## **Independent Auditor's Report**

To the Plan Administrator  
Westmoreland Retirement Plan

### ***Scope and Nature of the ERISA Section 103(a)(3)(C) Audits***

We have performed audits of the financial statements of Westmoreland Retirement Plan (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2022 and 2021 and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of January 1, 2022 and the related statement of changes in accumulated plan benefits for the year then ended and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from qualified institutions as of December 31, 2022 and 2021 and for the years then ended stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

### ***Opinion***

In our opinion, based on our audits and on the procedures performed as described in the *Auditor's Responsibilities for the Audits of the Financial Statements* section:

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (GAAP).
- The information in the accompanying financial statements related to assets held by and certified to by qualified institutions agrees to, or is derived from, in all material respects, the information prepared and certified by institutions that management determined meets the requirements of ERISA Section 103(a)(3)(C).

### ***Basis for Opinion***

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audits of the Financial Statements* section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

To the Plan Administrator  
Westmoreland Retirement Plan

### ***Responsibilities of Management for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern within one year after the date that the financial statements are issued or available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments; administering the Plan; and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or that may become due to such participants.

### ***Auditor's Responsibilities for the Audits of the Financial Statements***

Except as described in the *Scope and Nature of the ERISA Section 103(a)(3)(C) Audits* section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that audits conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing audits in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audits.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information except for obtaining and reading the certifications, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of GAAP.

Accordingly, the objective of the ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with GAAP.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits, significant audit findings, and certain internal control-related matters that we identified during the audits.

To the Plan Administrator  
Westmoreland Retirement Plan

***Supplemental Schedules Required by ERISA***

The supplemental schedules of assets held at end of year as of December 31, 2022 and reportable transactions for the year ended December 31, 2022 are presented for the purpose of additional analysis and are not a required part of the financial statements but are supplemental information required by the DOL's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by qualified institutions agrees to, or is derived from, in all material respects, the information prepared and certified by institutions that management determined meets the requirements of ERISA Section 103(a)(3)(C).

## NOTES TO FINANCIAL STATEMENTS

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### *Basis of Financial Statement Presentation*

The Westmoreland Retirement Plan, or the "Plan," is a defined benefit plan covering all eligible employees of Texas Westmoreland Coal Company (formerly Northwest Resources Company), Western Energy Company, Westmoreland Mining, LLC, Westmoreland Coal Company, Dakota Westmoreland Corporation, Westmoreland Savage Corporation, and San Juan Coal Company (collectively, the "Company"), provided they are not covered by a collective bargaining agreement that does not specifically provide for coverage under the Plan or they are not leased employees. The Plan resulted from the merger of the Westmoreland Coal Company Retirement Plan ("Westmoreland Coal Plan"), the Northwest Resources and Western Energy Pension Plan ("Northwest Plan"), and the Beulah & Savage Salaried Employees' Pension Plan ("Beulah & Savage Plan") and was established on May 1, 2001 and subsequently amended and restated effective January 1, 2016. On November 30, 2002, the assets of the prior Westmoreland Coal Plan and the Northwest Plan were merged into the Beulah & Savage Plan. Effective December 1, 2002, the Plan's name was changed to the Westmoreland Retirement Plan. Effective January 1, 2018, the Navajo Mine Retirement Plan was transferred into the Plan. Effective July 31, 2019, the Beulah and Savage Hourly Employees' Pension Plan and the Westmoreland Elkol-Sorensen Mine Pension Plan were transferred into the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

During 2021, the Plan was amended to have certain benefits as of April 21, 2021 and November 15, 2021 be paid through an immediate annuity purchase from Minnesota Life Insurance Company and Pacific Life Insurance Company, respectively, in the same form as currently being paid. On May 3, 2021 and November 23, 2021, the Plan purchased a group annuity contract from Minnesota Life Insurance Company and Pacific Life Insurance Company for approximately \$12,487,452 and \$51,960,154, respectively. This resulted a transfer of benefit obligations of \$64,447,606, and is reported in the accompanying statement of changes in the net assets available for benefits.

The accompanying financial statements have been prepared on the accrual basis of accounting and present the net assets available for benefits, changes in those net assets, accumulated plan benefits and changes in the accumulated plan benefits.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions in net assets available for benefits and accumulated plan benefits during the reporting period. Actual results could differ significantly from those estimates.

#### *Investments*

The Plan's investments are stated at fair value as reported by the Plan custodian.

Pooled separate accounts are valued at net asset value ("NAV"), as a practical expedient for fair value, of units held by the Plan at year-end, which is based on the quoted market prices of the securities underlying the investments. There are no unfunded commitments, and the units may be redeemed on a daily basis.

Registered investment company mutual funds are recorded at quoted market values.

U.S. government securities, corporate bonds and municipal and foreign government securities are valued using evaluated bid prices from approved pricing services when available and appropriate based on the conditions of the market. If a price cannot be located from either the primary or secondary sources, or if the market is determined to be illiquid or inactive, other appropriate sources, which may include the use of an internally developed valuation model, another external pricing vendor or sourcing a price from a broker, may be used.

The guaranteed deposit fund, which is an unallocated contract, invests in the general assets of Empower Annuity Insurance Company (formerly known as Prudential Retirement Insurance and Annuity Company) ("Empower

## NOTES TO FINANCIAL STATEMENTS (CONT.)

Retirement"); however, since there are no specific securities in Empower Retirement's general account related to this contract and due to the contract terms, including the frequency of the interest rate reset intervals, contract value approximates fair value. Contract value represents deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees.

The preceding methods may produce a fair value calculation (or a net asset value calculation for pooled separate accounts) that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Purchases and sales of securities are recorded on a trade-date basis. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Net realized and unrealized gains and losses are reflected in the accompanying statement of changes in net assets available for benefits as net appreciation (depreciation) of investments and is determined as the difference between fair value at the beginning of the year (or date purchased during the year) and selling price or year-end fair value. Changes in market values after the Plan year-end are not reflected in the accompanying financial statements. See *Note 5* for a discussion of fair value measurements.

Pension benefits under the Plan are recorded when paid on a cash basis of accounting and are as follows for the employees hired prior to July 1, 2006:

*Westmoreland Coal Participants* - Employees with five or more years of vesting service are entitled to monthly pension benefits beginning at normal retirement age of 65 equal to the greater of (1), (2) or (3), less (4), as defined below (with capitalized terms being defined within the Plan documents). Employees with less than five years of vesting service are 0% vested until such time.

- (1) 1.2% of the Participant's Average Compensation plus 0.5% of the Participant's Average Compensation in excess of the Participant's Covered Compensation multiplied by the Participant's Years of Credited Service through June 30, 2009 (to a maximum of 30 years);
- (2) 1.2% of the Participant's Average Compensation as of the last day of the Prior Plan Year plus 0.5% of the Participant's Average Compensation as of the last day of the Prior Plan Year in excess of the Participant's Covered Compensation as of the last day of the Prior Plan Year multiplied by the Participant's Years of Credited Service as of the last day of the Prior Plan Year to a maximum of 30 years, if the Participant's Annuity Starting Date was prior to July 1, 2009;
- (3) \$30.00 multiplied by the Participant's Years of Credited Service through June 30, 2009;
- (4) the benefit, if any, provided to the participant under the Westmoreland Coal Company and Affiliated Companies Employees' Retirement Plan.

This benefit may be reduced in certain circumstances.

The Plan permits early retirement at age 55 with at least ten years of vesting service. If the employee is between ages 62 and 65 and has 20 or more years of vesting service, there are no reductions in benefits for early retirement. The Plan permits deferred vested pension payments for employees whose employment is terminated for reasons other than death, retirement, or disability on or after the completion of five years of vesting service.

Married employees will receive their benefits in the form of a reduced joint and 100% survivor annuity unless an alternate method has been selected and properly approved. Unmarried employees will receive their benefits in the form of a single life annuity. Various alternative methods are available to employees with appropriate consent.

*Beulah & Savage Participants* - Employees with five or more years of vesting service are entitled to monthly

### NOTES TO FINANCIAL STATEMENTS (CONT.)

pension benefits beginning at normal retirement age of 65 equal to the greater of the accrued monthly pension defined below or the amount of the accrued monthly pension as determined under the Beulah & Savage Plan as in effect on April 30, 2001. The accrued monthly pension is equal to the participant's years of service (maximum of 35 prior to June 30, 2009) multiplied by the sum of 1.2% of average monthly compensation, as defined, plus 1.6% of average monthly compensation in excess of the social security integration level. The Plan permits early retirement at age 55 with at least five years of vesting service. The Plan permits deferred vested pension payments for employees whose employment is terminated for reasons other than death, retirement, or disability on or after the completion of five years of vesting service. Pension payments will generally be made in the form of a monthly annuity, unless the participant elects to receive a lump-sum distribution.

Married employees will receive their benefits in the form of a reduced joint and 50% survivor annuity unless an alternate method has been selected and properly approved. Unmarried employees will receive their benefits in the form of a single life annuity. Various alternative methods are available to employees with appropriate consent.

*Texas Westmoreland Coal Participants* - Employees are entitled to monthly pension benefits beginning at the normal retirement age of 65 equal to 0.95% of average compensation up to the social security integration level, plus 1.5% of the part of such compensation in excess of the social security integration level, multiplied by the number of years of service (maximum of 35). The Plan permits early retirement at age 55 with at least 15 years of vesting service. The Plan permits deferred vested pension payments for employees whose employment is terminated for reasons other than death, retirement or disability on or after the completion of five years of vesting service.

Married employees will receive their benefits in the form of a reduced joint and 50% survivor annuity unless an alternate method has been selected and properly approved. Unmarried employees will receive their benefits in the form of a single life annuity. Various alternative methods are available to employees with appropriate consent.

*Western Energy Participants* - Employees of Western Energy Company will receive a monthly benefit equal to the participant's notional account balance divided by an actuarial equivalent life annuity factor. The account balance contains contributions made by Western Energy Company each year that were calculated by multiplying a participant's basic credit percentage, as defined, by eligible earnings; an additional Western Energy Company contribution was calculated by multiplying the additional credit percentage, as defined, by the amount of eligible earnings that are in excess of one-half of the social security wage base, and annual interest that is equal to 6% of the account balance at the beginning of the year. Former participants in the Northwest Plan who would have been eligible to retire before January 1, 2003 receive the greater of the benefits determined under the Northwest Plan, as defined in the prior section, or the benefits defined in this section.

A participant who terminates at a time when they are not entitled to benefits under the early, normal or postponed retirement benefit will be 100% vested if they have completed five years of vesting service. The Plan permits early retirement at age 55 with at least 15 years of vesting service. In the event of early retirement, the monthly benefit will be the participant's account balance divided by an actuarial equivalent life annuity factor. The Plan permits deferred vested pension payments for employees whose employment is terminated for reasons other than death, retirement or disability on or after the completion of five years of vesting service.

Married employees will receive their benefits in the form of a reduced joint and 50% survivor annuity unless an alternate method has been selected and properly approved. Unmarried employees will receive their benefits in the form of a single life annuity. Various alternative methods are available to employees with appropriate consent.

Pension benefits were as follows for employees of all of the above employers hired on or after July 1, 2006 - Employees with five or more years of vesting service were entitled to monthly benefits equal to the greater of 0.75% of the participant's average compensation, as defined, multiplied by the number of years of service, or \$30 multiplied by the number of years of service.

*Basin Participants* - Employees are entitled to monthly pension benefits beginning at the normal retirement

age of 65 based on pension credits earned for each year of participation in the Plan. For each year of participation on and after the original effective date of the Plan (June 1, 1991), the employee earns a monthly pension credit equal to 1.75% of monthly compensation not in excess of \$1,600 plus 2.1% of monthly compensation in excess of \$1,600, unless subject to the special provisions outlined in the Plan related to employees who were in a prior plan.

The Plan permits early retirement at age 55 with at least 10 years of vesting service. Early retirement benefit is calculated using the normal retirement benefit formula, except it is reduced by 5% each year by which the benefit commencement date precedes the first day of the month upon reaching the age of 62. The Plan permits deferred vested pension payments for employees whose employment is terminated for reasons other than death, retirement, or disability on or after the completion of five years of vesting service.

Married employees will receive their benefits in the form of a reduced joint and 50% survivor annuity unless an alternate method has been selected and properly approved. Unmarried employees' beneficiaries will receive no survivor benefits unless mandatory employee contributions were made to a prior plan before January 1, 1974. In that case, the beneficiary is entitled to the accumulated employee contributions plus applicable interest. Various alternative methods are available to employees with appropriate consent.

*San Juan Coal Company Participants* - Participant who retires on or after February 1, 2002 and has attained age 65 is entitled to receive a monthly benefit equal to \$40 multiplied by the participant's years of credited service prior to February 1, 2002, plus \$36 multiplied by the participant's years of service on or after February 1, 2002. Effective February 1, 2004, the past service multiplier for eligible participants employed in surface operations increased from \$40.00 to \$42.00 for periods of service prior to February 1, 2002, and effective February 1, 2007, the past service multiplier increased to \$44.00. One year of credited service is earned for each year in which at least 1,600 hours are worked. Partial years of credited service can also be earned for years in which less than 1,600 hours are worked. Effective April 30, 2006, the Plan was closed to new entrants.

The Plan permits early retirement at age 55 with at least 5 years of vesting service. Early retirement benefit is calculated using the normal retirement benefit formula, except it is reduced by 0.5% for each month the participant is younger than age 60 on the date the early retirement benefit is to commence. An early retirement supplement is available for participants who retire after attaining age 55 when their age plus years of service total at least 85. The early retirement supplement is \$300.00 per month payable until age 62 or death, if earlier.

The surviving spouse of a participant entitled to a benefit that has not commenced at the date of the participant's death is entitled to a survivor benefit. The amount of the survivor benefit is paid at 50% of member's pension benefit to surviving spouse for life or 60 times member's monthly pension benefit to non-spousal beneficiaries over a 60 month period. Additional death benefits are available in the case of deaths resulting from mine accidents.

#### ***Funding Policy***

The Plan is non-contributory; all funding is provided for by the Company. The Company has voluntarily agreed to make contributions to the Plan sufficient to provide the Plan with assets with which to pay pension benefits to Plan participants. For the Plan years ended December 31, 2022 and 2021, minimum funding requirements of the ERISA and the Internal Revenue Code (the "Code") were met.

***Death and Disability Benefits***

Death and disability benefits under the Plan are as follows:

*Westmoreland Coal Participants* - If an active employee dies prior to retirement and has rendered ten years of service, a monthly pension equal to the survivor's annuity is paid to the employee's spouse beginning at the time the employee would have been age 55. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's spouse. If an employee becomes totally disabled before retirement, the employee is immediately eligible for monthly benefits equal to the amount computed in accordance with the pension benefits section above without reduction for early retirement.

*Beulah & Savage Participants* - If an active employee dies prior to retirement and has rendered five years of service, a monthly pension equal to the survivor's annuity is paid to the employee's spouse beginning the month following the employee's death. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's spouse. If an employee becomes totally disabled prior to retirement and has rendered at least five years of service, the employee continues to receive credit for years of service until early retirement age, at which time benefits commence as computed under the pension benefits section above. Participants receive an unreduced pension at age 62 with five years of experience and age 60 with 30 years of experience.

*Texas Westmoreland Coal Participants* - If an active employee dies prior to retirement and has rendered fifteen years of service, a monthly pension equal to 50% of the survivor's annuity is paid to the employee's spouse beginning at the time the employee would have been age 55. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's beneficiary. If an employee becomes disabled prior to retirement and has rendered at least four years of service, the employee is eligible for a deferred benefit as described in the pension benefits section.

*Western Energy Participants* - If an active employee dies prior to retirement and has rendered fifteen years of service, a monthly pension equal to 50% of the employee's account balance divided by an actuarial equivalent life annuity factor is paid to a married employee's spouse or an unmarried employee's designated beneficiary beginning the month following the employee's death. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's beneficiary. If an employee becomes totally disabled prior to retirement and has rendered at least five years of service, the employee receives the employer contributions and interest credits to the account until benefits commence and is eligible for benefits upon completion of the requirements described in the pension benefits section above.

*Basin Participants* - If an employee dies prior to retirement and has rendered ten years of service, a monthly pension is paid in the form of a single life annuity equal to 50% of the amount of monthly benefit entitled to at the time of death to a married employee's spouse beginning the month following the employee's death if the employee had attained the age of 50 at time of death. If the employee was not 50 at time of death, then benefit payments will begin after the employee would have attained the age of 50. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's beneficiary. If an employee becomes totally disabled prior to retirement, the employee continues to accrue benefits as they were accruing at the time they became disabled. When service terminated and the employee was no longer eligible for long-term disability benefits, the provisions governing termination of employment applied and the pension was treated the same as a deferred vesting provision.

*San Juan Coal Company Participants* - If an employee dies prior to retirement and has rendered five years of service, a monthly pension is paid in the form of a monthly payments for life equal to the survivor's portion of the 50% of QJSA (which maybe reduced for early commencement) at the time of death to a married employee's spouse (married for at least 12 months prior to the death) beginning the month following the employee's death if the employee had attained the age of 55 at time of death. If the employee was not 55 at time of death, the benefits payment will begin after the employee would have attained the age of 55. If an employee dies after retirement, the benefit provided by the form of payment elected at retirement is paid to the employee's beneficiary. If an employee

becomes totally disabled prior to retirement, the employee is eligible for a disability retirement benefit if the employment is terminated as a result of total disability. The disability benefit is computed in the same manner as the normal retirement benefit and is equal to greater of the benefit based on years of credited service as of your disability retirement date, or the benefit computed as if you had completed 10 years of credited service. If the employee is entitled to a deferred vested benefit and has a total disability, the employee may elect to have the deferred vested benefit begin prior to age 55. The benefit will be reduced for early payment, but not before age 55.

#### *Administrative Expenses*

Fees incurred and paid directly (or through appreciation) by the Plan for administrative services were \$338,032 and \$626,796, for the years ended December 31, 2022 and 2021, respectively.

#### *Annuity Contract*

In 2021, the Plan purchased an annuity contract to settle the benefit obligations for certain participants currently receiving benefits (see *Note 1*). In 2022, the premium true-up was finalized for the amount presented on the Statements of changes in Net Assets. This contract and related obligations are excluded from the Plan's statements of net assets and statements of changes in net assets, and are reflected in the the statement of accumulated plan benefits and statement of changes in accumulated plan benefits as of and for the year ended December 31, 2021. The premium true-up will be reflected in the statement of accumulated plan benefits and statement of changes in accumulated plan benefits as of and for the year ended December 31, 2022.

### **3. ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS**

Accumulated Plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered prior to the valuation date.

The actuarial present value of accumulated Plan benefits is determined by the Plan's independent actuary using the unit credit actuarial cost method and is the amount that results from applying actuarial assumptions to the accumulated Plan benefits to reflect the time value of money (through discounts and for interest) and the probability of the payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. Actuarial assumptions for the Plan are made as of the beginning of the Plan year. The Statement of Accumulated Plan Benefits and the Statement of Changes in Accumulated Plan Benefits were prepared as of January 1, 2022 and for the year ended January 1, 2022. Had the reports been prepared as of and for the year ended December 31, 2021, no material change would have been necessary. The significant actuarial assumptions used in the valuations as of January 1, 2022 are as follows:

- Accumulated plan benefits are calculated based on provisions of Accounting Standards Codification ("ASC") Topic 960
- The ASC 960, the effective interest rate and expected rate of return were 5.60%
- Life expectancy of participants was obtained from Pri-2012 using MP-2021
- Administrative expenses expected to be paid from Plan assets of \$650,000 per year
- No disabilities were assumed

- Participants are assumed to terminate based on rates of expected termination varying by age:

|-----|-------------------------------------|--------------------|
| 25  | 13.0%                               | 9.3%               |

| 55  | 3.0%                                | 3.0%               |

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

There were no changes recognized in the actuarial methods during the actuarial valuation from the January 1, 2021 valuation to the January 1, 2022 valuation.

The following change in actuarial assumptions was made from the January 1, 2021 valuation to the January 1, 2022 valuation:

- For purpose of calculating the accumulated plan benefits, the ASC 960 mortality table was updated from Pri-2012 using MP-2020, to Pri-2012 using MP-2021.
- The administrative expense assumption changed from \$630,000 for 2021 to \$650,000 for 2022 to better anticipate level of future expenses to be paid from the trust primarily due to anticipated increases in PBGC premiums.

### 4. CERTIFICATION OF INVESTMENTS

Empower Retirement and Prudential Bank & Trust, F.S.B. have certified in writing to the Plan administrator that the stated amounts for investments at fair value as of December 31, 2022 and 2021 and the income earned or losses incurred on the investments for the years ended December 31, 2022 and 2021, as reflected in the accompanying financial statements and the supplemental schedules, are complete and accurate.

The Plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the

# WESTMORELAND RETIREMENT PLAN

## NOTES TO FINANCIAL STATEMENTS (CONT.)

Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator instructed the Plan's auditors not to perform any auditing procedures with respect to the investment information certified by the trustee, except for comparing the information contained therein to information included in the financial statements and the supplemental schedules.

### 5. FAIR VALUE MEASUREMENTS

The Plan classifies valuations into three levels based upon the observability of inputs to the valuation of the Plan's investments. The valuation levels are not necessarily an indication of the risk or liquidity associated with the investments. Classification is based on the lowest level of input significant to the fair value measurement. The three levels of the fair value hierarchy are described below:

- Level 1: Unadjusted quoted prices for identical assets or liabilities in active markets.
- Level 2: Inputs other than quoted prices included in Level 1 that are observable either directly or indirectly. These may include quoted prices for similar assets or liabilities in active markets.
- Level 3: Unobservable inputs to the extent observable inputs are not available and may include prices obtained from single broker quotes. Unobservable inputs reflect the investment's own assumptions and would be based on the best information available under the circumstances.

There were no changes to the valuation techniques used during the period. The Plan had no Level 3 assets measured at fair value.

The following table sets forth the fair value of the Plan's investment assets by level within the fair value hierarchy as of December 31, 2022:

| Description                                     | Level 1             | Level 2               | Level 3     | Total                 |
|-------------------------------------------------|---------------------|-----------------------|-------------|-----------------------|

### 6. INCOME TAXES

The Plan has received a tax determination letter dated March 15, 2017 from the IRS covering changes made to comply with ERISA and indicating that the Plan qualifies under the provisions of Section 401(a) of the Code and is exempt from federal income taxes.

The Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes has been included in the accompanying financial statements.

Generally accepted accounting principles require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that, as of December 31, 2022 and 2021, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Company is currently working with the Department of Labor to complete the audit and does not expect the results of the audit to have an impact on the plan.

### 7. ADMINISTRATION OF THE PLAN

The Company provides, at no cost to the Plan, certain administrative, accounting and legal services to the Plan and also pays the cost of certain outside services for the Plan.

### 8. PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions of ERISA. If the Plan is terminated for any reason, the net assets of the Plan would be allocated, as prescribed by ERISA and its regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for the three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination;

## WESTMORELAND RETIREMENT PLAN

### NOTES TO FINANCIAL STATEMENTS (CONT.)

- Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC"), a U.S. government agency, up to the applicable limitations (discussed below);
- All other vested benefits not insured by the PBGC; or
- All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

#### 9. RISKS, UNCERTAINTIES AND CONCENTRATIONS

The Plan provides for various investments that, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the value of investments will occur in the near term and that such changes could materially affect the investment account balances and the amounts reported in the Statements of Net Assets Available for Benefits.

Additionally, some investments held by the Plan are invested in the securities of foreign companies, which involve special risks and considerations not typically associated with investing in U.S. companies. These risks include devaluation of currencies, less reliable information about issuers, different securities transaction clearance and settlement practices, and possible adverse political and economic developments. Moreover, securities of many foreign companies and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies.

Plan contributions are made and the actuarial value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would have a material impact on Plan contributions and the financial statements.

During the year ended December 31, 2022, no individual investment that accounted for more than 12%. During the year ended December 31, 2021, there were three investments that accounted for 84% of total investments.

#### 10. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Plan assets include pooled separate accounts, a guaranteed deposit fund and cash managed by Empower Retirement and Prudential Bank & Trust, F.S.B.. Empower Retirement and Prudential Bank & Trust, F.S.B. are the custodians and trustees, as defined by the Plan; therefore, these transactions qualify as party-in-interest. These transactions are exempt from prohibited transaction regulations.

#### **11. SUBSEQUENT EVENTS**

The Company has evaluated subsequent events related to the Plan through the auditor's report date, which is the date the financial statements were available for issuance, and determined there were no other subsequent events requiring disclosure.

The Company is currently working with the Department of Labor to complete the audit and does not expect the results of the audit to have an impact on the plan.

**SECTION VIII**

**ACTUARIAL METHODS**

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

**Cost Method**

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

**Target Normal Cost**

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

**Funding Target and Funding Shortfall**

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over 15 years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over 15 years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

| <u>Plan Year</u> | <u>Corridor</u> |
|------------------|-----------------|
| Through 2030     | 95% - 105%      |
| 2031             | 90% - 110%      |
| 2032             | 85% - 115%      |
| 2033             | 80% - 120%      |
| 2034             | 75% - 125%      |
| 2035 and later   | 70% - 130%      |

In the event the 25-year average of either the first, second, or third segment rate falls below 5%, the 25-year average of such rate will be deemed to be 5%.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

**Sponsor Elections**

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

ARPA Effective Date: January 1, 2022 for amortization and January 1, 2021 for segment rates.

**SECTION VIII**

**ACTUARIAL METHODS**

**At-Risk Determination**

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

**Credit Balance**

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

**Asset Valuation Method**

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

The Fair Market Value of Assets used for funds invested in the General Account of an Insurance Company is the stated contract value with a market value adjustment factor. This value is an estimate only and not the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute a final offer by Empower or a final experience adjustment.

MINE PENSION PLAN**

The Plan was established pursuant to The Kemmerer Coal Company - UMWA Western Coal Wage Agreements of 1977 between The Kemmerer Coal Company (the Employer) and the International Union, United Mine Workers of America (the Union). The plan covers employees represented by the Union and working for the Employer on or after December 6, 1977 and certain specified former employees. The Kemmerer Coal Company, as Employer, was succeeded by The Pittsburgh & Midway Coal Mining Company, subsequently renamed Chevron Mining, Inc. and succeeded by the Westmoreland Coal Company. As of March 10, 2019, all future benefit accruals ceased and no new participants will be allowed into the plan. On July 31, 2019, the plan merged into the Westmoreland Retirement Plan.

**SECTION I**

**CHANGES SINCE LAST YEAR'S VALUATION**

**Changes in Pension Plan Provisions**

No changes in the pension plan provisions were recognized with this actuarial valuation.

**Legislated Changes**

The American Rescue Plan Act of 2021 ("ARPA") increased the shortfall amortization period from 7 to 15 years, beginning with the January 1, 2022 valuation, unless the plan sponsor elects to recognize the change earlier. The plan sponsor has elected to apply the 15-year amortization to the January 1, 2022 valuation. Due to the plan's funded status, this change has no impact on the minimum required contribution.

The Infrastructure Investment and Jobs Act (IIJA) of 2021 further extended the phase out of the funding rate corridor until 2031. Prior to IIJA, the 95%-105% corridor around interest rate smoothing was to begin to phase out in 2026, reaching the final 70%-130% corridor in 2030. Under IIJA, the phase out period will commence in 2031 and end in 2035. This change has no impact on the current valuation.

**Changes in Actuarial Assumptions**

The following changes in the prescribed minimum funding actuarial assumptions were effective on January 1, 2022:

- The discount rate assumption (segment rates) was updated to 2022 in accordance with requirements of IRC Section 430(h), IRS regulations, and ARPA.
- The mortality assumption was updated from the IRS 2021 Static Mortality Table to the IRS 2022 Static Mortality Table.

The following change in the non-prescribed minimum funding actuarial assumptions was effective on January 1, 2022:

- The expected expense assumption was increased from \$630,000 to \$650,000.

The following change in the ASC 960 accounting actuarial assumptions was effective on January 1, 2022:

- The mortality improvement scale for the Pri-2012 Total Dataset and Pri-2012 Blue Collar Mortality Tables was updated from MP-2020 to MP-2021.

**Changes in Actuarial Methods**

No changes in actuarial methods were recognized with this actuarial valuation.

**Annuity Purchases**

Two annuity purchases occurred during 2021: on May 3, 2021, \$12,487,452 was paid to purchase the annuities of 348 participants (plus 6 alternate payees pursuant to QDROs), and on November 23, 2021, \$51,960,154 was paid to purchase the annuities of 483 participants (plus 1 alternate payee pursuant to a QDRO, 3 participants with a separate additional benefit, and 10 beneficiaries with delayed payment commencement dates.

**SECTION VIII**

**ACTUARIAL METHODS**

Under the Actuarial Methods described below, if all current assumptions remain constant and are realized, funding at least the Minimum Required Contribution each year will eventually accumulate sufficient plan assets to cover the Funding Target. Future widening of the interest rate stabilization corridor may extend the time period for the plan to become fully funded.

**Cost Method**

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described under “Actuarial Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

**Target Normal Cost**

The Target Normal Cost is the present value of benefits expected to accrue during the plan year plus an estimate of the expenses to be paid from plan assets during the plan year.

**Funding Target and Funding Shortfall**

The Funding Target is the present value of benefits accrued as of the beginning of the plan year and the Funding Shortfall is the excess of the Funding Target over the Actuarial Value of Assets (reduced by the Credit Balance). The initial Funding Shortfall is amortized over 15 years.

In subsequent years, the Funding Shortfall less the present value of prior year amortization installments is amortized over 15 years, and added to any prior year amortization installments.

Segment rates are adjusted as necessary to fall within the specified corridor of the corresponding 25-year average of segment rates for the period ending September 30 of the calendar year preceding the first day of the plan year. The specified corridor is:

| <u>Plan Year</u> | <u>Corridor</u> |
|------------------|-----------------|
| Through 2030     | 95% - 105%      |
| 2031             | 90% - 110%      |
| 2032             | 85% - 115%      |
| 2033             | 80% - 120%      |
| 2034             | 75% - 125%      |
| 2035 and later   | 70% - 130%      |

In the event the 25-year average of either the first, second, or third segment rate falls below 5%, the 25-year average of such rate will be deemed to be 5%.

The adjustments to fall within the specified corridor of the 25-year average of segment rates apply for determining the minimum required contribution and related funded percentages. They do not apply for determining the maximum tax deductible contribution or certain other situations.

**Sponsor Elections**

Discount Rate: Segment rates, with a 4-month lookback

Mortality Table: Prescribed IRS Static Mortality Table – Separate

ARPA Effective Date: January 1, 2022 for amortization and January 1, 2021 for segment rates.

**SECTION VIII**

**ACTUARIAL METHODS**

**At-Risk Determination**

The At-Risk Funding Target is determined by assuming that participants eligible to retire in the current plan year and next 10 plan years retire at the earliest possible date, but not before the end of the plan year. All participants are assumed to elect the optional form resulting in the highest possible present value.

A load is added to the At-Risk Funding Target and At-Risk Target Normal Cost when a plan is At-Risk in at least two years during the preceding four years. The load increases the At-Risk Funding Target by 4% of the Not At-Risk Funding Target plus \$700 per participant, and increases the At-Risk Target Normal Cost by 4% of the Not At-Risk Target Normal Cost.

The Funding Target and Target Normal Cost are calculated by multiplying the Not At-Risk values by 100% minus the Phase-In Percentage, plus the At-Risk values multiplied by the Phase-In Percentage.

**Credit Balance**

The Credit Balance consists of the Carryover Balance from excess contributions prior to the Pension Protection Act (PPA) of 2006, plus the Prefunding Balance from elected excess contributions after the PPA. Balances accumulate with interest and are reduced for amounts applied towards the Minimum Required Contribution, voluntary waivers by the plan sponsor, and compelled waivers to avoid benefit restrictions. The Actuarial Value of Assets is reduced by the Credit Balance to determine certain funded percentages and to determine the Funding Shortfall.

**Asset Valuation Method**

The Actuarial Value of Assets is determined using an annual average of the adjusted Fair Market Value of Assets with the earliest determination 24 months prior to the valuation date. The Fair Market Value of Assets in prior years is adjusted for contributions, benefit payments, expenses and expected earnings (not to exceed the third segment rate).

This is equivalent to the Fair Market Value of Assets, plus two-thirds of the (gain)/loss from the prior year, plus one-third of the (gain)/loss from the second preceding year. The (gain)/loss in each year is the difference between the expected and actual returns on the Fair Market Value of Assets.

The Actuarial Value of Assets is adjusted to be no less than 90% or no more than 110% of the Fair Market Value of Assets, as required by IRC Section 430(g)(3)(B)(iii).

Since the expected earnings assumption cannot exceed the third segment rate, over time, the method may produce an Actuarial Value of Assets slightly below the Fair Market Value of Assets.

The Actuarial Value of Assets for determining the Maximum Tax Deductible Contribution reflects interest rate stabilization rates for discounting contributions and limiting expected earnings.

The Fair Market Value of Assets used for funds invested in the General Account of an Insurance Company is the stated contract value with a market value adjustment factor. This value is an estimate only and not the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute a final offer by Empower or a final experience adjustment.

**SECTION I**

**CHANGES SINCE LAST YEAR'S VALUATION**

**Changes in Pension Plan Provisions**

No changes in the pension plan provisions were recognized with this actuarial valuation.

**Legislated Changes**

The American Rescue Plan Act of 2021 ("ARPA") increased the shortfall amortization period from 7 to 15 years, beginning with the January 1, 2022 valuation, unless the plan sponsor elects to recognize the change earlier. The plan sponsor has elected to apply the 15-year amortization to the January 1, 2022 valuation. Due to the plan's funded status, this change has no impact on the minimum required contribution.

The Infrastructure Investment and Jobs Act (IIJA) of 2021 further extended the phase out of the funding rate corridor until 2031. Prior to IIJA, the 95%-105% corridor around interest rate smoothing was to begin to phase out in 2026, reaching the final 70%-130% corridor in 2030. Under IIJA, the phase out period will commence in 2031 and end in 2035. This change has no impact on the current valuation.

**Changes in Actuarial Assumptions**

The following changes in the prescribed minimum funding actuarial assumptions were effective on January 1, 2022:

- The discount rate assumption (segment rates) was updated to 2022 in accordance with requirements of IRC Section 430(h), IRS regulations, and ARPA.
- The mortality assumption was updated from the IRS 2021 Static Mortality Table to the IRS 2022 Static Mortality Table.

The following change in the non-prescribed minimum funding actuarial assumptions was effective on January 1, 2022:

- The expected expense assumption was increased from \$630,000 to \$650,000.

The following change in the ASC 960 accounting actuarial assumptions was effective on January 1, 2022:

- The mortality improvement scale for the Pri-2012 Total Dataset and Pri-2012 Blue Collar Mortality Tables was updated from MP-2020 to MP-2021.

**Changes in Actuarial Methods**

No changes in actuarial methods were recognized with this actuarial valuation.

**Annuity Purchases**

Two annuity purchases occurred during 2021: on May 3, 2021, \$12,487,452 was paid to purchase the annuities of 348 participants (plus 6 alternate payees pursuant to QDROs), and on November 23, 2021, \$51,960,154 was paid to purchase the annuities of 483 participants (plus 1 alternate payee pursuant to a QDRO, 3 participants with a separate additional benefit, and 10 beneficiaries with delayed payment commencement dates.
