Demographic and Other Assumptions

Mortality	Separate IRS-prescribed annuitant and non-annuitant tables with “static” projection of assumed mortality improvements based on the RP/MP-2014 Society of Actuaries study and subsequent updates (including, for 2021 plan years, the use of the MP-2020 mortality improvement scale).
Termination	N/A
Disability	N/A
Benefit commencement	Age 65
Form of payment	100% of benefit payable as a life annuity. 0% is assumed to elect another optional form under the plan.
Percentage married	100% of males and females are assumed to be married
Spouse age	Wives three years younger than husbands
Covered pay	Not applicable
Administrative expense	Set equal to allocated actual plan-related administrative expense paid from the trust in the prior year (adjusted for rounding). Plan-related expenses of \$8,000 are assumed during 2022.

Actuarial Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during the plan year plus plan-related administrative expenses expected to be paid from plan assets during the plan year
Actuarial value of assets for determining minimum required contributions	Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings. The average asset value must be within 10% of fair value, including contributions receivable. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These results produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA’s smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Charter Communications and is not aware of any significant benefits required to be valued that were not.

Change in assumptions and methods since prior valuation The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of January 2021 to January 2022.

The mortality table used to calculate the funding target and target normal cost was updated to use the MP-2020 projection scale as specified in the regulations under §1.430(h)(3)-1.

Based on trust expense information provided by Charter Communications, the administrative expense load to target normal cost was updated to better reflect plan-related administrative expenses expected to be paid from the trust during 2022.

Assumptions Rationale - Significant Economic Assumptions for Contributions

Discount rate The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Assumptions Rationale - Significant Demographic Assumptions for Contributions

Healthy Mortality Assumptions used for funding purposes are as prescribed by IRC §430(h).

Disabled Mortality Assumptions used for funding purposes are as prescribed by IRC §430(h).

Sources of Data and Other Information

Charter's third-party administrator, Fidelity, furnished participant data as of 1/1/2022. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with Charter, the following assumptions were made for missing or apparently inconsistent data elements.

Beneficiaries missing benefit information are assumed to have benefit according to prior Joint & Survivor percentage and benefit amount of deceased retiree.

For beneficiaries reported with a lump sum paid after 1/1/2022, it is assumed to be deferred beneficiaries with accrued benefit amount in reported in data received.

Unknown beneficiaries who have not yet commenced are assumed to be deferred beneficiaries with benefit information from prior year.

New beneficiaries with no gender provided are assumed to be female.

Deceased retirees with possible future benefit payable to a beneficiary are valued as deferred beneficiary.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Source of Prescribed Methods

Funding methods The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are "prescribed methods set by law", as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Other Plan Provisions

Forms of payment

Preretirement death benefits are payable only as described above. Spouse's benefits can be paid as a lump sum. Annual pension benefits will be paid as a life annuity if the participant has no spouse as of the date payments commence. Otherwise, they will be paid in the form of a 50% joint and survivor annuity option or, if the participant elects and his spouse consents, another actuarially equivalent optional form offered by the plan. The optional form consists of a 50%, 75%, or 100% joint and survivor annuity, a life annuity, or lump sum payment. The total amount paid under each optional form shall be at least equal to the member's accumulated contributions. The member's accumulated contributions may be refunded to the participant in a single lump sum.

Conversions to a joint and survivor annuity are based on the ages of the retiree (X) and the beneficiary (Y) as follows:

$$50\% \text{ joint and survivor} \quad .860 + (65-X)(.006) + (Y-X)(.0050)$$

$$75\% \text{ joint and survivor} \quad .805 + (65-X)(.006) + (Y-X)(.0075) \text{ or} \\ .837 + (65-X)(.0046) + (Y-X)(.0075), \text{ whichever results in the larger benefit}$$

$$100\% \text{ joint and survivor} \quad .750 + (65-X)(.006) + (Y-X)(.0100)$$

Conversions to a lump sum are based on PPA 417(e) factors with an annual stability period and a 2-month lookback (November rates). The lump sum is the present value of the accrued benefit.

Conversions to optional payment forms are provided in the plan document.

Maximums on benefits

All benefits payable to a participant or anyone else on his behalf for any calendar year may not exceed the maximum benefit limitations for that year as defined in the plan. The plan provides for increasing the dollar limits automatically as such changes become effective.
