Schedule SB, Part V Statement of Actuarial Assumptions/Methods

Economic Assumptions

Interest rate basis:

- Applicable month January
- Interest rate basis Segment rates from one month preceding valuation date

Interest rates:

	Reflecting Stabilization	Not Reflecting Stabilization
■ First segment rate	4.75%	0.88%
■ Second segment rate	5.18%	2.61%
■ Third segment rate	5.92%	3.27%
■ Effective interest rate	5.47%	2.90%

- **Plan-related expenses** Prior year administrative expenses paid, adjusted for expected deviations and PBGC premiums for the year. For 2022, an amount of \$60,000 was included in the target normal cost.

As permitted by law, rates reflecting stabilization are used to determine the funding target and thus the minimum required contribution under IRC §430 for the plan. Because these assumptions are subject to a corridor based on average interest rates over a 25-year period, they may differ from (and currently are higher than) current market interest rates, and may be inconsistent with other economic assumptions used in the valuation.

Demographic Assumptions

- **Inclusion date** The valuation date coincident with or next following the date on which the employee becomes a participant.

- **New or rehired employees** It was assumed there will be no new or rehired employees.

At-risk assumptions For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 50% Joint and Survivor form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits as required by regulations under IRC §430.

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets The actuarial value of assets is equal to the market value of assets as of the valuation date plus the discounted present value of contributions made after the valuation date for the prior plan year, discounted using the effective interest rate for the prior plan year.

Benefits not valued All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with FHR and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits (with a present value up to \$1,000 in a single lump sum payment). Such lump sums are not explicitly valued; rather such participants' benefits are valued using the benefit choice assumptions described above.

Sources of Data and Other Information

The plan sponsor, through its third party administrator, furnished participant data as of January 1, 2022. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.
