Independent Auditor's Report

Trust Committee and Program Participants
Retirement & Security Program for Employees of NTCA and its Members
Arlington, Virginia

Opinion on the 2022 Financial Statements

We have audited the financial statements of Retirement & Security Program for Employees of NTCA and its Members (the Program), an employee benefit plan subject to the *Employee Retirement Income Security Act of 1974* (ERISA), which comprise the statement of net assets available for benefits as of December 31, 2022, and the related statement of changes in net assets available for benefits for the year then ended, and the related notes to the financial statements (2022 Financial Statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of the Program as of December 31, 2022, and the changes in its net assets available for benefits for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion on the 2022 Financial Statements

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the 2022 Financial Statements section of our report. We are required to be independent of the Program and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the 2022 Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Program's ability to continue as a going concern within one year after the date that these financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the Program's transactions that are presented and disclosed in the financial statements are in conformity with the Program's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the 2022 Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

In our opinion, the information in the accompanying schedule is fairly stated, in all material respects, in relation to the financial statement as a whole, and the form and content is presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Auditor's Report on the 2021 Financial Statements

The 2021 financial statements of the Program were audited by predecessor auditors whose report dated August 15, 2022, expressed an unmodified opinion on those financial statements.

Notes to Financial Statements

1. Description Of The Program

The following description of the Retirement & Security Program for Employees of NTCA and its Members (the Program) provides only general information. Participants should refer to the Program's summary plan description and specifications for a more complete description of the Program's provisions. Copies of these documents are available from the National Telecommunications Cooperative Association (NTCA) or from a participating employer. The Program was most recently restated effective January 1, 2022.

General

The Program is a multiple-employer defined benefit pension plan covering many of the employees of NTCA, its affiliates, and its members that have adopted the Program (collectively, the Participating Employers, Employers, or Member Company). The Program is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Contributions

Employers who adopt the Program make contributions monthly to the Program for all eligible employees. These contributions are calculated as a percentage of each participant's compensation with the percentage for each Employer determined by the benefit formula elected on the Employer's adoption agreement. Certain Employers require participants to make contributions to the Program to receive the Employers' contribution. Such mandatory participant contributions are specified in the adoption agreement as a percent of salary. Voluntary contributions by participants are not permitted.

In addition, each Employer contributes a surcharge contribution. Generally, the surcharge contribution for each such Program year is the sum of (i) the product of the Employer's surcharge contribution percentage times the compensation of the Employer's participants for the Program Year, plus (ii) the amount of any surcharge contributions for the Program year by the Employer on behalf of disabled participants.

The Surcharge Contribution Percentage after Plan Year 2017 for an 8/24/2015 Participating Member is the product of (i) 50% times (ii) the sum of the following percentages elected under or pursuant to the Participating Member's Adoption Agreement: Section C, Rule-of- 85, and Section G, Participating Member Contributions and Participant Contributions for active Employees, in effect on August 24, 2015. The Surcharge Contribution Percentage for Plan Years after 2017 for a Participating Member that is not an 8/24/2015 Participating Member is the highest Surcharge Contribution Percentage of any 8/24/2015 Participating Member in the same Controlled Group as such Participating Member.

Participating Employers may not require employees to make contributions at a rate in excess of 100% of the rate of Employer contributions. This limitation only applies to changes to Employer or employee rates after the effective date and will not need to be retroactively applied to adoption agreements already in effect at that date.

Employers also may elect to fund prior service benefits for participants on a nondiscriminatory basis. The Employer may fund these benefits either by a lump sum payment or by installment payments, with interest charged at an actuarially determined rate on the unpaid balance.

Participants may rollover qualified lump sum distributions into the Program when restoring a previously distributed benefit or at retirement to increase the monthly pension amount.

Retirement & Security Program for Employees of NTCA and its Members

Notes to Financial Statements

The Program allows a member company to freeze R&S Program participation to new employees.

The Program meets the ERISA minimum funding requirements.

401(h) Accounts

The Program provides a postretirement medical benefit component in addition to the normal retirement benefits of the Program, pursuant to Section 401(h) of the Internal Revenue Code (IRC). These benefits are Employer funded, subject to certain restrictions and limitations, and can be disbursed only to reimburse participating Employers for payment of certain nonpension retiree health benefits, as outlined in the Program's provisions. If an Employer were to withdraw from the Program, or if the Program were to be terminated, all 401(h) amounts on deposit in the trust would revert to the Employer that established and funded the account. Distributions to the Program's participants are not permitted. Because the 401(h) net assets may not be used to satisfy Plan obligations, the total net assets available for benefits does not include net assets held in the 401(h) account. The Plan's statements of changes in net assets available for benefits do not include any of the components of the changes in the 401(h) net assets.

Pension, death, and disability benefits

If an employee dies prior to retirement while covered under the Program, the participant's beneficiary is entitled to a pre-retirement death benefit. For participants who die prior to age 65, the basic death benefit is generally 100 times the monthly pension that would have been payable had the participant survived until age 65 and retired. After age 65, the basic death benefit equals the present value of the participant's accrued retirement benefit as of the date of death.

The Program permits payments of a lump sum benefit if elected by nonspousal beneficiaries of nonretired participants who die on or after age 55.

Participants who retire at age 65 (the Program's normal retirement age), age 55 (the Program's early retirement age) or at an age between those two are entitled to a monthly annuity or a lump sum payment. There is no minimum service requirement to qualify for this benefit; however, the benefit payable generally is reduced actuarially if the participant retires before normal retirement age. However, companies may pay an additional amount to provide employees an unreduced benefit as early as age 55. In addition, if a participant's age is at least 55 and age and service years added together equal at least 85 at retirement, the participant can receive an unreduced benefit when retiring before age 65. This benefit provision is called the "Rule-of-85."

The normal benefit payable is calculated using the participant's highest five compensation years from the last 10 years of credited service, multiplied by the sum of accumulated company and participant net contribution percentages made prior to January 1, 2008, and the actuarial factor of 0.2168 plus the sum of accumulated company and participant net contribution percentages made between January 1, 2008 and December 31, 2013, and the actuarial factor of 0.2091 plus the sum of accumulated company and participant net contribution percentages made between January 1, 2014 and December 31, 2016, and the actuarial factor of 0.1855 plus the sum of accumulated company and participant net contribution percentages made after December 31, 2016, and the actuarial factor of 0.1531. If the retiring employee is under age 65, the benefit then is actuarially reduced, unless the participant qualifies under the Rule-of-85 outlined above. In certain limited circumstances, a participant's accrued benefit may be calculated differently in order to conform to Program and legal requirements.

For married participants who retire, the normal form of benefit is a 50% joint and survivor benefit. For other participants, the normal form of benefit is a life annuity with payment guaranteed for 10 years. Optional forms of benefits (including a 75% joint and survivor benefit, a 100% joint and survivor benefit, a lump sum payment, etc.) are also available to retiring participants. Married retirees, however, must obtain spousal consent for any benefit election that does not provide a monthly survivor benefit of at least 50%. The Program permits certain eligible participants, without regard to their age, to roll over a lump sum distribution of benefits to the Savings Plan of

Retirement & Security Program for Employees of NTCA and its Members

Notes to Financial Statements

NTCA and Its Members. The number of days required for participants to receive notice of a reduction in accrued benefits is 45 days.

Participants who receive a Program distribution and subsequently return to work for a participating member company are permitted to restore their previous accrued benefit with contributions, including from an eligible rollover distribution, within five years of their re-employment date.

The Program automatically cash-outs account balances of \$1,000 or less and rolls into an IRA any terminated employees account balance that is between \$1,000 and \$5,000.

The Program requires distribution of benefits to terminated participants at the Program's normal retirement age (65).

The Program provides for the purchase of a group annuity contract to assume the Program's liability for benefits payable to participants, beneficiaries, and retirees of employers that withdraw from the Program after April 30, 2013, and do not elect to spin out to a successor defined benefit plan.

The Program provides for the purchase of a group annuity contract to assume the Program's liability for benefits payable to participants, beneficiaries, and retirees of employers who were not active participating members as of December 31, 2012.

The Program added 10-year certain, Social Security leveling, and combination lump sum and annuity features to the 75% joint and survivor benefit.

The Program does not provide pension benefits on the basis of participant disability. Participants are fully vested immediately in their accrued benefits.

2. Summary Of Accounting Policies

Basis of accounting

The financial statements of the Program are prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America (GAAP).

Fair value measurements

The Program categorizes its assets and liabilities measured at fair value into a three-level hierarchy based on the priority of the inputs to the valuation technique used to determine fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Trust has the ability to access.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;

Retirement & Security Program for Employees of NTCA and its Members

Notes to Financial Statements

- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair market value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. There have been no changes in the valuation methodologies used at December 31, 2022 and 2021.

Investment valuation and income recognition

Investments are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in orderly transaction between market participants at the measurement date. The Program's Trust Committee determines the valuation policies utilizing information provided by the investment advisor and trustee. See Note 5 for a discussion of fair value of investments.

Interest income is recorded on the accrual basis. The fair value of the Plan's interest in the master trust is based on the beginning of year value of the Plan's interest in the trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses.

Cash and cash equivalents

Cash equivalents include overnight repurchase agreements that are collateralized by a bank at an amount equal to at least 100% of the resale price. The collateral consists of U.S. Treasury or agency securities and is required to be held in a segregated custody account. In the event of default, the Program has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation.

A portion of these funds, \$28,145 and \$257,496, represents the Program's interest as of December 31, 2022 and 2021, respectively, in a lockbox bank account held jointly with NTCA and used for initial deposits of plan-related employer payments.

Actuarial present value of accumulated benefits

Accumulated Program benefits are those estimated future periodic payments, including lump sum distributions that are attributable under the Program's provisions to services rendered by the participants to the valuation date. Accumulated benefits include benefits expected to be paid to retired or terminated employees of NTCA and participating member systems or their beneficiaries, and to present employees or their beneficiaries.

Benefits under the Program are based on a participant's highest five compensation years from the last 10 years of credited service. The accumulated benefits for active participants are based upon estimated average compensation during the years preceding the valuation date. Benefits payable under all circumstances (e.g., retirement, termination of employment and death) are included to the extent they are deemed attributable to employee service rendered to the valuation date. Present employees' accumulated contributions, including interest, as of December 31, 2021 were \$194,144,966. Interest was credited on employees' contributions at a rate of 1.57% for the year ended December 31, 2021.

Benefits to be provided through annuity contracts are excluded from plan assets and are also excluded from accumulated plan benefits.

Contributions

The Program records contributions in the period they are due. Contributions received through August 31st are allocated to the prior year in order to minimize the Program's unfunded vested benefits as defined by the Pension Benefit Guaranty Corporation (PBGC). At December 31, 2022 and 2021, contributions receivable and contributions revenue include amounts estimated to be received by the Program through August 31, 2023 and 2022, respectively.

Benefit payments

Benefits are recorded in the period of distribution.

Use of estimates

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Administrative expenses

The Plan's expenses are paid by the Program. Certain expenses incurred in connection with the general administration of the Program that are paid by the Program are recorded as administrative expenses in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in master trust investment income presented in the accompanying statement of changes in net assets available for benefits.

Subsequent events

In preparing these financial statements, the Program has evaluated events and transactions for potential recognition or disclosure through August 9, 2023, the date the financial statements were available to be issued.

3. Concentration Of Credit Risk

The Federal Deposit Insurance Corporation (FDIC) insures bank balances up to \$250,000 per depositor, per insured bank. Management monitors these balances and believes they do not represent significant credit risk to the Program.

4. Investments

The investments of the Program are held in the R&S Program and Savings Plan of NTCA and its Members Employee Benefit Trust (Master Trust) which was established for the investment of assets of the Program and 401(h) investments. The Program and 401(h) accounts each have an undivided interest in the Master Trust. The assets of the Master Trust are held by State Street Bank and Trust Company pursuant to the provisions of the Employee Benefit Plan Trust Agreement. At December 31, 2022 and 2021, the Program and 401(h) account's interest in the net assets of the Master Trust was approximately 94.6% and 95.4%, respectively.

Investment income and administrative expenses relating to the Master Trust are allocated to the individual plans based upon their proportionate interest in the Master Trust. The value of the Program's interest in the Master Trust is based on the beginning of year value of the Program's interest in the trust plus actual contributions and allocated investment income less actual distributions and allocated administrative expenses.

5. Fair Value Measurement

Following is a description of the valuation methodologies used for assets held in the Master Trust, which are measured at fair value. Investments in short-term investments are stated at cost, which approximates fair value. Investments in corporate bonds are valued on yields currently available on comparable securities of issuers with similar credit ratings. Investments in common stock are valued at the closing price reported in the actual market in which the individual security is traded. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price.

Investments in foreign securities are reported at their foreign currency denominated fair value and are converted into U.S. dollars using current exchange rates.

Investments in collective trust funds and real estate investment trusts are valued based on NAV of units, which are based on observable prices of the underlying assets, held by the funds at year-end and are included as investments measured at NAV. For certain funds NAV is a readily determinable fair value and is the basis for current transactions and participant transactions (purchases and sales) may occur daily. These funds are included in Level 2.

Investment in the group variable annuity policy is valued based on the value of the underlying investments estimated NAV, as provided by the investment manager and is included as investment measured at NAV.

Investments in private equity investments, which are not readily marketable, are carried at their estimated NAV as provided by the investment managers and are included as investments measured at NAV. The Program reviews and evaluates the values provided by the investment manager and agrees with the valuation methods and assumptions used in determining the fair value of the alternative investments. Those estimated fair values may differ significantly from the values that would have been used had a ready market for these investments existed.

6. Derivatives And Hedging Activities

The Trustees of the Master Trust have authorized certain investment managers to invest in derivative instruments for hedging purposes. As a global institutional investor, the Master Trust is in a position to take advantage of derivative instruments to ensure overall investment performance objectives are achieved as specified. Investment managers may utilize derivatives for risk control and substitution. Speculation is not permitted. Under no circumstances is a manager permitted to leverage the Master Trust's portfolio with derivatives. The Master Trust allows the use of forwards, futures, and options.

The Master Trust purchases derivatives in carrying out its international enhanced equity strategy. The types of derivatives include: (1) forward foreign currency exchange contracts principally used for risk control by hedging a portion of the Master Trust's portfolio to minimize exposure to foreign exchange risk, and (2) exchange traded futures to manage exposure to international markets more rapidly and less expensively than can be accomplished through the use of cash markets.

When engaging in forward exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. To lessen this risk, individual counterparty exposure is limited to 25% of the total market value of exposure created by all derivatives (calculated at the time of purchase).

The Master Trust does not anticipate nonperformance by counterparties to these contracts, and no material loss would be expected from any such nonperformance.

In connection with its derivative activities, the Master Trust generally enters into master netting agreements and collateral agreements with its counterparties. These agreements provide the Master Trust with the right in the event of a default by the counterparty, to net a counterparty's rights and obligations under the agreement and to liquidate and setoff collateral against any net amounts owed by the counterparty. The enforceability of the master netting agreement is taken into account in the Master Trust's risk management practices and application of counterparty credit limits.

As of December 31, 2022, there were no open offsetting derivative instruments and related collateral.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts

Forward foreign currency exchange contracts (forward currency contracts) are commitments to purchase or sell foreign currency at a future settlement date and at a negotiated rate. The Master Trust's holdings in forward foreign exchange contracts also includes foreign exchange spot transactions which are forward foreign exchanges that are conducted in the short-term to either convert foreign currency earnings to U.S. dollars or to purchase foreign currencies to satisfy forward activity obligations that are coming due in the near term. The objective is to minimize exchange rate risk. Equity investments in foreign markets have both equity risk and foreign exchange risk.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between the contract value and the market value is recorded as unrealized

Retirement & Security Program for Employees of NTCA and its Members
Notes to Financial Statements

appreciation (depreciation) in the Master Trust's net assets. This amount also represents the fair value of the forward currency contracts and is reflected in the Investment in Master Trust on the statements of net assets available for benefits.

When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker is offset and any gain (loss) is realized on the date of offset. The amount of gain (loss) recognized on foreign currency contracts is (\$8,736,784) and (\$1,600,817) for the years ended December 31, 2022 and 2021, respectively.

Certain risks may arise entering into forward currency contracts, including the potential inability of counterparties to meet their obligations. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

As of December 31, 2022, there were no open forward currency contracts of the Master Trust.

A summary of the open forward currency contracts of the Master Trust at December 31, 2021 is presented below:

Exchange Traded Futures Contracts

An exchange traded futures contract is a contractual agreement to make or take delivery of a standardized financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust uses equity index futures contracts on broad indices to manage exposure to international markets. Buying futures tends to increase the Master Trust's exposure to the underlying market. Selling futures tends to decrease the Master Trust's exposure to the underlying market, or hedge the fair value of other markets. The Master Trust does not employ leverage in its use of futures, thus, cash balances are maintained at a level at least equal to the contract value of the future.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a future contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of nominal value of the contract (initial margin). Pursuant to the future contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which are generally settled daily and are included in the realized gains (losses) on future contracts. The Master Trust records a variation in margin receivable or payable in net assets for variation margins which have not yet been paid at the end of the year. This amount also represents the fair value of the exchange traded futures contracts and is reflected in the Investment in Master Trust on the statement of net assets available for benefits.

Future contracts involve, to varying degrees, credit, and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange.

The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is a risk that there may not be an exact correlation between a future contract and the underlying index or security. The amount of gain (loss) recognized on exchange-traded future contracts is (\$609,880) and \$326,757 for the years ended December 31, 2022 and 2021, respectively.

At December 31, 2022 and 2021, cash of \$0 and \$2,008,145 was pledged as collateral for open exchange traded futures contracts, respectively.

7. Reconciliation Of Financial Statements To Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements to Form 5500 as of December 31:

	<u>2022</u>	<u>2021</u>
Net assets available for pension benefits per the financial statements	\$ 1,954,247,360	\$ 2,520,510,208
Net assets held in 401(h) accounts included as assets in Form 5500	<u>259,330,626</u>	<u>295,530,638</u>
Net assets available for benefits per Form 5500	<u>\$ 2,213,577,986</u>	<u>\$ 2,816,040,846</u>

The following is a reconciliation of the changes in net assets available for benefits per the financial statements to Form 5500 for the year ended December 31, 2022:

	<u>2022</u>
Decrease in net assets available for benefits per the financial statements	\$ (566,262,848)
Loss on 401(h) account	(33,244,059)
Contributions made to 401(h) account	625,000
Expenses paid by 401(h) account	(641,701)
Benefits paid from 401(h) account	(2,949,052)
2022 payable to related party	14,474
2022 payable for services	4
2021 payable for services	(4)
2022 401(h) prepaid expenses	(12,154)
2021 401(h) prepaid expenses	<u>7,480</u>
Net loss per Form 5500	<u>\$ (602,462,860)</u>

The net assets of the 401(h) accounts included in Form 5500 are not available to pay pension benefits but can be used only to pay certain nonpension retiree medical benefits; therefore, these assets and any components of their changes are excluded from net assets and changes in net assets available for pension benefits per the financial statements.

8. Actuarial Present Value Of Accumulated Program Benefits

The Program's actuary estimates the actuarial present value of accumulated program benefits, which is the amount that results from applying actuarial assumptions to reflect the time value of money (through discounts for interest) and the probability of payment (by means of reductions such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

Retirement & Security Program for Employees of NTCA and its Members
Notes to Financial Statements

The accumulated benefit information as of the beginning of the Program year is as follows:

	December 31, 2021
Actuarial present value of accumulated benefits:	
Vested benefits of participants currently receiving benefits	\$ 679,726,532
Other vested benefits	1,510,234,717
Nonvested benefits	<u>219,362,089</u>
Total actuarial present value of accumulated benefits	<u>\$2,409,323,338</u>

The actuarial present value of accumulated Program benefits increased as a result of the following:

Present value of accumulated program benefits – December 31, 2020	\$2,379,530,343
Change during the year due to:	
Benefits accumulated	119,565,882
Actuarial losses	39,853,261
Decrease in the discount period	149,142,083
Actual benefits paid	(340,035,996)
Change of assumptions	<u>61,267,765</u>
Present value of accumulated program benefits - December 31, 2021	<u>\$2,409,323,338</u>

Significant assumptions underlying the actuarial computations are as follows:

	2021
Interest Rate	6.75%
Mortality Basis	Male and Female Society of Actuaries' Pri-2012 Employees mortality table generationally projected with Scale MP-2021 for participants before they begin receiving payment. Male and Female Society of Actuaries' Pri-2012 for Healthy Annuitants mortality table generationally projected with Scale MP-2021 for participants currently in payment and once participants not in payment status move to in payment status.
Retirement Age	Variable based on age, using a low of 6% for those 55 to 61 and a high of 100% for those 70 or 15% under Rule of 85 after 56 to 60.
Cost Method	Aggregate Cost Method

The foregoing actuarial assumptions are based on the assumption that the Program will continue. Were the Program to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated program benefits. The computation of the actuarial present value of accumulated program benefits was made as of January 1, 2022. Had the valuation been performed as of December 31, 2021, there would be no material differences.

9. Funding Policy

The Program is funded through Employer and participant contributions that are specified by the Employer. These contributions, plus earnings that accumulate tax-free in the Program's unallocated share of the Master Trust, are intended to be sufficient to fund the Program's past and future service cost on an ongoing basis.

10. Program Termination

Although they have not expressed any intention to do so, NTCA and Participating Employers have the right under the Program to discontinue contributions at any time and to terminate their participation in the Program subject to certain advance notice requirements. Also, the NTCA board of directors has the authority to terminate the Program.

Should the Program terminate at some future time, a particular participant's accumulated benefits will be paid dependent on the priority of those benefits and the levels of benefits guaranteed by the PBGC at that time. The Program's net assets generally will not be available on a pro rata basis to provide participants' benefits, due to the priority assigned different benefit categories under ERISA Section 4044. Some benefits may be fully or partially provided by the then-existing assets and the PBGC guaranty, while other benefits may not be provided at all.

11. Federal Income Tax Status

The Program obtained its latest favorable determination letter from the Internal Revenue Service (IRS) on January 9, 2014. In that letter, the IRS stated that the Program, as designed, was in compliance with the applicable requirements of the IRC. The IRS also indicated, in issuing this letter that the member companies participating in the Program could rely on this letter without having to file individual letters to have the IRS determine if the Program, as they adopted it, is in compliance. While the Program has been restated and further amended since the date of this letter, the Program administrator and the Program's ERISA counsel believe that the Program continues to be designed in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Program's financial statements.

Accounting principles generally accepted in the United States of America require the Program's management to evaluate tax positions taken by the Program and recognize a tax liability (or asset) if the Program has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Program is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

12. Related Party And Party In Interest Transactions

The Program has entered into an agreement with Services Management Corporation (SMC), a wholly owned subsidiary of NTCA, under which SMC has been designated Contract Administrator for the Program. SMC provides comprehensive third-party administrative services to the Program. SMC is compensated for these services on a fixed-fee basis.

Total fees to SMC under this agreement were \$3,029,255 and \$3,118,493 for the years ended December 31, 2022 and 2021, respectively.

13. Risks And Uncertainties

The Program invests in various investment instruments. Investments are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Program contributions are made and the actuarial present value of accumulated program benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

APPENDIX C - SCHEDULE B ATTACHMENTS (cont.)

Schedule B, Line 11 – Justification for Change in Actuarial Assumptions as of January 1, 2022

The PPA segment interest rates were updated from the September 2020 rates of 4.75%, 5.36% and 6.11% to the September 2021 rates of 4.75%, 5.18%, and 5.92% reflecting interest rate stabilization under ARPA.

The RPA '94 Current Liability interest rate was changed from 6.11% to 5.92%.

The RPA '94 Current Liability and Funding Target liability annuitant mortality tables were updated to reflect an additional year of mortality improvements.

The valuation mortality table and lump sum mortality table for distributions after 2022 were updated to reflect the Society of Actuaries' Pri-2012 mortality table projected generationally with Scale MP-2021.

The lump sum mortality assumption for RPA '94 Current Liability and Funding Target liability was changed from the 2021 table to the 2022 table, as specified in Internal Revenue Code section 417(e).

The lump sum interest rate assumption for distributions assumed to occur during 2022 was changed from 4.00%, 5.25%, and 6.00% to 0.66%, 2.50%, and 3.12% (the actual rates that apply for distributions during 2022), as the 1st, 2nd and 3rd segment rates, respectively.

The expected administrative expense assumption was changed from \$5,838,643 to \$5,343,929. The method for determining this assumption did not change.

Social Security Wage
Base, and Plan
Compensation
Limitations***

Projected benefits are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit, Social Security Wage Base, or compensation limit.

***Assumed Cost-of-Living
Adjustments***

2.50%

***Administrative
Expenses***

The amount included this year for Administrative Expenses is \$5,343,929. This amount is estimated by assuming last year's administrative expenses, increased by 2.50%, plus actual PBGC premiums for the year.

***Mortality (other than for
lump sum distribution)***

- For RPA '94 Current Liability and Funding Target: Male and Female 2022 PPA Static Mortality for Non-Annuitants is used for participants in the valuation before they begin receiving payment. Male and Female 2022 PPA Static Mortality for Annuitants is used for participants currently in payment and once participants not in payment status move to in payment status.
- For ASC960: Male and Female Society of Actuaries' Pri-2012 Employees mortality table generationally projected with Scale MP-2021 for participants before they begin receiving payment. Male and Female Society of Actuaries' Pri-2012 for Healthy Annuitants mortality table generationally projected with Scale MP-2021 for participants currently in payment and once participants not in payment status move to in payment status.
- For all other purposes: Separate rates for disabled participants (based on Pri-2012 "Disabled Retiree" table), non-annuitants (based on Pri-2012 "Employees" table) and annuitants (based on Pri-2012 "Healthy Annuitants" table), all generationally projected using Scale MP-2021.
- Last year for RPA '94 Current Liability and Funding Target: Male and Female 2021 PPA Static Mortality for Non-Annuitants was used for participants in the valuation before they begin receiving payment. Male and Female 2021 PPA Static Mortality for Annuitants was used for participants currently in payment and once participants not in payment status move to in payment status.
- Last Year for ASC960: Male and Female Society of Actuaries' Pri-2012 Employees mortality table generationally projected with Scale MP-2021 for participants before they begin receiving payment. Mortality for lump sum distributions

- For RPA '94 Current Liability and Funding Target: the 2022 mortality table specified in Internal Revenue Code section 417(e). In prior year, the 2021 mortality table specified in Internal Revenue Code section 417(e).
- For all other purposes: The 2022 mortality table specified in Internal Revenue Code section 417 (e) is used for lump sum distributions in 2022. The Society of Actuaries' Pri-2012 mortality table generationally projected with Scale MP-2021 for lump sum distributions after 2022. In the prior year, the 2021 mortality table specified in Internal Revenue Code section 417 (e) was used for distributions in 2021 and the Society of Actuaries' Pri-2012 mortality table generationally projected with Scale MP-2020 for lump sum distributions after 2021.

Disability Rates

None.

Form of Payment

65% of retirements are assumed to elect a lump sum at termination or retirement. Of the remaining 35%, 30% are assumed to elect a ten-year certain annuity and 70% are assumed to elect a 75% joint and survivor annuity. Vested participants with termination dates in the year prior to the valuation are assumed to elect an immediate lump sum with 50% probability, a lump sum at age 65 with 32.5% probability, and an annuity at age 65 with 17.5% probability. Terminated vested participants who are eligible for Rule of 85 and will reach 85 points before age 65 are assumed to elect a lump sum in the year they reach 85 points. All other terminated vested participants are assumed to elect a lump sum at age 65 with 65% probability and a life annuity with payments guaranteed for 10 years commencing at age 65 with 35% probability.

Marriage

Of all active participants, 85% are assumed to be married.

Spouse Age

Wife 3 years younger than husband.

Inclusion Date

The valuation date coincident with or next following the date on which the employee becomes a participant.

Employees

It is assumed that there will be no new or rehired employees.

Employees at Withdrawn Employers

Active employees at withdrawn employers are assumed to commence benefits at the same rates as active employees at other participating employers.

Cost Method

The Aggregate Cost Method is used to determine the normal cost for retirement, termination, and ancillary benefits. Under this cost method, the total of the present value of all future benefits for all participants reduced by the actuarial value of assets is divided by the present value of future compensation to determine the Normal Cost Rate. The present value of future benefits is determined by discounting, to the valuation date, the total future benefit cash flows from the plan to all of the current participants, using the actuarial assumptions. The actuarial value of assets is adjusted for certain funding standard account balances or by included-but-not-deducted contributions less deducted-but-not-included contributions. The present value of future compensation is determined by discounting, to the valuation date, all of the pensionable compensation anticipated to be paid to the current participants, using the actuarial assumptions. The Normal Cost Rate is then multiplied by the pensionable compensation for participants under retirement age to arrive at the Normal Cost payable on the valuation date. The final Normal Cost, after increasing this result for expected administrative expenses, if applicable, may not be less than zero. For this purpose, "retirement age" means the earliest age at which probability of retirement is 100%.

Asset Method

The actuarial value of assets is equal to the market value of assets except that the difference between total investment return and expected return (based on the valuation interest rate) is recognized at the rate of 20% per year. The resulting value is limited to a range of 80% to 120% of market value.

PPA Actuarial Value of Assets Method

The PPA actuarial value of assets is the average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year).

Participant Data

National Telecommunications Cooperative Association provided employee data as of the valuation date. Data for other participants was provided by National Telecommunications Cooperative Association. We have relied on all the data and information provided, including plan provisions and asset information, as being complete and accurate. We have not independently verified the accuracy or completeness of the data or information provided, but we have performed limited checks for reasonableness. Asset data was provided by the National Telecommunications Cooperative Association.

Tax Policy

The actuarial valuation performed for the plan year ending December 31, 2022 is used to determine the maximum deductible contribution for the tax year ending December 31, 2022.

Benefits Not Included in Valuation

We believe all significant Plan provisions are reflected in this valuation.

Funding Policy

Under the R&S Program's funding policy, each member contributes a percentage of compensation based on the elections in their adoption agreement and as described in the plan document. These base contribution percentages, as well as surcharge contributions, are reassessed and updated annually to maintain the solvency of the plan.

Changes in Assumptions and Methods Since Last Actuarial Valuation

The PPA segment interest rates were updated from the September 2020 rates of 4.75%, 5.36% and 6.11% to the September 2021 rates of 4.75%, 5.18%, and 5.92% reflecting interest rate stabilization under ARPA.

The RPA '94 Current Liability interest rate was changed from 6.11% to 5.92%.

The RPA '94 Current Liability and Funding Target liability annuitant mortality tables were updated to reflect an additional year of mortality improvements.

The valuation mortality table and lump sum mortality table for distributions after 2022 were updated to reflect the Society of Actuaries' Pri-2012 mortality table projected generationally with Scale MP-2021.

The lump sum mortality assumption for RPA '94 Current Liability and Funding Target liability was changed from the 2021 table to the 2022 table, as specified in Internal Revenue Code section 417(e).

The lump sum interest rate assumption for distributions assumed to occur during 2022 was changed from 4.00%, 5.25%, and 6.00% to 0.66%, 2.50%, and 3.12% (the actual rates that apply for distributions during 2022), as the 1st, 2nd and 3rd segment rates, respectively.

The expected administrative expense assumption was changed from \$5,838,643 to \$5,343,929. The method for determining this assumption did not change.

Source of Data and Other Information

The plan sponsor furnished participant data as of 1/1/2022. Information on assets, contributions and plan provisions was supplied by the plan sponsor. Data and other information were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Summary of Plan Provisions

Effective Date:

As amended through January 1, 2022.

Eligibility Requirements:

Any one of the following, depending upon system election:

- i. Date of employment
- ii. Completion of three months of service
- iii. Completion of six months of service
- iv. Completion of one year of service
- v. Completion of two years of service
- vi. Attainment of age 21
- vii. Attainment of age 21 and completion of three months of service
- viii. Attainment of age 21 and completion of six months of service
- ix. Attainment of age 21 and completion of one year of service
- x. Attainment of age 21 and completion of two years of service.

Retirement Dates:

- a. Normal - The first of the month containing the 65th birthday.
- b. Early - The first of any month coincident with or following the month containing the 55th birthday.

Retirement Benefits:

- a. Normal - The benefit is based on the final average earnings. The benefit is equal to the final average earnings multiplied by the product of:
 - i. 0.2168 for all earnings prior to January 1, 2008, and 0.2091 for all earnings on or after January 1, 2008 but prior to January 1, 2014, and 0.1855 for all earnings on or after January 1, 2014, and 0.1531 for all earnings on or after January 1, 2017 multiplied by
 - ii. The sum of accumulated system and participant net contribution percents.
- b. Early - The benefit amount is the accrued benefit determined as in 4.a. based on past service and salaries at the date of early retirement, subject to the following:
 - i. The full accrued benefit is payable if the employee is eligible to retire under the Rule-of-85. Only employees of systems which have adopted this provision may become eligible.
 - ii. If not, the benefit in 4.a.i. is reduced 1/4% for each month by which the member's 60th birthday, or Early Retirement Date, if later, precedes his Normal Retirement Date, plus 1/2% for each of the next 60 months by which the payment commencement date precedes age 60.
- c. Late - Accrued benefit of 4.a. above, based on credited service and final average earnings at the date of late retirement, increased 1/4% for each month by which the member's Late Retirement Date follows his Normal Retirement Date.

Schedule SB, Part V

Termination Benefits:

The accrued benefit of 4.a. above based on credited service at date of termination. An actuarially equivalent benefit is payable at any time.

Death Benefits:

An amount equal to the greater of:

- i. 100 times the monthly pension that would have been payable had the participant survived until his Normal Retirement Date and retired with benefits payable in the form of a single life annuity with payments guaranteed for ten years.
- ii. The present value of the participant's Accrued Retirement Benefit.

Employee Contributions:

Employees may be required to contribute to the Plan as a condition of participation. The amount of the contribution is equal to a designated percentage of earnings. Interest is credited on all employee contributions.

Form of Benefit Payment:

For married participants, an actuarially equivalent 50% Joint and Survivor Benefit is the normal form of benefit.

For all others, the normal form of benefit is a life annuity with payments guaranteed for ten years.

Optional forms of payment are available under the Plan to all participants.

Changes in Plan Provisions:

Various member companies made changes to their benefit levels and other adoption agreement elections, some of which may have been prospective only.
