REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Plan Administrator
Retirement Plan for Employees of Ohio Gas Company

Scope and nature of the ERISA Section 103(a)(3)(C) audit

We have performed audits of the financial statements of Retirement Plan for Employees of Ohio Gas Company (the "Plan"), an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), as permitted by ERISA Section 103(a)(3)(C) (ERISA Section 103(a)(3)(C) audit). The financial statements comprise the statements of net assets available for benefits - modified cash basis as of December 31, 2022 and 2021, and the related statements of changes in net assets available for benefits - modified cash basis for the years ended December 31, 2022 and 2021, and the related notes to the financial statements.

Management, having determined it is permissible in the circumstances, has elected to have the audits of the Plan's financial statements performed in accordance with ERISA Section 103(a)(3)(C) pursuant to 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. As permitted by ERISA Section 103(a)(3)(C), our audits need not extend to any statements or information related to assets held for investment of the plan (investment information) by a bank or similar institution or insurance carrier that is regulated, supervised, and subject to periodic examination by a state or federal agency, provided that the statements or information regarding assets so held are prepared and certified to by the bank or similar institution or insurance carrier in accordance with 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA (qualified institution).

Management has obtained certifications from a qualified institution as of December 31, 2022 and 2021, and for the years ended December 31, 2022 and 2021, stating that the certified investment information, as described in Note 4 to the financial statements, is complete and accurate.

Opinion

In our opinion, based on our audits and on the procedures performed as described in the Auditor's Responsibilities for the Audit of the Financial Statements section

- The amounts and disclosures in the accompanying financial statements, other than those agreed to or derived from the certified investment information, are presented fairly, in all material respects, in accordance with the modified cash basis of accounting described in Note 2.
- The information in the accompanying financial statements related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

Basis for opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our ERISA Section 103(a)(3)(C) audit opinion.

Emphasis of matter - basis of accounting

We draw attention to Note 2 of the financial statements, which describes the basis of accounting. The financial statements are prepared on the modified cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the modified cash basis of accounting described in Note 2, and for determining that the modified cash basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. Management's election of the ERISA Section 103(a)(3)(C) audit does not affect management's responsibility for the financial statements.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's responsibilities for the audit of the financial statements

Except as described in the Scope and Nature of the ERISA Section 103(a)(3)(C) Audit section of our report, our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

Our audits did not extend to the certified investment information, except for obtaining and reading the certification, comparing the certified investment information with the related information presented and disclosed in the financial statements, and reading the disclosures relating to the certified investment information to assess whether they are in accordance with the presentation and disclosure requirements of the modified cash basis of accounting described in Note 2.

Accordingly, the objective of an ERISA Section 103(a)(3)(C) audit is not to express an opinion about whether the financial statements as a whole are presented fairly, in all material respects, in accordance with the modified cash basis of accounting described in Note 2.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other matter – Supplemental schedules required by ERISA

The supplemental schedules of assets (held at end of year) as of December 31, 2022, and reportable transactions for the year ended December 31, 2022 are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information included in the supplemental schedules, other than that agreed to or derived from the certified investment information, has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures. These additional procedures included comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with US GAAS. For information included in the supplemental schedules that agreed to or is derived from the certified investment information, we compared such information to the related certified investment information.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, other than the information agreed to or derived from the certified investment information, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion

- The form and content of the supplemental schedules, other than the information in the supplemental schedules that agreed to or is derived from the certified investment information, are presented, in all material respects, in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.
- The information in the supplemental schedules related to assets held by and certified to by a qualified institution agrees to, or is derived from, in all material respects, the information prepared and certified by an institution that management determined meets the requirements of ERISA Section 103(a)(3)(C).

NOTES TO FINANCIAL STATEMENTS

December 31, 2022 and 2021
(Modified cash basis)

NOTE 1 - DESCRIPTION OF PLAN

General

The Retirement Plan for Employees of Ohio Gas Company (the "Plan") is a defined benefit pension plan established to provide pension benefits to Ohio Gas Company (the "Company") employees identified in the Plan document. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). Effective December 31, 2010, the Plan was frozen which suspended the accrual of future service benefits and no employees shall be eligible to enter the Plan after December 31, 2010. Effective August 31, 2022, the Plan was amended to add a temporary lump sum distribution option to allow for a termination of the Plan. The following is a brief description of the Plan and its respective provisions. Participants should refer to the Plan document for more complete information.

Plan Administration

The Plan is administered by the Ohio Gas Company Benefits Committee (the "Benefits Committee"). Principal Trust Company ("Principal") serves as the Plan's trustee which administers the investments. The Plan's assets are held by Principal and Principal is the administrator of the Plan's contributions and disbursements.

Participation

Employees were generally eligible to participate in the Plan upon completion of one year of service and attainment of age 21. One year of service is defined as a 12-month period in which an employee completes at least 1,000 hours of service.

Funding Policy

Contributions to the Plan are based upon a valuation performed by an independent actuary. The amounts are calculated to provide for whatever benefits are not covered by the Plan's current assets and the estimated future earnings thereon. Contributions are at least equal to the minimum funding required under ERISA. Annually, an independent actuary is utilized to determine the Plan's funding requirements. The minimum funding requirement was \$0 for 2022 and 2021.

Vesting

Participants are 100% vested after completing five years of service, with no vesting before the end of the five-year period.

Pension Benefits

In accordance with the Plan provisions, employees are entitled to monthly pension benefits beginning at the normal retirement age of 65, which are equal to the greater of the average of the last five year's salary multiplied by specified rates or specified rates multiplied by "salary earned," as defined in the Plan. The normal form of benefit is a life annuity; however, married participants will receive a 50% joint and survivor annuity unless elected otherwise. Early retirement benefits are based upon service accrued and "salary earned" up to age 55 and are reduced by an early retirement factor. Subject to the provisions set forth in the Plan, spouses are entitled to a lifetime benefit of up to 100% of the accrued benefit upon the death of an active member.

(Modified cash basis)

Plan Termination Priorities

The Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA. In the event the Plan is terminated, the assets of the Plan will be allocated as prescribed by the Plan document and by ERISA and its related regulations, generally to provide accrued benefits to the date of such termination to the extent that such benefits have been funded under the Plan, or to the extent that such benefits are insured by the Pension Benefit Guaranty Corporation (the "PBGC").

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits under covered plans and the amount of the benefit protection is subject to certain limitations.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared using the modified cash basis of accounting which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. Under the modified cash basis of accounting certain income and the related assets are recognized when received rather than when earned and certain expenses and the related liabilities are recognized when paid rather than when the obligation is incurred.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for a discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income is recognized when received. Net (depreciation) appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 8) are those future periodic payments that are attributable under Plan provisions for service that participants have rendered. Such benefits include those expected to be paid to retired or terminated employees, beneficiaries of employees who have died, and present employees. The accumulated plan benefits for active employees are calculated according to a formula based upon the employees' compensation and years of service rendered to December 31, 2010, the date the Plan was frozen to future benefit accruals. Benefits to be provided via annuity contracts excluded from plan assets have also been excluded from accumulated plan benefits.

(Modified cash basis)

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Expenses

The Plan pays all costs to the trustee for investment management services. The Company pays substantially all other costs of Plan administration.

NOTE 3 - FAIR VALUE MEASUREMENTS

In accordance with the Financial Accounting Standards Board guidance regarding fair value, a hierarchy is established that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy defines three levels of inputs that may be used to measure fair value.

- Level 1 - Unadjusted quoted prices in active markets for identical unrestricted assets and liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset and liability or can be corroborated with observable market data for substantially the entire contractual term of the asset or liability.
- Level 3 - Unobservable inputs that reflect the entity's own assumptions about the assumption market participants would use in the pricing of the asset or liability and are consequently not based on market activity but rather through particular valuation techniques.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value as of December 31, 2022 and 2021:

Mutual funds - Valued at the quoted net asset value ("NAV") of shares held by the Plan at year end.

Pooled separate accounts - The fair value of the pooled separate accounts is measured using the NAV per unit based on the redemption value as determined by the trustee based on the fair value of the underlying investments.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement result at the reporting date.

NOTE 4 - INFORMATION CERTIFIED BY THE PLAN'S TRUSTEE

Information certified by Principal includes investments held and their fair values as reported in the statements of net assets available for benefits; investment income (loss) as reported in the statements of changes in net assets available for benefits; and all investment related information included in the supplemental schedules. Management has obtained the certifications as of December 31, 2022 and 2021, and for the years ended December 31, 2022 and 2021, stating that the certified investment information is complete and accurate.

NOTE 5 - RELATED-PARTY TRANSACTIONS

The Plan's investments include pooled separate accounts which were invested with or managed by the trustee or a related entity to the trustee and, therefore, qualify as party-in-interest transactions. Fees to the trustee for investment management services were paid by the Plan and amounted to \$79,239 and \$57,993 for the years ended December 31, 2022 and 2021, respectively.

NOTE 6 - TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated February 16, 2017, that the Plan and related trust were designed in accordance with applicable sections of the Internal Revenue Code ("IRC"). The Plan has been amended since the opinion letter was issued. The plan administrator believes that the Plan is currently being operated in compliance with the applicable requirements of the IRC and, therefore, believes that the Plan is qualified, and the related trust is tax exempt.

Plan management must evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2022 and 2021, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is

subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

NOTE 7 - RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE 8 - ACCUMULATED PLAN BENEFITS

The Company utilizes an independent actuary to determine the actuarial present value of accumulated plan benefits. The actuarial present value of accumulated benefits is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the estimated date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2021 is as follows:

Vested benefits:	
Participants currently receiving benefits	\$ 10,127,686
Other participants	<u>3,473,112</u>
Non-vested benefits	<u>50,745</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 13,651,543</u>

The following factors affected changes in the actuarial present value of accumulated plan benefits from December 31, 2020 to December 31, 2021:

Actuarial present value of accumulated plan benefits as of December 31, 2020	\$ 14,967,054
Benefits accumulated and plan experience	
Increase for interest due to decrease in the discount period	600,828
Benefits paid	(1,677,302)
Change in assumptions	<u>(239,037)</u>
Net decrease	<u>(1,315,511)</u>
Actuarial present value of accumulated plan benefits as of December 31, 2021	<u>\$ 13,651,543</u>

Retirement Plan for Employees of Ohio Gas Company

The following is a summary of significant actuarial assumptions used in the calculation of the accumulated Plan benefit information:

Rates of Mortality	2021 - Pri-2012 Mortality Table, Principal 2016-10 MI scale (based on MP-2021 study) 2020 - Pri-2012 Mortality Table, Principal 2016-10 MI scale (based on MP-2020 study)
Discount Rate	2021 - 4.25% 2020 - 4.25%
Retirement Age	Based upon normal retirement age.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The computation of the actuarial present value of accumulated plan benefits was made as of January 1, 2021. Had the valuation been performed as of December 31, 2021, there would be no material difference. The change in the mortality projection scale resulted in a decrease in accumulated plan benefits for the year ended December 31, 2021 of \$239,037.

NOTE 9 - SUBSEQUENT EVENTS

The Plan evaluated its December 31, 2022 financial statements for subsequent events through October 16, 2023, the date the financial statements were available to be issued.

In January 2023, the Plan received the standard termination acknowledgement from the PBGC in response to the form 500 filing. In April 2023, the Plan received approvals from the Internal Revenue Service ("IRS") that the termination of the Plan does not affect its qualification for federal tax purposes, at which point the termination of the plan was determined to be imminent.

The Plan was settled through a combination of lump sum distributions to eligible Plan participants who elected such payments, and the purchase of a group annuity contract from Principal, for all remaining liabilities. Upon completion of the transaction, in June 2023, Principal irrevocably assumed from the Plan the obligation to pay the remaining retirement benefits described in the group annuity contract. The accrued benefits of participants, beneficiaries and annuitants are not affected by the termination of the Plan. As the Plan was in an overfunded status, the final assets remaining in the plan were transferred to the Plan Sponsor's 401(k) plan on July 20, 2023, the date of termination.

The Plan is not aware of any other subsequent events that would require recognition or disclosure in the financial statements, other than the matter disclosed above.

Schedule SB, Part V - Statement of Actuarial Assumptions/Methods
Retirement Plan for Employees of Ohio Gas Company
EIN 34-4320120 Plan No. 001

Assumptions prescribed by law

Mortality	<u>During benefit payment period</u> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.
	<u>Before benefit payment period</u> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

Assumptions selected by actuary

Inflation	2.25% increase per year.
	Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.
Asset return	4.50% for the current plan year.
	The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets, with an updated estimate of PBGC premiums. This is the best estimate available of upcoming year's expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in <u>Plan provisions</u> .
	This assumption is based on the results of recent experience analysis and anticipated future experience.
Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	80% married; husbands are 3 years older than wives.
	This assumption does not have material impact on the results of this report and has been selected based on our best estimate of active workforce.

Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 0.80. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 0.80 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.
Form of benefit	Participants are assumed to receive their benefits on the normal form at the assumed retirement age.
Retirement cost of living adjustment	2.25% per year Retirement Cost of Living Adjustment should be consistent with the inflation assumption, not to exceed 3.00% as defined by the plan.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
HCE benefit payment restrictions	A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by: - any retiree benefit index or floor - amounts for HCEs who were previously restricted - an amount for the retiring HCE The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the non-stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

Methods selected by plan sponsor

Asset method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.											
Segment rates	24-month average with no weighting to prior law basis. Use rates where August is the last month included in the average.											
PBGC premium basis	Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 01/01/2014 plan year and the method must be used for five years before a change can be made. <table><tr><td>Segment 1</td><td>Segment 2</td><td>Segment 3</td></tr><tr><td>years 0-5</td><td>years 5-20</td><td>years 20+</td></tr><tr><td>1.16%</td><td>2.72%</td><td>3.10%</td></tr></table>			Segment 1	Segment 2	Segment 3	years 0-5	years 5-20	years 20+	1.16%	2.72%	3.10%
Segment 1	Segment 2	Segment 3										
years 0-5	years 5-20	years 20+										
1.16%	2.72%	3.10%										

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date. The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)
With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on Pri-2012 Total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2017-10).

Base rates

Before benefit payment period

Employee amount-weighted, male and female

During benefit payment period

Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The Total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement (MI)

Principal 2017-10 MI scale: this scale is based on MP-2021 study and model issued by SOA with the exception of the following user-selected assumptions:

- 10-year convergence period on age and cohort
- Long-term rates (LTR) assumptions using sex-distinct and age-based rates developed from Social Security Trustees Reports.

See Mortality Documentation for rationale and additional information.

Interest rate used to value liabilities 4.25%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Schedule SB, Part V - Summary of Plan Provisions
Retirement Plan for Employees of Ohio Gas Company
EIN 34-4320120 Plan No. 001

Late retirement benefit

Age	No maximum age.
Form	Same as normal retirement benefit.
Amount	Employed Participants: Accrued benefit on late retirement date. Other Participants: The actuarial equivalent of the accrued benefit that would have been paid on normal retirement date.

Termination benefit

Vesting percentage	100% after five years of vesting service.
Form	Same as normal retirement benefit with income deferred until normal retirement date.
Amount	Accrued benefit on date of termination multiplied by the vesting percentage.

Death benefit (the greater of A. or B.)

A. Active participant death benefit (a non-vested benefit)

Eligibility	Qualified married participant
Form	Monthly annuity payable to spouse at participant's date of death
Amount	If death occurs, the amount paid to the surviving spouse is equal to the accrued benefit on date of death reduced by 0.5% for each year, if any, by which the spouse is more than five years younger than the participant but not below 40%

B. Qualified pre-retirement survivor annuity (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day

Definitions

Average compensation The monthly average of total pay received for the 5 consecutive years out of the 10 latest years before retirement date which gives the highest average.

Integration level The monthly average of the social security taxable wage base in effect under section 230 of the Social Security Act for each year in the 35 year period ending with the year the employee attains social security retirement age.

Optional forms of benefit payments The optional forms of benefit payments are:

Monthly annuity payable for life and 10 years certain and life
Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50, 66 2/3, 75 or 100
Social Security Adjustment Option

The optional form conversion basis is 2.5% interest and the 1951 Group Annuity Mortality Table for optional forms other than certain and life and lump sums. The 1951 Group annuity mortality table is set back 6 years for the plan participant and 1 year for the joint payee. The certain and life optional form conversion basis is 2.5% interest and the 83 GAM (50/50) mortality table. The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.
