Independent Auditors' Report

To the Participants and Plan Administrator of
The Dial Corporation Future Security Plan

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of The Dial Corporation Future Security Plan (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits as of December 31, 2022 and 2021, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audit need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of and for the years ended December 31, 2022 and 2021, stating that the certified investment information, as described in Note 8 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

- the information in the financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Baker Tilly US, LLP, trading as Baker Tilly, is a member of the global network of Baker Tilly International Ltd., the members of which are separate and independent legal entities. © 2020-2022 Baker Tilly US, LLP

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control-related matters that we identified during the audit.

1. Description of the Plan

The following description of The Dial Corporation Future Security Plan (the Plan) provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan was established on July 31, 1996, as a noncontributory, defined benefit pension plan designed to provide retirement and certain other benefits to all regular administrative, supervisory and other nonunion employees of The Dial Corporation or any participating employer (the Company or Dial). Effective January 1, 2001, the Plan was amended and restated to be a cash balance plan, and the Plan's name was changed to The Dial Corporation Future Security Plan. As a cash balance plan, Dial credits participants' accounts for each year they worked. In addition to the credits, which are calculated based on participants' age and total compensation, participants will earn a guaranteed rate of interest on their account balances annually. Participants have access to their vested benefit balances when they leave Dial or if they become disabled or die. Employees who already had at least one year of service with Dial as of December 31, 2000, were automatically enrolled in this Plan with accrued benefits, as defined. Effective January 1, 2020 the plan was amended and restated to incorporate amendments and to prepare the plan document to submit for an application to the Internal Revenue Service for a determination letter under Revenue Procedure 2019-20.

The Henkel of America, Inc. Benefits Administrative Committee (the Committee), and the plan administrator control and manage the operation and administration of the Plan. State Street Bank and Trust Company, N.A. (State Street) serves as the trustee of the Plan. The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974 (ERISA).

On March 29, 2004, Dial became a wholly owned subsidiary of Henkel of America, Inc. (Henkel).

Effective January 1, 2007, participants in the Plan whose combined age and service is less than 50, or whose age was less than 50 with service equal to or greater than 12 years, transitioned to a new defined contribution service-based plan sponsored by Dial. The participant's accounts in the Plan will continue to earn interest credits annually and the December 31, 2000 frozen accrued benefit will continue to index with increases in the base compensation rate.

Participants whose combined age and service is at least 50 on January 1, 2007, will continue to participate in the existing Plan. Transition credits will be provided to any participant adversely impacted by the change. The vesting schedule of the Plan has been revised from a five-year cliff to a 20% per year graduated vesting schedule, over five years.

Effective September 1, 2013, the Plan was amended to allow for certain terminated vested participants to receive a distribution of their vested benefits if certain requirements were met for a period of time as defined.

The Plan was restated as of January 1, 2020.

The Plan was amended effective October 7, 2022 to allow for the purchase of one or more group annuity contracts. The annuity contracts will cover accrued benefits for certain participants or beneficiaries with payment dates on or before August 1, 2022 and monthly benefits in payment as of August 1, 2022 that are less than $1,500 monthly. On October 14, 2022, the Company entered into an annuity contract with Massachusetts Mutual Life Insurance Company (Mass Mutual) and transferred $60,763,687 in assets out of the Master Trust to Mass Mutual to cover 2,456 participants that met the criteria as outlined in the amendment.

Eligibility

Employees were eligible to participate in the Plan upon attainment of age 21 and completion of one year of service with a minimum of 1,000 service hours before the Plan was frozen to participation.

Pension Benefits

An eligible participant becomes 20% vested for each year of cumulative service the participant completes; 100% upon completion of five years of cumulative service. The amount of such benefit is based on the actuarial equivalent of benefits accrued as of December 31, 2000, under the former defined benefit plan and those accrued benefits under the current cash balance plan, since January 1, 2001. Benefits, under the defined benefit plan prior to January 1, 2001, were based on a participant's credited length of service and highest level of compensation, subject to limits set by federal regulations, during certain years of the participant's employment period. Benefits earned under the current cash balance plan are calculated based on a participant's age and total wages earned each year during his or her employment with Dial.

Generally, payment of benefits will be in the form of a single life annuity for unmarried participants and a joint and survivor annuity for married participants, unless the participant, with spousal consent, elects another form of benefit permitted by the Plan. Other forms of pension benefit payments are available at the participant's option. The distribution of benefits to any participant entitled to receive a benefit will commence no later than April 1 of the following calendar year in which the participant (1) attains age 72 or (2) the calendar year in which the participant retires.

Death and Disability Benefits

If a married vested participant dies prior to retirement, then a monthly survivor annuity is payable to the surviving spouse. If the participant dies after age 55, then the surviving spouse would receive the same benefit that would have been payable to the spouse had the participant retired on the day before his or her death. If the participant dies before age 55, then the surviving spouse would receive the same benefit that would have been payable to the spouse had the participant survived to age 55. If an active participant with five or more years of service dies after age 55, then the surviving spouse is eligible to receive an additional supplemental death benefit, as defined in the plan document.

A participant who becomes disabled while an employee of Dial is eligible to receive a benefit commencing at normal retirement based on continuous service, determined as though the participant had continued in active employment to age 65.

2. Summary of Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results may differ from those estimates.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company, including actuarial fees, insurance premiums, legal fees and accounting fees, are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying Statements of Changes in Net Assets Available for Benefits. Accrued expenses include investment and administrative expenses. Certain investment related expenses are included in the plan interest in the Master Trust investment loss presented in the accompanying Statements of Changes in Net Assets Available for Benefits.

Investment Valuation and Income Recognition

The Plan's investments are held in the Master Trust. Investments in the Master Trust are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Henkel of America Pension Investment Committee determines the Plan's valuation policies utilizing information provided by the trustee. See Note 6 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Investment loss includes the Plan's interest in the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits presented below is based on an actuarial valuation as of January 1, 2022, prepared by the Plan's actuary, Mercer, using the present value of accrued benefits.

Accumulated plan benefits are those future periodic benefit payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of participants who have died and (c) present participants or their beneficiaries. Benefits earned under the Plan prior to January 1, 2001, are based on participants' average compensation during their last five years of credited services prior to December 31, 2000, indexed by any increase in annual base pay rate from December 31, 2000 through the date as of which the benefit information is presented (the valuation date). The accumulated plan benefits earned under the Plan subsequent to January 1, 2001 for active participants are calculated based on a participants' age and total wages earned each year during his or her employment with Dial. Benefits payable under all circumstances - retirement, death, disability and termination of employment - are included, to the extent they are deemed attributable to participant service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was determined by the Plan's independent actuary, and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of January 1, 2022 is as follows:

Vested benefits:	
Participants currently receiving benefits	$ 112,165,537
Other participants	63,117,510
Total vested benefits	175,283,047
Nonvested benefits	33,926
Total actuarial present value of accumulated plan benefits	$ 175,316,973

The change in actuarial present value of accumulated plan benefits for the year ended December 31, 2021 is as follows:

Actuarial present value of accumulated plan benefits, at beginning of year	$ 188,707,083
Increase (decrease) during the year attributable to:	
Benefits accumulated and experience (gains) or losses	1,393,739
Increase for interest due to decrease in discount period	7,288,974
Benefits paid	(20,173,355)
Changes in actuarial assumptions	(1,899,468)
Actuarial present value of accumulated plan benefits, at end of year	$ 175,316,973

Significant assumptions underlying the actuarial computations are as follows:

Discount rate	4.20%
Mortality	Pri-2012 sex distinct, separate employee and retiree tables with contingent survivor adjustments and no collar adjustments applied and with future improvement using the MP-2021 projection scale
Retirement age	Age 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The assumed rate of interest used to value the present value of accumulated plan benefits changed from 4.10% to 4.20% and the mortality table changed from the Pri-2012 sex distinct, separate employee and retiree tables with contingent survivor adjustments and no collar adjustments applied and with future improvement using the MP-2020 scale to the Pri-2012 sex distinct, separate employee and retiree tables with contingent survivor adjustments and no collar adjustments applied and with future improvement using the MP-2021 scale resulting in a decrease of $1,899,468 in actuarial present value of accumulated benefits for the year ended December 31, 2021.

Subsequent Events

The Plan has evaluated subsequent events for recognition or disclosure through October 13, 2023, the date the financial statements were available to be issued.

The Secure 2.0 Act of 2022 was signed into law on December 29, 2022. This legislation includes a vast array of provisional changes to retirement plans, becoming effective in 2023 and beyond. Plan management is evaluating the impact of the adoption and implementation of this legislation on the Plan.

3. Related-Party and Party in Interest Transactions

The Plan's investments are administered under a contract with State Street. Contributions are held and managed by State Street, who invests cash received, interest and dividend income and makes distributions to participants. These transactions are party in interest transactions under ERISA.

Certain expenses of State Street related to plan operations and investment activity are paid by the Plan, as described in Note 2. Additionally, certain administrative functions of the Plan are performed by officers or employees of the Company. No such officer or employee receives compensation from the Plan. These transactions are party in interest transactions under ERISA.

4. Funding Policy

The Plan's funding policy is for the Company to make annual contributions to the Plan as determined by the Plan's independent actuary in amounts necessary to provide the Plan with assets sufficient to fund participants' benefits by the time they retire. During 2022 and 2021, the Company made no contributions. No participant contributions are permitted. The minimum funding requirements of ERISA were met for 2022 and 2021.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

5. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits former participants or their beneficiaries have been receiving for at least three years, those employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination.

2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed subsequently).

3. All other vested benefits (that is, vested benefits not insured by the PBGC).

4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at the time, of the Plan's net assets to provide benefits and may also depend on the level of benefits guaranteed by the PBGC.

6. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value by the Plan and in the Master Trust. There have been no changes in the methodologies used at December 31, 2022 and 2021.

Short-term investments consist of cash and cash equivalents, foreign currencies, the State Street Short Term Investment Fund and U.S. Treasury Bills. The State Street Short Term Investment Fund is valued at net asset value (NAV) of shares held at year end. Foreign currencies and U.S. Treasury Bills are valued based on quoted market prices in the active markets on which the individual securities are traded.

Corporate debt obligations are valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar bonds, the bond is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote if available.

The collective trusts and commingled funds are valued at the NAV of units of a bank collective trust. The collective trusts and commingled funds are valued at the NAV of the unit values of such funds held by the Plan at year end. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV. Were the Plan to initiate a full redemption of the collective trusts and commingled funds, the investment adviser reserves the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

U.S. government agency securities are valued using pricing models maximizing the use of observable inputs for similar securities.

The private equity limited partnerships are valued at NAV in a manner consistent with fair value guidance. The values assigned are based upon the general partners estimates and assessment of each underlying investment, incorporating valuation techniques that consider the evaluation of financing and sale transactions with third parties, EBITDA (earnings before interest, taxes, depreciation and amortization) multiples, expected cash flows and market-based information, including comparable transactions and performance multiples, among other factors. The Committee considers fair value measurements based on valuations provided by the investment manager of the partnerships. The private equity limited partnerships have unfunded commitments and redemption restrictions and are classified as Level 3 in the fair value hierarchy. The redemption restrictions do not have a material impact on the stated NAV's of the limited partnerships, which represent fair value, as of December 31, 2022 and 2021.

Investments Measured Using NAV per Share Practical Expedient

The following tables summarize investments measured at fair value based on NAV per share as of December 31, 2022 and 2021, respectively.

	December 31, 2022			
	Fair Value	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
Collective trusts and commingled funds	$ 95,930,331	$ -	Daily	N/A

	December 31, 2021			
	Fair Value	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
Collective trusts and commingled funds	$ 196,022,768	$ -	Daily	N/A

7. Undivided Interest in Henkel of America Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the plan and several other Company sponsored retirement plans. Each participating retirement plan has an undivided interest in the Master Trust.

The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment (loss) income less actual distributions and allocated administrative expenses. At December 31, 2022 and 2021, the Plan's undivided interest in the net assets of the Master Trust was 19% and 23%, respectively. Total investment (loss) income (including net (depreciation) appreciation in the value of investments) and administrative expenses of the Master Trust are allocated to the individual plans based upon the amount of the time the Plan's assets were invested in the Master Trust.

The following tables present the investments and other assets and liabilities of the Master Trust and the Plan's undivided interest as of December 31, 2022 and 2021:

	2022	
	Master Trust Balances	**Plan's Interest in Master Trust Balances**

Total master trust investments at fair value				$ 1,008,127,185

(a) In accordance with Subtopic 820-10, certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the Statements of Net Assets Available for Benefits.

The following table sets forth a summary of certain changes in the fair value of the Master Trust's Level 3 assets for the years ended December 31, 2022 and 2021:

	Level 3 Assets	
	2022	2021
Contributions	$ -	$ 40,068
Distributions	(195,249)	(2,751,039)
Transfers in and/or out of Level 3	-	-

The amount of total losses for the years ended December 31, 2022 and 2021 attributable to the change in unrealized gains relating to assets still held at the reporting date was $317,546 and $1,014,800, respectively.

8. Information Certified by the Trustee

The plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA for 2022 and 2021. Accordingly, State Street, the trustee of the Plan, has certified to the completeness and accuracy of all investments reported in the accompanying Statements of Net Assets Available for Benefits as of December 31, 2022 and 2021 and the related investment activity reported in the Statements of Changes in Net Assets Available for Benefits for the years then ended.

9. Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by letter dated October 14, 2011, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions. The Plan was audited by the DOL for the years ended December 31, 2019, 2018 and 2017, which were completed in 2019.

10. Risks and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would-be material to the financial statements.

In addition, the Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Market risks include global events which could impact the value of investment securities, such as a pandemic or international conflict. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

As of December 31, 2021, the Master Trust had an investment of $103,919,286 that was concentrated in one fund. There were no concentrations as of December 31, 2022.

11. Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits on the financial statements to Form 5500 at December 31, 2022 and 2021:

	2022	2021
Net assets available for benefits on financial statements	$ 99,306,655	$ 229,209,701
Accrued expenses	208,682	242,366
Net assets available for benefits per Form 5500	$ 99,515,337	$ 229,452,067

The following is a reconciliation of the changes in net assets available for benefits on the financial statements to Form 5500 for the year ended December 31, 2022:

Net decrease per the financial statements	$ (129,903,046)
Plus current year accrued expenses	208,682
Less prior year accrued expenses	(242,366)
Net loss per Form 5500	$ (129,936,730)

• Healthy and disabled participants	Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables. These tables are based on the RP-2014 mortality tables, adjusted to remove post-2006 projection factors, and projected with mortality improvement to specified years depending on age and gender based on scale MP-2020.		
417(e) lump sums	Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality with generational improvements projected using MP-2021 projection scale.

Rationale for Economic Assumptions

- **Discount rate** – The discount rate assumption for funding purposes is prescribed by the plan sponsor through an election from allowable alternatives under IRS regulations.
- **417(e) lump sums** – The 417(e) lump sum assumptions for funding purposes are prescribed by IRS Section 430 and relevant regulations.
- **Cash balance interest accumulation rate** – The plan's interest crediting rate is the greater of the yield on thirty-year Treasury bonds, or 5%. We have assumed that the average yield on the thirty-year Treasury bonds over the typical accumulation period will be greater than 5% for some years, based on Mercer Investment Consulting's Capital Market Outlook.
- **Salary Increases** – The age-graded salary increases are based on an experience study undertaken in 2021 using data from plan years 2015 to 2020. The plan sponsor believes that this age-graded structure is representative of anticipated future experience.
- **Social Security wage base** – This assumption is equal to 150 basis points higher than inflation based on historical experience of national real wage growth.
- **Inflation** – The inflation assumption is based on the inflation assumption periodically published by Mercer Investment Consulting in their Capital Markets Outlook.
- **Expected investment return** – The expected rate of return on plan assets for funding purposes is the median rate based on the hypothetical past performance of the plan's target asset mix, adjusted for current market conditions. The expected return on assets assumption is net of an adjustment for investment expenses assumed to be paid from plan assets.
- **Expenses** – Administrative expenses are not paid from the plan trust and are therefore assumed to be $0.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Rationale for Demographic Assumptions

- **Mortality for Funding** – The mortality assumption for funding purposes is prescribed by the plan sponsor through an election from allowable alternatives under IRS regulations.
- **Withdrawal** – Withdrawal rates are based on an experience study undertaken in 2021 using data from the plan years ending in 2015 to 2020. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Disability incidence** – The disability incidence table is based on the Conference of Consulting Actuaries 1985 Pension Disability Study Class 1 rates multiplied by 82% because the plan's disability requirements are more stringent than Social Security Disability, which was the basis of the 1985 study.
- **Retirement rates**– Retirement rates are based on an experience study undertaken in 2021 using data from the plan years ending in 2015 to 2020. The plan sponsor believes that this period will be representative of anticipated future experience.
- **Form of payment, Vested Deferred Commencement Age and Spouse assumptions** – These assumptions are based on the experience study report titled *Henkel Corporation 2021 Experience Analysis*, issued on November 29, 2021, and the expectation that the future retirement patterns and circumstances of the employer will not differ significantly from the period studied.

Actuarial methods

Asset methods

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Only those employees who have completed the plan's eligibility requirement are included in the valuation of liabilities.

- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break-in-service on the valuation date are treated as terminated participants.

  Insurance contracts: Certain retirees are excluded because they are covered under annuity contracts that are not part of the plan. However, their surviving beneficiaries (if applicable) are included in the valuation as deferred contingent liabilities because they are not covered under the annuity contracts.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Minimum funding methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual are the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

• Benefit (non spousal)	Cash Balance payable immediately to beneficiary or estate
• **Pre-retirement surviving spouse benefit(prior formula benefit)**	
• Eligibility	Participant or former participant, vested or partially vested
• Benefit (spousal) (If participant has a grandfathered non-qualified benefit)	The monthly Prior Formula Benefit is determined as though the employee had retired or terminated the day before his death, survived to his earliest possible commencement date, and elected a reduced benefit in the form of a 50% joint and survivor annuity.
• Benefit (spousal) (If participant does not have a grandfathered non-qualified benefit)	The monthly Prior Formula Benefit is determined as though the employee had retired or terminated the day before his death, and elected a reduced benefit in the form of a 50% joint and survivor annuity.
Form of benefits	
• Automatic form for unmarried participants	Life annuity. Retirement Account may be taken as a lump sum.
• Automatic form for married participants	50% joint and survivor annuity, actuarially reduced. Retirement Account may be taken as a lump sum.
• Optional forms (prior to early retirement eligibility for participants who do not have grandfathered non-qualified benefits)	• Life annuity • 50%, 75% or 100% Joint and Survivor annuities • 10 Year Certain and Life annuity • Lump sum – lump sum is based on the age 65 benefit
• Optional forms (after early retirement eligibility)	• Life, 50%, 75% and 100% Joint and Survivor annuities • 10 Year Certain and Life annuity • Lump sum – lump sum is based on a benefit as of the later of current age or age 60 (Prior Formula Benefit not available as a lump sum for participants who terminated prior to June 1, 2008 and have a grandfathered non-qualified benefit).

Schedule SB, Part V — Summary of Plan Provisions

• Actuarial equivalence	• Optional Forms: 7.5% interest, 1971 TPF&C mortality (6 year setback for beneficiaries) • Lump Sum conversion: 417(e)(3) assumptions for interest and mortality. Stability Period = one month. Lookback = fifth month prior to the date of distribution.
Miscellaneous	
• Maximum compensation	Annual compensation may not exceed the limits in IRC Section 401(a)(17). This limit is indexed annually. For 2022, the limit is $305,000.
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2022, the limit is $245,000.

Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated effective January 1, 2015 and amended through January 1, 2022, are included in this valuation.

- **Most recent plan amendments included:** Amendment #4, adopted August 30, 2013.
- **Plan amendments excluded:** None.
- **Late retirement increases:**
  - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including a retroactive lump sum as of the valuation date. The amount of the lump sum is actuarially equivalent to a temporary life annuity of missed payments from age sixty-five to the valuation date.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Additional benefits included or excluded

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.

Schedule SB, Part V — Summary of Plan Provisions

- *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
- *Benefit accruals*: The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.

- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.

- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan provision changes since prior valuation

Maximum benefit and maximum compensation were updated from 2021 to 2022.

Schedule SB, line 24 - Change in Actuarial Assumptions

Actuarial assumption changes since prior valuation

- The lump sum mortality table was updated to 2022 per IRC section 417(e) and generational improvements based on MP-2021 scale to better reflect future expected lump sum conversion basis.
- Expected investment return was changed from 3.70% for 2021 to 3.20% for 2022.
- Retirement rates, withdrawal rates, salary scale, form of payment, TV commencement age and spouse assumptions were updated based on Henkel experience study review for the period 2015-2020.
