifying assumptions other than what was previously described under "Sources of Data and Other Information".
Change in methods since prior valuation	None.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V
Summary of Plan Provisions

Plan Provisions

Effective date	December 1, 1955. The plan was restated effective January 1, 2015. The most recent amendment for this plan (Amendment No. 9) was signed on July 8, 2019 and is effective as of January 1, 2015. The most recent amendment for PVP (Amendment No. 32) which impacts certain non-represented participants in this plan is effective December 31, 2015.
Covered employees	Hourly West employees employed by Boeing. Members of SPFPA 159 are excluded from participating in the plan if hired on or after a disqualifying break in service after January 1, 2010. Members of UAW 148 are excluded from participating in the plan if hired or rehired after a disqualifying break in service after January 1, 2011. Members of IAFF I-66 (Long Beach, CA) are excluded from participating in the plan if hired or rehired after a disqualifying break in service after January 1, 2012. Members of IAM&AW 725 are excluded from participating in the plan if hired on or after a disqualifying break in service after January 1, 2013. Members of IUOE 501W are excluded from participating in the plan if hired on or after a disqualifying break in service after February 1, 2014. A disqualifying break is any termination and rehire, except a rehire while in a 6 year layoff period, a rehire from an approved leave of absence, or transfers within the control group. For this purpose, an employee's period of employment with United Launch Alliance (ULA) will be considered an authorized leave of absence, to the extent that the employee first transferred directly from the controlled group to ULA and subsequently transferred from ULA back to the controlled group.
Participation date	The employee becomes covered after an initial 1 year period or subsequent 1 year period where the participant earns 1,000 hours.
Missing participants	Terminated vested participants past normal retirement age who have not been located after reasonable attempts are deemed to have forfeited their benefits. Such benefits will be reinstated after verification of a claim for the benefit.

Definitions

Actuarial equivalence for annuity conversion	For the single life annuity, the monthly pension benefit is payable without adjustment. For the 5-year period certain annuity and the accelerated income annuity, the monthly benefit is actuarially adjusted based on the applicable 417(e)(3) interest rate for November of the prior plan year, and the applicable 417(e)(3) mortality table. For the 55% joint and survivor annuity with “pop-up”, the monthly benefit is multiplied by 95%, where this factor is increased (decreased) by 0.5% for each year in excess of 5 years that the spouse’s age exceeds (is less than) the employee’s age. For all other optional payment forms, the monthly pension benefit is actuarially adjusted based on an interest rate of 6% and the RP 2000 mixed collar mortality table with a 50/50 male/female blend then projected to 2015 using Scale AA.
Aggregate benefit service	Total amount of benefit service the participant earned in the MDC pension plans and their successors including ULA plans.
Benefit service	One year for each calendar year an employee completes 1,800 hours. A prorated portion is provided if at least 1,000 hours of benefit service is earned. Hours are counted using a 45 hour/week equivalency. Effective June 30, 2016, benefit service accruals ceased for IAFF I-66 (Long Beach, CA) and IUOE 501W participants. Effective December 31, 2016, benefit service accruals ceased for UAW 148 participants. Effective December 31, 2017, benefit service accruals ceased for IAM 725 and other “me too” labor group participants. Effective December 31, 2018, benefit service accruals ceased for SPFPA Local 159 participants.
ERS/LISA	Participants in SPFPA 160 and AFSO 1 get $500 per month. $550 per month for all other participants.
Monthly pension benefit	Amount per year of benefit service (see Exhibit A).
Monthly preretirement death benefit	55% of the monthly pension benefit accrued as of the date of death, reduced for the 55% joint and survivor election as if the participant survived to early retirement, and actuarially reduced, if needed, for payment as early as the first of the month following death.
Normal retirement date (NRD)	First of month coinciding with or next following the attainment of age 65.

SCHEDULE SB ATTACHMENTS

Postretirement death benefit	$2,000
Vesting service	One year for 1,000 hours of service in a plan year; partial credit for less than 1,000 hours.

Eligibility for Benefits

Normal retirement	Retirement on NRD
Early retirement	Attainment of age 55 with 10 years of vesting service as of the termination date. In addition, the following groups are eligible upon reaching age 50 with 30 years of aggregate benefit service as of the termination date: AFG 1, AFSO 1, IAM 725, SPFPA 159, SPFPA 160 and all non-represented participants.
ERS/LISA	Early retirement with 30 years of aggregate benefit service or age 60 with 20 years of aggregate benefit service, and before age 62. Employees who transferred to another plan are not eligible.
Postponed retirement	Retirement after NRD.
Vested termination	Termination for reasons other than death or retirement after completing 5 years of vesting service.
Preretirement death	Death while vested and before benefits commence, with a surviving spouse.
Postretirement death	Death after normal, early, postponed retirement or disablement from active or layoff status.
Disablement	Total and permanent disability for a period of 6 months while active with 10 years of vesting service.
Fund E	Certain participants are eligible for a lump sum benefit. These participants and amounts have been provided by Boeing through its third party administrator for inclusion in this valuation.

Monthly Benefits Paid Upon the Following Events

Normal retirement	Monthly pension benefit determined as of NRD
Early retirement	Monthly pension benefit determined as of early retirement date, reduced by an actuarial factor of 6% per year before age 62, interpolated monthly, plus LISA if eligible. No reduction is applied for participants who retire after age 55 with 30 or more years of aggregate benefit service plus ERS if eligible. No reduction is applied for participants in the specified unions who retire after age 50 with 30 or more years of aggregate benefit service, plus ERS if eligible.
Postponed retirement	Monthly pension benefit determined as of actual retirement date
Vested termination	Monthly pension benefit determined as of termination date, actuarially reduced for payment before NRD. If payment begins

SCHEDULE SB ATTACHMENTS

	after NRD, a make-up payment based on the number of missed payments with interest will also be provided.
Employees transferred to another plan	Monthly pension benefit determined using benefit service as of the transfer date. Minimum benefit provisions and pay are determined as of retirement date.
Layoffs	Monthly benefit determined using benefit service, vesting service and the minimum benefit provisions as of the layoff date. UAW 148 participants who are laid off on or after July 1, 2007 may elect early retirement during the 6-year period following the layoff date, if the participant was at least age 49 with 10 years of vesting service at the layoff date. UAW 148 participants who are laid off on or after October 1, 2014 may elect early retirement using enhanced early retirement factors during the 6-year period following the layoff date (but not before age 55), if the participant was at least age 49 but less than 55 with at least 10 years of vesting service and at least 29 years of benefit service at the layoff date (and at least 30 years of benefit service at commencement). Monthly pension benefit determined as of early retirement date, reduced by an actuarial factor of 3% per year before age 62. No reduction is applied for participants who retire after age 55 with 30 or more years of aggregate benefit service. Non-represented participants who are laid off may subsequently elect early retirement at any point between ages 55 and 65 if the participant was at least age 50 with 10 years of vesting service, or was under age 50 but had at least 75 points, at the layoff date. All other laid-off participants may elect early retirement during the 5-year period following the layoff date, if the participant met the early retirement eligibility at the layoff date.
Preretirement death	Monthly preretirement death benefit is determined as of the date of death, actuarially reduced for early commencement
Postretirement death	Postretirement death benefit payable in a lump sum
Disablement	Monthly pension benefit unreduced for early commencement
Fund E	Fund E benefit determined as of the benefit commencement date
Forms of payment	Monthly preretirement death benefits are paid as a single life annuity, except, the surviving spouse of a former employee who would have been eligible to elect a 5-year period certain shall be entitled to elect to receive his or her death benefit as a 5-year period certain. Such 5-year period certain benefit shall be the actuarial equivalent value of the spouse's immediate survivor annuity as of his or her benefit commencement date. Monthly pension benefits are paid as a single life annuity, if the participant has no spouse as of the date payments begin, or if the participant so elects. Otherwise, benefits are paid in the form of the 55% joint and survivor annuity with "pop-up" (where annuity will "pop-up" to the benefit amount before the joint and survivor option election if

	the spouse predeceases the retired participant) or, if the participant elects and the spouse consents, another actuarially equivalent optional form offered by the plan. Optional forms are accelerated income annuity, 10-year certain and life annuity, 75% joint and survivor annuity with "pop-up" or a single life annuity (for married participants). A 5-year period certain option is available for former employees who terminated prior to April 24, 2016, with a benefit commencement date that is on or after December 1, 2019.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective prior to benefit commencement, but does not allow changes once the benefit has commenced.
Voluntary lump sum window	Certain participants who terminated employment before January 1, 2015, were entitled to a vested benefit, and had not commenced benefits by November 1, 2015, were eligible to receive their benefits in the form of a lump sum (or immediate annuity) as of November 1, 2015. The lump sum window did not apply to all terminated vested participants. Participants that elected the lump sum and were cashed out during November 2015 are no longer participants in the plan.

Changes in Benefits Since Prior Year

These plan provisions reflect all amendments to the Hourly West Plan adopted before January 1, 2021 and effective during the 2021 plan year.

The pay and dollar limits were adjusted in accordance with legislative changes effective for 2021 as follows:

- The IRC Section 401(a)(17) pay limit increased from $285,000 for the 2020 plan year to $290,000 for the 2021 plan year.
- The IRC Section 415 dollar limit remained at $230,000 for the 2021 plan year.

Change in Actuarial Assumptions

- In the prior valuation, data provided by a third-party vendor (PBI) was used to identify participants believed to be deceased. Those among this group who were listed as deferred in the Plan Administrator's census data were given a "presumed dead" flag and valued by applying a 40% multiplier to their liability, as a simplifying assumption to reflect the value of a Qualified Pre-retirement Survivor Annuity (QPSA) for the portion who are assumed to be married under the valuation assumptions. The current valuation relies on data from the Plan Administrator with no simplifying assumptions other than what was previously described under "Sources of Data and Other Information".
