Independent Auditors' Report

Ingersoll Rand Benefits Committee
Gardner Denver, Inc. Pension Plan
Davidson, North Carolina

Scope And Nature Of The ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of Gardner Denver, Inc. Pension Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2022 and 2021, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2022 and 2021, stating that the certified investment information, as described in Note 3 to the financial statements, is complete and accurate.

RubinBrown LLP is a member of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities For The Audit Of The Financial Statements section:

- the amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis For Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditors' Responsibilities For The Audit Of The Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities Of Management For The Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities For The Audit Of The Financial Statements

Except as described in the Scope And Nature Of The ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in the United States of America will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with auditing standards generally accepted in the United States of America, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other Matter - Supplemental Schedules Required By ERISA

The supplemental schedule of assets held at end of year as of December 31, 2022 and reportable transactions for the year ended December 31, 2022 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. For information included in the supplemental schedules that agrees to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion:

- the form and content of the supplemental schedules, other than the information in the supplemental schedules that agrees to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- the information in the supplemental schedule related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

GARDNER DENVER, INC. PENSION PLAN
Notes to Financial Statements
December 31, 2022 and 2021

Note 1. Description of the Plan

The following description of Gardner Denver, Inc. Pension Plan (the Plan) provides only general information. Participants should refer to the Plan Document for a complete description of the Plan's provisions.

General

The Plan is a noncontributory defined benefit plan, which covers eligible employees of Gardner Denver, Inc. (the Company) who are not receiving contributions in another Company-sponsored defined benefit retirement plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Plan also covers participants from the following former plans:

Plan Name	Plan Merger Date
Lamson Corporation Pension Plan for Salaried Employees (Lamson)	1997
Invensys Salaried Pension Plan (Invensys)	2001
Gardner Denver, Inc. Hourly Pension Plan (Hourly)	2002
Lamson Corporation Hourly Employee Pension Plan (Lamson Hourly Plan)	2006
TI Pneumotive Hourly Pension Plan	2007
Welch Vacuum Technology, Inc. Pension Plan for Hourly Employees (Skokie Plan)	2007
Gardner Denver Thomas, Inc. at Sheboygan, Wisconsin and the IBEW Local Union No. 1060, AFL-CIO Pension Plan	2007
LeRoi International, Inc. Pension Plan for Union Employees	2011

In March 2005, Nash Elmo Industries, LLC (Nash Elmo) employees became eligible to participate in the Plan. The Plan recognizes service credited under the former Nash Elmo Industries, LLC Pension Plan.

Effective November 1, 2006, the Plan was frozen. No additional employees were eligible for Plan participation after October 31, 2006. No further basic credits have been credited to a participant's account after October 31, 2006 and no further additional credits have been credited to a participant's account after November 14, 2006.

Contributions

Contributions from the Company are based upon amounts required to be funded under provisions of ERISA. Employee contributions are not permitted. The Plan is in compliance with applicable ERISA minimum funding requirements for the Plan years ended December 31, 2022 and 2021.

Vesting

Participants vest in their accrued benefits according to the following schedule:

Years of Service	Vested Percentage
Less than 3 years	— %
3 years or more	100 %

Participants, who are current employees, become fully vested at the normal retirement age of 65, upon becoming totally disabled, or upon death. If participants terminate before vesting, they forfeit the right to receive the portion of their accumulated plan benefits.

Retirement Benefits

Participants (other than those of Lamson and Invensys) may elect early retirement between the ages of 55 and 65. Benefits are received at normal retirement age or, if elected, at a reduced amount at early retirement. Participants have a choice between various forms of payment, including annuities or a lump-sum payment. Benefit amounts between $1,000 and $5,000 are transferred to an Individual Retirement Account (IRA) in the participant's name (unless distribution of the benefit is requested).

Benefit amounts less than $1,000 are paid directly to the participant. Participants electing early retirement can choose to receive a payment of their accumulated plan benefit, if it is between $5,000 and $10,000. Benefit amounts that are over $10,000 are held in the Plan until the participant reaches retirement age.

Lamson participants may elect early retirement between the ages of 50 and 65. The age at which full, unreduced benefits are available depends on the length of the participant's service. Participants have a choice between various forms of payment. Benefit amounts between $1,000 and $5,000 are transferred to an IRA in the participant's name (unless distribution of the benefit is requested). Benefit amounts less than $1,000 are paid directly to the participant. Participants electing early retirement can choose to receive a payment of their accumulated plan benefit, if it is between $5,000 and $10,000. Benefit amounts greater than $10,000 are held in the Plan until the participant reaches normal retirement age.

Invensys participants may elect early retirement between 62 and 65. Benefits are received at normal retirement age or, if elected, at a reduced amount at early retirement. Benefit amounts between $1,000 and $5,000 are transferred to an IRA in the participant's name (unless distribution of the benefit is requested). Benefit amounts less than $1,000 are paid directly to the participant.

Employees who were participants as of October 1, 2002, the date the Hourly Pension Plan merged into the Plan, may receive a lump-sum payment at any time, regardless of the accumulated plan benefit amount.

The Plan allows for benefit payments to a designated beneficiary in the event of a participant's death. Upon becoming totally disabled after reaching one year of service, a participant may receive a lump-sum or annuity payment for benefits earned.

Note 2. Summary of Significant Accounting Policies

Basis Of Accounting

The accompanying financial statements of the Plan are prepared on the accrual basis of accounting.

Estimates And Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Valuation of Investments And Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are reflected on a trade-date basis. The net change in fair value of investments in the accompanying statement of changes in net assets available for benefits includes realized gains and losses and unrealized appreciation and depreciation.

Actuarial Present Value Of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

The actuarial present value of accumulated plan benefits has been actuarially determined and is that amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between

the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2022 are as follows:

Actuarial Cost Method	Unit credit cost method
Interest Rate	5.10% per annum, compounded annually
Retirement Age	55 to 65
Mortality	Pri-2012 Total Mortality Tables projected with MP-2021 Mortality Improvement Scale applied on a generational basis

Changes In Actuarial Assumptions

The following assumption changed from the December 31, 2022 valuation date:

- The interest rate assumption changed from 2.50% to 5.10%. This is based on an asset allocation of 100% bonds and is within a reasonable range of projected returns of a similar portfolio using a forward looking approach at December 31, 2022.

The foregoing assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Administrative Expenses

Salaries and related benefits of employees who administer the Plan are provided by the Company. All other administrative expenses are paid by the Plan. These expenses include investment management, trustee, and accounting fees.

Payment Of Benefits

Benefit payments to participants are recorded when paid.

Subsequent Events

Management evaluates subsequent events through the date the financial statements are available for issue, which is the date of the Independent Auditors' Report.

Note 3. Certified Investments

Information related to investments disclosed in the accompanying financial statements, including investments held at December 31, 2022 and 2021, and net change in fair value of investments for the years then ended was obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by Fidelity Management Trust Company.

Note 4. Fair Value Measurements

The Plan utilizes an established framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodology used for assets measured at fair value:

Common/Collective Trusts

Valued based on the net asset value (NAV) as calculated by the trustee. The NAV is not publicly available but is published to existing clients and service providers. The Plan uses the NAV as a practical expedient to estimate fair value, which is based upon the fair value of the underlying investments. The investments are redeemable daily at the adjusted NAV; however, it is possible that the redemption rights may be restricted or eliminated in the future. Due to the nature of the investments, changes in market conditions, liquidity requirements and the economic environment, the NAV and consequently the fair value of the Plan's investments may be affected. For the Plan years ended December 31, 2022 and 2021, there were no unfunded capital commitments. All common/collective trusts held by the Plan file an annual report on Form 5500 as a direct filing entity.

All Plan investments are measured at fair value using the NAV per share (or its equivalent) practical expedient and, therefore, have not been categorized in the fair value hierarchy.

The method described above may produce fair value calculations that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

There have been no changes in the methodology used at December 31, 2022 or 2021.

Note 5. Plan Termination and Pension Benefit Guaranty Corporation Matters

While it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA.

In the event of termination of the Plan, the Plan's assets shall be used and applied first for the benefit of retired employees and employees who have reached their normal retirement date and second for the benefit of all other employees based on their accrued retirement benefits at the date of termination of the Plan in amounts proportionate to the actuarially determined present values of their retirement benefits at the date of termination of the Plan. Any balance remaining after satisfaction of all liabilities of the Plan shall be returned to the Company.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. The PBGC guarantees up to a statutory ceiling on the amount of an individual's monthly pension benefit each year for plan terminations occurring during the year. Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Note 6. Party In Interest Transactions

Fidelity Management Trust Company is the Trustee of the Plan. The Plan invests in funds managed by an affiliate of the Trustee and these transactions qualify as party in interest transactions allowable under ERISA regulations. Fees to the Trustee and affiliate are based on customary and reasonable fees and are paid by the Plan.

Note 7. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes

in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

The actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 8. Income Tax Status

The Plan received a favorable determination letter from the Internal Revenue Service (the IRS), dated February 6, 2015, indicating that the Plan, as then designed, was in compliance with the requirements of the Internal Revenue Code (the IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and is currently operating in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability or asset if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 9: Subsequent Events

On September 11, 2023, the Plan transferred assets of $7,277,874 to an annuity provider in exchange for the assumption of the accumulated plan benefits of a portion of the Plan's participants.

Actuarial Assumptions and Methods

ERISA Interest Rates as required by IRC Section 430 based on plan sponsor election of the look-back month for the segment rates:

"Minimum" means for the purpose of calculating the PPA funding liability and normal cost for the minimum required contribution.

"Maximum" means for the purpose of calculating the PPA funding liability and normal cost for the maximum tax-deductible contribution.

	2022 Plan Year		2021 Plan Year

Segment rates or full yield curve	Segment	Segment	Segment	Segment
Look-back months	4	4	4	4
First 5 years	4.75%	1.07%	4.75%	2.22%
Next 15 years	5.18%	2.68%	5.36%	3.38%
Over 20 years	5.92%	3.36%	6.11%	3.92%
Applicable Law for the segment rates corridor	ARPA	Not Applicable	ARPA	Not Applicable

Discount Rate for developing pension expense: 2.50% (previously 2.10%), as determined by the company.

Expected Long-Term Return on Plan Assets for developing pension expense: 2.50% (previously 1.40%). This assumption has been set equal to the Discount Rate as determined by the company. In our opinion and based on our professional judgment, we believe setting the expected long-term rate of return on assets to match the discount rate is a reasonable assumption for the Plan, given the Plan is 100% invested in liability hedging assets.

Interest Rate for FASB ASC 960: 2.50% (previously 1.40%). Consistent with prior years, this assumption has been set equal to the Expected Long-Term Return on Plan Assets as determined by the company.

Interest Credit for Increasing Account Balances: 2.00% compounded annually (unchanged from prior year)

Salary Scale: N/A

Actuarial Assumptions and Methods (continued)

Increase in Consumer Price Index (CPI): 3.50%. This is based on long-term historical inflation rates of about 3.50%.

Increase in Social Security Taxable Wage Base: 3.50%. This is based on the CPI assumption.

Administrative Expenses:

ERISA: Average of the non-investment related administrative expenses paid from the Trust (net of PBGC premium payments from the Trust) in the prior three years, plus the estimated PBGC premium for the current year plan expected to be paid from the Trust.

FASB ASC 715: None.

Mortality:

ERISA: IRS 2022 Static Mortality Table using separate tables for annuitants and non-annuitants as prescribed by IRC Section 430. *Previously:* IRS 2021 Static Mortality Table using separate tables for annuitants and non-annuitants as prescribed by IRC Section 430. These tables include future mortality improvement of 8 years for males and 9 years for females with the following adjustments: For ages below 80, the projection period is increased by 1 year for each year below age 80. For ages above 80, the projection period is reduced (but not below zero) by 1/3 year for each year above 80.
FASB ASC 715: Pri-2012 Total Mortality Tables projected with MP-2021 45% Blue Collar / 55% White Collar Blend Mortality Improvement Scale applied on a generational basis (previously Pri-2012 Total Mortality Tables projected with MP-2020 Mortality Improvement Scale applied on a generational basis).

FASB ASC 960: Pri-2012 Total Mortality Tables projected with MP-2021 45% Blue Collar / 55% White Collar Blend Mortality Improvement Scale applied on a generational basis (previously Pri-2012Total projected with MP-2020 Mortality Improvement Scale applied on a generational basis).

Actuarial Assumptions and Methods (continued)

Retirement Rates: For active participants: Rates varying by age: based on the assumption used by the prior actuary for this plan. There has been no pattern of significant consistent gains or consistent losses related to this decrement.

Marital Status: 85% of males and females are assumed married, with females 3 years younger than males This assumption was used by the prior actuary for this plan, and there has been no pattern of significant consistent gains or consistent losses related to this assumption.

Maximum Benefit: $245,000 for 2022. For determining limitations under funding amounts and liabilities under FASB ASC 960, no future increases in the IRC Section 415 limit have been reflected. For FASB ASC 715 purposes, this limit was assumed to increase annually by the Consumer Price Index.

Maximum Salary: $305,000 for 2022. For determining limitations under funding amounts and liabilities under FASB ASC 960, no future increases in the salary limit have been reflected. For FASB ASC 715 purposes, this limit was assumed to increase annually by the Consumer Price Index.

Actuarial Assumptions and Methods (continued)

Increase in Consumer Price Index (CPI): 2.00% increase per year. We believe this assumption to be reasonable.

Form of Payment:

For participants without a cash balance: Single Life Annuity

For active and terminated vested participants with a cash balance:

- 85% are assumed to elect a lump sum
- 15% are assumed to elect an annuity

For future terminated vested participants with a cash balance:

- 20% are assumed to elect an immediate lump sum
- 68% are assumed to elect a deferred to age 62 lump sum
- 12% are assumed to elect a deferred to age 62 annuity

Assumed election form for annuity options are as follows:

- 55% are assumed to elect a single life annuity
- 6% are assumed to elect a 10-year certain and life annuity
- 15% are assumed to elect a 50% joint and survivor annuity
- 2% are assumed to elect a 75% joint and survivor annuity
- 22% are assumed to elect a 100% joint and survivor annuity

The payment form assumption was used by the prior actuary for this plan, and there has been no pattern of significant consistent gains or consistent losses related to this assumption.

Data Assumptions: None.

Actuarial Assumptions and Methods (continued)

The actuarial value of assets is equal to:

a) the market value of assets, including discounted receivables, on the valuation date, less

b) the following percentages of prior years' investment gains (losses):

i) 67% of the prior year, and
ii) 33% of the second prior year,

Investment gains and losses are defined as the excess or deficiency of the expected return on the market value (at an assumed rate of 1.40%[1], not to exceed the third segment rate for that year) over the actual return on the market value of assets, including discounted receivables, for any given year.

c) The actuarial value of assets can be neither less than 90% nor greater than 110% of the market value of assets, including discounted receivables.

Market Related Value of Assets for FASB ASC 715 Expense Purposes: The market related value of assets is equal to the fair value of assets on the valuation date.

Amortization of Prior Service Costs and Net Gains and Losses for FASB ASC 715 Expense Calculation: As permitted under paragraph 715-30-35-13 of FASB ASC 715, plan amendments are reflected in the net periodic pension cost by use of a straight-line amortization of the cost of such amendment(s) over the average remaining service period of employees expected to receive benefits under the plan.

Pursuant to paragraph 715-30-35-24 of FASB ASC 715, an unrecognized gain or loss (as of the beginning of the year) in excess of 10% of the greater of the projected benefit obligation or the market-related value of plan assets is amortized over the average remaining service period of active employees expected to receive benefits under the plan and included as a component of the net periodic pension cost. Since this method compares the outstanding gain or loss to the greater of the PBO or the assets to determine the amount to be amortized, the unfunded projected benefit obligation is not expected to be fully amortized if all assumptions are realized.

Shortfall Amortization Charge for ERISA Funding Purposes: Per IRC Section 430(c), the shortfall amortization charge for any plan year is the aggregate total (not

[1] 2.50% in 2022, 1.40% in 2021, 2.60% in 2020, 4.00% in 2019, 7.75% in 2018

Actuarial Assumptions and Methods (continued)

less than zero) of the shortfall amortization installments for such plan year with respect to any shortfall amortization base which has not been fully amortized. The shortfall amortization installments are the amounts necessary to amortize the shortfall amortization base of the plan for any plan year in level annual installments over the 15-year period beginning with such plan year.

Actuarial Cost Method: The unit credit cost method is used for ERISA funding target (FT) and FASB ASC 715 accumulated benefit obligation (ABO) purposes. Under this method, accrued pension benefits are determined for all eligible active participants. These benefits reflect service, salary and negotiated benefit increases to date. The liability is then equal to the present value of all benefits (PVAB) for inactive participants plus the PVAB for active participants.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings, or negotiated benefit increases, to date in both cases. The total normal cost is based upon the sum of the individual normal costs. The target normal cost for funding is equal to the total normal cost plus assumed administrative expenses expected to be paid from the trust.

The projected unit credit method is used for IRS maximum deductible limit cushion amount and FASB ASC 715 projected benefit obligation (PBO) purposes. Under this method, accrued pension benefits are determined for all eligible active participants reflecting service to date and anticipated salary and negotiated benefit increases to the assumed retirement age. This liability for active participants is then added to the present value of all benefits for inactive participants to determine the total liability under this method.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings and negotiated benefit increases projected to assumed retirement age in both cases. The total normal cost is based upon the sum of the individual normal costs.

Definitions:

Account: an Account was established for each Plan member. The Account consists of one or all of the following parts: Initial Balance, Basic Credits, Transitional Credits, Additional Credits and Interest Credits.

Initial Balance: Equivalent single sum value of Prior Plan accrued benefit as of January 1, 1994.

Basic Credits: 4% of compensation not in excess of the Social Security Wage Base plus 8% of compensation in excess of Social Security Wage Base. Basic Credits were suspended on October 31, 2006.

Transitional Credits: Participants who were active members in the prior plan as of July 1, 1986 were credited with an additional percentage of their compensation for a period

of one to five years, with both the percentage and duration dependent upon their age and credited service as of July 1, 1986.

Additional Credits:

Participants who were active members in the plan as of December 31, 1989 are credited with additional monthly contributions. Additional Credit amounts are based on the member's year of birth. Participants born in 1940 or later will receive Additional Credits based on their year of birth as outlined in the table below:

Year of Birth	Additional Monthly Contribution
1964 or later	$10
1963	$11
