Independent Auditor's Report

To the SPX Retirement and

Patterson-Kelley Hourly Employees Pension Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit for the 2021 Financial Statements

We have performed an audit of the financial statements of Patterson-Kelley Hourly Employees Pension Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statement of net assets available for benefits as of December 31, 2021 and the related statement of changes in net assets available for benefits for the year then ended and the related notes to the financial statements (2021 financial statements).

Management, having determined it is permissible in the circumstances, has elected to have the audit of the Plan's 2021 financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audit need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained a certification from a qualified institution as of December 31, 2021 and for the year then ended stating that the certified investment information, as described in Note 3 to the financial statements, is complete and accurate.

Opinion on the 2021 Financial Statements

In our opinion, based on our audit and on the procedures performed as described in the *Auditor's Responsibilities for the Audit of the 2021 Financial Statements* section:

- The amounts and disclosures in the accompanying 2021 financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- The information in the accompanying 2021 financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion on the 2021 Financial Statements

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the 2021 Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Patterson-Kelley Hourly Employees Pension Plan

Responsibilities of Management for the 2021 Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are issued or available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the Plan; and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or that may become due to such participants.

Auditor's Responsibilities for the Audit of the 2021 Financial Statements

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audit for the 2021 Financial Statements* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audit did not extend to the certified investment information except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the 2021 financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Auditor's Report on the 2020 Financial Statements

We were engaged to audit the 2020 financial statements of the Plan. As permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information certified by a qualified institution. In our report dated September 27, 2021, we indicated that, (a) because of the significance of the information that we did not audit, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion, and, accordingly, we did not express an opinion on the Plan's 2020 financial statements, and (b) the form and content of the information included in the 2020 financial statements, other than that derived from the certified information, were presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Note 1 - Plan Description

The following description of Patterson-Kelley Hourly Employees Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan that provides for retirement, death, and disability benefits for all eligible employees of Patterson-Kelley, LLC (a subsidiary of SPX Corporation, the "Company"). The Plan was originally established for employees covered under the Local Lodge 397 Pension Agreement (the "Lodge 397 participants"). The Plan also provides for pension benefits for former participants of Patterson-Kelley's Administrative Employees Plan ("Administrative participants"). Effective at various dates through December 31, 2008, accrued benefits for all participants were frozen. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

On August 15, 2022, SPX Corporation implemented a reorganization of its corporate legal structure by executing a tax-free merger of SPX Corporation with and into SPX Merger, LLC, a newly-formed Delaware limited liability company that is a subsidiary of a newly-formed Delaware corporation, SPX Technologies, Inc. (“SPX Technologies”). As a result of the transaction, SPX Technologies became the holding company for the SPX group of companies, and is now the publicly traded entity. In addition, SPX Enterprises, LLC (a subsidiary of SPX Technologies, Inc.) assumed sponsorship of the Plan.

Pension Benefits

The Plan provides for payment of normal retirement, early retirement, disability retirement, and death benefits to its participants, as calculated under the provisions of the Plan. Accrued benefits for Lodge 397 participants are calculated based on years of service multiplied by the applicable monthly benefit rate, as defined in the plan agreement. Accrued benefits for Administrative participants are calculated based upon the participants' compensation and years of service, using provisions defined in the plan agreement.

In general, a participant with five years of credited service is fully vested in their benefit.

Funding

Contributions are made by the Company in actuarially determined amounts. The Company's policy is to make contributions necessary to satisfy ERISA funding standards. There were no required contributions in 2021 and 2020.

Party-in-interest Transactions

Certain plan assets are in investment funds managed by JPMorgan Chase Bank, N.A. ("JPMorgan") or its affiliates. JPMorgan is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions, as defined under ERISA guidelines.

Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation

The fair value of the Plan's interest in the SPX Corporation Master Trust (the "Master Trust") is based on the fair value of the Plan's individual interest in the underlying investments of the trust and allocated investment income and expenses based on the actual investments. The Master Trust investments are stated at fair value except as noted below. The insurance contracts are valued at contract value. Contract value represents deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees.

The common collective trusts and partnership are valued at net asset value per share (NAV) (or its equivalent) of the funds, which is based on the fair value of the funds' underlying assets. There are no redemption restrictions or unfunded commitments on these investments. The mutual funds and government securities are valued using quoted market prices and/or other market data for the same or comparable instruments and transactions in establishing the prices, discounted cash flow models, and other pricing models. These models are primarily industry-standard models that consider various assumptions, including time value and yield curve, as well as other relevant economic measures. The short-term investment, which consists of a money market mutual fund, is valued at fair value based on quoted market prices. See Note 4 for additional information.

Benefit Payments

Benefits are recorded when paid.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable, under the Plan's provisions, to the service employees have rendered. These include benefits expected to be paid to the following:

(a) Retired or terminated employees or their beneficiaries

(b) Beneficiaries of employees who have died

(c) Present employees or their beneficiaries

Benefits are calculated based on the specific provisions outlined in the plan agreement.

Actuarial Assumptions

The actuarial present value of accumulated plan benefits is determined by a third-party actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2020 are summarized as follows:

Actuarial cost method	Traditional unit credit method
Assumed rate of return	2.50 percent
Mortality basis	Pri-2012 tables with sex distinct rates and no collar adjustment, projected generationally from the base year of 2012 using Scale MP-2020
Retirement age	30 percent at age 65, increasing to 100 percent at age 68 for clerical and nonclerical employees

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 2 - Summary of Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties

Contributions to the Plan and the accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the financial statements.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 6, 2022, the date the financial statements were available to be issued.

Note 3 - Unaudited Information

JPMorgan Chase Bank, N.A. (the "Trustee") holds the Master Trust investments and executes all investment transactions. The investment balances and related investment results included in the accompanying financial statements, including Master Trust information summarized in Note 4, are based solely on information certified by the Trustee.

Note 4 - Investments

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan and other related benefit plans. Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based on their pro rata share in the investments of the Master Trust.

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the valuation techniques and inputs used to measure fair value.

Level 1

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Master Trust has the ability to access.

Level 2

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

In instances whereby inputs used to measure fair value fall into different levels of the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Master Trust's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

[1] This class represents investments in actively managed common collective trust funds that invest in a variety of fixed-income investments, which may include corporate bonds, both U.S. and non-U.S. municipal securities, interest rate swaps, options, and futures.

[2] This class represents investments in actively managed common collective trust funds that invest primarily in equity securities, which may include common stocks, options, and futures.

[3] This class represents investments in private equity funds related primarily to venture capital.

The investment income for the Master Trust for the years ended December 31, 2021 and 2020 is as follows:

	Master Trust	
	2021	2020
Net realized and unrealized gains on investments	$ 1,318,937	$ 37,675,336
Interest and dividends	2,130,599	1,464,159
Total investment income	$ 3,449,536	$ 39,139,495

Note 5 - Derivative Financial Information

The Master Trust invests trust assets in derivative securities. The derivatives are highly liquid exchange-traded fixed-income futures securities. These contracts involve elements of market risk in excess of amounts recognized in the statements of net assets available for benefits and changes in net assets available for benefits; however, the credit risk associated with these contracts is considered minimal, as they are traded on organized exchanges and settled daily. The use of these derivatives securities is for gaining market exposure to the U.S. Treasury bond market.

There is no collateral held by the Master Trust in connection with the derivative agreements.

The notional amount represents the contract amount, not the amount at risk. The notional amount of futures contracts was approximately $55,000,000 and $70,000,000 at December 31, 2021 and 2020, respectively. Gross assets and gross liabilities associated with the futures contracts were approximately $178,000 and $300,000 respectively, at December 31, 2021. Gross assets and gross liabilities associated with the futures contracts were approximately $110,000 and $128,000, respectively, at December 31, 2020. Derivatives are presented on a net basis and are included in receivables in Note 4. Net realized and unrealized gains (losses) related to futures were approximately ($1,747,000) and $1,011,000 for the years ended December 31, 2021 and 2020, respectively. The net gains (losses) are recorded in the Master Trust investment income for the years ended December 31, 2021 and 2020.

Note 6 - Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Willis Towers Watson. The calculation of the actuarial present value of accumulated plan benefits attributable to participants in the Plan, which was made as of December 31, 2020, is as follows:

Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving benefit payments	$	4,926,268
Other vested participants		1,880,302
Total vested benefits		6,806,570
Nonvested benefits		30,990
Total actuarial present value of accumulated plan benefits	$	6,837,560

A summary of significant changes in the actuarial present value of accumulated plan benefits during the year ended December 31, 2020 is as follows:

Actuarial present value of accumulated plan benefits - Beginning of year	$	6,400,070
(Decrease) increase during the year attributable to:		
Actuarial losses		158,497
Interest due to the decrease in discount period		227,792
Benefits paid		(651,240)
Changes in actuarial assumptions		702,441
Net increase		437,490
Actuarial present value of accumulated plan benefits - End of year	$	6,837,560

For the year ended December 31, 2020, the change in actuarial and other assumptions was primarily due to the changes in the mortality improvement scale from MP-2019 to MP-2020, and the discount rate from 3.75 to 2.50 percent.

Note 7 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Note 8 - Subsequent Event

As mentioned in Note 2, the Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Through the date of this report, the plan investments have incurred a decline in fair value driven by fluctuations in global markets. The extent of this impact on the statements of net assets available for benefits and the statements of changes in net assets available for benefits cannot be determined at this time.

Plan-related expenses

The amount included for this year for plan-related expenses is $140,000. This amount is based on projected non-investment fees for the current year including the expected PBGC premiums due in the current plan year.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

Form of payment and benefit commencement date

Active participants (retirement and termination decrements)

- Clerical

80% of participants elect lump sum immediately. The remaining 20% elect an annuity at age 63, if not early retirement eligible at time of decrement, or immediately, if early retirement eligible at time of decrement: life annuity for single participants and 40% of married participants, 50% J&S for 60% of married participants.

■ Non-Clerical	Life annuity for single participants and 40% of married participants, 50% J&S for 60% of married participants. Payments commence at age 63, if not early retirement eligible at time of decrement, or immediately, if early retirement eligible at time of decrement.

Deferred inactive participants (other than deferred beneficiaries)

■ All	Normal form of payment for unmarried participants commencing at age 63.
Percent married	75%. Used to value pre-retirement surviving spouse benefits and in determining the optional forms expected to be elected at commencement.
Spouse age	The female spouse is assumed to be two years younger than the male spouse.
Late retirement adjustments	Retroactive benefit payments due to deferred vested participants who have surpassed their applicable normal retirement date are estimated for valuation purposes by applying an actuarial adjustment (using the plan's definition of actuarial equivalence) to the underlying deferred benefit for the period after the later of termination and suspension of benefits.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits as required by regulations under IRC §430.
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

SCHEDULE SB ATTACHMENTS

Decrement timing

The approach used is called rounded middle of year (rounded MOY) decrement timing. Most events are assumed to occur at the middle of year during which the eligibility condition will be met or the start/end date will occur. For death and disability decrements, the rate applied is based on the participant's rounded age (nearest integer age) at the beginning of the year, to align with the methodology generally used to create those rate tables. For retirement and withdrawal decrements: the age is generally the participant's rounded age at the middle of the year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the 12 and 24 months preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the plan year).

The asset method described above was first elected on January 1, 2020. The fresh-start approach was elected as part of the asset method and therefore the actuarial value of assets as of January 1, 2020 is equal to the market value of assets, including present value of receivables.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

The plan sponsor and plan administrator furnished participant data as of 1/1/2021. Information on assets, contributions and plan provisions were also supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The American Rescue Plan Act (ARPA) of 2021 was enacted in March, 2021. ARPA revises PPA's interest rate stabilization provisions. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions effective with the 2021 plan year and that election is reflected in this report.

ARPA also revises PPA's interest rate stabilization provisions for IRC §436 (benefit restriction) purposes. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions for §436 purposes effective with the 2021 plan year and that election is reflected in this report.

The mortality table calculate the funding target was updated to include one additional year of projected mortality improvement as required by guidance issued by IRS under IRC §430.

Change in methods since prior valuation

The American Rescue Plan Act (ARPA) of 2021 was enacted in March, 2021. ARPA replaces PPA's 7-year shortfall amortization installments (SAIs), with a "fresh start" 15-year amortization. (Note that waiver amortization bases, if any, are not affected). The plan sponsor elected to adopt ARPA's 15-year amortization provisions effective with the 2021 plan year and that election is reflected in this report.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Plan-related expenses

The amount included for this year for plan-related expenses is $140,000. This amount is based on projected non-investment fees for the current year including the expected PBGC premiums due in the current plan year.

As permitted by law, rates reflecting stabilization are used to determine the funding target and target normal cost, and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Rates not reflecting stabilization are used to determine PBGC variable rate premiums if the alternative method is used, and are used to determine the PBGC FTAP and the PBGC 4010 FS.

Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Changes in Assumptions and Methods

Change in assumptions since prior valuation

The segment interest rates used to calculate the funding target were updated to the current valuation date as required by IRC §430.

The American Rescue Plan Act (ARPA) of 2021 was enacted in March, 2021. ARPA revises PPA's interest rate stabilization provisions. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions effective with the 2021 plan year and that election is reflected in this report.

ARPA also revises PPA's interest rate stabilization provisions for IRC §436 (benefit restriction) purposes. The plan sponsor elected to adopt ARPA's interest rate stabilization provisions for §436 purposes effective with the 2021 plan year and that election is reflected in this report.

The mortality table calculate the funding target was updated to include one additional year of projected mortality improvement as required by guidance issued by IRS under IRC §430.

Change in methods since prior valuation

The American Rescue Plan Act (ARPA) of 2021 was enacted in March, 2021. ARPA replaces PPA's 7-year shortfall amortization installments (SAIs), with a "fresh start" 15-year amortization. (Note that waiver amortization bases, if any, are not affected). The plan sponsor elected to adopt ARPA's 15-year amortization provisions effective with the 2021 plan year and that election is reflected in this report.
