Report of Independent Auditors

Woodbury University as Plan Administrator
Pension Plan for Employees of Woodbury University

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Pension Plan for Employees of Woodbury University, an employee benefit plan subject to the Employee Retirement Income Security Act of 1974 (ERISA), which comprise the statements of net assets available for benefits as of February 28, 2023 and 2022, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the net assets available for benefits of Pension Plan for Employees of Woodbury University as of February 28, 2023 and 2022, and the changes in its net assets available for benefits for the years then ended, in accordance with accounting principles generally accepted in the United States of America (GAAP).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Pension Plan for Employee of Woodbury University and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with GAAP, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Pension Plan for Employees of Woodbury University's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Management is also responsible for maintaining a current plan instrument, including all plan amendments, administering the plan, and determining that the plan's transactions that are presented and disclosed in the financial statements are in conformity with the plan's provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Pension Plan for Employees of Woodbury University's internal control. Accordingly, no such opinion is expressed.
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Pension Plan for Employees of Woodbury University's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplemental Schedules Required by ERISA

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of Schedule of Assets and Schedule of Reportable Transactions as of and for the year ended February 28, 2023, are presented for purposes of additional analysis and are not a required part of the financial statements but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS.

In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

In our opinion, the information in the accompanying schedules is fairly stated, in all material respects, in relation to the financial statements as a whole, and the form and content are presented in conformity with the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA.

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

Note 1 – Description of Plan

The following brief description of the Pension Plan for Employees of Woodbury University (the “Plan”) provides only general information. Participants should refer to the Plan Agreement for a more complete description of the Plan’s provisions.

General – The Plan is a noncontributory defined benefit pension plan covering substantially all employees of Woodbury University (the “Plan Sponsor”) and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Plan year end – The plan year is defined as the 12 consecutive months beginning on March 1 and ending the last day of the following February.

Pension benefits and vesting – Under the terms of the Plan Document, participants accrue benefits based on a percentage of annual compensation for each year of credited service as follows: for each year of credited service prior to March 1, 1965, those who became members on the effective date are entitled to a monthly benefit of 1.5% of the first \$400 of monthly earnings (determined in the first 12-month period ending March 1, 1965), plus 2.25% of such earnings in excess of \$400; for each year of credited service after February 28, 1965 and prior to March 1, 1989, a monthly benefit of 1.5% of the first \$400 of current monthly earnings, plus 2.25% of such earnings in excess of \$400; and for each year of credited service after February 28, 1989, a monthly benefit of 2.25% of current annual earnings. Participants are eligible for full monthly benefit payments upon reaching age 65 with a minimum of three years of vesting service. If employees terminate before rendering three years of service, the benefits vest as follows: 0% for less than one year of credited service; 33% for one year of credited service; 67% for two years of credited service; and 100% after two years of credited service. If employees terminate before rendering three years of service, they forfeit the unvested portion of accumulated plan benefits. The Plan does not permit early retirement. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity. Terminated vested participants or eligible beneficiaries may elect to receive the value of their accumulated benefits as a lump-sum distribution upon termination or they may elect to receive their benefits as a life annuity payable monthly from retirement.

Effective June 30, 2011, the Plan was amended to freeze participation and benefit accruals, but to allow participants to continue to accrue Credited Vesting Service, as defined by the Plan.

Death benefits – If an active employee dies at age 55 or older, a death benefit equal to the value of the employee’s accumulated pension benefits is paid to the employee’s beneficiary. If an employee dies prior to normal retirement, the spouse will receive death benefits equal to the amount the employee would have received if retired on the day before death under the normal retirement formula.

Note 2 – Summary of Significant Accounting Policies

Basis of accounting – The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), using the accrual basis of accounting.

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

Use of estimates – The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Investment valuation and income recognition – The investments are stated at fair value based on quoted market prices. Fair value is the price that would be received to sell an asset or paid to transfer a liability (the “exit price”) in an orderly transaction between market participants at the measurement date.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. The net appreciation (depreciation) in fair value of investments consists of both the realized gains or losses and unrealized appreciation and depreciation of those investments.

Payment of benefits – Benefit payments to participants are recorded upon distribution.

Expenses – Administrative expenses related to operating and maintaining the Plan are paid by the Plan Sponsor, and certain investment and transaction fees are paid by the Plan.

Subsequent events – Subsequent events are events or transactions that occur after the statement of net assets available for benefits date but before the financial statements are available to be issued. The Plan recognizes in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of net assets available for benefits, including the estimates inherent in the process of preparing the financial statements. The Plan’s financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the statement of net assets available for benefits but arose after the statement of net assets available for benefits date and before the financial statements are available to be issued.

The Plan has evaluated subsequent events through December 15, 2023, which is the date the financial statements were available to be issued.

Note 3 – Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions, which are attributable under the Plan’s provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees’ compensation. Benefits payable under all circumstances—retirement, death, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of the accumulated plan benefits is determined by an actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

The significant actuarial assumptions used in the valuation as of February 28, 2022, were (a) mortality based on Pri-2012 total dataset mortality table projected to future years with historical and assumed improvement rates using the Principal Mortality Improvement Scale MP-2021, (b) retirement age assumptions (the assumed average age was 65), and (c) interest rate used was 5.75%.

Assumptions used to allow lump sums:

- The form of benefit and basis has changed from 25% of married participants assumed to elect a 50% joint and life annuity while the remaining participants are assumed to elect a life annuity, to:
 - 50% of participants will elect a benefit paid in a lump sum based on the applicable mortality and the Plan's funding segment rates.
 - 12.5% of married participants are assumed to elect a 50% joint and life annuity.
 - The remaining participants are assumed to elect a life annuity.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The accumulated plan benefit information, as of February 28, 2022, is as follows:

Actuarial present value of accumulated benefits

Participants currently receiving payments	\$ 11,167,207
Other participants	<u>8,743,812</u>

--	-----------------------------

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

The changes in the accumulated plan benefits for the year ended February 28, 2022, were as follows:

Actuarial present value of accumulated plan benefits	
at beginning of year	<u>\$ 20,246,769</u>
Increase (decrease) during the year attributable to	
Plan experience	247,535
Increase for interest due to the decrease in discount period	1,077,546
Change in actuarial assumptions	(333,021)
Benefits paid	<u>(1,327,810)</u>
 Net decrease	 <u>(335,750)</u>
 Actuarial present value of accumulated plan benefits	
at end of year	<u><u>\$ 19,911,019</u></u>

Note 4 – Funding Policy

Employee contributions – Contributions by participants are not required or permitted by the Plan.

Employer contributions – The Plan Sponsor's funding policy has generally been to make sufficient contributions to maintain a well-funded position, but not less than the minimum required contribution or more than the maximum deductible contributions for the plan year, and also to make additional contributions under certain circumstances to achieve short-term objectives. The Plan has met the minimum funding requirements of the ERISA. Although it has not expressed any intention to do so, the Plan Sponsor has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

Note 5 – Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at February 28, 2023 and 2022.

Registered investment companies (mutual funds) – Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Pooled separate accounts – Units held in pooled separate accounts (PSAs) are valued using the net asset value practical expedient (NAV practical expedient) of the PSA as reported by the account managers. The NAV practical expedient is based on the fair value of the underlying assets owned by the PSA, minus its liabilities, and then divided by the number of units outstanding.

The following table discloses by level the fair value hierarchy of the Plan's investments:

Investment Assets at Fair Value as of February 28, 2023				
	Level 1	Level 2	Level 3	Total
Mutual funds	\$ 15,880,253	\$ -	\$ -	\$ 15,880,253

Investment measured at NAV (practical expedient)				<u>374,110</u>
				<u>\$ 19,292,772</u>

Note 6 – Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by the Plan and its related regulations, generally to provide the following benefits in the order indicated:

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

- a. To provide benefits to the extent guaranteed by the Pension Benefit Guaranty Corporation (PBGC), a U.S. government agency, for participants, spouses, or beneficiaries who have been receiving pension payments for at least three years as of the date of termination.
- b. To provide benefits to the extent guaranteed by the PBGC for participants who would have been receiving pension payment for at least three years as of the date of termination if they had elected to retire.
- c. To provide benefits to the extent guaranteed by the PBGC for participants, spouses of beneficiaries not included above who have benefits guaranteed under this Plan by the PBGC.
- d. To provide benefits to the extent vested and not provided for above for all participants who have met the vesting requirements.
- e. To provide all other accrued benefits under the Plan.

The Plan provides that if assets available for allocation are insufficient to satisfy in full the benefits of all individuals, the assets shall be allocated pro rata on the basis of the present value as of the termination date of their respective benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2022, that ceiling is \$6,205 per month. That ceiling applies to those annuitants who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan Sponsor and the level of benefits guaranteed by the PBGC.

Note 7 – Transactions with Parties-in-Interest

The Plan invests in a money market separate account managed by Principal Global Investors, an affiliate of Principal Trust Company. As Principal Trust Company is the Plan's trustee, the transactions qualify as party-in-interest transactions as defined by the ERISA.

All administrative expenses are paid by the Plan Sponsor, except for administration fees paid to Principal, which are paid by the Plan. Administrative fees are based on the dollar value of assets held by the trustee.

Pension Plan for Employees of Woodbury University

Notes to Financial Statements

Note 8 – Tax Status

The Internal Revenue Service has determined and informed the Plan Sponsor by a letter dated July 7, 2014, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, the plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

In accordance with guidance on accounting for uncertainty in income taxes, the plan administrator has evaluated the Plan's tax positions and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

Note 9 – Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Assumptions prescribed by law

Mortality	<u>During benefit payment period</u> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.
	<u>Before benefit payment period</u> IRS Prescribed Mortality - Optional Combined Table for Small Plans, male and female.

Assumptions selected by actuary

Inflation	2.40% increase per year. Our long-term inflation assumption considered the current economic environment, recent and historical data, and forecasts from Federal Reserve Bank FOMC, Congressional Budget Office, and Survey of Professional Forecasters. See Long-Term Capital Market Assumptions link.
Asset return	6.50% for the current plan year. The asset return is developed as a weighted average rate based on the target asset allocation of the plan and the long-term capital market assumptions. The calculated return is on an arithmetic mean basis. For details, see the Long-Term Capital Market Assumptions link.
Expected expense	The expected expense included in target normal cost is an estimate based on prior year expenses paid from plan assets. This is the best estimate available of upcoming year's expenses.
Retirement	Active and inactive participants are assumed to retire at normal retirement age as defined in <u>Plan provisions</u> . This assumption is based on the results of recent experience analysis and anticipated future experience.
Disability	None. This plan does not offer a subsidized disability benefit therefore the disability assumption is built into the withdrawal assumption.
Marriage	90% married; husbands are 3 years older than wives. This assumption is based on the results of recent experience analysis and anticipated future experience. This assumption does not have material impact on the results of this report.

Withdrawal	2003 Society of Actuaries Small Plan Age Table, multiplied by 1.50. We rely on a publicly published table due to the limited size of the plan. The SOA Small Plan Age Table is the most recent withdrawal experience table published by the Society of Actuaries. A multiplier of 1.50 is applied to this table to reflect the results of the most recent experience analysis and anticipated future experience.
Form of benefit and basis	50% of participants are assumed to receive benefits as a single lump sum payable immediately for retirement, death and withdrawal benefits. 12.5% of married participants are assumed to receive a benefit as a 50% joint and life annuity at the assumed retirement age. The remaining participants are assumed to receive a life annuity at the assumed retirement age. This has been updated to reflect the new provision allowing a lump sum payment option. We will monitor and make appropriate adjustments in the future. The single sum benefit is based on the applicable mortality and the plan's funding target interest rates, as prescribed.
Methods prescribed by law	
Liability measure	Funding target is the present value of the benefits accrued on the valuation date. Target normal cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.
Lump sum payments	Lump sum payments are valued using the plan's funding target interest rates as required, per IRS guidance. These rates are currently higher than the actual rates used to determine lump sum distributions. Therefore, plan liabilities do not currently recognize this additional cost and this may result in the plan not accumulating adequate assets. You may wish to consider additional contributions.
HCE benefit payment restrictions	A ratio of the plan assets and accrued liability is used to determine if restrictions apply. Assets and accrued liability are as of the valuation date and are reduced by: - any retiree benefit index or floor - amounts for HCEs who were previously restricted - an amount for the retiring HCE The estimated HCE ratio illustrated in this report is based on the market value of plan assets (excluding late deposits) and funding target as of the valuation date. The funding target uses the stabilized interest rates as defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods could be used.

Methods selected by plan sponsor

Asset method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the maximum allowable rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.		
Segment rates	24-month average with no weighting to prior law basis. Use rates where February is the last month included in the average.		
PBGC premium basis	Variable rate premiums are calculated using census, market value of assets and the one-month average of corporate bond rates in effect on the valuation date. You elected this Standard interest method for the 03/01/2014 plan year and the method must be used for five years before a change can be made.		
	Segment 1 years 0-5 1.88%	Segment 2 years 5-20 3.35%	Segment 3 years 20+ 3.70%

Methods elected by actuary

Retirees	Assets and liabilities for current and future retirees are included.
Vested benefits	A benefit is included in vested benefits if it meets the requirements under PBGC. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date. The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, pre-retirement death benefits in excess of the survivor annuity death benefit and post retirement death benefits for non-retired participants except as noted in the Plan provisions.

Assumptions and methods elected by actuary - plan accounting (ASC 960)

With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular funding target and target normal cost.

Mortality

Based on Pri-2012 total dataset base rate mortality table projected generationally using the using the Principal Mortality Improvement Scale (Principal 2017-10).

Base rates

Before benefit payment period

Employee amount-weighted, male and female

During benefit payment period

Retiree amount-weighted, male and female

The Society of Actuaries (SOA) is an actuarial organization that periodically reviews mortality data and publishes mortality tables and improvement scales. In October 2019, the SOA released the Pri-2012 Mortality Tables for private-sector retirement plans in the U.S. The Pri-2012 report contains different sets of mortality tables based on complete dataset or various subsets. The total dataset base rate table was selected based on information provided by the plan sponsor.

Pri-2012 section 12.4. provided three approaches for designated beneficiaries in the calculation of joint-and-survivor annuities. We believe "Approach 1" is reasonable for this plan.

Mortality improvement (MI)

Principal 2017-10 MI scale: this scale is based on MP-2021 study and model issued by SOA with the exception of the following user-selected assumptions:

- 10-year convergence period on age and cohort
- Long-term rates (LTR) assumptions using sex-distinct and age-based rates developed from Social Security Trustees Reports.

See Mortality Documentation for rationale and additional information.

Interest rate used to value liabilities

5.75%

The interest rate used to value ASC 960 liabilities is developed as long-term expected geometric return on plan assets. Arithmetic expected return is calculated as the weighted average of broad asset classes' arithmetic returns of the plan's target asset allocation, and then converted to the geometric under lognormal distribution assumption. For details, see Long-Term Capital Market Assumptions link.

Treatment of administrative expenses

No adjustments are made for administrative expenses, either through a reduction in the discount rate or by calculating a present value of future expenses.

Plan sponsors may change their administrative expense handling at any time. Our approach provides consistent handling of ASC 960 liabilities from year to year, whether expenses are paid with plan assets or directly by the employer.

Note - expenses paid with plan assets are required to be included in funding normal cost. As a result, the plan is reimbursed annually through required funding. Exception – contributions are not required due to assets sufficiently in excess of liabilities to fund both expenses and normal cost. In this case, administrative expenses are taken from the excess assets.

Basis for lump sums

Interest rate

Based on the three segment yield curve: 3.05%/3.45%/4.35%

The plan document defines the lump sum interest rate based on IRC §417(e) rates which closely tie to the high quality corporate bond yields. According to our most recent study, the long-term expected yields for short/intermediate/long corporate bonds are 3.05%/3.45%/4.35%. For details, see Corporate AA yield in Figure 2 of Long-Term Capital Market Assumptions link.

Mortality

We have selected the same mortality assumption for lump sum payments, but with a 50/50 blend of male and female total dataset base rates and mortality improvement scales. This reflects the IRS practice of defining lump sum mortality on a unisex basis.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Survivor annuity death benefit (a vested benefit)

Eligibility	Qualified married participant fully or partially vested in an accrued benefit. Participants who are terminated before death must be married for at least one year.
Form	Monthly annuity payable to spouse, deferred to participant's earliest retirement date if later than the date of death.
Amount	If death occurs, the amount paid to the surviving spouse is equal to the amount that would have been paid had the participant terminated employment on the date of death and survived to his/her earliest retirement age, retired with a qualified joint and 50% survivor annuity in effect, then died the next day.

Definitions

Accrual service	The sum of (a), (b), and (c) below: (a) Service prior to March 1, 1965 is the number of years of employment with the employer, excluding periods of employment prior to age 25. (b) Service after February 28, 1965 and prior to March 1, 1985 is the number of years during which an employee is credited with at least one hour of service during the plan year. (c) Service on and after March 1, 1985 is the number of years during which an employee is credited with at least 500 hours of service during the plan year. Accrual service is frozen effective June 30, 2011.
Vesting service	The sum of (a) and (b) below: (a) Service prior to March 1, 1985 is the number of years during which an employee is credited with at least one hour of service for each 12-month period, measured from his date of employment, in which he performs an hour of service. (b) Service on and after March 1, 1985 is the number of years during which an employee is credited with at least 500 hours of service during the plan year.

Optional forms of benefit payments

The optional forms of benefit payments are:

- Monthly annuity payable for life.
- Monthly annuity payable as a survivorship life annuity with survivorship percentages of 50 or 75
- Single sum payment equal to the present value of the retirement benefit

The optional form conversion basis is 6.0% interest and the RP 2000 Mortality Table (Female) for the participant and RP2000 Mortality Table (male) for the spouse for payments other than lump sums.

The optional form conversion basis uses the applicable interest rate and applicable mortality table as set forth in Code Section 417 for lump sum payments. The applicable interest rate uses the second calendar month preceding the first day of the stability period which is the plan year.

Schedule SB, Line 24 – Change in Actuarial Assumptions
Pension Plan for Employees of Woodbury University
EIN 95-2786163 Plan No. 001

Certain non-prescribed assumptions have been changed since last year. These assumptions were changed to better reflect the anticipated experience of your plan. See the attachment, Part V – Statement of Actuarial Assumptions/Methods, for the rationale for each assumption.

The assumed asset return for the current year has increased from 6.25% to 6.50%. This rate is used in the calculation of the actuarial value of plan assets.

The inflation assumption has increased from 2.25% to 2.40%.

Turnover has been updated from Towers Watson Term Rates to SOA 2003 Small Plan Table multiplied by 1.5
