FINANCIAL STATEMENTS

DECEMBER 31, 2022 AND 2021

INDEPENDENT AUDITOR'S REPORT

Board of Trustees
Southern California General Sales Employers
and United Food and Commercial Workers
Unions Pension Fund
2220 Hyperion Avenue
Los Angeles, California 90027

Members of the Board:

Opinion

We have audited the accompanying financial statements of Southern California General Sales Employers and United Food and Commercial Workers Unions Pension Fund (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 ("ERISA"), which comprise the statements of net assets available for benefits as of December 31, 2022 and 2021, and the related statements of changes in net assets available for benefits for the years then ended, and the statement of accumulated plan benefits as of January 1, 2022, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2022 and 2021, and the changes in its net assets available for benefits for the years then ended, and the accumulated plan benefits as of January 1, 2022, and the changes in its accumulated plan benefits for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the plan; and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

NOTE 1 - DESCRIPTION OF PLAN

The Southern California General Sales Employers and United Food and Commercial Workers Unions Pension Fund (the "Plan") is a multiemployer defined benefit pension plan providing benefits to participants covered by applicable collective bargaining agreements between employers in the Southern California Retail General Sales Industry and Southern California United Food and Commercial Workers Unions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. PARTICIPANTS SHOULD REFER TO THE PLAN AGREEMENT AND ANY AMENDMENTS REGARDING SPECIFIC PROVISIONS OF THE PLAN.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Accounting

The financial statements of the Plan were prepared on the accrual basis of accounting.

B. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

C. Employer Contributions

Employer contributions to the Plan have been suspended. See Note 7-D.

D. Employer Payroll Compliance Program

Employer remittance reports were accepted as submitted, without examination or verification of employers' payroll records. The system of internal control provides for examination of employers' records by the Plan's independent auditors under a separate employer payroll compliance program.

E. Investments

Accounting principles generally accepted in the United States of America require disclosures about fair value measurement and establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 — Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

E. Investments (Continued)

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability; and
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Level 1 investments consist of mutual funds that are actively traded on a national exchange. Level 2 investments consist of a short-term investment fund that is recorded at amortized cost, which approximates fair value. The 103-12 investment entity is valued at net asset value or its equivalent.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables represent the Plan's fair value hierarchy for its financial assets measured at fair value on a recurring basis:

^A In accordance with ASC 820, investments measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the statements of net assets available for benefits.

The Plan's common/collective trusts and 103-12 investment entity are valued at net asset value. The unfunded commitments and significant terms of redemption for the Plan's investments at NAV are as follows:

	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Bridgewater All Weather Portfolio Limited	\$ 8,814,131	None	Monthly	5 Business Days

The investment strategies for investments valued at net asset value are as follows:

Bridgewater All Weather Portfolio Limited seeks to provide attractive returns with relatively limited risks, with no material bias to perform better or worse in any particular type of economic environment. To achieve this objective, the Fund holds investments in different asset classes that have different biases to economic conditions.

Valuations are furnished by the investment managers and the corporate co-trustee. Investment purchases and sales are recorded on the transaction trade date. Interest, dividends and other investment income are recorded on the accrual basis. Realized gain (loss) from sale of investments and unrealized appreciation or depreciation in the fair value of investments are reported as net realized and unrealized appreciation (depreciation) in fair value of investments. Form 5500 requires realized gains and losses to be reported as the difference between proceeds from the sale or redemption of investments and the current (market) value of the investment at the beginning of the year, for those investments on hand at the beginning of the year, or the purchase price of investments acquired during the year. The different methods of computing realized gain or loss and the residual unrealized appreciation (depreciation) in fair value of investments results in differences in reporting on the financial statements and the Form 5500.

F. Benefits

(1) Pension Benefits

Pension benefits are charged to expense when benefits are paid. Included in Pension Benefits is a "thirteenth monthly" benefit check approved by the Board of Trustees as a permanent benefit. The total "thirteenth monthly" benefits paid in 2022 for retirees and beneficiaries eligible for benefits on December 2, 2022 was \$491,841. The total "thirteenth monthly" benefits paid in 2022 for retirees and beneficiaries eligible for benefits on December 2, 2021 was \$501,575.

(2) Death Benefits

In 1985, the Plan was amended to provide for payment of death benefits for retirees who retired prior to April 1, 1985. The amount of the death benefit that is payable when a retiree dies is based on the number of years of credited service earned. The liability for future death benefits payable upon the death of qualifying retirees is included in the actuarial present value of accumulated plan benefits.

G. Transactions with Related Parties

The Plan shares common administration expenses with the retail drug industry plans administered at the same location. The Southern California United Food and Commercial Workers Unions and Drug Employers Pension Fund pays for common administration expenses and allocates these expenses to the other plans based on a predetermined allocation formula. The allocation rate applicable to the Plan was 6.0%, effective January 1, 2022 and 4.0% for the period January 1, 2019 through December 31, 2021.

H. Tax-Exempt Status

No provision for federal or state income tax is made. The Plan has received tax-exempt status from the federal government under Internal Revenue Code Section 501(a) and the state of California under Revenue and Taxation Code Section 17501.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken a tax position that more likely than not would not be sustained upon examination by a tax authority. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

I. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service participants have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. Benefits under the Plan are based on the participants' total credited services, which is the sum of (a) past service credits and (b) future service credits. Benefits payable under all circumstances –

retirement, death and disability – are included, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was estimated by actuaries from The Segal Company and is the amount that results from applying actuarial assumptions and methods to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. The significant actuarial assumptions and methods used at January 1, 2022, the date of the last actuarial review, were (actuarial assumptions used in the prior year are in [brackets]); (a) assumed average rate of return of 4.75% per annum, (b) mortality rates: Postretirement Healthy – Pri-2012 Healthy Retiree Amount-weighted Mortality Tables, generationally projected using Scale MP-2021, Preretirement Healthy – Pri-2012 Employee Amount-weighted Mortality Tables, generationally projected using Scale MP-2021, Postretirement Disabled – Pri-2012 Disabled Retiree Amount-weighted Mortality Tables, generationally projected using Scale MP-2021, (c) assumed retirement age of 65 or service requirement, if later, (d) entry age normal actuarial cost method, (e) no liabilities are held for inactive employees age 80 and over, and (f) other assumptions and methods for termination rates before retirement, future benefit accruals – 1,625 hours per year at credited contribution rate, percent married – 85% for males and 60% for females, age of spouse – females 4 years younger than males, administrative expenses – \$475,000 per year, payable monthly, unknown data for participants, benefit election, current liability assumptions and asset valuation.

The foregoing actuarial assumptions and methods are based on the presumption that the Plan will continue unchanged. Were the Plan to terminate, different actuarial assumptions, methods and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 3 - FUNDING POLICY

The Board of Trustees has established a funding policy and method in order to promote the purpose of the Plan and to ensure compliance with ERISA. Each employer contributed to the Plan such amounts and at such times as were required by the applicable provisions of the collective bargaining agreements. Contributions were based on various hourly contribution rates, such rates being included in the computation of the participant's benefit. Contributions had been made on a monthly basis throughout the year. See Note 7-D.

NOTE 4 - PLAN TERMINATION

Although there has been no expressed intent to do so, the Plan may be terminated in accordance with the provisions of ERISA (as amended) and related regulations. The Plan may be terminated by an amendment which provides that participants will receive no credit under the Plan for credited service with an employer after a specified date, or which causes the Plan to become a defined contribution plan; withdrawal of every employer; or through proceedings instituted by the Pension Benefit Guaranty Corporation (PBGC) when one of certain conditions exists with respect to the Plan.

**SOUTHERN CALIFORNIA GENERAL SALES EMPLOYERS AND
UNITED FOOD AND COMMERCIAL WORKERS UNIONS
PENSION FUND**

**NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2022 AND 2021**

NOTE 4 - PLAN TERMINATION (Continued)

If the Plan is terminated by the withdrawal of all employers and if the value of nonforfeitable (vested) benefits exceeds the value of Plan assets, the Board of Trustees must amend the Plan to reduce benefits, but only to the extent necessary to pay all of the nonforfeitable benefits when due and to reduce accrued benefits only to the extent that those benefits are not eligible for the guarantee of the PBGC. If, after implementation of the reduction in benefits, the Plan's available resources are not sufficient to pay benefits when due for the plan year, the Plan will be considered insolvent.

Plan benefits are guaranteed by the PBGC only if the Plan is insolvent. The PBGC, however, will not guarantee benefits or benefit increases in effect for fewer than 60 months nor will it guarantee a benefit or benefit increase in effect for fewer than 60 months before the first day of the plan year in which a plan amendment to reduce benefits is taken into account in determining the minimum contribution requirement for the plan year in accordance with provisions set forth in ERISA.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

NOTE 5 - EMPLOYER WITHDRAWAL LIABILITY

The Plan adopted the presumptive method of computing employer withdrawal liability for the year ended December 31, 2021. Under this method, the liability for unfunded vested benefits as of December 31, 2021 was \$2,875,884.

NOTE 6 - RISKS AND UNCERTAINTIES

The Plan invests in various investment securities that are exposed to various risks such as interest rate, market fluctuations, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

D. Contributions Suspension

Effective November 1, 1984, in accordance with the collective bargaining agreements, employer contributions to the Plan were suspended for the term of the agreement and remain suspended through 2022. During the period employer contributions are suspended, employees continue to receive credits as if contributions were being made at the rates stipulated in the collective bargaining agreements.

E. Unfunded Liability/Overfunding Surplus

The latest actuarial review of the Plan was prepared by The Segal Company as of January 1, 2022. As of that date, the Plan had an overfunded surplus of \$16,643,106.

NOTE 8 - SUBSEQUENT EVENTS

Management has evaluated subsequent events through September 11, 2023, the date on which the financial statements were available to be issued. There were no material subsequent events that required recognition or additional disclosures in these financial statements.

Rationale for Demographic and Noneconomic Assumptions	Current data is reviewed in conjunction with each annual valuation. Based on professional judgment, no assumption changes are warranted at this time.
Mortality Rates	<i>Postretirement Healthy:</i> Pri-2012 Healthy Retiree Amount-weighted Mortality Tables, generationally projected using Scale MP-2021. <i>Preretirement Healthy:</i> Pri-2012 Employee Amount-weighted Mortality Tables, generationally projected using scale MP-2021. <i>Postretirement Disabled:</i> Pri-2012 Disabled Retiree Amount-weighted Mortality Tables, generationally projected using Scale MP-2021. The underlying healthy tables with the generational projection to the ages of participants as of the measurement date reasonably reflect the mortality experience of the Plan as of the measurement date. These mortality tables were then adjusted to future years using the generational projection to reflect future mortality improvement between the measurement date and those years. The mortality rates were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of deaths and the projected number based on the assumptions over the most recent 5 years.

² The combined select rates for withdrawal and disability are shown above. These rates apply for the first 10 years from the entry date, defined as current age minus years of Vesting Credits. Withdrawal rates do not apply after these 10 years.

The termination rates and disability rates were based on historical and current demographic data, adjusted to reflect the estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of terminations and disability retirements and the projected number based on the assumption over the most recent 5 years.

Retirement Age for Actives and Inactive Vested Participants

Age 65 or service requirement, if later.

The retirement age was based on historical and current demographic data, adjusted to reflect plan design, estimated future experience and professional judgment. As part of the analysis, the ages of new retirees from active and inactive status were reviewed over the most recent 5 years.

Future Benefit Accruals

1,625 hours per year at credited contribution rate and 0.8 year of Credited Service earned per year.

The future benefit accruals were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the assumed and the actual benefit accruals over the most recent 5 years.

Unknown Data for Participants

Same as those exhibited by participants with similar known characteristics. If not specified, participants are assumed to be male.

Definition of Active Participants

Active participants are defined as those with at least 300 hours in the most recent Plan Year and who have accumulated at least one Vesting Credit, excluding those who have retired as of the valuation date.

Section 3: Certificate of Actuarial Valuation

Exclusion of Inactive Vested Participants	Inactive participants over age 80 excluded from the valuation, with 10 inactives excluded in this valuation. The exclusion of inactive vested participants over age 80 was based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, the ages of new retirees from inactive vested status were reviewed.
Percent Married	85% for males and 60% for females.
Age of Spouse	Spouses of male participants are four years younger and spouses of female participants are four years older.
Benefit Election	All future pensioners are assumed to elect the Single Life Annuity at retirement. The benefit elections were based on historical and current demographic data, adjusted to reflect the plan design, estimated future experience and professional judgment. As part of the analysis, a comparison was made between the assumed and the actual option election patterns over the most recent 5 years.
Delayed Retirement Factors	Inactive vested participants who are assumed to commence receipt of benefits after attaining normal retirement age qualify for delayed retirement increases. Under the plan, the increases are based on the UP84 mortality table and ERISA 4044 interest rates used by multiemployer plans terminating by mass withdrawal, as of the first month of the plan year of the annuity starting date. For valuation purposes, the factor is based on UP84 mortality and 3% interest.
Net Investment Return	4.75% The net investment return assumption is a long-term estimate derived from historical data, current and recent market expectations, and professional judgment. As part of the analysis, a building block approach was used that reflects inflation expectations and anticipated risk premiums for each of the portfolio's asset classes as provided by Segal Marco Advisors, as well as the Plan's target asset allocation.
Annual Administrative Expenses	\$475,000, payable monthly (equivalent to \$463,250 payable at the beginning of the year) or 158.4% of Normal Cost. The annual administrative expenses were based on historical and current data, adjusted to reflect estimated future experience and professional judgment.
Actuarial Value of Assets	The market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the projected return on the actuarial value, and is recognized over a five – year period. The actuarial value is further adjusted, if necessary, to be within 20% of the market value.
Actuarial Cost Method	Entry Age Normal Actuarial Cost Method. Entry Age is defined as the current age minus years of Vesting Credit. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are allocated by service, with Normal Cost determined as if the current benefit accrual rate had always been in effect.
Benefits Valued	Unless otherwise indicated, includes all benefits summarized in Exhibit K.
Current Liability Assumptions	<i>Interest:</i> 2.22%, within the permissible range prescribed under IRC Section 431(c)(6)(E) <i>Mortality:</i> Mortality prescribed under IRS Regulations 1.431(c)(6)-1 and 1.430(h)(3)-1(a)(2); RP-2014 employee and annuitant mortality tables, adjusted backward to the base year (2006) using scale MP-2014, projected forward generationally using scale MP-2020 (previously, the MP-2019 scale was used).

Section 3: Certificate of Actuarial Valuation

Estimated Rate of Investment Return	<i>On actuarial value of assets (Schedule MB, line 6g): 5.4%, for the Plan Year ending December 31, 2021</i> <i>On current (market) value of assets (Schedule MB, line 6h): 5.8%, for the Plan Year ending December 31, 2021</i>
Actuarial Models	Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are prepared to meet regulatory, legislative and client requirements. Our Actuarial Technology and Systems unit, comprised of both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible Enrolled Actuary.

Section 3: Certificate of Actuarial Valuation

Justification for Change in Actuarial Assumptions (Schedule MB, line 11)	For purposes of determining current liability, the current liability interest rate was changed from 2.43% to 2.22% due to a change in the permissible range and recognizing that any rate within the permissible range satisfies the requirements of IRC Section 431(c)(6)(E) and the mortality tables and mortality improvement scales were changed in accordance with IRS Regulations 1.431(c)(6)-1 and 1.430(h)(3)-1.

Section 4: Actuarial Certification

Schedule MB, Line 6f(1) - Description of Withdrawal Liability Interest Rate

Exhibit B: Actuarial Assumptions and Methods

Investment Return

To the extent the vested benefits are matched by the market value of plan assets on hand: interest assumptions prescribed by the Pension Benefit Guaranty Corporation under 29 C.F.R. Ch. XL, Part 4044, which are in effect for the applicable withdrawal liability valuation date, are used.

PBGC Interest Rates as of December 31, 2021:

- First 20 years 2.40%
- After 20 years 2.11%

To the extent the vested benefits are not matched by plan assets (at market), the interest assumption is the same as used for plan funding: 4.75%

The portion of the vested benefits that is matched by readily available assets is determined by comparing the total present value of vested benefits plus expenses – at PBGC rates – with the total market value of assets; each vested benefit is treated as covered by assets to the same extent as all other vested benefits.

The present value of vested benefits is based on a blend of two liability calculations. The first calculation is performed on a market value basis, using discount rates selected based on estimated annuity purchase rates available for benefits being settled, because withdrawal liability essentially settles an employer's obligation to the Plan. The second calculation uses the interest rate determined by the plan actuary for minimum funding, based on the expected return on current and future assets. For benefits that could be settled immediately, because assets on hand are sufficient to cover their market value, the first calculation basis is used: annuity purchase rates promulgated by PBGC under ERISA Sec. 4044 for multiemployer plans terminating by mass withdrawal on the measurement date. For benefits that cannot be settled immediately because they are not currently funded, the calculation uses the second basis: the interest rate used for plan funding calculations.

Mortality Rates

Postretirement healthy: Pri-2012 Healthy Retiree Amount-weighted Mortality Tables, with generational projection using Scale MP-2021.

Postretirement disabled: Pri-2012 Disabled Retiree Amount-weighted Mortality Tables, with generational projection using Scale MP-2021.

Preretirement: Pri-2012 Employee Amount-weighted Mortality Tables, with generational projection using Scale MP-2021.

The underlying tables with the generational projection to the ages of participants as of the measurement date reasonably reflect the mortality experience of the Plan as of the measurement date.

These mortality tables were then adjusted to future years using the generational projection to reflect future mortality improvement between the measurement date and those years.

The mortality rates were based on historical and current demographic data, adjusted to reflect estimated future experience and professional judgment. As part of the analysis, a comparison was made between the actual number of deaths and the projected number based on the current assumption over the most recent 5 years.

Exhibit K: Summary of Plan Provisions

(Schedule MB, Line 6)

This exhibit summarizes the major provisions of the Plan included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Year	January 1 through December 31
Pension Credit Year	January 1 through December 31
Plan Status	Ongoing plan
Normal Pension	• <i>Age and Service Requirements:</i> 65 and 5 years of Vesting Credit or the fifth anniversary of participation • <i>Amount:</i> \$18 per month for each year of Credited Past Service, plus 15% of Credited Supplementary Service imputed contributions from July 1, 1964 through June 30, 1970, plus 15% of Future Service contributions through 1975, plus 5% of Future Service contributions from 1976 through 1982, plus 4% of actual or credited Future Service contributions after 1982. Benefits are based on the 30 years of Credited Service which produce the highest benefit. Accrued benefits for active participants were increased by 50% for service through 1991, and another 35% for service through 1994. The minimum monthly benefit is \$45 times years of Credited Service (limited to 30 years). A 13th check is paid each December to retired participants.
Early Retirement	• <i>Age and Service Requirements:</i> 55 and 10 years of Credited Service • <i>Amount:</i> Normal pension accrued reduced by 6% for each of the first 5 years that the retiring participant is younger than age 65 and 4% for each of the next 5 years.
Disability	• <i>Age and Service Requirements:</i> 10 years of Credited Service • <i>Other Requirement:</i> No earlier than the date Social Security disability benefit payments are effective • <i>Amount:</i> Accrued Normal Retirement Benefit
Vesting	• <i>Age and Service Requirements:</i> 5 years of Vesting Credit • <i>Amount:</i> Accrued Normal Retirement Benefit, payable commencing at Normal Retirement Age or, on a reduced basis, as early as age 55, if eligible. The reduced benefit is calculated as described under “Early Retirement” above. • <i>Normal Retirement Age:</i> Later of age 65 and fifth anniversary of participation If a participant delays applying and benefits are deferred beyond the Normal Retirement Age, then the monthly amount of benefit payable as of the Annuity Starting Date will be the actuarial equivalent of a benefit commencing as of the first day of the month following the month in which the Participant attained Normal Retirement Age, unless the participant elects a Retroactive Annuity Starting Date, in which case the delayed benefits will be paid in the form of a lump sum.

Section 3: Certificate of Actuarial Valuation

Spouse's Pre-Retirement Death Benefit

- *Age and Service Requirements:* 5 years of Vesting Credit
- *Amount:* 50% of the benefit participant would have received had he or she retired the day before death and elected the joint and survivor option. If the participant died prior to early retirement eligibility, the spouse's benefit is deferred until that time.

Post-Retirement Death Benefit

- *Lump Sum Benefit:* For participants who retired before April 1, 1985 with at least 10 years of service, a lump sum benefit is payable to the named beneficiary. The amount is \$1,000 for 10 years of service, \$1,002 for 11-12 years of service, plus \$83.50 for each additional year of service to a maximum benefit of \$2,500.
- *Joint and Survivor:* If the participant is married, pension benefits are paid in the form of a 50% joint and survivor annuity unless this form is rejected by the participant and spouse. If it is not rejected, the benefit amount otherwise payable is reduced to reflect the joint and survivor coverage. Under this option, if the spouse predeceases the participant, the benefit amount will revert to the amount that would have been paid had this option not been elected. If this option is rejected, or if the participant is not married, benefits are payable for the life of the participant or in any other available optional form elected by the participant in an actuarially equivalent amount.

Optional Forms of Benefits

- Single Life Annuity
- 50% Joint and Survivor Annuity ("QJSA")
- 75% Joint and Survivor Annuity ("QOSA")

Service Schedules

- *Credited Past Service:* Credited Past Service is granted for continuous employment before July 1, 1964 at the rate of 1/12 year for each 150 hours of service in covered employment.
- *Credited Supplementary Service:* A participant is entitled to 1/12 year for each 150 hours of service in covered employment from July 1, 1964 to January 1, 1974 for which no pension contributions were required to be made to the Plan.
- *Credited Future Service:* Beginning in 1976, a participant who works at least 1,800 hours in a Calendar Year receives one year of Credited Future Service. Fractional credit is given based on hours of service in covered employment (minimum of 300 hours) divided by 2,000.
- *Vesting Credit:* Beginning in 1976, a participant who works at least 750 hours in a Plan Year receives one year of Vesting Credit. Fractional credit is given based on hours of service (minimum of 300 hours) divided by 2,000.

Break in Service Rules

- *One-Year Break:* A participant incurs a One-Year Break in Service upon failure to work at least 300 hours of service in covered employment in a Plan Year.
- *Permanent Break:* A non-vested participant incurs a Permanent Break in Service if the number of consecutive One-Year Breaks in Service is at least five and it equals or exceeds the number of full years of Vesting Credit previously accumulated. At this time, all accumulated Vesting Credit and Credited Service are cancelled.

Section 3: Certificate of Actuarial Valuation

Participation Rules	• <i>Participation:</i> An employee becomes a “Participant” upon completion of at least 600 hours of service in any Plan Year or in any two consecutive Plan Years. • <i>Termination of Participation:</i> A Participant who incurs a One-Year Break in Service ceases to be a Participant as of the last day of the Plan Year which constituted the One-Year Break in Service unless he or she has retired or attained vested rights.
Separation in Service	A participant who fails to earn at least 300 hours of covered service during a Plan Year or begins to receive retirement benefits incurs a Separation in Service at the end of the Plan Year.
Credited Contribution Rate	The average credited contribution rate as of January 1, 2022 is \$0.33 per hour.
Changes in Plan Provisions	There were no changes in plan provisions reflected in this actuarial valuation.

Section 3: Certificate of Actuarial Valuation

Schedule of FSA Bases (Charges) (Schedule MB, Line 9c)

As of January 1, 2022, there were no amortization charges in the Funding Standard Account.

Section 3: Certificate of Actuarial Valuation

Schedule of FSA Bases (Credits) (Schedule MB, Line 9h)

As of January 1, 2022, there were no amortization credits in the Funding Standard Account. Due to the plan's overfunded position, no FSA base was established as of January 1, 2022 to reflect the change in actuarial accrued liability resulting from the net experience gain.

Section 3: Certificate of Actuarial Valuation

Justification for Change in Actuarial Assumptions (Schedule MB, line 11)	For purposes of determining current liability, the current liability interest rate was changed from 2.43% to 2.22% due to a change in the permissible range and recognizing that any rate within the permissible range satisfies the requirements of IRC Section 431(c)(6)(E) and the mortality tables and mortality improvement scales were changed in accordance with IRS Regulations 1.431(c)(6)-1 and 1.430(h)(3)-1.
