INDEPENDENT AUDITOR'S REPORT

To the Trustees and Participants
L3Harris Ocean Systems Pension Plan for Hourly Employees

Opinion

We have audited the accompanying financial statements of L3Harris Ocean Systems Pension Plan for Hourly Employees (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for pension benefits as of December 31, 2022 and 2021, and the related statements of changes in net assets available for pension benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for pension benefits of L3Harris Ocean Systems Pension Plan for Hourly Employees as of December 31, 2022 and 2021, and the changes in its net assets available for pension benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of L3Harris Ocean Systems Pension Plan for Hourly Employees and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about L3Harris Ocean Systems Pension Plan for Hourly Employees' ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the plan; and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with auditing standards generally accepted will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with auditing standards generally accepted, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of L3Harris Ocean Systems Pension Plan for Hourly Employees' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about L3Harris Ocean Systems Pension Plan for Hourly Employees' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Note 1 - Description of Plan

The following description of the L3Harris Ocean Systems Pension Plan for Hourly Employees (formerly L3 Ocean Systems Pension Plan for Hourly Employees) (the “Plan”) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan was established effective April 1, 1998, in connection with the acquisition of the Ocean Systems division of AlliedSignal, Inc. by L3 Technologies, Inc. (“L3”). Effective April 1, 1998, certain participants in the AlliedSignal, Inc. Pension Plan for Hourly Employees (the “Prior Plan”) became participants in the Plan. The Plan is a non-contributory defined benefit plan covering members of UAW Local 179 at L3 Ocean Systems division. On June 29, 2019, L3 Technologies, Inc. completed its merger with Harris Corporation (“Harris”) to create L3Harris Technologies, Inc. (the “Company”) (the “Plan Sponsor”). The Plan funds are held in the L3Harris Pension Master Trust. See note 3 for further information regarding the Master Trust. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (“ERISA”), as amended.

Master Trust

The Northern Trust Company (the “Trustee” or “Northern Trust”) serves as trustee of the Plan and administers the Plan’s investment assets. The Plan’s assets consist of an undivided interest in an investment account of the L3Harris Pension Master Trust, EIN 36-6668234, a master trust established by the Company and administered by the Trustee. The Master Trust includes the combined assets of the Plan, as well as several other employee benefit plans of the Company. Although assets of the Plan are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain of the investment account to the participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating plans. A schedule of the Master Trust assets has been filed with the U.S. Department of Labor and includes the Plan’s proportionate share of such assets at December 31, 2022 and 2021.

Eligibility

Participation in the Plan commences after completion of one year of service.

Note 1 - Description of Plan (Continued)

Pension Benefits

The Plan provides a monthly benefit (benefit payments not in thousands) of (1) \$34 for each year of credited service for participants retiring during the period from August 1, 2003 through July 31, 2004, (2) \$35 for each year of credited service for participants retiring during the period from August 1, 2004 through July 31, 2005, (3) \$36 for each year of credited service for participants retiring during the period from August 1, 2005 through July 31, 2006, and (4) \$37 for each year of credited service for participants after August 1, 2006. Benefits vest 100% after five years of service and are payable at age 65. Service in the Prior Plan is considered as service under the Plan.

The Plan permits early retirement for participants at either (i) age 60 with at least 10 years of service, (ii) age 55 and 85 points (points are the sum of age and credited service) or (iii) 30 years of credited service. The benefit may begin at the date of early retirement, reduced by percentages ranging from 6.7% to 69.6%, depending on age at retirement. Participants eligible for early retirement receive 100% of benefits at age 62.

The Plan is frozen with respect to new participants hired on or after August 1, 2007. As such, any employees hired on or after August 1, 2007 are not eligible to participate in the Plan. As of February 1, 2016, participants shall not receive any Special Benefit payments if the participant retirement occurs after February 1, 2016. Special Benefit payments are benefit payments payable to participants retiring from active service with a retirement or disability pension, and to surviving spouses of such participants, as well as to surviving spouses of employees who die in active service. Participants shall receive no Special Benefit payments after February 1, 2016 if the participant retirement occurs on or after August 1, 2011 and on or before February 1, 2016.

Death and Disability Benefits

Retirees may elect to receive their pension benefits in the form of a joint and survivor annuity or a life annuity payable monthly from the date of retirement. Under the joint and survivor annuity, if a vested participant dies prior to the date pension benefits commence, the surviving spouse of the deceased vested participant receives benefits equal to 60% of the amount which would have been payable to the retiree under a joint and survivor annuity. Under the life annuity, there are no continuing payments after the death of the retiree.

The Plan provides for a disability benefit if the participant obtains ten years of vesting service, which is calculated the same as a normal monthly retirement benefit.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis in accordance with accounting principles generally accepted in the United States of America (GAAP).

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties

Plan contributions and the actuarial present value of accumulated plan benefits are determined based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in the estimates and assumptions in the near term would be material to the financial statements.

The Plan, through the Master Trust, utilizes various investment instruments, including common and preferred stocks, U.S. government securities, corporate debt instruments, partnerships/joint ventures, common collective trusts, hedge funds, cash and cash equivalents, registered investment companies, and other investments. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Note 2 - Summary of Significant Accounting Policies (Continued)

Investment Valuation and Income Recognition

The Plan's interest in the Master Trust is presented at fair value, which has been determined based on the fair value of the underlying investments of the Master Trust. Fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net (depreciation) appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Administrative expenses of the Plan are paid by the Master Trust on behalf of the Plan, as provided in the plan document and the Master Trust agreement. Administrative expenses generally consist of consulting fees, auditing fees, recordkeeping fees, and insurance expenses.

Subsequent Events

The Plan has evaluated its December 31, 2022 financial statements for subsequent events for recognition or disclosure through October 5, 2023, the date the financial statements were available to be issued.

Note 4 - Fair Value Measurements

Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. It defines fair value as an exit price, which is the price that would be received for an asset or paid to transfer a liability in the Plan's principal or most advantageous market for the asset or liability, in an orderly transaction between market participants on the measurement date.

The fair value hierarchy generally requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability and are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the entity's own assumptions based on market data and the entity's judgments about the assumptions that market participants would use in pricing the asset or liability and are to be developed based on the best information available in the circumstances.

The Plan determines the fair market value of its investment in securities based on the established fair value definition and hierarchy levels. The three levels within its hierarchy that may be used to measure fair value are:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted; quoted prices for similar assets or liabilities; quoted prices in markets that are less active than traded exchanges; and other inputs that are observable or can be substantially corroborated by observable market data.

Notes to the Financial Statements (Continued)

(In Thousands)

Note 4 - Fair Value Measurements (Continued)

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities.

Asset Valuation Techniques

The lowest level of input that is a significant component of the fair value measurements determines the placement of the entire fair value measurement in the hierarchy. The Plan's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the classification of fair value assets and liabilities within the fair value hierarchy levels. The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2022 and 2021.

Domestic and international equity:

Domestic and international equity includes common and preferred stocks, domestic listed and foreign listed equity securities, unit trust equities, stapled securities, open-ended and closed-ended mutual funds, exchange-traded funds (registered investment companies), and these are generally valued at the closing price reported on the major market on which the individual securities are traded at the measurement date.

REITs:

Real Estate Investment Trusts (REITs) consist of securities that trade on the major exchanges and invest directly in real estate, either through properties or mortgages.

Fixed income investments:

Fixed income investments include U.S. Government securities, corporate bonds, corporate convertible bonds, asset-backed securities, bank loans, government mortgage-backed securities, non-government backed collateralized mortgage obligations and municipal obligations, which are generally valued using pricing models that use verifiable, observable market data such as interest rates, benchmark yield, and bids provided by brokers or dealers, or quoted prices of securities with similar characteristics.

The fair value of the Level 3 investments is determined using the discounted cash flow method. The unobservable inputs used in this valuation to determine the pricing yield for each security include the 30-year treasury base yield, ranging between 3.84% and 4.71% as of December 31, 2022, and 0.39% and 1.82% as of December 31, 2021. Additional unobservable inputs used include a broker spread, ranging between 0.89% and 4.10% as of December 31, 2022, and 0.71% and 3.25% as of December 31, 2021.

Notes to the Financial Statements (Continued)
December 31, 2022 and 2021
(In Thousands)

Note 4 - Fair Value Measurements (Continued)

Short-term investments:

Short-term investments are primarily comprised of short-term money market funds, which invest primarily in short-term, high quality money market securities such as government obligations, commercial paper, time deposits and certificates of deposit which are valued at cost, which approximate fair value, or valued at quoted market prices of identical instruments.

Limited partnerships:

Limited partnership funds include buy-out (developing companies), mezzanine (funds providing mezzanine loans to companies), venture capital (start-up companies), distressed asset (distressed companies undergoing bankruptcies, etc.), commodities (businesses in commodity related sectors), real estate (residential, commercial, and industrial real estate), international equity and venture capital, and are typically limited partnership investment structures and/or joint ventures. Limited partnership valuations are based on the valuation of the underlying investments, which include inputs such as cost, operating results, discounted future cash flows and market-based comparable data. Net asset value (NAV) is used as a practical expedient to estimate fair value.

Hedge funds:

Hedge funds include equity long/short, event driven, multi-strategy, real estate and fund of funds, and are typically limited partnership investment structures. Limited partnership interests in hedge funds are primarily valued using a market approach based on net asset value (NAV) calculated by the funds and are not publicly available. NAV is used as a practical expedient to estimate fair value.

Common collective trusts:

Common collective trusts (CCTs) are valued at NAV and are arrangements in which the funds of individual trusts are pooled to avail themselves of professional investment management and achieve greater diversification of investment, stability of income, or other investment objectives. CCTs are reported at NAV, as of the measurement date. NAV is used as a practical expedient to estimate fair value.

The preceding valuation methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 4 - Fair Value Measurements (Continued)

- (a) Limited partnership interests in private equity funds are not redeemable from the general partner. Private equity interests can be sold through a secondary sale to a third party. Distributions are generally received through the liquidation of the underlying assets of the funds. Other partnerships include distressed asset investments, venture capital funds, mezzanine funds. These partnerships (except for commodities, real estate, and international equity) are expected to be liquidated in approximately the next three to ten years.
- (b) Redemption restrictions vary, within 30 to 91 days, by investment management agreement but are based on the initial investment date and take into account liquidity terms, notice periods, redemption schedules, withdrawal with or without penalties and lock-ups, if any. In certain cases, full redemption may be extended over a period of time.
- (c) Fund of funds hedges invest in a variety of investments, mainly other hedge funds, of different styles with the goal of generating diversified returns in all types of market environments. Real estate hedge funds commonly invest in real estate investment trusts. However, as the name states, they may also invest in real estate properties such as residential and commercial properties and land. Other hedge funds include multi-strategy and event driven funds. Multi-strategy funds have an objective to add value from mispriced securities. These funds have entered into full redemption requests and are expected to be liquidated over the next year. Event driven funds are single direct funds attempting to generate returns in all types of market environments with appropriate amounts of risk.

Note 5 - Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2022 and 2021.

Note 6 - Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

Note 6 - Accumulated Plan Benefits (Continued)

The actuarial present value of the accumulated plan benefits is determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of January 1, 2022 and 2021, respectively, were:

Mortality Basis: The assumed mortality rates are the Pri-2012 Blue Collar Mortality Table for hourly plans and the Pri-2012 White Collar Mortality Table for salaried plans. In 2021, mortality rates were increased by 10% for hourly plans and decreased by 10% for salaried plans, with this adjustment tapering linearly to 0% starting at age 85 and ending at age 95. These assumed rates are projected generationally with the 2021 Buck Projection Scale for year 2022 and with the 2020 Buck Projection Scale for year 2021.

Retirement: Retirement starting at 55 through 70, at varying rates, with 100% by age 70. The retirement assumption at age 65 was 25%.

Discount Rate: The assumed interest rate is 7.5%.

The actuarial present value of accumulated plan benefits as of January 1, 2022 is as follows:

Vested accumulated plan benefits:

Retired participants and/or beneficiaries currently receiving benefits	\$	12,963
Other participants		588

Total vested accumulated plan benefits		13,551

Note 7 - Exempt Party-in-Interest Transactions

Certain Master Trust investments are shares of common collective trusts managed by the Trustee. These assets and related transactions qualify as exempt party-in-interest transactions.

Certain accounting and other administrative functions are performed by officers and employees of the Company (who may also be participants in the Plan) at no cost to the Plan or Master Trust. These transactions are not deemed prohibited party-in-interest transactions because they are covered by the statutory administrative exemptions from the IRC and ERISA's rules on prohibited transactions.

Note 8 - Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated October 11, 2017, that the Plan is designed in accordance with the applicable sections of the IRC. The Plan has been amended since receiving the determination letter. The plan administrator and the Plan's counsel believe that the Plan is designed and is currently being operated in compliance with the applicable regulations of the IRC; therefore, no provision for income taxes has been included in the Plan's financial statements.

L3HARRIS OCEAN SYSTEMS PENSION PLAN FOR HOURLY EMPLOYEES
Notes to the Financial Statements (Continued)
December 31, 2022 and 2021
(In Thousands)

Note 8 - Tax Status (Continued)

GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2019.

Note 9 - Plan Termination

While the Company has not expressed any intent to do so, it is free to discontinue its contributions at any time and to terminate the Plan, subject to collective bargaining and the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated as specified by the Plan in accordance with ERISA, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination.
- b. Benefits attributable to participants who have retired at least three years before the termination date of the Plan or those participants who were eligible to retire and receive pension benefits at least three years before, but who did not elect to retire at that time.
- c. Benefits commencing at retirement age to participants who are eligible to receive guaranteed benefits under ERISA.
- d. All vested and non-vested benefits.

Whether participants receive all benefits to which they are entitled under the terms of the Plan should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation, up to specified limits.

Summary of Plan Provisions

This subsection summarizes the major provisions of the Plan as included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Supplemental Allowance

Payable until age 62 to participants retiring with early retirement or disability pension.

- a) For participant retiring under “30 and out” provision, the amount payable is an amount such that the total benefit paid is \$1,950 per month.
- b) For participants retiring early but *not* under “30 and out” provision, the amount payable is based on the following:

Attained age at retirement	Additional benefit per year of credited service
55	\$14.55 per month
56	17.15
57	20.55
58	23.95
59	27.20
60	31.50
61	31.50

- c) For participants retiring with a disability pension, a “Temporary Benefit” of \$35.00 per month per year of credited service (up to 30 years). The “Temporary Benefit” is only payable if participant is not eligible for Social Security Disability Benefits.

Special Early Retirement

- *Eligibility:* All of the following:
 - a) 10 or more years of vesting service,
 - b) Age between 55 and 65
 - c) Participant has not been discharged for cause
 - d) Unusual circumstances result in L3Harris asking a participant to retire, and
 - e) The participant and L3Harris have agreed that the participant should retire with special benefits.
- *Amount:* The lifetime income benefit is unreduced for early retirement. A supplemental benefit of \$1,950 is payable until age 62 and 1 month and a Medicare supplement of \$52 is payable at age 65.

Special Medicare Part B Reimbursement Benefit	<p>This benefit is payable to participants retiring from active service with a retirement or disability pension, and to surviving spouses of such participants, as well as to surviving spouses of employees who die in active service.</p> <p>The benefit commences upon attainment of age 65, or receipt by the Board of proof of enrollment in Medicare Part B, whichever is later.</p> <p>The amount of the benefit is \$52.00 per month for months commencing on or after January 1, 2001. In no event shall the benefit paid for a month exceed the generally applicable Medicare Part B premium for that month. The benefit is \$52.00 per month since the Medicare Part B premium is larger.</p> <p>Effective February 1, 2016, the Medicare Part B reimbursement benefit is not available for participants retired after August 1, 2011.</p>
Withdrawal Benefits	<ul style="list-style-type: none"> • <i>Service Requirement:</i> 5 years of vesting service (none for participants hired prior to 4/1/1998) • <i>Amount:</i> Accrued benefit payable at age 65. <p>Participant may also elect to commence payment any time after attainment of age 60, or any time after attainment of age 55 with 85 points (points measured using credited service), subject to a benefit reduction of 5/9 of 1% for each of the first 60 months by which the commencement date precedes age 65, plus 5/18 of 1% for each such month in excess of 60.</p> <p>If the actuarial equivalent lump sum amount of a deferred vested benefit is under \$1,000, this sum will be paid automatically.</p>
Death Benefits	<p>For deaths occurring in service, after attainment of eligibility to retire and married to surviving spouse at least one year: an amount payable for the life of the surviving spouse equal to 60% of the benefit that would have been payable had the employee retired on the date of his death and elected the Survivorship Option.</p> <p>For deaths occurring after attainment of eligibility for the Withdrawal Benefit but prior to eligibility for retirement and prior to benefit commencement: an amount payable for the life of the surviving spouse on or after the date the participant's Withdrawal Benefit could have commenced equal to 60% of the benefit that would have been payable had the participant elected the Survivorship Option.</p> <p>Survivorship Option: Benefit otherwise payable to employee is reduced by 5%, with an additional reduction of 0.5% for each year in excess of 5 years up to 10 years by which the spouse's age is less than the employee's, and with an offsetting increase of 0.5% for each year in excess of 5 by which the spouse's age exceeds the employee's.</p>

Actuarial Assumptions and Methodologies

Certain assumptions are prescribed as noted below. The other assumptions are estimates derived from historical and recent experience as well as market observations, combined with professional judgment about future expectations. Segal's report as of December 2017 shows a recent analysis upon which these assumptions are based.

Interest:

The interest rates used for the 2022 plan year are the 24-month average corporate bond segment rates for September 2021 (a four-month lookback) subject to funding stabilization. Under stabilization, the interest rates used for funding purposes are calculated in the usual manner (24-month average corporate bond rates) but are then constrained to be within a corridor around a 25-year average of those same bond rates. Each of the three segments of the yield curve reflecting the 25-year average rates is constrained to be no less than 5%. For 2022, the stabilization corridor is 5%. It will remain at 5% through 2030 and then increase by 5% beginning in 2031 until it reaches 30% for 2035. The interest rate description above reflects that the plan sponsor elected to apply the ARPA provisions beginning with the 2022 plan year. The rates are as follows:

	Payments in the First 5 Years	Payments in Years 6 – 20	Payments Thereafter	Effective Interest Rate
Current Year, reflecting stabilization	4.75%	5.18%	5.92%	5.26%
Current Year, without stabilization	1.07%	2.68%	3.36%	2.69%
Prior Year, reflecting stabilization	3.32%	4.79%	5.47%	4.77%
Prior Year, without stabilization	2.22%	3.38%	3.92%	3.40%

The interest rates used to determine the PBGC variable-rate premium are:

	Payments in the First 5 Years	Payments in Years 6 – 20	Payments Thereafter
Current Year	1.16%	2.72%	3.10%
Prior Year	0.51%	2.26%	3.01%

These interest rates are based on the plan sponsor's election (an election that can currently be changed) and are subject to the constraints established by law.

Mortality Rates	RP-2006 combined employee and annuitant healthy mortality tables, projected through the valuation date plus a number of years that varies by age and sex per IRC 1.430(h)(3)-1(c)(3)(ii)(A) using scale MP-2020. This assumption is one of the choices allowed by the regulations.		
Benefit Election	Life annuity for unmarried participants. 60% joint and survivor for married participants. This assumption is based on historical and current data, adjusted to reflect estimated future experience and professional judgment.		
Sample Termination Rates	Age	Male	Female
	20	9.90%	14.90%
	25	9.90	14.90

Description of Weighted Average Retirement Age	Age 61, determined as follows: The individual weighted average retirement age is calculated as the sum of the product of each potential past or future retirement age times the probability of surviving to that age and then retiring at that age, assuming no other decrements.		
Retirement From Inactive Status	Age 65		
Percent Married	70% for male participants and 55% for female participants. Spouse is assumed to be the opposite gender.

Age Difference	Male spouses are assumed to be three years older than female spouses.			
Administrative Expenses	<p>An expense assumption is required under the funding rules. Plan-related expenses of \$110,000 (previously, \$130,000) are expected to be paid by the plan during the year.</p> <p>This assumption is based on recent historical data, adjusted to reflect PBGC premium changes, input from the plan sponsor, and estimated future experience and professional judgment.</p>			
Asset Method	<p>As selected by the plan sponsor, assets are determined by averaging the market value as of the valuation date and the adjusted market values as of the preceding two years. The resulting value is limited to between 90% to 110% of market value of assets. The adjusted market values reflect cash flow and expected earnings to the valuation date. The expected earnings are based on an assumed rate of return of 7.75% for 2020 and 7.50% for 2021, not to exceed the applicable third segment rate of 5.94% for 2020 and 5.47% for 2021.</p>			
Funding Method	<p>Funding method is unit credit actuarial cost method, as prescribed by law. The liability is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.</p> <p>If all assumptions are met (including the investment earnings implicitly assumed by the interest rate), funding the plan at the minimum required contribution level is generally designed to achieve a 100% funded status within fifteen years. Once that is achieved, or for overfunded plans, the required contribution will generally equal the target normal cost reduced by any overfunding.</p>			
Non-Prescribed Assumption Changes Since Prior Valuation	Assumption Types	Current Assumptions	Prior Assumptions	Reason for Changes
	Administrative Expenses	\$110,000	\$130,000	Experience

Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are presented to meet regulatory, legislative and client requirements. Our Actuarial Technology and Systems unit, comprising both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible actuary.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
