**Plan Name** D & B Cousins Construction Corporation Defined Benefit Plan

**EIN:** 20-8397561

**Plan Sponsor's Name** D & B Cousins Construction Corporation

**PN:** 002

The weighted average retirement age is equal to the normal retirement age of 62 .

List the rate of retirement at each age and describe the methodology used to compute the weighted average retirement age, including a description of the weight applied at each potential retirement age.

**Attachment to 2021 Form 5500**  
**Schedule SB, Part V - Statement of Actuarial Assumptions/Methods**

**Plan Name** D & B Cousins Construction Corporation Defined Benefit Plan

**EIN:** 20-8397561

**Plan Sponsor's Name** D & B Cousins Construction Corporation

**PN:** 002

Describe all non-prescribed actuarial assumptions used to determine the funding target and target normal cost. Also, describe the method for determining the actuarial value of assets and any other aspects of the funding method for determining the Schedule SB entries that are not prescribed by law.

**COST METHOD**

In accordance with PPA, the annual cost is equal to the target normal cost plus the shortfall amortization charge minus any prefunding and carryover balances.

Unit Credit method. The normal cost is the sum of the individual normal costs for active participants. The normal cost for an individual is the present value, as of the valuation date, of the participant's retirement, death, and withdrawal benefits which he is expected to accrue during the current plan year.

The actuarial accrued liability is the sum of the individual present values, for all participants, of the benefits accrued, based on service to the valuation date.

The actuarial liabilities shown in this report are determined using software purchased from an outside vendor which was developed for this purpose. Certain information is entered into this model in order to generate the liabilities specific to your pension plan. These inputs include economic and non-economic assumptions, plan provisions and census information. We rely on the coding within the software to value the liabilities using the actuarial methods and assumptions selected. Both the input to and the output from the model is checked for accuracy and reviewed for reasonableness.

**ACTUARIAL ASSUMPTIONS**

Interest Rate (as prescribed by PPA and modified by MAP-21, HATFA, BBA and ARPA)  
Without Adjusted Interest Rates:

Liabilities are valued using the three segment rates based on the 24-month average of the corporate bond yield curve published by the Secretary of the Treasury for the applicable month of September 2020.

With Adjusted Interest Rates:

The Plan Sponsor has elected to implement the interest rate provisions provided in the American Rescue Plan Act of 2021 effective with the 2021 Plan Year for both IRS minimum funding and AFTAP benefit restriction purposes. The interest rates are the adjusted 24-month segment rates using 25-year average segment rate corridors under MAP-21, further adjusted by HATFA/BBA/ARPA permissible corridors for the plan year beginning in 2021.

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

**Schedule SB, Part V - Statement of Actuarial Assumptions/Methods**

**Plan Name** D & B Cousins Construction Corporation Defined Benefit Plan

**EIN:** 20-8397561

**Plan Sponsor's Name** D & B Cousins Construction Corporation

**PN:** 002

Describe all non-prescribed actuarial assumptions used to determine the funding target and target normal cost. Also, describe the method for determining the actuarial value of assets and any other aspects of the funding method for determining the Schedule SB entries that are not prescribed by law.

**COST METHOD**

In accordance with PPA, the annual cost is equal to the target normal cost plus the shortfall amortization charge minus any prefunding and carryover balances.

Unit Credit method. The normal cost is the sum of the individual normal costs for active participants. The normal cost for an individual is the present value, as of the valuation date, of the participant's retirement, death, and withdrawal benefits which he is expected to accrue during the current plan year.

The actuarial accrued liability is the sum of the individual present values, for all participants, of the benefits accrued, based on service to the valuation date.

The actuarial liabilities shown in this report are determined using software purchased from an outside vendor which was developed for this purpose. Certain information is entered into this model in order to generate the liabilities specific to your pension plan. These inputs include economic and non-economic assumptions, plan provisions and census information. We rely on the coding within the software to value the liabilities using the actuarial methods and assumptions selected. Both the input to and the output from the model is checked for accuracy and reviewed for reasonableness.

**ACTUARIAL ASSUMPTIONS**

Interest Rate (as prescribed by PPA and modified by MAP-21, HATFA, BBA and ARPA)  
Without Adjusted Interest Rates:

Liabilities are valued using the three segment rates based on the 24-month average of the corporate bond yield curve published by the Secretary of the Treasury for the applicable month of September 2020.

With Adjusted Interest Rates:

The Plan Sponsor has elected to implement the interest rate provisions provided in the American Rescue Plan Act of 2021 effective with the 2021 Plan Year for both IRS minimum funding and AFTAP benefit restriction purposes. The interest rates are the adjusted 24-month segment rates using 25-year average segment rate corridors under MAP-21, further adjusted by HATFA/BBA/ARPA permissible corridors for the plan year beginning in 2021.
