## Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

### Actuarial assumptions

Discount rate sponsor elections	
• Segment rates or full yield curve	Segment
• Look-back months	4
• First 5 years	4.75%
• Next 15 years	5.18%
• Over 20 years	5.92%
<b>Rationale:</b> Prescribed assumptions set by IRS and based on plan sponsor's PPA election.	
Mortality sponsor elections	
• Healthy participants	Section 430(h)(3) prescribed combined static annuitant and nonannuitant mortality tables. These tables are based on the RP-2014 mortality tables with improvements beyond 2006 removed with static mortality improvement based on the IRS methodology and projection scale MP-2020. <b>Rationale:</b> Prescribed assumption set by IRS and based on plan sponsor's PPA election.
Other economic assumptions	
• Salary increases	4.00% per year <b>Rationale:</b> Based upon average actual historical salary increases.
• Social Security taxable wage base increases	2.95% per year <b>Rationale:</b> The Social Security wage base increase assumption reflects 0.75% real wage growth above inflation
• Inflation	2.20% per year <b>Rationale:</b> The inflation assumption is based on the inflation assumption periodically published by Mercer Investment Consulting in their long-term Capital Market Outlook.
• Expected investment return	5.38% for 2020/2021 and 4.98% per year for 2021/2022, limited to third segment rate as required by the asset method. The third segment rate was 5.94% for 2020/2021 and 6.11% for 2021/2022. <b>Rationale:</b> The expected investment return is based on the median simulated investment return using market assumptions published in Mercer Investment Consulting's Capital Markets Outlook for the plan's current target asset mix, net of an adjustment for expenses assumed to be paid from plan assets.
• Expenses	\$35,000 added to current year normal cost <b>Rationale:</b> Based upon the amount paid from plan assets during the prior plan year

**Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**

<b>Demographic assumptions</b>		
• Withdrawal	None assumed <b>Rationale:</b> Based on historical participant behavior in which they retire directly from active status.	
• Disability incidence	None assumed <b>Rationale:</b> Based on historical participant behavior in which they retire directly from active status.	
• Retirement age	100% retire at age 67 <b>Rationale:</b> Based on a review of participant behavior undertaken in 2015.	
• Benefit commencement age for		
– Future vested deferred	67	
– Current vested deferred	67	
	<b>Rationale:</b> Based on a review of participant behavior undertaken in 2015.	
• Spouse assumptions	<b><u>Male participants</u></b>	<b><u>Female participants</u></b>
– Percentage married	83%	83%
– Spouse age difference	3 years younger	3 years older
	<b>Rationale:</b> Because the plan does not have enough credible experience to analyze spousal demographics, the assumptions regarding percent married/spouse age difference at benefit commencement are based on the actuary’s experience with many plans.	
• Form of payment	100% of future retirees are assumed to elect a Single Life Annuity. <b>Rationale:</b> Almost all of the current retirees elected a Single Life Annuity form of payment.	
• Unpredictable contingent event assumptions	Not applicable	

## *Schedule SB, Part V — Statement of Actuarial Assumptions/Methods*

### Actuarial methods for funding

#### Asset methods – Effective February 1, 2008

The asset valuation method is an annual average of the adjusted market value during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as required by IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

#### Participant methods – Effective February 1, 2008

We used the participant data supplied by the plan sponsor. We have reviewed the data and have no reason to doubt its substantial accuracy. Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts:** The plan does not have any insurance contracts.

#### Minimum funding methods – Effective February 1, 2008

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

## Schedule SB, Part V — Summary of Plan Provisions

### Benefits included or excluded

Unless noted below, all benefits provided by the plan, as restated and amended through February 1, 2014 and amended through Amendment #2, are included in this valuation:

- **Plan amendments excluded:** None
- **Late retirement increases:**
  - *Active participants:* The plan applies late retirement actuarial increases for participants who defer retirement beyond their normal retirement date.
  - *Deferred vested participants:* The plan applies late retirement actuarial increases for participants who defer retirement beyond their normal retirement date.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** Not applicable because the plan is collectively bargained.

### Plan provision specific to funding

#### Additional benefits included or excluded

- **IRC Section 436 benefit restrictions:** The target normal cost does not reflect any limitation on benefit accruals.
- **Scheduled benefit increases:** Scheduled **benefit** increases effective after the end of the current plan year are excluded from minimum funding requirements.

### Plan provision changes since prior valuation

- Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2021 to 2022.
- New \$215 benefit level effective July 1, 2022 is reflected for PPA purposes. All negotiated benefit increases were already reflected for ASC 715 disclosure.

***Schedule SB, line 24 — Change in Actuarial Assumptions***

- Interest discounts and mortality rates were updated from 2021 to 2022 in accordance with PPA.
- The expected investment return was updated from 5.38% to 4.98%.
- The expense assumption was updated from \$30,000 to \$35,000.
