Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial assumptions for January 1, 2021 funding valuation**

Discount rate sponsor elections		
• Segment rates or full yield curve	Segment	
• Look-back months	4	
	Stabilized	Nonstabilized
• First 5 years	3.32%	2.22%
• Next 15 years	4.79%	3.38%
• Over 20 years	5.47%	3.92%
	Rationale: Given the segment rate and look-back election made by the plan sponsor, the stabilized and nonstabilized rates are prescribed by IRC Section 430 and relevant regulations.	
Mortality sponsor elections		
• Healthy and disabled participants	<p>Section 430(h) (3) prescribed separate static annuitant and non-annuitant mortality tables. These tables are based on the RP-2006 mortality table with IRS-developed adjustments and projected with mortality improvement scale MP-2019.</p> <p>Rationale: Given the mortality election made by the plan sponsor, the mortality rates are prescribed by IRC Section 430 and relevant regulations.</p>	
417(e) lump sums	<p>Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality.</p> <p>Rationale: These are the IRC Section 430 prescribed rates and IRC Section 417(e) mortality tables. The valuation methodology is prescribed by the IRS.</p>

• Flat-dollar benefit increases	N/A	
• Social Security wage base	N/A

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial methods for funding****Asset methods**

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break-in-service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum funding methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Weighted Average Retirement Age: 62

The weighted average retirement age is the total for column E divided by the total for column D, rounded to the nearest integral age. It should be noted that while only integral values are shown in the table, the full content of each cell, including decimal portions, is used in the calculations. This calculation has been done using ultimate rates for a participant with less than 30 years of service at time of retirement.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial assumptions for January 1, 2021 funding valuation**

Discount rate sponsor elections		
• Segment rates or full yield curve	Segment	
• Look-back months	4

• First 5 years	3.32%	2.22%
• Next 15 years	4.79%	3.38%
• Over 20 years	5.47%	3.92%
	Rationale: Given the segment rate and look-back election made by the plan sponsor, the stabilized and nonstabilized rates are prescribed by IRC Section 430 and relevant regulations.	
Mortality sponsor elections		
• Healthy and disabled participants	Section 430(h) (3) prescribed separate static annuitant and non-annuitant mortality tables. These tables are based on the RP-2006 mortality table with IRS-developed adjustments and projected with mortality improvement scale MP-2019. Rationale: Given the mortality election made by the plan sponsor, the mortality rates are prescribed by IRC Section 430 and relevant regulations.	
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality. Rationale: These are the IRC Section 430 prescribed rates and IRC Section 417(e) mortality tables. The valuation methodology is prescribed by the IRS.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial methods for funding****Asset methods**

The asset valuation method is the fair market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break-in-service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

Minimum funding methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Summary of Plan Provisions**Summary of major plan provisions**

Effective date and plan year	Original plan: January 1, 1994 Restated plan: January 1, 2012 Plan year: Calendar year
Status of the plan	The plan is frozen as of December 31, 2006.
Significant events that occurred during the year	To the best of our knowledge, there were no significant events during the year.
Definitions	
• Eligibility	Each non-union employee who was a Participant on October 31, 1992 or as of the effective date shall become a participant as of that date. Any other non-union employee becomes a participant on their employment date or transfer date. Former Employees of Atlas Marine Services became Participants on January 1, 2002. No new participants are allowed in the plan after December 31, 2006.
• Employee contributions	None
• Service	Continuous employment with the corporation (including service with Abex Corporation). Effective December 31, 2006, service considered for benefit amount purposes only is frozen as of that date. A participant will continue to earn service for benefit eligibility purposes only after December 31, 2006.
• Compensation	Prior to January 1, 1994 – Total cash remuneration, including overtime, Commissions and incentive compensation, but excluding other forms of Irregular payments. Post January 1, 1994 - W-2.
• Average annual compensation	Participant's highest average compensation during any 60 consecutive months during the last 120 months. Effective December 31, 2006, a participant's average annual compensation may not include compensation earned after December 31, 2006.
• Actuarial equivalence	Interest: 7.0% per annum Mortality: 1971 Group Annuity Mortality Table for males with a two year setback.
• Lump sum actuarial equivalence	Interest: Segmented interest rates for the month preceding the valuation date. Mortality: Applicable mortality for lump sum payments under PPA as of the valuation date.
Normal retirement	
• Eligibility	Participants are eligible for Normal Retirement on their 65th birthday.
• Benefit	Benefit payable for life of the participant equal to (a) + (b) but not less than (c) or (d): (a) 1.05% of Average Annual Compensation times Years of Credited Service not in excess of 30 years. (b) 0.45% of Average Annual Compensation in excess of Covered Compensation times years of Credited Service to a maximum of 30 years.

Schedule SB, Part V — Summary of Plan Provisions

(c) The participants accrued benefit under the prior plan in effect December 31, 1989.

(d) The participants accrued benefit under the Prior Plan Formula in effect December 31, 1995.

Participants who are due benefits from Abex Corporation, ASEA Hagglunds, Inc., and ABB Power Generation, Inc. will have the above benefit offset by their accrued benefit under these plans to yield a net benefit due.

Benefit amounts are frozen as of December 31, 2006.

Early retirement

- **Eligibility** Participants are eligible for Early Retirement after attainment of age 55 and completion of 10 years of continuous service. Certain grandfathered participants are eligible to retire after age plus service equals or exceeds 75.
- **Benefit** The above benefit reduced by 1/3 of 1% for each month the benefit commencement date precedes Normal Retirement.
However, for a participant who retires with more than 30 years of service, the benefit is reduced by 1/3 of 1% for each month the benefit commencement date precedes the participants 62nd birthday. (Certain grandfathered participants get their reduction calculated from their 60th birthday.)
Effective May 1, 2017, a participant who remains in employment may elect to receive an unreduced, in-service distribution upon attainment of age 62.

Deferred vested

- **Eligibility** A participant who separates from service before Early Retirement Age with a 100% vested benefit is eligible for Deferred vested retirement.
- **Benefit** The above Normal Retirement benefit commencing on the date the participant would have attained Normal Retirement Age; provided, however, if the participant separates with at least 10 years of service, the benefit may commence at any time following the attainment of age 60 or when the Participant's age plus service equals 75 or more (but not earlier than 55). If a participant elects to commence the benefit before Normal Retirement Age, the Normal Retirement benefit will be reduced by ½ of 1% for each month the commencement date precedes the Normal Retirement Date.
Effective December 31, 2006 all benefits accrued as of that date were 100% vested on December 31, 2006.

Disability

- **Eligibility** Termination of employment as the result of total disability.
- **Benefit** A participant who is disabled prior to Normal Retirement shall receive a benefit at Normal Retirement assuming the participant continued to earn Credited Service at the rate of compensation in effect on the date of disability through that period, but no later than December 31, 2006.

Pre-retirement death

- **Eligibility** Death before retirement benefits commencement with a surviving spouse.
- **Benefit prior to early retirement** The eligible surviving spouse of a vested participant will receive benefits payable at the participant's earliest retirement date or immediately if the participant was eligible for retirement on the date of death. The pension will equal one half of the pension due the participant had he or she terminated

• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2021, the limit is \$230,000.

Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated effective January 1, 2012, are included in this valuation:

- **Most recent plan amendments included:** All provisions incorporated in the 2012 restatement are included because it was adopted by the valuation date and is effective by the end of the plan year. The most recent plan amendment, effective May 1, 2017, is included as it was adopted prior to the valuation date.
- **Plan amendments excluded:** None
- **Late retirement increases:**
 - *Active participants:* Current active participants over normal retirement age are valued including the late retirement actuarial increase.
 - *Deferred vested participants:* Current deferred vested participants are assumed to retire at Normal Retirement.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-

and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan provisions specific to funding**Additional benefits included or excluded**

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.
- **IRC Section 415(b) benefit limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.

Plan provision changes since prior valuation

Mortality and interest for lump sum actuarial equivalence were updated from 2020 to 2021.
