Independent Auditor's Report

The Plan Administrator
URS GSG Pension Plan
Germantown, Maryland

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit for the 2021 Financial Statements

We have performed an audit of the financial statements of URS GSG Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2021, and the related statements of changes in net assets available for benefits for the year ended, and the related notes to the financial statements (2021 Financial Statements).

Management, having determined it is permissible in the circumstances, has elected to have the audit of the 2021 Financial Statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the ERISA. As permitted by ERISA Section 103(a)(3)(C), our audit need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under the ERISA (qualified institution).

Management has obtained a certification from a qualified institution as of and for the year ended December 31, 2021, stating that the certified investment information, as described in Note 8 to the financial statements, is complete and accurate.

Opinion on the 2021 Financial Statements

In our opinion, based on our audit and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the 2021 Financial Statements section:

- the amounts and disclosures in the accompanying 2021 Financial Statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the accompanying 2021 Financial Statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion on the 2021 Financial Statements

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the 2021 Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the 2021 Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor’s Responsibilities for the Audit of the 2021 Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit for the 2021 Financial Statements section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audit did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the 2021 Financial Statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Auditor's Report on the 2020 Financial Statements

We were engaged to audit the 2020 financial statements of the Plan. As permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan administrator instructed us not to perform and we did not perform any auditing procedures with respect to the information certified by a qualified institution. In our report dated October 10, 2021, we indicated that (a) because of the significance of the information that we did not audit, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion and accordingly, we did not express an opinion on the 2020 financial statements, and (b) the form and content of the information

included in the 2020 financial statements other than that derived from the certified information were presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

1. Description of the Plan

The following description of the URS Government Services Group Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document and the *Summary Plan Description* for more complete information regarding the terms of the Plan.

General

The Plan is a frozen contributory defined benefit pension plan, subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended. Prior to December 31, 2005, (the "Plan Freeze Date"), the Plan covered specified employees of Washington Government Environmental Services Company, LLC ("WGES"), Westinghouse Government Environmental Services Company, LLC ("WGS") and certain affiliated entities. After the Plan Freeze Date, no new participants were allowed into the Plan, participant contributions to the Plan ceased, and pension benefits stopped accruing.

The Plan is sponsored by Amentum Nuclear & Environment Holdings, Inc. ("Amentum" or the "Company"). The Plan is administered by the Amentum Benefits Administration Committee as authorized by Amentum.

Benefits

The Plan provides 100% cliff vesting upon attainment of age 65 or completion of five years of service, as defined by the Plan. Retirement benefits are paid to participants or beneficiaries in various forms consisting of annuities, lump-sum payments, or a combination of both. The benefit that a participant is entitled to if he or she has less than five years is 100% of his or her contribution and interest attributable to these contributions.

A participant's normal retirement benefit at age 65 is based on years of credited service and the monthly career accumulation amount of 1/12 of two percent of compensation for that year. The Plan generally provides a reduced benefit for early retirement. Eligibility for retirement is attained upon (1) completion of 10 years of eligibility service and attaining age 60 or (2) completion of 30 years of eligibility service and attaining age 58.

Even though the Plan is frozen, a participant, through continued employment with the Company, continues to earn eligibility credit for vesting and retirement purposes. Pension benefits for active participants in the Plan as of the Plan Freeze Date were based on pay and service earned through December 31, 2005.

Death Benefits

If an active employee dies, the spouse may be entitled to a spouse survivor benefit. Depending on the employee's age and/or eligibility service at the time of death, the spouse may qualify for an immediate spouse survivor benefit or a deferred spouse survivor benefit. The benefit payable to the spouse is equal to 55% of the employee's early retirement benefit, except that the benefit is reduced as if the employee retired at the date of death (subject to a maximum benefit reduction for early commencement) and assuming that a joint and survivor benefit and 55% form of payment had been elected. Benefit payments are guaranteed for 60 months and payable to the spouse's beneficiary, if necessary. If the employee was not married and dies before retirement, the named beneficiary will receive a refund of the employee's contributions to the Plan plus interest earned.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America using the accrual basis of accounting.

Valuation of Investments

The fair value of interest in the URS Government Services Group Master Trust ("Master Trust"), is based on the beginning of the year value of the Plan's interest in the trust plus actual contributions and allocated investment income (loss) less actual distributions and allocated administrative expenses. Investments are reported at fair value. Fair value is the price that would be received when an asset is sold or paid to transfer a liability in an orderly transaction between market participants at the measurement date. (See Note 6 for a description of fair value measurements under Accounting Standards Codification ("ASC") 820). Investment income (loss) and realized and unrealized gains or losses are reported as a single amount as plan interest in investment gain (loss) of the Master Trust (see Note 7 for information about the Master Trust).

The Master Trust records purchases and sales of securities on a trade date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as those held during the year.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

The Plan utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Administrative Expenses

The Plan's expenses are paid by either the Plan or the Company, as provided by the Plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying Statements of Changes in Net Assets Available for Benefits. In addition, certain investment-related expenses are included in investment gains of the master trust as presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Subsequent Events

The Plan has evaluated subsequent events through September 29, 2022, the date the financial statements were available to be issued.

3. Funding Policy

The Company contributes certain amounts as necessary (calculated on an actuarial basis) to provide the Plan with assets sufficient to meet the benefits to be paid to Plan participants. For 2021 and 2020, the minimum funding requirements of ERISA, as determined by consulting actuaries, have been met.

Prior to the Plan Freeze Date, active participants were required to contribute 1.5% of their salary to the Plan as a condition of accruing a benefit. Participants were immediately vested in their contributions, including earnings thereon. Total participant accumulated contributions as of December 31, 2021 and 2020, were $380,172 and $420,176, respectively, including interest credited each January at the annual rate of 120% of the federal mid-term interest rate for the first month of the Plan year and (0.62% and 2.03% for 2021 and 2020, respectively).

4. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) current employees or their beneficiaries. Because the benefits under the Plan are frozen, the accumulated plan benefits for active employees are based on their accrued benefits as of the Plan Freeze Date. Future active employee compensation and credited service increases are no longer applicable after the Plan Freeze Date. Due to the Plan freeze, benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included and are fully attributable to employee service rendered to the valuation date.

The computations of the actuarial present value of accumulated Plan benefits were made as of January 1, 2021. Had the valuation been performed as of December 31, there would be no material differences.

The actuarial present value of accumulated plan benefits of the Plan is as follows:

	January 1, 2021
Vested benefits:	
Participants and beneficiaries currently receiving benefits	$ 22,127,962
Other participants	12,340,284
Total vested benefits	34,468,246
Nonvested benefits	110,697
Total actuarial present value of accumulated plan benefits	$ 34,578,943
Actuarial present value of accumulated plan benefits at beginning of year	$ 34,266,528
Increase (decrease) during the period attributable to:	
Benefits paid	(2,066,237)
Interest due to the decrease in the discount period	1,827,838
Actuarial losses	177,166
Change in assumptions	373,648
Net increase	312,415
Actuarial present value of accumulated plan benefits at end of year	$ 34,578,943

The actuarial present value of accumulated plan benefits is determined by independent actuaries and reflects actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and expected date of payment.

Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, the effect of such changes could be material to the Plan's financial statements.

The significant actuarial assumptions used in the valuation for 2021 are shown below:

Discount rate	-	5.40%
Rate of pay increases	-	Not applicable
Mortality basis	-	Benefit weighted Pri-2012 base with mortality table with MP-2021 projection scales with no collar adjustment and projected generationally
Average retirement age	-	Ranging from 8% at age 58 to 100% at age 70; weighted average retirement age is 62

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

5. Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Plan by a letter dated May 20, 2014, that the Plan, as amended through December 2012, and related trust were designed in accordance applicable regulations of the Internal Revenue Code ("Code") and therefore, the related trust is exempt from taxation. The Plan has been amended since receiving the determination letter. The Plan administrator believes that the Plan continues to be qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by the IRS; however, there are currently no audits for any tax periods in progress.

6. Fair Value Measurements

The investments held by the URS Government Services Group Master Trust (see Note 7 for more information) are stated at fair value in accordance with the established framework disclosure requirements described in ASC No. 820-10, "Fair Value Measurements and Disclosures" ("ASC 820-10"). ASC 820-10 establishes a framework for measuring fair value under current accounting pronouncements and enhances disclosures about fair value measurements. ASC 820-10 also defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction, which requires an entity to maximize the use of observable inputs when measuring fair value.

The standard describes three levels of inputs that may be used to measure fair value:

Level 1	Inputs to the valuation methodology are quoted prices available in active markets for identical investments as of the reporting date.
Level 2	Inputs to the valuation methodology include: • quoted prices for similar assets or liabilities in active markets; • quoted prices for identical or similar assets or liabilities in inactive markets; • inputs other than quoted prices that are observable for the asset or liability; • inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.
Level 3	Inputs to the valuation methodology are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability including assumptions regarding risk.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for instruments measured at fair value, including the general classification of such instruments pursuant to the valuation hierarchy. There were no changes in the methodologies used as of December 31, 2021 and 2020.

Mutual funds – A mutual fund is an investment company registered under the Investment Company Act of 1940 that pools the capital of many investors and invests it in stocks, bonds, short-term money market instruments and/or other securities. These investments are public investment vehicles valued at the closing price reported in the active market in which the investments are traded. These investments are classified within Level 1 of the valuation hierarchy.

Collective investment trusts – A collective investment trust is a trust for the collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one plan. These investments are valued using the net asset value ("NAV") provided by the administrator of the collective trust. The NAV is based on the value of the underlying assets owned by the fund, minus its liabilities, and then divided by the number of shares outstanding. The NAV is used as a practical expedient to estimate fair value. The collective investment trusts are not classified within the fair value hierarchy; however, the amounts measured using NAV are disclosed to permit reconciliation of the fair value of investments to the Statements of Net Assets Available for Benefits.

Privately-held securities – Investments in privately-held securities are investments in closely held instruments for which there is no available market. These funds seek capital appreciation and current income by investing in various financial instruments. The funds may invest in publicly traded equity and debt securities, as well as derivatives thereof. In addition, the funds may pursue a value-oriented strategy through short selling and investments in private or less liquid instruments (financial instruments and other obligations for which no market or only a limited market may exist). The funds may also leverage its portfolio with borrowed funds. The fair value is determined by the Plan's management using the NAV. The Plan's management considers subscription and redemption rights, including any restrictions on the disposition of its interest in its determination of fair value. For information regarding restrictions on redemptions, see Note 7. Privately-held securities are not classified within the fair value hierarchy; however, the amounts measured using NAV are disclosed to permit reconciliation of the fair value of investments to the Statements of Net Assets Available for Benefits.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although Plan management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Master Trust's assets at fair value as of December 31, 2021 and 2020, respectively.

7. Interest in URS Government Services Group Master Trust

The Plan's investment assets are held in a trust account at The Bank of New York Mellon ("Trustee") and consist of an undivided interest in an investment account of the URS Government Services Group Master Trust ("Master Trust"), a master trust established by WGS and WGES and administered by the Trustee. The Master Trust and two other pension plan, which are part of the Master Trust, also transferred to the Amentum. Use of the Master Trust permits the commingling of trust assets with the assets of two other pension plans for investment and administrative purposes. Although assets of these pension plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the participating plans. The net investment income (loss) of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans. The Plan's interest in the Master Trust represents approximately 13.9% and 14.8% of the net assets of the Master Trust as of December 31, 2021 and 2020. The Plan's investment gains in the Master trust for the year ended December 31, 2021 and 2020 was $2,702,402 and $5,693,712, respectively.

The following table presents the net assets of the Master Trust as of December 31:

	Master Trust		Plan's Interest in Master Trust	
	2021	2020	2021	2020
Investments at fair value				
Collective investment trusts	$ 233,775,177	$ 202,789,917	$ 10,753,145	$ 6,217,190
Privately-held securities	34,412,790	29,083,224	16,865,540	15,862,879
Mutual funds	17,843,141	31,043,353	12,043,271	16,949,520
Net assets of Master Trust	$ 286,031,108	$ 262,916,494	$ 39,661,956	$ 39,029,589

The net investment earnings for the Master Trust for the years ended December 31:

	2021	2020
Investment gains	$ 22,412,039	$ 39,919,510
Interest and dividends	494,649	690,309
Net investment earnings	$ 22,906,688	$ 40,609,819

8. Certified Investments

Certain information related to investments disclosed in the accompanying financial statements, including investments held as of December 31, 2021 and 2020, and net appreciation in fair value of investments, interest and dividends for the years then ended, was obtained by management and agreed to or derived from information certified as complete and accurate by the Bank of New York Mellon/BNY Mellon, N.A. (the trustee of the Plan).

9. Related-Party and Party-In-Interest Transactions

The Plan has certain investments that are managed by the Trustee. As of December 31, 2021 and 2020 the Plan has certain investments managed by Angeles Investments ("Angeles"), and Angeles acts as a trustee for those investments. Fees paid by the Plan for investment management services of the common trust funds and privately held securities were included as a reduction of the return on each fund. Fees paid by the Plan for investment fund services provided to the Master Trust were $34,012 and $44,968, for the years ended December 31, 2021 and 2020, respectively. These transactions qualify as party-in-interest transactions.

These party-in-interest transactions qualify for prohibited transaction exemptions.

10. Plan Termination

Although it has not expressed any intention to do so, the Plan sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event the Plan is terminated, the net assets of the Plan will be allocated as specified by the Plan document in accordance with ERISA and its related regulations.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the form of benefit payment elected by the participant at Plan termination. The ceiling varies depending on the form of benefit payment elected by the participant at the time of termination.

Whether all participants will receive vested benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC. Any balance remaining after satisfaction of all liabilities of the Plan shall be returned to the Company.

Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

Applicable month	September
Interest rate basis	Segment rates

	Reflecting Corridors	Not Reflecting Corridors
Interest rates:		
First segment rate	3.32%	2.22%
Second segment rate	4.79%	3.38%
Third segment rate	5.47%	3.92%
Effective interest rate	4.91%	3.52%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting corridors (interest rate stabilization) are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP, the PBGC 4010 FS and the maximum deductible contribution.

- Assumed return for asset smoothing during 2020[1] 6.50%

[1] The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors). For 2020, the third segment rate was 5.94%.

Plan-related expenses	Plan related expenses are assumed to be the average of actual plan-related expenses net of PBGC premiums in the prior three years, plus the expected PBGC premium for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is $330,000.

[2] Not applicable as this assumption currently has no impact on liability. The projected employee contribution account balance is expected to be smaller than the career average benefit for all active participants. Terminated non-vested participants who have deferred the refund of employee contributions are assumed to take their balances on the valuation date.

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	There are no new entrants after the plan freeze date of December 31, 2005.
Mortality	
Healthy	The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants (based on RP-2006 "Healthy Annuitants" table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019) and non-annuitants (based on RP-2006 "Employees" table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019).
Disabled	Disabled participants are assumed to have the same mortality as healthy participants.

SCHEDULE SB ATTACHMENTS

Disability benefit	Earliest retirement age
Retirement benefit	Upon termination of employment
Form of payment	Participants without a pre-1995 benefit are assumed to elect the normal form of payment: - Single life annuity with 5-year certain guarantee for single participants, and - 55% joint and survivor annuity with 5-year certain guarantee for married participants For participants with a pre-1995 benefit, 25% are assumed to elect a lump sum of their pre-1995 accrued benefit, and 75% are assumed to elect the normal form of payment (same as participants without a pre-1995 benefit described above). Participants are also assumed to elect the normal form of payment on benefits accrued after 12/31/1994. Calculation of Lump Sum: Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.
Percent married	For purposes of determining assumed form of payment and for valuing the pre-retirement surviving spouse's benefit, 85% of eligible male participants and 65% of eligible female participants are assumed to be married.
Spouse age	Male spouses are assumed to be three years older than female spouses.
Covered pay	Not applicable. The plan was frozen as of December 31, 2005.
Site Closure Date	None
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.
Timing of future decrements	Retirements, withdrawals, disabilities, and deaths are assumed to occur in the middle of the year.

SCHEDULE SB ATTACHMENTS

Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year, as required by regulations under IRC §430.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.00% and 6.50% during 2019 and 2020 respectively (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits Not Valued	All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not. The plan pays small benefits (with a present value up to $1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2021. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any

significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). The expected administrative expenses are rounded to the nearest ten thousand.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns considering the plan's current asset allocation and any expected changes during the fiscal year in which the plan year begins, current market conditions and the expectations for future market conditions.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on a table for pension participants believed to have similar characteristics to the plan population with periodic monitoring of observed gains and losses caused by termination patterns different than assumed. Active vested participants who terminate are assumed to commence benefits at their earliest eligible date and receive a 6% per year reduction for benefits commencing before age 65. Because of the lack of substantial early retirement subsidies to terminated vested participants and since the accrued benefits are frozen, the timing of termination and benefit commencement does not have a significant impact on the plan's liability.
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. Participants hired after 1994 receive a 6% per year reduction for benefits commencing before age 65. Those hired before 1995 and electing an annuity

receive a 4% per year reduction for benefits commencing before age 65 (or at age 58 with 30 years of eligibility service, a 3% per year reduction prior to age 60). Because the accrued benefits are frozen and because substantial early retirement subsidies only impact some of the participants reaching retirement eligibility, the timing of retirement and benefit commencement has a diminished impact on the plan's liability.

SCHEDULE SB ATTACHMENTS

Benefit Commencement date for deferred benefits

- Preretirement death benefit

Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value.

- Deferred vested benefit

For active participants who terminate, deferred vested benefits are assumed to commence at earliest retirement age. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement. Deferred vested early commencement factors are not subsidized so the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

Form of payment

Married participants are assumed to elect the 55% J&S with 5-year certain guarantee, and single participants are assumed to elect singe life annuity with 5-year certain guarantee. While actual experience indicates that more participants elect 100% J&S compared to 55% J&S, the selection among 100%, 75%, versus 55% J&S annuity as the form of payment assumption does not have a significant impact on the plan obligation. We did not review the lump sum election assumption, because few active and deferred vested participants have a pre-12/31/1994 accrued benefit which is eligible for the lump sum form of payment. The form of payment assumption is based on an experience review performed in 2017.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed

methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods Since Prior Valuation

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.

The lump sum mortality assumption was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

The assumed return for asset smoothing changed from 7.00% in 2019 to 6.50% in 2020, consistent with the expected return on assets (EROA) assumption under ASC 715. However, the actual assumed return used for both 2019 and 2020 was capped at the third segment rate (reflecting corridors), which changed from 6.11% in 2019 to 5.94% in 2020.

The assumed plan-related expenses added to the target normal cost were changed from $430,000 for the prior valuation to $330,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.

Change in methods since prior valuation

There have been no changes in methods since the prior valuation.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Description of Weighted Average Retirement Age
as of January 1, 2021

See Schedule SB, Part V - Statement of Actuarial Assumptions/Methods for retirement rates. The average retirement age for Line 22 was calculated by determining the average age at retirement for those current active participants expected to reach retirement, based on all current decrements assumed.

Age	Rate of Retirement	Number of Retirements	Number of Remaining Participants	Weighted Average Age

Schedule SB, Part V
Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:	
Applicable month	September
Interest rate basis	Segment rates

	Reflecting Corridors	Not Reflecting Corridors
Interest rates:		
First segment rate	3.32%	2.22%
Second segment rate	4.79%	3.38%
Third segment rate	5.47%	3.92%
Effective interest rate	4.91%	3.52%

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting corridors (interest rate stabilization) are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP, the PBGC 4010 FS and the maximum deductible contribution.

- Assumed return for asset smoothing during 2020[1] 6.50%

[1] The assumed return for asset smoothing is used in the development of the Actuarial Value of Assets (AVA). The assumed return for each year can be no greater than the third segment rate (reflecting corridors). For 2020, the third segment rate was 5.94%.

SCHEDULE SB ATTACHMENTS

Annual rates of increase	
▪ Compensation	N/A
▪ Future Social Security wage bases	N/A
▪ Statutory limits on compensation	N/A
▪ Interest on employee contribution balances	N/A[2]
Plan-related expenses	Plan related expenses are assumed to be the average of actual plan-related expenses net of PBGC premiums in the prior three years, plus the expected PBGC premium for the current year, rounded to the nearest ten thousand. The amount included this year for plan-related administrative expenses is $330,000.

[2] Not applicable as this assumption currently has no impact on liability. The projected employee contribution account balance is expected to be smaller than the career average benefit for all active participants. Terminated non-vested participants who have deferred the refund of employee contributions are assumed to take their balances on the valuation date.

SCHEDULE SB ATTACHMENTS

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	There are no new entrants after the plan freeze date of December 31, 2005.
Mortality	
Healthy	The prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants (based on RP-2006 "Healthy Annuitants" table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019) and non-annuitants (based on RP-2006 "Employees" table without collar or amount adjustments, projected forward with a static projection using Scale MP-2019).
Disabled	Disabled participants are assumed to have the same mortality as healthy participants.
Termination	Rates varying by age:

Percentage leaving during the year		
Attained Age	Males	Females
20	14.7%	21.6%
25	7.4	11.6
30	4.3	6.7

Average age: 62

Participants with deferred benefits are assumed to commence their benefit payments at age 65.

Benefit commencement date:

Preretirement death benefit

Earliest of:

Immediately with 25 years of service

Age 50 with 15 years of service

Age 60 with 10 years of service

Age 65

Deferred vested benefit

Earliest retirement age for active participants who terminate. Age 65 for participants with deferred vested benefits as of the valuation date.

SCHEDULE SB ATTACHMENTS

Disability benefit	Earliest retirement age
Retirement benefit	Upon termination of employment
Form of payment	Participants without a pre-1995 benefit are assumed to elect the normal form of payment: - Single life annuity with 5-year certain guarantee for single participants, and - 55% joint and survivor annuity with 5-year certain guarantee for married participants For participants with a pre-1995 benefit, 25% are assumed to elect a lump sum of their pre-1995 accrued benefit, and 75% are assumed to elect the normal form of payment (same as participants without a pre-1995 benefit described above). Participants are also assumed to elect the normal form of payment on benefits accrued after 12/31/1994. Calculation of Lump Sum: Lump sums were valued using the substitution of annuity form under IRS Regulation 1.430(d)-1(f)(4) without application of generational mortality.
Percent married	For purposes of determining assumed form of payment and for valuing the pre-retirement surviving spouse's benefit, 85% of eligible male participants and 65% of eligible female participants are assumed to be married.
Spouse age	Male spouses are assumed to be three years older than female spouses.
Covered pay	Not applicable. The plan was frozen as of December 31, 2005.
Site Closure Date	None
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.
Timing of future decrements	Retirements, withdrawals, disabilities, and deaths are assumed to occur in the middle of the year.

SCHEDULE SB ATTACHMENTS

Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during plan year (zero since the plan was frozen) plus plan-related expenses expected to be paid from plan assets during plan year, as required by regulations under IRC §430.
Actuarial value of assets	Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.00% and 6.50% during 2019 and 2020 respectively (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.) The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Benefits Not Valued	All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not. The plan pays small benefits (with a present value up to $1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2021. Information on assets, contributions and plan provisions was supplied by the plan sponsor and/or the trustee. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any

significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Plan-related expenses	As required by regulations, plan-related expenses are calculated by estimating the expenses to be paid from the trust during the coming year (including, for example, expected PBGC premiums and actuarial, accounting, legal, administration and trustee fees to be paid from the trust). The expected administrative expenses are rounded to the nearest ten thousand.
Assumed return for asset smoothing	We have relied on the plan's investment consultants' estimate of expected return on assets. We understand that this assumption reflects the plan's investment consultants' estimate of future experience for trust asset returns considering the plan's current asset allocation and any expected changes during the fiscal year in which the plan year begins, current market conditions and the expectations for future market conditions.

Assumptions Rationale – Significant Demographic Assumptions

Healthy Mortality	Assumptions used for funding purposes are as prescribed by IRC §430(h).
Termination	Termination rates were based on a table for pension participants believed to have similar characteristics to the plan population with periodic monitoring of observed gains and losses caused by termination patterns different than assumed. Active vested participants who terminate are assumed to commence benefits at their earliest eligible date and receive a 6% per year reduction for benefits commencing before age 65. Because of the lack of substantial early retirement subsidies to terminated vested participants and since the accrued benefits are frozen, the timing of termination and benefit commencement does not have a significant impact on the plan's liability.
Retirement	Retirement rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed. Participants are assumed to commence benefits immediately upon retirement. Participants hired after 1994 receive a 6% per year reduction for benefits commencing before age 65. Those hired before 1995 and electing an annuity

receive a 4% per year reduction for benefits commencing before age 65 (or at age 58 with 30 years of eligibility service, a 3% per year reduction prior to age 60). Because the accrued benefits are frozen and because substantial early retirement subsidies only impact some of the participants reaching retirement eligibility, the timing of retirement and benefit commencement has a diminished impact on the plan's liability.

SCHEDULE SB ATTACHMENTS

Benefit Commencement date for deferred benefits

- Preretirement death benefit

Surviving spouses are assumed to begin benefits at the earliest permitted commencement date because ERISA requires benefits to start then unless the spouse elects to defer. If the spouse elects to defer, actuarial increases from the earliest commencement date must be given, so that a later commencement date is expected to be of approximately equal value.

- Deferred vested benefit

For active participants who terminate, deferred vested benefits are assumed to commence at earliest retirement age. Deferred vested participants' assumed commencement age is a single age intended to capture the average age at commencement. Deferred vested early commencement factors are not subsidized so the difference between this approach and using assumed commencement rates at multiple ages is not expected to be significant.

Deferred vested participants are assumed to begin benefits at age 65 (or current age if later) because the plan's experience is not considered to be credible, but deferred vested early commencement factors are not subsidized so that the difference between this approach and using assumed commencement rates at earlier ages is not expected to be significant.

Form of payment

Married participants are assumed to elect the 55% J&S with 5-year certain guarantee, and single participants are assumed to elect singe life annuity with 5-year certain guarantee. While actual experience indicates that more participants elect 100% J&S compared to 55% J&S, the selection among 100%, 75%, versus 55% J&S annuity as the form of payment assumption does not have a significant impact on the plan obligation. We did not review the lump sum election assumption, because few active and deferred vested participants have a pre-12/31/1994 accrued benefit which is eligible for the lump sum form of payment. The form of payment assumption is based on an experience review performed in 2017.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed

methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods Since Prior Valuation

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The mortality table used to calculate the funding target was updated to reflect current IRS prescribed assumptions.

The lump sum mortality assumption was updated to reflect current IRS prescribed assumptions.

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

The assumed return for asset smoothing changed from 7.00% in 2019 to 6.50% in 2020, consistent with the expected return on assets (EROA) assumption under ASC 715. However, the actual assumed return used for both 2019 and 2020 was capped at the third segment rate (reflecting corridors), which changed from 6.11% in 2019 to 5.94% in 2020.

The assumed plan-related expenses added to the target normal cost were changed from $430,000 for the prior valuation to $330,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.

Change in methods since prior valuation

There have been no changes in methods since the prior valuation.

Summary of Plan Provisions

Plan Provisions

The plan was originally effective April 1, 1999 and was frozen as of December 31, 2005. It was amended and restated effective January 1, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	All Eligible Employees may participate in the Plan. Eligible Employees are those employed at non-Excluded Units of the Westinghouse Government Services Company, LLC who are either non-represented or represented by a collective bargaining unit that has a written agreement with URS regarding participation in the Plan.
Participation Date	Date of becoming a covered employee.

Definitions

Credited Service	*For the plan year April 1, 1999 through December 31, 1999:* Only post-April 1, 1999 credited service is included, pending the plan merger and corresponding transfer of assets from CBS Corporation representing benefits accrued through March 31, 1999. *For plan years beginning January 1, 2000:* Generally, all service as a contributing participant in the Plan is used to determine pension benefit amounts. Prior to January 1, 1995, all service as an Employee of CBS Corporation was generally included as Credited Service. Service while employed with an Affiliated Entity or Excluded Unit is not included. Service is included while receiving benefits under URS's salary continuance and extension program or short-term or long-term disability plan, or after being determined to be "Totally Disabled", up to a maximum continuous period of two years. No additional credited service is accrued on or after the plan freeze date of December 31, 2005.
Eligibility Service	All Credited Service, plus service that would be credited except that the Employee elects not to contribute to the Plan or is employed by an Affiliated Entity or an Excluded Unit.
Vesting Date	The date the Participant completes five years of Eligibility Service or reaches Normal Retirement Date.
Plan Compensation	Generally, regular compensation paid to a participant inclusive of overtime, bonus and other additional compensation payments, except that only 50% of an annual incentive award payable under any management incentive program is included.
Normal Retirement Date (NRD)	The first day of the month following the Participant's 65th birthday.

Eligibility for Benefits

Normal Retirement	Retirement on Normal Retirement Date
Early Retirement	The first of any month following the date the Participant attains: (i) age 58 with at least 30 years of Eligibility Service or (ii) age 60 with at least 10 years of Eligibility Service.
Pre-retirement Death Benefit	Death while accruing Eligibility Service and after attainment of Early Retirement Eligibility or any of the following:

Age	Eligibility Service
any	25 years or more
60 or older	10 years or more
50 or older	15 years or more

Vested Death Benefit	Death after vesting date and before pre-retirement death benefit eligibility.

Benefits Paid Upon the Following Events

Normal Retirement

Generally, a monthly amount equal to the greater of (a) The Career Accumulation Method and (b) the Flat Rate Method.

(a) Career Accumulation Method: the sum of (i) and (ii)
- (i) the monthly amount accumulated to January 1, 1992
- (ii) 1/12 of 2% of Compensation for each calendar year commencing on or after January 1, 1992 in which an Employee contributed. A minimum of $15 per year of Credited Service applied for 1992, 1993, and 1994 regardless of an Employee's election to contribute to the Plan.

(b) Flat Rate Method: the sum of (i) and (ii)
- (i) $31 for years of Credited Service while contributing to the Plan
- (ii) $13 for years of Credited Service prior to January 1, 1995 in which an Employee was eligible to contribute to the Plan but elected not to contribute.

SCHEDULE SB ATTACHMENTS

Early Retirement

Employees Hired after December 31, 1994:

Determined as for Normal Retirement except that benefits are reduced by ½ percent per month that Early Retirement Date precedes Participant's Normal Retirement Date.

Employees Hired before January 1, 1995:

If a Lump Sum form of payment is elected, the Participant will receive the sum of (i) and (ii), as follows:

(i) A payment equal to the lump sum equivalent of the normal retirement benefit determined as of December 31, 1994. The lump sum equivalent will be calculated assuming benefits begin at Early Retirement Date. Benefits are reduced for early commencement by 1/3 of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by ¼ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday.

(ii) An annuity equal to the difference between (a) the normal retirement benefit (based on total Credited Service) determined as of the Participant's Early Retirement Date and reduced by ½ of 1% for each month that Early Retirement Date precedes Normal Retirement Date, and (b) the normal retirement benefit determined as of December 31, 1994, reduced for early commencement as described in (i) above.

If a Participant has Eligibility Service both before January 1, 1995 and after December 31, 1994, and an annuity form of payment is elected, the Participant's benefit is determined as for normal retirement except that benefits are reduced for early commencement by 1/3 of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by ¼ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday. Further, if the benefit payable at NRD using the Flat Rate Method produces a higher monthly benefit, then the unreduced Flat Rate benefit is payable upon Early Retirement.

Early Retirement Supplements

For Employees hired prior to January 1, 1995 who retire early and elect an annuity form of payment, a temporary monthly supplement is payable until age 62 equal to $10 per year of Credited Service.

Deferred retirement

An active participant working beyond NRD may defer retirement after age 65 and continue to accrue benefits until his deferred retirement date.

SCHEDULE SB ATTACHMENTS

Vested termination	The benefit payable to a terminated vested Participant is the greater of the benefit determined as for normal retirement and an annuity that is the actuarial equivalent of the Participant's contributions with interest. A Participant who attains at least 30 years of Eligibility Service may elect to receive benefits beginning at age 58, and a Participant who attains at least 10 years of Eligibility Service may elect to receive benefits beginning at age 60. The benefits will be reduced by ½ of 1% for each month that benefit commencement precedes Normal Retirement Date.
Non-vested termination	A Participant who terminates employment non-vested receives a refund of contributions plus interest; or, if over $5,000, an actuarially equivalent annuity beginning any time up to Normal Retirement Date.
Pre-retirement Death	Immediate benefit payable to Participant's spouse equal to 55% of the applicable amount below, adjusted for form assuming that the participant had elected the Joint and 55% form of payment: If the participant had fewer than 30 years of service, the amount is the greatest of the participant's a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method, reduced by 1/3 of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 20% b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method c. Normal Retirement Benefit determined as of the participant's date of death, reduced by ½ of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42%. If the participant had 30 or more years of service, the amount is the greatest of the participant's a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method c. Normal Retirement Benefit determined as of the participant's date of death, reduced by ½ of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42% If the surviving spouse of a Participant who has Eligibility Service both before January 1, 1995 and after December 31, 1994 elects to receive the entire benefit as a monthly annuity, then (a) and (b) are changed to be based on the Normal Retirement Benefit determined as of the participant's date of death, not as of December 31, 1994 (regardless of whether the participant had 30 years of service). Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

SCHEDULE SB ATTACHMENTS

Vested death	Deferred benefit, payable to Participant's spouse at what would have been the employee's earliest benefit commencement date, equal to 55% of the Termination Benefit, assuming that the Joint and 55% form of payment had been elected. Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

Other Plan Provisions

Forms of payment

Normal Form of Payment

- Married Participant: 55% surviving spouse annuity with 60 payments guaranteed. The form reduction is 7.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 15 years.
- Unmarried Participant: Single life annuity with 60 payments guaranteed.

Optional Forms of Payment

- Single life annuity with 60 payments guaranteed.
- Joint and 100% survivor annuity with 60 payments guaranteed – The optional form reduction is 13.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 27 years.
- Joint and 75% survivor annuity with 60 payments guaranteed – The optional form reduction is 10.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 21 years.
- Joint and 55% survivor annuity with 60 payments guaranteed – The optional form reduction is 7.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 15 years.
- Lump sum, based upon the benefit accrued as of 12/31/1994 (any additional benefit accruals are payable in any of the other optional benefit forms). If the lump sum value of the benefit accrued after 12/31/1994 is less than $10,000, a participant may receive the lump sum value of his entire benefit.

Pension Increases	None.
Plan Participants' Contributions	Not applicable since the plan is frozen.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension cost or in determining minimum and maximum contributions. Willis Towers Watson is not aware of any future plan changes which are required to be reflected.

Changes in Benefits Valued Since Prior Year

There have been no changes to benefits valued since the prior year.

Substantive Commitment

No substantive commitments other than the above plan provisions have been included in this valuation.

Schedule SB, Part V
Summary of Plan Provisions

Plan Provisions

The plan was originally effective April 1, 1999 and was frozen as of December 31, 2005. It was amended and restated effective January 1, 2012. This valuation accounts for the plan as amended through the valuation date.

Covered Employees	All Eligible Employees may participate in the Plan. Eligible Employees are those employed at non-Excluded Units of the Westinghouse Government Services Company, LLC who are either non-represented or represented by a collective bargaining unit that has a written agreement with URS regarding participation in the Plan.
Participation Date	Date of becoming a covered employee.

Definitions

Credited Service	*For the plan year April 1, 1999 through December 31, 1999:* Only post-April 1, 1999 credited service is included, pending the plan merger and corresponding transfer of assets from CBS Corporation representing benefits accrued through March 31, 1999. *For plan years beginning January 1, 2000:* Generally, all service as a contributing participant in the Plan is used to determine pension benefit amounts. Prior to January 1, 1995, all service as an Employee of CBS Corporation was generally included as Credited Service. Service while employed with an Affiliated Entity or Excluded Unit is not included. Service is included while receiving benefits under URS's salary continuance and extension program or short-term or long-term disability plan, or after being determined to be "Totally Disabled", up to a maximum continuous period of two years. No additional credited service is accrued on or after the plan freeze date of December 31, 2005.
Eligibility Service	All Credited Service, plus service that would be credited except that the Employee elects not to contribute to the Plan or is employed by an Affiliated Entity or an Excluded Unit.
Vesting Date	The date the Participant completes five years of Eligibility Service or reaches Normal Retirement Date.
Plan Compensation	Generally, regular compensation paid to a participant inclusive of overtime, bonus and other additional compensation payments, except that only 50% of an annual incentive award payable under any management incentive program is included.
Normal Retirement Date (NRD)	The first day of the month following the Participant's 65th birthday.

SCHEDULE SB ATTACHMENTS

Eligibility for Benefits

Normal Retirement	Retirement on Normal Retirement Date
Early Retirement	The first of any month following the date the Participant attains: (i) age 58 with at least 30 years of Eligibility Service or (ii) age 60 with at least 10 years of Eligibility Service.
Pre-retirement Death Benefit	Death while accruing Eligibility Service and after attainment of Early Retirement Eligibility or any of the following:

Age	Eligibility Service
any	25 years or more
60 or older	10 years or more
50 or older	15 years or more

Vested Death Benefit	Death after vesting date and before pre-retirement death benefit eligibility.

Benefits Paid Upon the Following Events

Normal Retirement

Generally, a monthly amount equal to the greater of (a) The Career Accumulation Method and (b) the Flat Rate Method.

(a) Career Accumulation Method: the sum of (i) and (ii)
- (i) the monthly amount accumulated to January 1, 1992
- (ii) 1/12 of 2% of Compensation for each calendar year commencing on or after January 1, 1992 in which an Employee contributed. A minimum of $15 per year of Credited Service applied for 1992, 1993, and 1994 regardless of an Employee's election to contribute to the Plan.

(b) Flat Rate Method: the sum of (i) and (ii)
- (i) $31 for years of Credited Service while contributing to the Plan
- (ii) $13 for years of Credited Service prior to January 1, 1995 in which an Employee was eligible to contribute to the Plan but elected not to contribute.

SCHEDULE SB ATTACHMENTS

Early Retirement

Employees Hired after December 31, 1994:

Determined as for Normal Retirement except that benefits are reduced by ½ percent per month that Early Retirement Date precedes Participant's Normal Retirement Date.

Employees Hired before January 1, 1995:

If a Lump Sum form of payment is elected, the Participant will receive the sum of (i) and (ii), as follows:

(i) A payment equal to the lump sum equivalent of the normal retirement benefit determined as of December 31, 1994. The lump sum equivalent will be calculated assuming benefits begin at Early Retirement Date. Benefits are reduced for early commencement by 1/3 of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by ¼ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday.

(ii) An annuity equal to the difference between (a) the normal retirement benefit (based on total Credited Service) determined as of the Participant's Early Retirement Date and reduced by ½ of 1% for each month that Early Retirement Date precedes Normal Retirement Date, and (b) the normal retirement benefit determined as of December 31, 1994, reduced for early commencement as described in (i) above.

If a Participant has Eligibility Service both before January 1, 1995 and after December 31, 1994, and an annuity form of payment is elected, the Participant's benefit is determined as for normal retirement except that benefits are reduced for early commencement by 1/3 of 1% for each month that the Early Retirement Date precedes Normal Retirement Date, or, if the Participant has 30 or more years of Eligibility Service, by ¼ of 1% for each month that Early Retirement Date precedes the first of the month following the Participant's 60th birthday. Further, if the benefit payable at NRD using the Flat Rate Method produces a higher monthly benefit, then the unreduced Flat Rate benefit is payable upon Early Retirement.

Early Retirement Supplements

For Employees hired prior to January 1, 1995 who retire early and elect an annuity form of payment, a temporary monthly supplement is payable until age 62 equal to $10 per year of Credited Service.

Deferred retirement

An active participant working beyond NRD may defer retirement after age 65 and continue to accrue benefits until his deferred retirement date.

SCHEDULE SB ATTACHMENTS

Vested termination	The benefit payable to a terminated vested Participant is the greater of the benefit determined as for normal retirement and an annuity that is the actuarial equivalent of the Participant's contributions with interest. A Participant who attains at least 30 years of Eligibility Service may elect to receive benefits beginning at age 58, and a Participant who attains at least 10 years of Eligibility Service may elect to receive benefits beginning at age 60. The benefits will be reduced by ½ of 1% for each month that benefit commencement precedes Normal Retirement Date.
Non-vested termination	A Participant who terminates employment non-vested receives a refund of contributions plus interest; or, if over $5,000, an actuarially equivalent annuity beginning any time up to Normal Retirement Date.
Pre-retirement Death	Immediate benefit payable to Participant's spouse equal to 55% of the applicable amount below, adjusted for form assuming that the participant had elected the Joint and 55% form of payment: If the participant had fewer than 30 years of service, the amount is the greatest of the participant's a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method, reduced by 1/3 of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 20% b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method c. Normal Retirement Benefit determined as of the participant's date of death, reduced by ½ of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42%. If the participant had 30 or more years of service, the amount is the greatest of the participant's a. Normal Retirement Benefit determined as of December 31, 1994 using the Career Accumulation Method b. Normal Retirement Benefit determined as of December 31, 1994 using the Flat Rate Method c. Normal Retirement Benefit determined as of the participant's date of death, reduced by ½ of 1% for each month that the date of death precedes Normal Retirement Date up to a maximum reduction of 42% If the surviving spouse of a Participant who has Eligibility Service both before January 1, 1995 and after December 31, 1994 elects to receive the entire benefit as a monthly annuity, then (a) and (b) are changed to be based on the Normal Retirement Benefit determined as of the participant's date of death, not as of December 31, 1994 (regardless of whether the participant had 30 years of service). Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

Vested death	Deferred benefit, payable to Participant's spouse at what would have been the employee's earliest benefit commencement date, equal to 55% of the Termination Benefit, assuming that the Joint and 55% form of payment had been elected. Payments are guaranteed for 60 months and payable to the spouse's beneficiary if necessary.

Other Plan Provisions

Forms of payment

Normal Form of Payment

- Married Participant: 55% surviving spouse annuity with 60 payments guaranteed. The form reduction is 7.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 15 years.
- Unmarried Participant: Single life annuity with 60 payments guaranteed.

Optional Forms of Payment

- Single life annuity with 60 payments guaranteed.
- Joint and 100% survivor annuity with 60 payments guaranteed – The optional form reduction is 13.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 27 years.
- Joint and 75% survivor annuity with 60 payments guaranteed – The optional form reduction is 10.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 21 years.
- Joint and 55% survivor annuity with 60 payments guaranteed – The optional form reduction is 7.5% plus 0.5% for each year the joint annuitant is younger than the participant (or minus 0.5% for each year the joint annuitant is older than the participant) up to 15 years.
- Lump sum, based upon the benefit accrued as of 12/31/1994 (any additional benefit accruals are payable in any of the other optional benefit forms). If the lump sum value of the benefit accrued after 12/31/1994 is less than $10,000, a participant may receive the lump sum value of his entire benefit.

SCHEDULE SB ATTACHMENTS

Pension Increases	None.
Plan Participants' Contributions	Not applicable since the plan is frozen.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Future Plan Changes

No future plan changes were recognized in determining pension cost or in determining minimum and maximum contributions. Willis Towers Watson is not aware of any future plan changes which are required to be reflected.

Changes in Benefits Valued Since Prior Year

There have been no changes to benefits valued since the prior year.

Substantive Commitment

No substantive commitments other than the above plan provisions have been included in this valuation.

Change in Actuarial Assumptions

Other than the prescribed changes in the discount rate and mortality, the following other changes in assumptions were made as part of this valuation:

The assumed return for asset smoothing changed from 7.00% in 2019 to 6.50% in 2020, consistent with the expected return on assets (EROA) assumption under ASC 715. However, the actual assumed return used for both 2019 and 2020 was capped at the third segment rate (reflecting corridors), which changed from 6.11% in 2019 to 5.94% in 2020.

The assumed plan-related expenses added to the target normal cost were changed from $430,000 for the prior valuation to $330,000 for the current valuation to account for lower expected expenses to be paid from the trust. The amount has been updated from the prior year, however the process for estimating plan-related expenses has not changed.
