Assumptions prescribed by law

Mortality	<u>During benefit payment period</u> IRS Prescribed Mortality - Static Annuitant, male and female.
	<u>Before benefit payment period</u> IRS Prescribed Mortality - Static Non-annuitant, male and female.

Assumptions selected by actuary

Asset return	3.00% for the current plan year. The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. See Long-Term Capital Markets Assumptions May 2022.
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets adjusted for the short plan year. This is the best estimate available of upcoming plan year expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in Plan provisions. This assumption is based on the results of recent experience analysis and anticipated future experience.
Disability	None. This plan does not offer a subsidized disability benefit; therefore, the disability assumption is built into the withdrawal assumption.
Marriage	75% married; husbands are 3 years older than wives. This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.
Withdrawal	2003 Society of Actuaries Small Plan Age Table. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries and reflects the results of the most recent experience analysis and anticipated future experience.

Form of benefit and basis 50% of active and terminated vested participants will elect a benefit paid in a lump sum at the assumed retirement ages. The remaining participants will elect a monthly annuity on the normal form at the assumed retirement ages.

This assumption is based on the results of recent experience analysis and anticipated future experience. The single sum benefit is based on the applicable mortality and the plan's funding target interest rates, as prescribed.

Methods prescribed by law

Liability measure Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Lump sum payments Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions; therefore, plan liabilities do not currently recognize this additional cost, and this may result in the plan not accumulating adequate assets.

HCE benefit payment restrictions A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by:

- any retiree benefit index or floor
- amounts for HCEs who were previously restricted
- an amount for the retiring HCE

The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the non-stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

Methods selected by plan sponsor

Asset method	<p>The asset valuation method is prescribed by law for plans that elect to use a value other than market value.</p> <p>For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years.</p> <p>The expected value includes contributions, distributions, any deducted administrative expenses and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value.</p> <p>When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.</p>
Segment rates	<p>24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.</p>
PBGC premium basis	<p>Variable rate premiums are calculated using census, market value of assets and interest rates in effect on the current valuation date. Interest rates are the 24-month average rates used for annual cost but without the interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2020 plan year.</p>
Methods elected by actuary	
Retirees	<p>Assets and liabilities for current and future retirees are included.</p>
Vested benefits	<p>A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date.</p> <p>The following ancillary benefits are generally treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.</p> <p>For purposes of this valuation, all liability is considered fully vested.</p>

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on Pri-2012 white-collar base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2017-10).

Base rates

Before benefit payment period

Employee amount-weighted, male and female

During benefit payment period

Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The white-collar base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement (MI)

Principal 2017-10 MI scale: This scale is based on MP-2021 study and model issued by SOA with the exception of the following user-selected assumptions:

10-year convergence period on age and cohort

Long-term rates (LTR) assumptions using sex-distinct and age-based rates developed from Social Security Trustees Reports

See [Mortality Documentation](#) for rationale and additional information.

Interest rate used to value liabilities

2.75%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation and then converted to the geometric under lognormal distribution assumption. See Long-Term Capital Markets Assumptions May 2022.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note that expenses paid with plan assets are required to be included in funding normal cost. Although contributions are not required due to assets sufficiently in excess of liabilities, the plan is usually reimbursed annually by funding more than the annual cost.

Basis for lump sums

Interest rate

Based on the three segment yield curve: 3.05%, 3.45% and 4.35%

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high-quality corporate bond yields. According to our most recent study, the long-term expected yields for short, intermediate and long corporate bonds are 3.05%, 3.45% and 4.35%. For details, see Corporate AA yield in Figure 2 of Long-Term Capital Markets Assumptions May 2022.

Mortality

We have selected the same mortality assumption for lump sum payments but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Lines 6, 18, 31, 32 - Explanation of short plan year
Pension Plan for Employees of NYC & Company, Inc.
EIN 13-5531178 Plan No. 001

The plan year beginning 01/01/2022 reflects a short plan year ending on the termination date of 01/15/2022.

The annual cost is prorated for the period from 01/01/2022 to 01/15/2022. This short period is based on the plan termination date of 01/15/2022 and reflects the final IRS minimum contribution regulations. Quarterly contribution requirements have been adjusted to reflect the short period.

Schedule SB, Line 22 - Description Of Weighted Average Retirement Age
Pension Plan for Employees of NYC & Company, Inc.
EIN 13-5531178 Plan No. 001

Active participants are expected to retire at the plan's assumed retirement age. The retirement rate reflects only those participants who meet retirement eligibility. An active participant working past assumed retirement age is expected to retire at current age.

This report reflects the maximum benefit limits under Internal Revenue Code (IRC) Section 415 and maximum compensation limits under IRC Section 401 in effect on the first day of each plan year.

The following is a summary of plan provisions and does not alter the intent or meanings of the provisions contained in the contract or plan document. This report reflects the provisions of the volume submitter signed 07/31/2020 through Amendment 1 signed 12/13/2021.

Plan eligibility

Age	Attained age 21.
Service	One year of service in which at least 1,000 hours worked.
Entry date	The first day of the month six months after meeting eligibility requirements or the first day of the plan year after meeting eligibility requirements.
	As of July 31, 2011, no employee shall become an active participant and no inactive participant or former participant shall again become an active participant in the plan.

Normal retirement benefit

Age	Attained age 65.
Form	Monthly annuity payable for life (optional forms may be elected in advance of retirement).
Amount (accrued benefit)	2% of Average Compensation multiplied by Accrual Service No future benefits accrue on or after July 31, 2011.

Early retirement benefit

Age	Attained age 60.
Service	15 years of service
Form	Same as normal retirement benefit.
Amount	Accrued benefit on early retirement date reduced by 6% for each year that the early retirement date precedes normal retirement date.

Late retirement benefit

Age No maximum age.
Form Same as normal retirement benefit.
Amount Accrued benefit on late retirement date.

Termination benefit

Vesting percentage 100% after five years of vesting service and at Early Retirement Age. All active participants as of July 31, 2011 are 100% vested.
Form Same as normal retirement benefit with income deferred until normal retirement date. Single sum payment is available if severance from employment occurs on or after January 1, 2009.
Amount Accrued benefit on date of termination multiplied by the vesting percentage.

Death benefit

Eligibility Qualified married participant fully or partially vested in an accrued benefit.
Form Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Average compensation

The monthly average of total pay received for the three consecutive years out of the ten latest years before retirement date which gives the highest average.

Accrued benefit adjustment

The quotient of the number of complete months of service as of a given date divided by the number of complete months of service as of normal retirement date.

Optional forms of benefit payments

The optional forms of benefit payments are:

- Monthly annuity payable for life, or 10 years certain and life
- Monthly annuity payable for life with Social Security leveling
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75, or 100
- Single sum payment equal to the present value of the retirement benefit

The optional form conversion basis is 4.00% interest and the Buck 1963 male mortality table (setback one year) for payments other than lump sums. The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the first calendar month preceding the first day of the stability period which is the plan year.

Changes in principal eligibility or benefit provisions

There have been no changes in principal eligibility or benefit provisions since the last valuation.

Significant event

The plan terminated effective 01/15/2022.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Pension Plan for Employees of NYC & Company, Inc.
EIN 13-5531178 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The assumed asset return for the current year has decreased from 6.00% to 3.00%. This rate is used in the calculation of the actuarial value of plan assets.
