Accrued Benefit (Unit Credit)

The funding target is equal to the sum of the individual accrued liabilities for all participants. The individual's accrued liability is the present value of the benefit accrued in prior plan years. The target normal cost is the present value of benefits accruing in the plan year. Experience gains and losses are included in the calculation of the funding target and are amortized as part of the shortfall amortization.

Actuarial Value of Assets

The Actuarial Value of Assets is a 24-month average determined in accordance with Notice 2009-22. Actuarial Value of Assets must fall within 90% to 110% of market value. The assumed rate of return for determining the actuarial value of assets is the lesser of 7.00% or the segment rate specified in Notice 2009-22.
