Independent Auditors' Report

To the Participants and Plan Administrator of
HNH Pension Plan (formerly known as WHX II Pension Plan):

Scope and Nature of the ERISA Section 103(a)(3)(C) Audit

We have performed audits of the financial statements of HNH Pension Plan (formerly known as WHX II Pension Plan) (the Plan), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits and of accumulated plan benefits as of December 31, 2022 and 2021, and the related statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the year ended December 31, 2022, and the and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the Plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2022 and 2021, and for the year ended December 31, 2022, stating that the certified investment information, as described in Note 6 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditors' Responsibilities for the Audit of the Financial Statements section:

- the amounts and disclosures in the financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.
- the information in the financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Emphasis of Matter

As disclosed in Note 1 to the financial statements, the WHX & API Foils Pension Plan merged into the Plan, effective April 1, 2022. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the Plan, and determining that the Plan's transactions that are presented and disclosed in the financial statements are in conformity with the Plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditors' Responsibilities for the Audit of the Financial Statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of accounting principles generally accepted in the United States of America.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control-related matters that we identified during the audit.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

1. General and Plan Formation

The HNH Pension Plan (formerly known as WHX Pension Plan II) (the Plan) is sponsored by Handy & Harman Ltd. (the Company or Plan Administrator) for the purpose of providing retirement and other benefits for certain participants and beneficiaries who were spun off from the WHX Pension Plan effective as of December 30, 2016, the inception of the Plan. Steel Partners Holdings L.P. owns 100% of the stock of Handy & Harman Ltd. The Plan contains supplements naming specific participants and beneficiaries covered. The benefits of participants under the Plan are equal to their accrued benefits under the benefit formula that was applicable to each participant under the WHX Pension Plan at the time of the spin-off. The total accumulated plan benefits of the two plans after the spin-off were equal to the accumulated plan benefits of the WHX Pension Plan immediately prior to the spin-off, and under the applicable spin-off rules, the Plan is considered fully funded.

Effective December 31, 2020, the WHX Pension Plan was merged with and into the API Foils North America Pension Plan, and all participants of both former plans became participants of the resulting Plan. The resulting merged plan was named WHX & API Foils Pension Plan.

Effective April 1, 2022, the Plan was amended and restated to merge the WHX & API Foils Pension Plan (the Affiliated Plan) into the Plan. This has been recorded as a Transfer In from Affiliated Plan of \$299,748,856 in the Statement of Changes in Net Assets Available for Benefits for the year ended December 31, 2022. The surviving plan has been renamed the HNH Pension Plan.

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). The Company's plan administrative committee is responsible for the administration of the Plan.

2. Description of the Plan

The following description of the Plan provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions. Eligibility and all future benefit accruals under the Plan are frozen. Participants are 100% vested in their benefits under the Plan. The Plan includes six primary benefit structures related to the specific employee groups covered, as discussed below:

WPSC Bargaining Employees and Ohio Coatings Company

Certain employees who were spun off into the Plan, with 5 years of continuous service are entitled to a benefit equal to the USWA-Wheeling-Pittsburgh Steel Corporation and the USWA-Pittsburgh-Canfield Corporation Retirement Security Plans (RSP Plans) benefit, as defined in the Plan document, or a monthly pension benefit at normal retirement age of 65 equal to \$40 times their years of continuous service offset by other pension benefits such as benefits from the Pension Benefit Guaranty Corporation (PBGC) and benefits attributable to vested balances in the RSP Plans.

Benefits are payable as early as age 55 provided minimum service requirements are met. Employees who are permanently incapacitated with at least 15 years of continuous service are eligible for a monthly pension benefit as explained above. Surviving spouses of retirees receive reduced benefits. Surviving spouses are also eligible for additional reduced benefits based on the deceased's pension type election at the time of retirement. Surviving spouses of active employees are eligible to receive reduced benefits provided the deceased was an active employee with at least 15 years of service.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

WPSC Salaried Employees

Certain employees who were spun off into the Plan, who were employees as of February 1, 1998 and have at least 5 years of continuous service are entitled to monthly pension benefits at normal retirement age of 62 equal to 1.3% of the highest average three-year compensation multiplied by years of continuous service offset by public pension benefits such as benefits from the PBGC and benefits attributable to vested balances in the Salaried Employees Pension Plan of WPSC. Reduced benefits are payable as early as age 55 provided minimum service requirements are met. Surviving spouses of retirees are eligible for reduced benefits as determined by the deceased's pension type election at the time of retirement. Surviving spouses of active employees are eligible to receive reduced benefits provided the deceased was an active employee with at least 5 years of service.

H&H Employees

Certain employees who were spun off into the Plan, are entitled to monthly pension benefits at the normal retirement age of 65. Benefits are payable as early as age 55 provided minimum service requirements are met. Participants are fully vested at the completion of 5 years of continuous service or normal retirement. For certain employees, the accrued monthly pension is generally equal to 28.75% or 38.75%, depending on the division in which the employee worked, of monthly average basic pay (determined by taking the average basic pay as of the beginning of the Plan year for each of the five most recent years) plus 11.25% of such average monthly pay in excess of \$833.33. For certain other employees, monthly pension benefits are determined based on credited service multiplied by factors ranging from \$6 to \$25, depending on the division in which the employee worked. Employees who are permanently incapacitated with 2-15 years of continuous service, depending on the division in which the employee worked, are eligible for a monthly pension benefit as explained above. In certain cases this benefit is subject to a minimum amount based on a percentage of the total projected pension benefit they would have received at normal retirement age.

Surviving spouses of retirees are eligible for actuarially reduced benefits as determined by the deceased's pension election. Spouses may decline surviving spouse benefits at retirement. Surviving spouses of vested active employees are eligible to receive benefits starting at the time the employee would have been eligible to retire. Participants may elect to receive their accumulated plan benefits as a life annuity, joint and survivor annuity, or other optional form of pension in an amount equal to the actuarial equivalent of the life annuity. In addition, certain one-time death benefits are available to surviving spouses of certain employees.

Bairnco Retirement Plan

Certain employees who were spun off into the Plan, who commenced employment subsequent to March 31, 2006, were excluded from participation in the Bairnco Plan. Participants in the Bairnco Plan included all nonunion employees of the Bairnco Corporation (Bairnco) and the union employees of the Arlon, East Providence, Rhode Island location. During the year ended December 31, 2004, the Arlon, East Providence, Rhode Island location was closed. On February 16, 2000, Bairnco purchased certain assets of the materials business of SignTech USA, Ltd. (SignTech). On March 15, 2000, Bairnco's Board of Directors (the Board) elected to include the employees of SignTech in the Bairnco Plan, effective March 1, 2000, at which time the employees of SignTech began participating in the Bairnco Plan. On January 10, 2001, Bairnco purchased selected net assets of Viscor, Inc. (Viscor). On January 27, 2001, the Board elected to include the employees of Viscor in the Bairnco Plan, effective February 1, 2001, at which time the employees of Viscor began participating in the Bairnco Plan. All employees employed prior to January 1, 1995 were eligible to participate in the Bairnco Plan at the later of January 1, 1989 or January 1 following their first date of employment. All employees employed after January 1, 1995 were eligible to participate in the Bairnco Plan on January 1 following the completion of one year of service. A year of service with respect to employment on or after January 1, 1976 was defined, for eligibility and vesting purposes, as a plan year during which a participant is credited with at least 1,000 hours of service, allocated pro rata for the first and last plan year of a participant's employment.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

Participants are entitled to annual pension benefits beginning at normal retirement (age 65) equal to 1.3% of final average compensation up to covered compensation levels plus 0.65% of final average earnings, which are in excess of covered compensation levels, multiplied by years of service up to a maximum of 25 years. A participant's benefits were 100% vested in the Bairnco Plan at the earliest of either: (a) the participant attains age 65, provided the participant is an employee of Bairnco on the date the participant becomes 65, or (b) upon completion of five years of credited service. Upon retirement, benefits are paid monthly during the lifetime of the retiree and, if applicable, during the lifetime of a surviving annuitant. A participant with an eligible spouse will have the benefits paid in the form of a joint and survivor annuity unless the participant elects not to receive it in this form. The amount of the monthly benefit is based on the participant's compensation, years of service, and other factors as defined in the Bairnco Plan agreement.

Bairnco Hourly Kasco Employees

Participants in the Kasco Plan include all individuals employed by Kasco Corporation (Kasco) who have completed at least three months of service, were represented by the International Association of Machinists and Aerospace Workers, District No. 9 (the Union), and were covered by the collective bargaining agreement between Kasco and the Union. Effective January 1, 2004, the Union was terminated and the Kasco Plan no longer accepted new active participants. As such, all participants were considered terminated vested employees from that date forward. Participants receive a monthly benefit for each year of credited service in accordance with the benefit rate in effect per the collective bargaining agreement in effect at the time of their termination of employment. Upon retirement, benefits are paid monthly during the lifetime of the retiree and, if applicable, during the lifetime of a surviving annuitant. A participant with an eligible spouse will have the benefits paid in the form of a joint and survivor annuity unless the participant elects not to receive it in this form. The amount of the monthly benefit is based on years of service and other factors, as defined in the Kasco Plan agreement.

API Foils

Effective September 30, 2004, API Foils North American Pension Plan was amended to discontinue the addition of new participants to the Plan and cease all future benefit accruals under the Plan. The Plan provides participants or their beneficiaries with benefits in accordance with a benefit formula. The benefit amount is based on age, years of service, compensation, and other relevant factors. Full vesting is provided after five years of service have been completed.

Employees are entitled to receive benefit payments at the normal retirement age of 65, although earlier retirement with lesser benefits is permitted. Benefit payments are paid in the following forms: (1) immediate survivorship annuity; (2) straight life annuity; (3) single life annuities with certain periods of five, ten or fifteen years; (4) survivorship life annuities with survivorship percentages of 50, 66 2/3, 75 or 100%; or (5) lump-sum distribution.

If an active participant dies before their normal retirement date, no benefit will become payable unless the participant is survived by a spouse on the date they die and the participant has a vesting percentage larger than zero. If both conditions are met, a Qualified Preretirement Survivor Annuity will become payable. Death benefits will be calculated in like manner if the participant dies after normal retirement age and before annuity starting date. If any death occurs after the participant's annuity starting date, the death benefit will be determined by the form of retirement benefit in effect at such date.

3. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan are prepared on the accrual basis of accounting in conformity with accounting principles generally accepted in the United States (U.S. GAAP).

Investment Valuation and Income Recognition

The investment in the WHX Pension Plan Trust (the Master Trust) (see Note 8) is valued at fair market value, which is determined by the current fair value of the underlying assets as reported by The Northern Trust Company (the Trustee) as of December 31, 2022 and 2021. The Master Trust invests in certain securities and other investments, including limited partnerships, joint ventures and hedge funds, for which no publicly quoted market value is readily available. The Trustee reported the fair value of these investments based upon the valuation techniques discussed in Note 7. Purchases and sales of securities are recognized on the trade date. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Plan interest in WHX Pension Plan Trust net investment income (loss) includes the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes, and when applicable, disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries, and (b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on years of service and the benefit rate in effect at the time of termination. Benefits payable under all circumstances (retirement, death, disability and termination of employment) are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits. Willis Towers Watson is the Plan's actuary. The actuarial present value of accumulated plan benefits is discounted to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability or retirement) between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation as of December 31, 2022 and 2021, are:

	2022	2021
Rate of Return/Interest Rate	6.50%	6.50%
Mortality	MP-2021	MP-2021
Normal Retirement Age	Age 62 to age 65	Age 62 to age 65

The plan amendments and transfer in of \$291,745,663 relates to the accumulated plan benefits of the plans that merged in as described in Note 1 to the financial statements.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

The foregoing actuarial assumptions are based on the presumption that the Plan will continue to operate. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2023 and 2022. Had the valuations been performed as of December 31, 2022 and 2021, respectively, there would be no material differences.

RSP Benefits

The RSP Benefits represent the current value of the USWA - Wheeling - Pittsburg Steel Corporation and the USWA - Pittsburg - Canfield Corporation Retirement Security Plans (RSP Plans) participant accounts that were merged into the Plan. The net assets available for plan benefits include RSP Benefits totaling \$11,876,093 and \$520,696 at December 31, 2022 and 2021, respectively. The assets related to the RSP Benefits can only be utilized to fund all or a portion of the former RSP Plan participant's total pension benefit as determined by the Plan's benefit formula.

Benefit Payments

Benefit payments to participants are recorded upon distribution.

Contributions

The Company contributes such amounts as are necessary on an actuarial basis to provide sufficient assets to meet benefit payments to Plan members. Contributions to the Plan are recorded as additions to the Plan on an accrual basis.

Administrative Expenses

Certain employees of the Company provide services to the Plan. Neither these individuals nor the Company receives any compensation from the Plan. Certain plan expenses, including consulting, legal, accounting, actuary and investment manager fees, were paid by the Master Trust and allocated to the respective plans based on their interest in the Master Trust or, if the fees were applicable to a particular plan, allocated directly to such plan.

Subsequent Events

The Plan has evaluated subsequent events through October 13, 2023, the date the financial statements were available to be issued, except as follows:

The Secure 2.0 Act of 2022 was signed into law on December 29, 2022. This legislation includes a vast array of provisional changes to retirement plans, becoming effective in 2023 and beyond. Plan management is evaluating the impact of the adoption and implementation of this legislation on the Plan.

4. Funding Policy

The Company's funding policy is to make annual contributions to the Plan in amounts needed to meet the minimum funding requirements of ERISA as amended. During 2022, the Company recorded contributions of \$6,512,713 on an accrual basis. The Company's contributions for 2022 exceed the minimum funding requirements of ERISA.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

5. Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan, subject to certain collective bargaining agreements, to discontinue or adjust its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

After all expenses of administration and liquidation are paid, benefits shall be distributed to vested participants in accordance with statutory priorities as defined by Title IV of ERISA. The participants' vested benefits shall be paid in accordance with the individual benefit structures, as defined generally in Note 2 above. If assets remain following the complete distribution of all benefit payments and Plan liabilities, they shall be returned to the Company. To the extent that unfunded vested benefits exist, ERISA provides that such benefits are payable by the PBGC to participants, up to specified limitations.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

6. Certified Financial Information

The Plan Administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Trustee has certified that the following information included in the accompanying financial statements are complete and accurate:

- Plan's interest in the Master Trust as shown in the Statements of Net Assets Available for Benefits as of December 31, 2022 and 2021.
- The Plan's interest in the Master Trust net investment loss as shown in the Statement of Changes in Net Assets Available for Benefits for the year ended December 31, 2022.

The Plan's independent certified public accountant did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements.

7. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under authoritative guidance are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, such as:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

HNH Pension Plan (formerly known as WHX Pension Plan II)

Notes to Financial Statements
December 31, 2022 and 2021

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observables and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2022 and 2021.

Equity securities: when available, quoted market prices are used to determine the fair value of investment securities, and they are included in Level 1. Level 1 securities primarily include publicly-traded equity securities. When unobservable, valuation methodologies are used, including utilization of the investee company's financial statements and industry comparisons.

Fixed income securities: when available, observable market data, including pricing on recent closed market transactions, is used to value loans which are included in Level 2. When this data is unobservable, the Master Trust uses valuation methodologies using current market interest rate data adjusted for inherent credit risk.

Hedge funds are comprised of shares or units in commingled funds that may not be publicly traded. The underlying assets in these funds are primarily publicly traded equity securities and fixed income securities, and the funds are valued at their NAVs as a practical expedient to measure fair value.

Private equity, a private equity limited partnership is a direct lending private debt fund which serves as an alternative source of liquidity for the shipping industry. Another private equity limited partnership has a strategy to build a concentrated portfolio of 8 to 10 companies with \$100 million to \$1 billion of equity allocated per investment. Investments will be control portions of minority stakes with significant protections and influence. The strategy will focus on the North American and Asian financial, industrial, energy, consumer and business service sectors. Another private equity limited partnership has a strategy to focus on private growth-oriented companies and value added investments in lower middle-market high growth industries committed to provide long-term opportunities and investing in both debt and equity. Another private equity limited partnership has a strategy to create a portfolio of high yield, secured, revenue-based loans made to established private companies generating between \$4 million and \$75 million in annual revenue. The limited partnerships are primarily valued based on NAV as a practical expedient to measure fair value as calculated by the funds and are not publicly available.

U.S. government debt securities and mortgage backed securities are valued at a price based on observable market information or a broker quote in an over-the-counter market and classified as Level 2.

Corporate bonds and loans are valued at a price based on observable market information in primary markets or a broker quote in an over-the-counter market, and is classified as level 2. Corporate bonds and loans also include private placement bonds that are not publicly issued or publicly traded and are classified as Level 3. The valuation for those instruments is based on analyzing comparable yields of similar debt securities.

Convertible promissory notes, stock warrants and private company common stock consist of promissory notes that are convertible into preferred shares of stock, stock warrants that are exercisable into preferred shares of stock, and common stock in a privately-held company. As there is no quoted market value for these investments, they are recorded at fair value based upon the market approach which reflects the value of recent transactions in the last rounds of financing. These investments are included in Level 3.

Notes to Financial Statements
December 31, 2022 and 2021

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Master Trust assets and liabilities at fair value as of December 31, 2022 and 2021:

(a) In accordance with Subtopic 820-10, certain investments that were measured at net asset value per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the line items presented in the Statements of Net Assets Available for Benefits.

Changes in Fair Value Levels

Gains and losses (realized and unrealized) included in changes in net assets for the period above are reported in Plan interest in the WHX Pension Plan Trust net investment loss in the Statement of Changes in Net Assets Available for Benefits.

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. For the years ended December 31, 2022 and 2021, there were no transfers into or out of Levels 1, 2 or 3.

8. Interest In WHX Pension Plan Trust

The Trustee maintained all records of investment transactions and determined the valuation of the investment portfolio for the Plan's interest in the Master Trust. The Master Trust was established for the investment of assets for the Plan and several other retirement plans sponsored by the Company or its subsidiaries. The Retirement Pension Plan for Employees of JPS Industries Holdings LLC, a related plan, is part of the Master Trust. Each participating plan has an interest in each investment fund within the Master Trust in the proportion its investment in such investment fund is to the total investments of all participating plans invested in such investment fund. As of December 31, 2022 and 2021, the assets of the Master Trust were held by The Northern Trust Company. The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust plus actual contributions and allocated investment income or loss less actual distributions and allocated administrative expenses, which approximates the Plan's divided interest in the Master Trust at the end of the year. At December 31, 2022 and 2021, the Plan's interest in the net assets of the Master Trust was approximately 83% and 1%, respectively. Income or loss related to the Master Trust is allocated to the individual plans based upon average monthly balances invested by each plan. Administrative expenses paid by the Master Trust are allocated to the individual plans based on their interest in the Master Trust or, if the fees were applicable to a particular Plan, allocated directly to such Plan. The Plan's investment in the Master Trust is included in Plan interest in WHX Pension Plan Trust in the accompanying Statements of Net Assets Available for Benefits.

The following tables present the investments and other assets and liabilities of the Master Trust and the Plan's divided interest as of December 31, 2022 and 2021:

9. Related-Party and Party In Interest Transactions

Section 3(14) of ERISA defines a party in interest to include, among others, fiduciaries or employees of the Plan, any person who provides services to the Plan, or an employer whose employees are covered by the Plan. Certain Plan investments are managed by the Trustee. Transactions related to those investments qualify as party in interest transactions. The Plan pays fees for investment management services and other exempt services provided by the Trustee. For the year ended December 31, 2022, there were no material administrative fees incurred and paid by the Plan to the Trustee. Certain investments in the Master Trust are managed by the Trustee or affiliates, and are therefore considered exempt party in interest transactions.

Notes to Financial Statements

December 31, 2022 and 2021

10. Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported on the basis of certain assumptions pertaining to interest rates, investment return, inflation rates and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

The Plan invests in a Master Trust, which in turn invests in various equity and debt securities, mutual funds, derivatives and hedge funds. These investments are exposed to various risks such as interest rate, market, concentration and credit risks. Market risks include global events, such as a pandemic or international conflict, which could impact the value of investment securities. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is possible that changes in risks in the near term could materially affect the amounts reported in the Statements of Net Assets Available for Benefits.

11. Tax Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated April 18, 2018 that the Plan is qualified under the Internal Revenue Code (IRC) and therefore the related trust is exempt from taxation. The Plan Administrator believes the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC and therefore, believes that the Plan is qualified, and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

12. Reconciliation of the Financial Statements to Form 5500

There are no reconciling items between the net assets or change in net assets reported in the audited financial statements and Schedule H of the Form 5500 as of December 31, 2022 and 2021, and for the year ended December 31, 2022.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits

The IRC §430 regulations describe the required methodology for attributing benefits among Funding Target, current year Target Normal Cost, and future years' Target Normal Costs for disability benefits, Social Security benefits, death benefits and other ancillary benefits.

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable.

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Handy & Harman Ltd. and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits in a single lump sum payment. Such lumps sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Assumptions Rationale - Significant Demographic Assumptions

Healthy and Disabled Mortality

Mortality rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. For annuitants, custom base tables based on the IRS approved substitute mortality tables for funding valuations.

Termination

Termination rates were based on an experience study conducted in 2010, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future

Retirement

Retirement rates were based on an experience study conducted in 2013, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future

Administrative expenses

Administrative expenses are estimated by determining the expected expenses for the coming year, reflecting items like expected PBGC premiums as well as the average expenses paid from the trust over the preceding three years.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law,” as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Data Sources

Handy & Harman Ltd., through its administrative platform, furnished participant data as of January 1, 2022. Data was reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Change in Assumptions and Methods

Change in Assumptions and Methods since Prior Valuation

- The segment interest rates used to calculate funding target and target normal cost were updated to the current valuation date as required by IRC §430.
- The mortality projection scale used to calculate the funding target was updated to reflect the latest mortality improvement scale, as required by guidance issued by IRS under IRC §430.
- The assumed plan-related expenses added to the target normal cost were updated to reflect current experience and nine months for the WHX & API Foils Pension Plan. The new amount is \$1,355,000.

Schedule SB – Statement by Enrolled Actuary

Plan Sponsor	Handy & Harman Ltd.
EIN/PN	13-3768097/002
Plan Name	WHX Pension Plan II
Valuation Date	January 1, 2022
Enrolled Actuary	Thomas A. DeFilippo
Enrollment Number	23-06419

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

The information contained in the Schedule SB reflects the merger of the WHX & API Foils Pension Plan into the WHX Pension Plan II and the pending IRS method change request due to the mid-year merger. The minimum required contribution ("MRC") for the January 1, 2022 – December 31, 2022 plan year for the plan was determined by taking the sum of:

- 1) the MRC for the WHX Pension Plan II determined as of the January 1, 2022 valuation date, and
- 2) the MRC for the WHX & API Foils Pension Plan determined based on a new April 1, 2022 valuation date, with target normal cost consisting solely of expenses expected to be paid from the trust during the April 1, 2022 – December 31, 2022 period (there are no benefit accruals since the plan is frozen), and a shortfall amortization charge, including a new shortfall amortization installment established as of April 1, 2022, pro-rated for the period April 1, 2022 to December 31, 2022.

Schedule SB, Line 23 Information on Use of Multiple Mortality Tables

Different mortality tables were used for before and after retirement. Per instructions, Item 23 reflects that the annuitant mortality will apply to the entire population. Below is the breakout of the current population.

Population description	Population size	Mortality table
Non-annuitants (Active employees and participants with deferred benefits)	169	Pre-retirement: separate rates based on RP-2014 "Employees" table without collar or amount adjustments, adjusted backward to 2006 with MP-2014, and then projected forward with a static projection as specified in the regulations under §1.430(h)(3)-1 using Scale MP-2020. Post-retirement: Plan specific mortality approved by the IRS.
Male and Female annuitant only	465	Plan specific mortality approved by the IRS

SCHEDULE SB ATTACHMENTS

Schedule SB, Line 23 Information on Use of Substitute Mortality Tables

Substitute mortality tables are used for the following plan populations:

Mortality is assumed to occur according to a plan-specific substitute mortality table with separate male and female rates, as approved by the IRS in 2018 for valuations for the 2019 through 2023 plan years. The mortality rates are applied to all annuitants (including disabled annuitants). The prescribed tables apply for non-annuitants (including disabled non-annuitants) before retirement. The tables were developed based on mortality experience of the annuitant populations for the qualified defined benefit pension plans sponsored by Handy & Harman Ltd. for the period from January 1, 2013 through December 31, 2017. The tables are generational, based on the IRS-prescribed projection scale MP-2018, with a base year of 2015. The table below presents illustrative rates for the base year.

Percentage of Participants Expected to Die Within One Year		
Age	Males	Females
25	0.0577%	0.0218%
30	0.0567%	0.0265%
35	0.0664%	0.0368%

80	5.7122%	4.4790%
85	9.9707%	7.9501%
90	17.4435%	14.1017%

The single mortality ratio for both genders of the aggregated pension plans is equal to 1.259291. The partial credibility weighting factor for the population determined pursuant to § 1.430(h)(3)-2(e)(2) is 0.774930. The single mortality ratio for both genders of the aggregated pension plans after reflecting the partial credibility weighting factor is 1.200932.

Percent married	85% of males; 65% of females; API participants are assumed to be 100% married;
Spouse age	Wife three years younger than husband
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the normal form of payment.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date First day of plan year

Funding target Present value of accrued benefits

The IRC §430 regulations describe the required methodology for attributing benefits among Funding Target, current year Target Normal Cost, and future years' Target Normal Costs for disability benefits, Social Security benefits, death benefits and other ancillary benefits.

Target normal cost Present value of benefits expected to accrue during the plan year plus plan-related expenses expected to be paid from plan assets during the plan year as required by regulations under IRC §430.

Actuarial value of assets Average of the fair market value of assets on the valuation date and 12 and 24 months preceding the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable.

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Willis Towers Watson has reviewed the plan provisions with Handy & Harman Ltd. and, based on that review, is not aware of any significant benefits required to be valued that were not.

The plan pays small benefits in a single lump sum payment. Such lumps sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Assumptions Rationale - Significant Economic Assumptions

Discount rate

The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.

Assumptions Rationale - Significant Demographic Assumptions

Healthy and Disabled Mortality

Mortality rates were based on an experience study conducted in 2018, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. For annuitants, custom base tables based on the IRS approved substitute mortality tables for funding valuations.

Termination

Termination rates were based on an experience study conducted in 2010, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future

Retirement

Retirement rates were based on an experience study conducted in 2013, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future

Administrative expenses

Administrative expenses are estimated by determining the expected expenses for the coming year, reflecting items like expected PBGC premiums as well as the average expenses paid from the trust over the preceding three years.

Source of Prescribed Methods

Funding methods

The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law,” as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.

Data Sources

Handy & Harman Ltd., through its administrative platform, furnished participant data as of January 1, 2022. Data was reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date.

We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Change in Assumptions and Methods

Change in Assumptions and Methods since Prior Valuation

- The segment interest rates used to calculate funding target and target normal cost were updated to the current valuation date as required by IRC §430.
- The mortality projection scale used to calculate the funding target was updated to reflect the latest mortality improvement scale, as required by guidance issued by IRS under IRC §430.
- The assumed plan-related expenses added to the target normal cost were updated to reflect current experience and nine months for the WHX & API Foils Pension Plan. The new amount is \$1,355,000.

The information contained in the Schedule SB reflects the merger of the WHX & API Foils Pension Plan into the WHX Pension Plan II and the pending IRS method change request due to the mid-year merger. The minimum required contribution ("MRC") for the January 1, 2022 – December 31, 2022 plan year for the plan was determined by taking the sum of:

- 1) the MRC for the WHX Pension Plan II determined as of the January 1, 2022 valuation date, and
- 2) the MRC for the WHX & API Foils Pension Plan determined based on a new April 1, 2022 valuation date, with target normal cost consisting solely of expenses expected to be paid from the trust during the April 1, 2022 – December 31, 2022 period (there are no benefit accruals since the plan is frozen), and a shortfall amortization charge, including a new shortfall amortization installment established as of April 1, 2022, pro-rated for the period April 1, 2022 to December 31, 2022.

Final Average Annual Compensation

For purposes of computing the benefits provided under the Plan, Final Average Annual Compensation is defined as the average annual compensation earned during the highest five consecutive years during the ten year period preceding retirement. In determining the compensation to be counted in a particular year, Management Incentive Compensation (MIC) shall be included in an amount up to 50% of the employee's basic rate of pay as of the December 31st of the preceding calendar year.

The partial year's compensation earned during the employee's last year of employment may be included in the Final Average Annual Compensation if it would be to his advantage. In such an instance, a fraction of the fifth preceding year's compensation must be included in the averaging for the period of time in which the employee did not work during his final year. However, no more than five year's bonuses may be included. In the event an employee completes less than five years of Credited Service, average compensation shall be based on all his periods of Credited Service. Only Compensation prior to March 31, 2006 is counted for benefit accrual purposes.

Retirement Dates

Retirement Benefits

Normal

A monthly benefit equal to 1/12th of the greater of (1), (2), and (3):

1. The sum of 1.3% of Final Average Annual Compensation and 0.65% of Final Average Annual Compensation in excess of participant's "covered compensation"; multiplied by years of Credited Service (to a maximum of 25) adjusted, if applicable, to reflect a participant's prior plan benefit
2. The accrued benefit as of December 31, 1993, plus a benefit based on (1) above and Credited Service after December 31 1993, with total Credited Service not in excess of 25 years
3. The annual accrued benefit as of December 31, 1988, based on Plan in effect at that time

All benefit accruals were frozen as of March 31, 2006

Early

A deferred pension equal to the pension computed as at Normal Retirement Date but based on Final Average Annual Compensation at actual date of retirement. Such pension shall be reduced by a fraction, the numerator of which is the number of years of Credited Service at the Early Retirement Date and the denominator of which is the number of years of Credited Service at the Normal Retirement Date; or an immediate pension equal to the pension payable just described, reduced for each month by which the Early Retirement Date precedes the Normal Retirement Date.

The early retirement reduction factors are illustrated below for select ages:

Death Benefits

Active employees

Spouses Benefit – The spouse of an employee who dies in active service after attaining age 50 and completing 10 years of Credited Service will receive a monthly benefit equal to 75% of the employee's accrued benefit or the employee's contributions with interest if greater in value. The 75% figure is reduced by 1/2% for each year in excess of five (5) by which the employee's age exceeds the spouse's age.

The Spouse of any employee who dies in active service with a vested benefit is entitled to a benefit equal to 50% of the amount he could have received if he had retired early and elected a joint and 50% survivor annuity.

Return of Contributions – An employee who dies in active service but is ineligible for benefits above will receive a return of contributions with interest. Interest will be credited at 5% compounded annually. Employee contributions were returned however, to all participants employed on October 4, 1980.

Valuation Date January 1, 2022

Enrolled Actuary Thomas A. DeFilippo

Enrollment Number 23-06419

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

The information contained in the Schedule SB reflects the merger of the WHX & API Foils Pension Plan into the WHX Pension Plan II and the pending IRS method change request due to the mid-year merger. The minimum required contribution ("MRC") for the January 1, 2022 – December 31, 2022 plan year for the plan was determined by taking the sum of:

1) the MRC for the WHX Pension Plan II determined as of the January 1, 2022 valuation date, and

2) the MRC for the WHX & API Foils Pension Plan determined based on a new April 1, 2022 valuation date, with target normal cost consisting solely of expenses expected to be paid from the trust during the April 1, 2022 – December 31, 2022 period (there are no benefit accruals since the plan is frozen), and a shortfall amortization charge, including a new shortfall amortization installment established as of April 1, 2022, pro-rated for the period April 1, 2022 to December 31, 2022.

The following groups have additional Pre-Retirement Spousal Benefit provisions:

- Martinsburg Automotive If a participant dies while active, and the employee has three or more years of service, a lump sum benefit in the amount of \$50 times years of Vesting Service, with a maximum benefit of \$2,000, is payable. If eligible for Normal Retirement at date of death, beneficiary will receive a lump sum death benefit of \$2,000.
- H&H Tube Company If a vested participant is not married at date of death, or married less than one year, a lump sum payment will be payable to the beneficiary in the amount of \$50 times the Monthly Pension Benefit at date of termination. A spouse may choose a lump sum benefit equal to \$50 times the Monthly Pension Benefit, in lieu of and in complete substitution for all other pre-retirement spouse benefits
- Sumco A lump sum option is available if the actuarial equivalent of the spouse's benefit is greater than \$5,000
- Postretirement Surviving Spouse Benefit A single lump sum death benefit is payable to the spouse or otherwise indicated beneficiary. The amount of the single lump sum death benefit is as follows:

<u>Group</u>	<u>Single Lump Sum Death Benefit</u>
Dover Automotive	\$1,000
Martinsburg Automotive	\$2,000
H&H Tube Company	\$5,000*
Indiana Tube	\$2,000
MSW Cockeyville	\$2,000
Strandflex	\$2,500

* \$5,500 after 5/10/2003

For Handy & Harman/USWA participants, a single lump sum death benefit in the amount of \$6,000 is payable to the spouse or otherwise indicated beneficiary. If the former employee had received less than three Monthly Pension payments prior to death, the single sum death benefit will be increased by the product of (a) the Monthly Pension Benefit and (b) three minus the number of pension payments received prior to death.

Final Average Annual Compensation

For purposes of computing the benefits provided under the Plan, Final Average Annual Compensation is defined as the average annual compensation earned during the highest five consecutive years during the ten year period preceding retirement. In determining the compensation to be counted in a particular year, Management Incentive Compensation (MIC) shall be included in an amount up to 50% of the employee's basic rate of pay as of the December 31st of the preceding calendar year.

The partial year's compensation earned during the employee's last year of employment may be included in the Final Average Annual Compensation if it would be to his advantage. In such an instance, a fraction of the fifth preceding year's compensation must be included in the averaging for the period of time in which the employee did not work during his final year. However, no more than five year's bonuses may be included. In the event an employee completes less than five years of Credited Service, average compensation shall be based on all his periods of Credited Service. Only Compensation prior to March 31, 2006 is counted for benefit accrual purposes.

Retirement Dates

Retirement Benefits

Normal

A monthly benefit equal to 1/12th of the greater of (1), (2), and (3):

1. The sum of 1.3% of Final Average Annual Compensation and 0.65% of Final Average Annual Compensation in excess of participant's "covered compensation"; multiplied by years of Credited Service (to a maximum of 25) adjusted, if applicable, to reflect a participant's prior plan benefit
2. The accrued benefit as of December 31, 1993, plus a benefit based on (1) above and Credited Service after December 31 1993, with total Credited Service not in excess of 25 years
3. The annual accrued benefit as of December 31, 1988, based on Plan in effect at that time

All benefit accruals were frozen as of March 31, 2006

Early

A deferred pension equal to the pension computed as at Normal Retirement Date but based on Final Average Annual Compensation at actual date of retirement. Such pension shall be reduced by a fraction, the numerator of which is the number of years of Credited Service at the Early Retirement Date and the denominator of which is the number of years of Credited Service at the Normal Retirement Date; or an immediate pension equal to the pension payable just described, reduced for each month by which the Early Retirement Date precedes the Normal Retirement Date.

The early retirement reduction factors are illustrated below for select ages:

<u>Age</u>	<u>Factor</u>	<u>Age</u>	<u>Factor</u>
64	0.923	59	0.654

Schedule SB, Line 23 Information on Use of Substitute Mortality Tables

Substitute mortality tables are used for the following plan populations:

Mortality is assumed to occur according to a plan-specific substitute mortality table with separate male and female rates, as approved by the IRS in 2018 for valuations for the 2019 through 2023 plan years. The mortality rates are applied to all annuitants (including disabled annuitants). The prescribed tables apply for non-annuitants (including disabled non-annuitants) before retirement. The tables were developed based on mortality experience of the annuitant populations for the qualified defined benefit pension plans sponsored by Handy & Harman Ltd. for the period from January 1, 2013 through December 31, 2017. The tables are generational, based on the IRS-prescribed projection scale MP-2018, with a base year of 2015. The table below presents illustrative rates for the base year.
